University of Connecticut

FACT BOOK
1998-1999

OFFICE OF INSTITUTIONAL RESEARCH

University of Connecticut Fact Book

1998-99

In a continuing effort to record and provide pertinent information, the Office of Institutional Research (OIR) presents its 22nd edition of the Fact Book. Its purpose is to present vital statistics along with a historical perspective of the University. This is achieved by collecting information from many sources across the University community. We are grateful to the numerous offices that have assisted in its development and content.

The fact book contains data on the Storrs and Regional Campuses. On the University Fact Sheet (page A-1), you will find information including the University Health Center.

Some of these pages can be accessed via the World Wide Web through the University of Connecticut's Home page. The site address is <http://www.uconn.edu>. OIR's home page can be accessed directly at: <http://vm.uconn.edu/~wwwoir/>.

If you have any questions, comments or suggestions for future issues of the Fact Book, please contact Lauren Jorgensen at (860)486-4240 or by e-mail at oiradm3@uconnvm.uconn.edu.

Annual Report 1997-98*

Philip E. Austin, President

Mark A. Emmert, Chancellor for University Affairs

Leslie S. Cutler, Chancellor for Health Affairs

Established in 1881

Statutory Authority Chapter 185b, General Statutes

Route 195, Storrs, Conn. 06269

Number of full-time employees: 3,552 and 2,328(Health Center)

Recurring Operating Expenditures: 1997-98 \$ 445,226,369 + \$378,200,274 (Health Center)

Organizational Structure: Public State University

Mission

Founded in 1881, the University of Connecticut serves as the flagship for higher education and the sole doctoral degree granting public institution in the state. The University serves as a center for research, dedicated to excellence in higher education and fulfillment of its land grant status. It is committed to meeting the educational needs of its undergraduate, graduate, professional and continuing education students and providing the faculty with the means to develop their intellectual capacity through teaching, research and interaction with society. Through the integration of teaching, research and service, the University provides an outstanding educational experience for each student.

The University will serve the state and its citizens in a manner that enhances the social and economic well-being of its communities. It will do so by providing leadership in the pursuit and dissemination of knowledge to all its constituents, recognizing that the continual transmission of knowledge and lifelong learning are essential to Connecticut's future in a global context. It will seek to enhance the quality of life and the economic well-being of Connecticut.

Statutory Responsibilities

The General Statutes of the State of Connecticut and the Morrill Act of the US Congress have charged the University of Connecticut with the responsibility for the education of Connecticut youth in scientific and classical studies, agriculture and mechanic arts and liberal and practical education. General Statutes have given it "exclusive authority for programs leading to doctoral degrees and post-baccalaureate professional degrees." The University's constitutional mandate, "excellence in higher education," is accomplished in its traditional triad of academic responsibilities: teaching, research and service.

Public Service

Central to the University's mission as a land-grant institution, and critical to the establishment of a strong resource base for the enhancement of teaching and research, is the University's expansion of relationships with the major economic interests of the state. For example, the University began a new and innovative collaboration with Pfizer, Inc. which will construct a \$19 million state-of-the-art research facility on University land. The new Center for Excellence will create opportunities for University faculty and students to work with outstanding scientists on projects at the cutting edge of key research fields. The Pfizer collaboration offers a model for subsequent endeavors with other state firms and helps the University fulfill not only its function of academic excellence, but also its role as a major force in Connecticut's economic growth.

President Austin served on the management committee of the MetroHartford Millenium Project, a public-private partnership developing creative initiatives to generate an economic rebirth in the Hartford downtown area and the greater region. The University and the Traveler's Insurance Company established a collaborative program through which the University will offer several credit-bearing courses and non-degree programs at the Traveler's Education Center in downtown Hartford. The courses will be open to employees of all area firms and will focus primarily on areas of interest to people working in Hartford's insurance, financial services and managed care industries.

The University of Connecticut Health Center in Farmington, like its counterpart institutions across the country, has two closely related functions of service and education. As a service provider, primarily through the John Dempsey Hospital, the Health Center represents a major resource not only to the greater Hartford area but to the state as a whole. The hospital recently underwent a rigorous four-day inspection by the Joint Commission on Accreditation of Health Care Organizations, the entity charged with evaluating and accrediting hospitals in the United States. The University received a score of 97 out of a possible 100, which is one of the highest ratings accorded to any hospital in the nation and is a clear affirmation of the quality that prevails at the Health Center.

The Connecticut Distance Learning Association has formed a partnership with the University to use the regional campuses and the University's teleconferencing network to broadcast the Association's monthly meetings to members throughout the state. This partnership provides better service to Connecticut's distance learning professionals.

SNET, Connecticut's largest telecommunications company, and the University have entered into a formal, continuing partnership to create a special collection of SNET historical documents and photographs at the Thomas J. Dodd Research Center. The SNET collection, when all materials have been transferred, will weigh more than 17 tons and total approximately 2.2 million documents.

The University continues to provide special activities in geography for students across the state, for teacher workshops and for youth programs. A \$1 million endowment from the National Geography Education Fund and the Connecticut Resource Recovery Authority this past year supported the work to enhance geography education in Connecticut schools.

Improvements/Achievements 1997-98

The recent adoption of a new University symbol, the oak leaf, is an important development since it establishes, for the first time, a singular identity representing the entire institution. Rich in its association with state and University history, the oak conveys strength, endurance and vitality. It provides appropriate representation of the academic excellence at the University. The adoption of this new identity coincides with the transformation now taking place at the University - a transformation that includes UCONN 2000, the Storrs Campus Master Plan, creation of key centers for excellence, and implementation of important collaborations with the Connecticut business community.

Following more than a year of consultation with students, faculty, staff and the community, the University unveiled a Master Plan for the Storrs Campus. The plan creates a new central pedestrian mall, as well as series of "neighborhoods" or quads by using new buildings in concert with existing buildings to square off grassy landscaped areas complete with pathways, lighting and seating to create opportunities for interaction among students, faculty and staff.

Many continuing and new construction projects are the result of the General Assembly's Public Act 95-230, the law that has come to be known as *UCONN 2000*. The \$1 billion program to rebuild, renew, and enhance the University infrastructure over a ten-year period includes such current capital projects as: a new agricultural biotechnology facility; a new chemistry building; maintenance and expansion of the Gant Science Center; improvement in equipment, library collections, and telecommunications; a new biology and physics building in the Technology Quadrant; underground steam and water upgrade, deferred maintenance and renovations, development of an Undergraduate Education Center; through renovations to the Wilbur Cross building; the Litchfield Agricultural Center; and expansion of the Marine Science and Technology Center at the Avery Point Campus.

The new downtown campus of the University of Connecticut at Stamford has given the University an imposing presence in the southwestern part of the state. The new campus builds on a strong foundation of programs and personnel and is directed toward strengthening MBA, Executive MBA and the Connecticut Information Technology Institute (CITI) programs.

With the financial assistance of Connecticut innovations Inc., the state's technology development corporation, the University began preparations for adding a \$2 million research vessel to the Marine Science and Technology Center. The vessel will play a major role in enabling the Avery Point Campus, the state's only higher education institution directly on Long Island Sound, to provide a unique marine-oriented educational experience.

In Fall 1997, 21,753 students were enrolled in degree credit programs in the 13 Schools and Colleges at the Storrs Campus, the regional campuses (Avery Point, Hartford, Stamford, Torrington and Waterbury), the Schools of Law and Social Work in Hartford, and the Schools of Medicine, Dental Medicine, and graduate programs at the Health Center in Farmington. In 1997-98 the University conferred a total of 4,571 bachelor's, master's, doctoral, law, medicine and dental medicine degrees. George Bush, the 41st president of the United States, was the Commencement speaker at the University's 115th Commencement ceremony.

In addition to the achievements indicated in the Strategic Planning section of this report, the following are illustrative of recent accomplishments of the University's programs:

US News and World Report in August reported the University was the top public university in New England and one of the best twenty public universities in the nation.

UConn was also ranked one of the "most wired" colleges in the nation in a survey by *Yahoo: Internet Life*.

Graduates in the Ph.D. program in clinical psychology ranked 8th out of 183 clinical programs at universities across the country in scores on a national test for those pursuing careers in the field.

A program designed to introduce accounting majors to real-life situations and practicing professionals has won a prestigious national award from the American Institute of Certified Public Accountants and the American Accounting Association.

The University was chosen over 40 other applicants for a \$35 million contract by the US Office of Naval Research. The contract funds the development of the science and technology of nanostructure coatings for ship repairs.

For the third consecutive year, the University's full-time MBA program has been selected by the *Princeton Review* as one of the best in the country. The University was in the top 8 percent of all the business schools reviewed.

Residency placements of the Health Center's medical students were significantly higher than the national average for Schools of Medicine: 97% were matched to a residency program and 85% were matched to one of their first three choices.

In the 1996 graduating class of undergraduates, 96% were either employed or in graduate/professional school full-time by the fall after graduation. Among those employed full-time, 71% were working in Connecticut and 79% considered the University baccalaureate helpful in applying for jobs.

The University was ranked 9th out of 25 as a "leading source of influence in the field of family therapy" in a study published by the American Association for Marriage and Family Therapy.

The speech/language pathology program in communication sciences ranked 21st out of 224 in the latest ranking of the nation's best graduate school programs by *US News and World Report*.

Each year many individuals in the University community receive national recognition for their scholarly and research accomplishments. Illustrative recent examples follow:

John L. Allen, geography professor for more than 30 years and a leading authority on the exploration of the American West, was a consultant to a PBS documentary on the Lewis and Clarke Expedition. Anthony T. DiBenedetto, emeritus professor of chemical engineering, is the most recent recipient of the Plueddeman Award for Excellence in Composites Interface Research. Presented once every two years, the Plueddeman is widely acknowledged as the most prestigious award in the area of composites and recognizes a lifetime of outstanding achievement.

Richard D. Brown, professor of history, was awarded a John Simon Guggenheim Memorial Foundation Fellowship for 1998-99. He is one of only 168 artists, scholars and scientists chosen from 3,000 applicants for Guggenheim fellowship awards totaling \$5.4 million. Ross Buck, professor of communication sciences, received national television coverage of his research on gender differences in communicating emotions.

Janine Caira, an associate professor of ecology and evolutionary biology, has been named the most outstanding North American parasitologist for 1998 by the American Society of Parasitologists. For the third consecutive year a University student has received the prestigious Barry M. Goldwater Scholarship Award. The national award, presented to Sarah Donnelly, encourages outstanding students to pursue careers in the fields of mathematics, engineering and the natural sciences.

Samuel Huang, professor of chemistry and materials science, has created an artificial tendon out of biodegradable materials that enables a new tendon to be developed within a shortened recovery period. Bahram Javidi, professor of electrical and systems engineering, with recent research on laser security systems, was elected a fellow of the Institute of Electrical and Electronics Engineers (IEEE). The award, granted to less than one in 1,000 members of the IEEE, is considered one of the most prestigious in the field of electrical engineering.

Wally Lamb, associate professor of English and author of the best seller *She's Come Undone*, published *I Know This Much is True* with a first edition hard cover print run of 250,000 copies, an astounding number in publishing. Julia Sherman, a University alumna, was the recipient of the 1997 Presidential Award for excellence in Science and Mathematics. The award, established in 1983 by the White House and presented by the National Science Foundation, recognizes teachers who are leaders in improving mathematics and science education.

William Stwalley, professor and head of the physics department, received the Optical Society of America's William F. Meggers Award for his outstanding work in spectroscopy. Scott E. Sullivan, a third-year student at the University's Law School, was selected as the National Outstanding Law Student of the Year by *Who's Who: America Law Students*, based on his legal and community achievements.

Eleven intercollegiate student athletes were named All-Americans and three coaches earned Coach of the Year honors. For the third consecutive year the women's polo team won the National Intercollegiate Polo Championships.

Reducing Waste

Savings from faculty and staff retirements were reallocated to schools and colleges on a new budgeting model that takes into account the priorities identified in the strategic plan and the performance of each unit. The reallocation process has focused resources on the goals of the strategic plan, in areas of undergraduate education, professional education, research and scholarship, partnership with government, industry and the citizens of the state, and diversity.

Aimed at strengthening relationships with the state's business community, the University conducted an assessment of its administrative functions with the assistance of Coopers and Lybrand consultants. The purpose of the study was to ensure that the functions provided at the University are as effective and efficient as they can be, in support of academic programs and student life. The study evolved out of discussions between President Austin and several key business leaders. It was funded by half a dozen Connecticut businesses - Aetna, Fleet Bank, General Electric, Travelers, United Technologies, and Xerox - who have longstanding ties to the University and employ a large number of its graduates. The study focused on the effectiveness of nine administrative areas: financial management, purchasing, payroll, computers and telecommunications, operations and plant management, auxiliary

and business services, public safety, human resources and benefits administration, and sponsored research administration. The review compared the University with other Research I, public land grant universities and included benchmarking for 15 institution-wide measures, including total operating costs per student, endowment, research funding, enrollment trends, retention, and faculty, staff and administrative costs.

An Office of Sponsored Programs was created to combine three administrative units (grants and contracts, contracts and corporations, and administration and regulations) into one organization and physical location. The consolidation is directed toward better access to these services for members of the University community and increased efficiency in the components of sponsored activities.

The Academic Information Technology Planning Committee completed an assessment of the University's current technology. The committee recommended ways for the University to become a leader in the use and development of information technology and for information technology to be integrated into daily life, enhance productivity, promote and create new opportunities for learning, be actively explored, and be continually renewed.

Strategic Planning and Initiatives

The Strategic Plan for the Storrs and Regional Campuses of the University, adopted by the Board of Trustees in 1995, has provided the framework for planning and implementing many strategic initiatives. Initiatives are derived from eight general strategic goals: (1) provide a challenging and supportive learning environment that fosters achievement and promotes excellence in research, scholarship and artistic creativity; (2) recruit and retain outstanding students, faculty and staff; (3) create a physical environment that reflects the University's expectation of excellence and encourages interaction among a diverse population; (4) enhance a sense of community; (5) allocate and develop resources on the basis of mission, value and performance; (6) streamline administrative functions; (7) promote the University's role in fulfilling the needs of the state, its citizens, and its economic institutions; and (8) foster a sense of partnership with the state.

Specific strategic initiatives in 1997-98 addressed the eight goals. Undergraduate education (goals 1,2,3 and 4) was strengthened by: improvement in the quality of core curriculum offerings; creation of an Academic Center for Exploratory Students (ACES) to provide academic counseling for students who are undecided about or in transition between majors; expansion of the First Year Experience Program for freshmen; increases in the Honors Program; support for instructional excellence through the Institute for Teaching and Learning; doubling of student participation in the peer-tutoring program in residence halls; and support for student volunteering for community service through the Center for Community Outreach.

Student access (goals 2,3 and 4) was expanded by: the creation of President's, Chancellor's and Dean's Scholarships to increase full scholarship opportunities for Connecticut students; enhancement of undergraduate recruitment materials to provide better information to prospective students, their families, and high school counselors; pilot testing of the acceptance of bank credit cards for the payment of tuition, room, board and fees; increased funding for multicultural affairs; seed money for multicultural studies institutes to work collaboratively with academic departments; a multi-year agreement with the University of Puerto Rico to expand collaborative activities and cultural exchanges with their students and faculty; permanent funding for the Rainbow Center;

establishment of outreach activities in middle and high schools to increase the diversity of individuals entering the health professions; and better accommodations and services for students with physical and learning disabilities.

Economic development and business partnerships (goals 7 and 8) were increased with: the Critical Technology Program which focuses on Biomedical/Biotechnology, Information Technology and Photonics research leading to commercialization; the Connecticut Information Technology Institute at the Stamford Campus with services for the corporate community and planned academic programs in graduate computer science and undergraduate business; the downtown relocation of the Stamford Campus with three times the space of the former location and an enhanced range of programs and courses; and the recruitment of aquaculture companies for public-private partnerships with marine science programs at the Avery Point Campus. The University's efforts to increase private support have resulted in significant growth in the total endowed assets which have grown from \$65 million in 1995 to \$118 million as of March 31, 1998. The \$20 million in state dollar match to private gifts as provided for in UCONN 2000, is fully committed.

Professional Schools (goals 1 and 2) were enhanced with the implementation of a Doctor of Pharmacy degree and planned additions of Business Administration programs in graduate accounting, undergraduate management information systems and Stamford Campus undergraduate business.

Technology (goals 1,4,5,6) improvements included: continued leadership in the use of instructional technology with renovations to create an additional 10 high tech classrooms; assessment and conversion of centrally supported and operating units' computers and computer programs to insure compliance with year 2000 requirements; and hiring and retention strategies to attract and keep skilled information technology professionals. The University also began planning for a new student information system and a new library information system.

Service, safety and efficiency (goals 2,5,6 and 7) were advanced by: planned physical enhancements and managerial improvements in research animal care and use; restructuring of the parking and transportation system, including a 45% increase in the shuttle bus operation; increased support of environmental health and safety programs; and increased emphasis on assessment of academic programs and service units to inform institutional planning. Improvements in the personnel information system, staff development, and employee assistance programs also were initiated.

A strategic communication program is being implemented to help the University attract high-achieving students and first-class faculty and staff, and compete more effectively for state dollars, federal grants and private resources. The program is reorienting the public relations/communications functions by establishing a marketing and strategic communications approach for the University.

The University of Connecticut Health Center is in the process of formulating a Strategic Plan for 1999 to 2004. Recent strategic initiatives, derived from the Center's Strategic Plan of 1993 to 1998, have included: creation of a new curriculum with innovative teaching approaches; focus on selected research areas in molecular biology and developmental genetics, biostatistics and epidemiology, structural biology and imaging sciences, and biomaterials; focus on clinical programs aligned with areas of scientific emphasis; and construction of a clinical research bridge. The Health Center also has been involved in: the building of a clinical system to coordinate inpatient and outpatient care; inclusion of faculty in the governance of the clinical system; identification of and service to new markets that

are value added, including Correctional Managed Health Care; partnerships in a state-wide integrated health care delivery network; reconnection with the larger community; development of programs in outcomes, health services, and health policy research; and active involvement in economic development-technology transfer, including the formation of a Center for Science and Technology Commercialization.

Diversity Enhancement

The University engages in a variety of activities and efforts to promote and support a diverse and pluralistic environment for students and employees, including: Asian Awareness Month, Black History Month, Latino Awareness Month, Women's History Month, Women in the Arts Program, Multicultural Awareness Week, lecture series sponsored by ethnic studies institutes, and annual awards to faculty and staff by the President for promoting diversity and multiculturalism. Several centers and academic programs promote an understanding of, and respect for, diversity, multiculturalism, and equity: the Institute for African-American Studies, the H. Fred Simons African-American Cultural Center, the Asian American Studies Institute, the Asian American Cultural Center, the Institute for Puerto Rican and Latino Studies, the Puerto Rican/Latin American Cultural Center, the Women's Studies Program, the Women's Center, the Center for students with Disabilities, and the Rainbow Center. The University has maintained a high ranking among State agencies in annual expenditures and total expenditures to women and minority-owned businesses and has continued to enhanced diversity in curriculum development and academic programs.

A partnership was created with the University of Puerto Rico to broaden the relationships UConn's Health Center, Schools of Social Work, Law, Pharmacy and Education, and Department of History have developed in recent years. The agreement gives faculty from the UPR, the largest Hispanic institution in the United States, a base from which they can conduct research projects, important to their constituents in Connecticut and the Northeastern United States. It also increases the opportunities for cultural exchanges between the two institutions.

Minority student enrollment at all levels and campus locations, including the professional schools, was 14.0%, with full-time undergraduate enrollment at 15.5% and full-time graduate enrollment at 11.7%. Over 94 countries were represented among the 1,071 undergraduate and graduate international students. The 22nd annual Day of Pride Scholarship Awards Banquet again honored a very talented and diverse class of high school seniors in the state, with the top 15 students offered early admission and full four-year scholarships. The full-time work force of 3,455 (as reported in the University's Affirmative Action Plan) included 14.3% minority faculty and staff. With these and many other programs and initiatives, the University continues to promote and enhance its diversity.

UNIVERSITY OF CONNECTICUT
1998-99 BOARD OF TRUSTEES

James F. Abromaitis
Louise M. Bailey (secretary)
Alyssa D. Benedict (student)
William R. Berkely
Louise S. Berry
Michael H. Cicchetti
Brian J. Collins (student)
John R. Downey
Shirley Ferris (ex officio)
Linda P. Gatling

Roger A. Gelfenbien (chairman)
Lenworth M. Jacobs, Jr.
Claire R. Leonardi

Strategic Plan for the The University of Connecticut...

The Vision...

The University of Connecticut will be perceived and acknowledged as the outstanding public university in the nation— a world class university. It will be a community of scholars and a center for learning where individuals can develop their intellectual capabilities throughout their lives in an environment that promotes academic achievement and research excellence. Each individual's responsibility to one's self and obligation to society will be nurtured. It will be a diverse community where the highest moral and ethical values will prevail with a dual purpose, an inward focus on learning and an outward focus on service. It will be the embodiment of the land grant, sea grant, public university dedicated to excellence. It will provide outstanding educational programs having a global perspective with a foundation based on knowledge, compassion and understanding.

The Mission...

Founded in 1881, the University of Connecticut serves as the flagship for higher education and the sole doctoral degree granting public institution in the state. The University serves as a center for research, dedicated to excellence in higher education and fulfillment of its land grant status. We are committed to meeting the educational needs of our undergraduate, graduate, professional and continuing education students and providing our faculty with the means to develop their intellectual capacity through teaching, research and interaction with society. Through the integration of teaching, research and service, we shall provide an outstanding educational experience for each student.

The University of Connecticut aspires to be the outstanding public university in the nation; a center for learning providing excellence in both teaching and research. We will be a center for intellectual pursuits offering the citizens of Connecticut, the nation, and the world the highest quality educational services. The research and creative endeavors of our faculty will provide the foundation upon which we build a challenging intellectual environment for all students. We will examine all we do with a global perspective in recognition of the exponential increase of knowledge in a rapidly changing world.

The University will focus its efforts on ensuring that the student experience fosters the transmission of knowledge and inspires intellectual curiosity in each student. The university experience will be oriented to ensure a positive, productive and responsible student life. We will create an atmosphere of trust and mutual respect enabling each community participant to benefit from the University's resources. We shall recognize our ever-changing leadership role as a flagship university to provide and facilitate educational services for all those seeking to expand their intellectual horizons.

The University will serve the state and its citizens in a manner that enhances the social and economic well-being of its communities. It will do so by providing leadership in the pursuit and dissemination of knowledge to all its constituents, recognizing that the continual transmission of knowledge and lifelong learning are essential to Connecticut's future in a global context. It will seek to enhance the quality of life and the economic well-being of Connecticut.

The Goals...

- ♦ Provide a challenging and supportive learning environment that fosters achievement and intellectual interaction among undergraduates, graduate students and faculty members and promotes excellence in research, scholarship and artistic creativity
- ♦ Recruit and retain outstanding students, faculty and staff.
- ♦ Create a physical environment that reflects our expectation of excellence and encourages interaction among a diverse population.
- ♦ Enhance our sense of community by increasing and valuing interaction while developing a strong sense of pride and ownership.
- ♦ Allocate and develop resources on the basis of mission values and performance. Hold the community of students, faculty and staff accountable for the success of the University.
- ♦ Streamline administrative functions.
- ♦ Promote the University's role in fulfilling the needs of the state, its citizens and its economic institutions.
- ♦ Foster a sense of partnership with the state.

University of Connecticut

The University of Connecticut is undergoing a remarkable transformation thanks to UCONN 2000, a ten year, \$1 billion, state-financed program to renew, rebuild, and enhance the University. The funding for the entire program has already been committed by the state legislature, which passed landmark legislation authorizing the program in June 1995. Currently in its fourth year, UCONN 2000 has already given rise to more than \$475 million in new construction projects. In addition, a new campus-wide Master Plan is creating a pedestrian-oriented center campus, plotting future building sites and creating a system of pathways and neighborhoods (quads). New facilities either completed or nearing completion include:

- New South Campus residence halls. New living complex for about 700 students. Four buildings, including conference center/dining facility, computer room, fitness area, study carrels, Honors hall for high achieving students, and faculty residences promoting greater student/faculty interaction. Opened in August 1998;
- New chemistry building, featuring 200,000-square-feet of laboratory, classroom and office space. Completed November 1998;
- New building/location for regional campus in Stamford. State-of-the-art complex in downtown Stamford, CT. Houses a number of undergraduate and graduate programs. Key center is the Connecticut Information Technology Institute (CITI), designed to increase the number of information technology professionals in Connecticut while also offering training to existing workers and seminars and workshops for regional businesses. Completed January 1998;
- New Law Library, considered the best in New England. Completed in summer 1996;
- Renovation of the Homer Babbidge Library, ranked among top 50 research libraries in the nation. Extensive interior and exterior renovations and technological upgrading. Completed in August 1998;
- Renovation of nearly 50 academic areas, which have been upgraded to "smart" classrooms, with full audio, video, and technological capabilities. Ten classrooms are upgraded each year;
- New parking garage for more than 1,000 hourly, daily and monthly customers. Opened January 1998;
- Renovation of the Student Recreation Facility, including new basketball, racquetball and squash courts, NCAA approved indoor track, swimming pool, several floors of weight rooms and aerobic workout facilities, and office space. Opened September 1997;
- Renovations of the Towers residence hall complex. New roofs, windows, and extensive exterior renovations. Completed July 1997;
- New ice hockey/skating rink, complete with locker rooms, warming area, coaching offices and seating for 2,000 spectators. Completed October 1998.
- A large pedestrian mall in the heart of the campus has now been created. At the center of the mall is an open forum located in front of the newly renovated Homer Babbidge library Completed January 1999.

Major new building and renovation projects entering design and/or construction phase include:

- New School of Business Administration building. An 99,000-square-foot facility for teaching and research, including technologically advanced modern teaching media, case rooms and skill labs. Construction to begin Spring 1999.
- New agricultural biotechnology building, an 46,000-square-foot laboratory and greenhouse, with seminar rooms, offices, lab animal quarters, computer lab and reference library. Also, new space will be created for transgenic animal facility, plant biotechnology lab and proposed transgenic plant facility. Currently under construction;
- Marine sciences and technology center (Avery Point regional campus), with 145,000-square-feet of classroom and research space. Currently under construction;
- New 111,000 -square foot biological sciences/physics building to house ecology and evolutionary biology, electron microscopy and biotechnology laboratories, offices and other support space, plus a 22,000-square-foot physics addition for accelerator and laser technology research. Currently under construction;
- Conversion of a 20,000-square-foot building into a new Center for Undergraduate Education. Currently in design;
- Renovation/addition to Fine arts/music facility including new band/orchestra building, new music library and new studio/classroom building. Currently under construction;
- A major new collaborative project with pharmaceutical giant Pfizer Inc., will result in a new \$29 million Center for Excellence in Animal Vaccine Research, to be built on UConn's main campus in Storrs. Currently in design;
- Total renovation of the Wilbur Cross building, an existing landmark structure, to create a comprehensive student services center: bursar, registrar, financial aid, career services, and more. Currently in design.

New programming has been added in a wide range of disciplines including:

- New five-year accounting program (master's degree) in the School of Business Administration has been approved; will begin in September 1998, to meet new accounting society requirements for 150-credit hours;
- Connecticut Information Technology Institute at UConn-Stamford campus, to meet state business community needs for information technology graduates;
- Several courses in entrepreneurship added to curriculum of Family Business Program;
- PharmD program, a four-year professional doctoral degree in pharmacy, analogous to the Doctor of Medicine or Doctor of Dental Medicine degrees.
- New coastal studies major to be offered at UConn-Avery Point campus;
- New four-year degree programs being instituted at all regional campuses;
- Master's degree program created in physical therapy
- New degree programs in material science and computer engineering

Based on a wide ranging Strategic Plan that is currently being implemented, UConn's academic mission has evolved in the following ways:

- Increased focus on student-centered learning;
- Pioneered the use of undergraduate students as mentors for key courses;
- Increased the use of technology-assisted learning, including course Web pages, e-mail interaction between students and faculty, and posting electronic course reserve lists. (Yahoo Internet Life magazine has rated UConn the fifth most wired public university in the nation and 17th overall);
- Decentralized budget process allowing departments to direct funding for new hires, programming or equipment. Institutional priorities that receive enhanced funding include UConn's professional schools — business, pharmacy and law — the undergraduate experience, the Connecticut Information Technology Institute (CITI) and management information systems, the Honors Scholar Program, undergraduate research opportunities, enhanced advising and orientation for students, and the regional campuses;
- Implemented "The First Year Experience", a program offering seminar courses in learning and community life skills and, for selected students, research experience. The programs prepare students for the rigors of higher education and increase student chances for academic success;
- External program review of every department and school launched in spring 1997, will assess performance of and recommend enhancements to more than seven academic entities each semester, with all sectors of University expected to be completed by spring 2002, when cycle begins anew;
- Externally funded (state business partnerships) review of all non-academic areas, by higher education division of Coopers & Lybrand, begun in December 1997. Goal is to discover potential efficiencies to improve performance of university administration and support academic and student services.

Special programs offered for freshmen include:

- Three theme-related, one-credit courses: a faculty/student seminar; a university learning skills course; and a community skills seminar. A variety of freshman specific programming also is offered in the residence halls, and a Hewlett Grant will help involve more freshmen in research. First Year Experience program has a participation rate of more than 25 percent of all freshmen. Freshmen also must begin completing work toward general education requirements, and begin considering pre-requisites for majors.
- Academic Center for Exploratory Students provides advising and counseling services for freshman who have yet to choose a major.
- An expanded merit-based scholarship program.

Students from all schools, professional as well as arts and sciences, are eligible for UConn's honors scholar program.

- Enrollment is about eight percent of the undergraduate population. Program is ranked nationally, in Sullivan & Randolph's Ivy League Programs at State School Prices, which named UConn Honors Program one of two best in northeast (New England, New York and New Jersey). It is also rated highly in Peterson's and other publications. Opportunities are plentiful for lower-division students and we maintain a high completion rate for honors theses. The University Scholar Program encourages creative, interdisciplinary academic programs. The Honors Program is rigorous: approximately 25 percent of a student's course load will involve Honors courses; about 20 percent of senior Honors theses are published in academic journals. Extracurricular features include Honors residence hall, student-run literary magazine, and funding for seniors' research.

About 10 percent of undergraduates participate in Study Abroad programs:

- Students travel to more than 30 countries;
- Students receive grades overseas — we match their majors. Programs exist for engineering, business, ESLE, public health administration, area studies (ie: Latin American and European and Slavic Studies), ecology and evolutionary biology, marine biology, anthropology, agriculture, and computer sciences.
- The Eurotech program places engineering students with interests/studies in particular languages in overseas jobs. Currently, about 40 students are enrolled, the largest number of whom are working in Germany.

Many opportunities exist for undergraduate research:

- Ten to 15 percent of the undergraduate population is involved in hands-on research, including Honors program students (all majors/fields), engineering students, and business and pharmacy students, each of whom have planned/required research components.

Several other programs bring UConn special pride, including:

- Manufacturing Engineering and Management (MEM), interdisciplinary program in business and engineering which offers students dual degree in business and engineering;
- Nutmeg Scholars Program. A full ride (tuition, fees, room and board, books) for the very best students in Connecticut. Scholarship also provides small stipend during academic year and includes summer job, preferably in industry student is preparing to enter;

- Several excellent support programs, including University Program for the Learning Disabled and the Center for Academic Programs, a summer institute to prepare at risk students for challenges of University life, academic and social;
- Multi-culturalism and diversity efforts through cultural centers and institutes that emphasize the academic side as much as — or more than — the social side. All the centers — the H. Fred Simons African American Cultural Center, the Asian American Cultural Center, and the Latin American and Puerto Rican Cultural Center — have ties to academic study areas: the African American Studies Institute, the Institute for Asian American Studies, and the Institute for Puerto Rican and Latino Studies. All the institutes are directed by tenured faculty with joint appointments to the institute and their academic specialty. The cultural centers also offer students of diverse backgrounds a comfortable haven, and offer the University community opportunities to share a variety of cultural and educational events;
- A continuing diversity initiative that, this year, brought more than 70 new faculty to campus, more than 35 percent of whom boast culturally and ethnically diverse backgrounds.

¹ The University of Connecticut participates in a regional program controlled by the New England Board of Higher Education. This program, known as the New England Regional Student Program, permits qualified residents of the New England states to study with reduced tuition in certain programs at any of the state universities, the Lowell Technological Institute, and the public two-year colleges and technical institutes.

i) Currently the cost of Board at UConn includes three meals a day seven days a week. In the past it has only included meals for Monday to Friday. In these cases the five day Board price has been corrected to seven days by multiplying by 7/5.

ii) The length of time Board has been provided to students has fluctuated between 30 and 36 weeks. Currently it is 33 weeks so all Board costs have been adjusted to that value.

iii) No one time fees, such as an application fee, were included in cost totals (Uniform fees were included)

iv) When a range of values were given for Room or Board a mid value was used.

¹ The conversion to 1999 dollars was done using Conversion Factors derived from the Consumer Price Index and the Historical Statistics of the United States. (see: www.orst.edu/dept/pol_sci/sahr)

² These costs are for the students participating in the New England Regional Students Program.

The University of Connecticut

Report on the Alumni Survey¹ - 1998 Graduating Class

Every year since 1979 the Office of Institutional Research has surveyed recent graduates. This survey is one of the few outcome measures the University of Connecticut has for our educational process. While the questionnaire focuses primarily on the academic experience of graduates, it also allows them to report their current activities. During the past twenty years, the survey results have yielded valuable information pertinent to both the graduates' experience at the University and their post-graduate activities.

This year we added 18 questions concerning the students' experience with computers and information technology services on campus. These questions allow us to evaluate how students feel about the use of information technology both inside and outside of the classroom. The results for these questions are summarized in a separate report, available at web site <http://vm.uconn.edu/~wwwoir/alumsuvy.html>.

The present report is an overview of the 1998 responses in the context of the previous 20 years. It is also available at web site <http://vm.uconn.edu/~wwwoir/alumni98.html>. Separate reports will also be generated for each school and for larger departments.

1. Number of Respondents and Response Rates

In Fall 1998, the 2,638 graduates who received a bachelor's degree from June 1997 through May of 1998 were sent a questionnaire concerning their academic experience at the University of Connecticut and their post-graduate activities. A follow-up letter was sent to those who did not respond within two months of the initial survey mailing.

Completed questionnaires were returned by 1,021 graduates, for a total response rate of 39%. Since the response rate has been in the range of 40% to 45% over the past several years, the 1998 response rate is relatively low. The addition of 18 questions to the survey may have made the questionnaire too lengthy for some graduates to complete.

The majority of respondents to the survey are female (57%), as were the majority of all graduates in the 1998 class (52%). Thus, female graduates responded at a higher rate (43%) than males (35%), as has been the case in all previous alumni surveys.

In terms of age distribution, the respondents did not differ from the graduating class, as measured in the broad categories used in the survey. Table 1.1 shows the distribution of respondents by age group. Three fourths of respondents are between 21 and 24 years old.

¹ This report was prepared by Sachiko Miyahara, a graduate assistant in the Office of Institutional Research.

Table 1.1: Distribution of Respondents by Age Group.

<u>Age Group [years]</u>	<u>Percentage of Respondents</u>
18 to 20	<1%
21 to 24	76%
25 to 34	16%
36 to 49	7%
Over 50	<1%
Not specified	<1%

In terms of ethnic background, the majority of respondents to the survey are white (88%), as were the majority of all graduates of the 1998 class (87%). The percentage of respondents belonging to minority groups (12%) is similar to the percentage of all 1998 graduates belonging to minority groups (13%).

Response rate by school is given in Table 1.2. The School of Education has the highest response rate (57%); Fine Arts and Agriculture have the lowest rates (both 30%).

Table 1.2: Response Rates, Ranked Within-School Percentage.

School	Number of Graduates	Number of Respondents	Response Rate
Education	144	82	57%
Allied Health	110	52	47%
Engineering	173	75	43%
Family Studies	147	59	40%
Business	364	142	39%
Nursing	70	27	39%
Liberal Arts and Sciences	1,095	411	38%
General Studies	202	71	35%
Pharmacy	102	33	32%
Fine Arts	93	28	30%
Agriculture	138	41	30%
Overall	2,638	1,021	39%

In summary, the respondents to the alumni survey represent a sample that is similar to the population of 1998 graduates both in terms of age and ethnic background, broadly speaking. Based on relatively high response rates, the sample slightly over represents female students and, for example, students in the School of Education.

2. General Questions

2.1. Freshman Entrance Rate

Overall, 69% of respondents entered UConn as freshmen; 31% entered as transfer students. Table 2.1 concerns within-school freshman entrance rates, given as percentages and ranked.

Table 2.1: Freshman Entrance Rate, Ranked Within-School Percentages.

School	Within-School Percentage
Pharmacy	91%
Education	82%
Business	74%
Agriculture	73%
Arts & Sciences	73%
Engineering	73%
Family Studies	71%
Nursing	70%
Fine Arts	68%
Allied Health	50%
General Studies	9%

Pharmacy has the highest freshman entrance rate (91%), followed by Education (82%).

The low freshman entrance rate for General Studies (9%) is consistent with age data. In General Studies, the age category with the largest number of respondents (55%) is 35-49 years; within all other schools, the most common age category is 21-24 years.

2.2. Residence Hall Habitation Rate

Overall, 75% of respondents lived in a residence hall on campus at some point during their time at UConn; 25% did not. Table 2.2 concerns residence hall habitation rates for respondents who entered UConn as freshmen and graduated in exactly four years, or *four-year respondents*.

Table 2.2: Semesters Lived in Residence Halls for Four-Year Respondents.

Semesters:	0	1	2	3	4	5	6	7	8
Respondents:	33	3	16	12	81	16	54	20	98
Percentage:	10%	1%	5%	4%	24%	5%	16%	6%	29%

For the four-year respondents, 29% lived in a residence hall for the entire eight semesters; 10% did not live in a residence hall at any point.

A large group of four-year respondents (24%) lived in a residence hall exactly 4 semesters. Assuming these students entered residence halls when they arrived on campus, they then decided to change their living situations after their first two years at UConn.

2.3. Point at which Major Decided

Table 2.3 concerns the point at which students decide their major; both overall and within-school percentages are given for the time categories.

Table 2.3: Point at which Major Decided, Overall and Within-School Percentages.

	Before College	As a Freshman	As a Sophomore	As a Junior	As a Senior	Do Not Remember	No Response
Overall	32%	12%	33%	18%	1%	4%	1%
Agriculture	29%	10%	34%	24%	2%	0%	0%
Allied Health	42%	21%	19%	8%	2%	6%	2%
Arts & Sciences	24%	12%	38%	23%	1%	2%	1%
Business	25%	14%	42%	16%	1%	3%	0%
Education	42%	11%	38%	7%	0%	0%	2%
Engineering	69%	11%	21%	0%	0%	0%	0%
Family Studies	14%	10%	49%	27%	0%	0%	0%
Fine Arts	57%	11%	18%	11%	0%	0%	4%
General Studies	18%	4%	10%	31%	4%	31%	1%
Nursing	48%	4%	26%	7%	4%	7%	4%
Pharmacy	85%	6%	6%	0%	3%	0%	0%

Overall, one third of respondents decided their major before entering college; another third decided as a sophomore. Within each school, except for General Studies, respondents who decided their majors either before college or as sophomores form a majority.

For Allied Health, Engineering, Fine Arts, Nursing, and Pharmacy, the highest within-school percentage of respondents decided their major before college. Pharmacy (85%) and Engineering (69%) especially stand out in this respect. For Agriculture, Arts and Sciences, Business, and Family Studies, the highest within-school percentage of respondents decided their major as a sophomore. For General Studies, respondents generally decided their majors later than in other schools, with 31% deciding as a junior (a large group (31%) did not remember).

2.4. Retrospective Reasons for Choosing UConn

Respondents were asked to take into account their experience at UConn and indicate what they felt should have been the single major reason for attending UConn. Overall, 35% of the respondents indicated reasons relating to educational programs, either (i) variety of programs, (ii)

the quality of programs, or (iii) specific programs offered. On the other hand, 26% indicated the low level of tuition and fees as the single major reason for attending UConn. Graph 2.4 concerns the trend of these responses over previous 18 years.

Graph 2.4: Retrospective reasons for choosing UConn, 1980-1998.

Retrospective indication of reasons for attending UConn related to educational programs oscillates with a slight downward trend from 1980 to 1988. Toward the end of the 1980's, the percentage decreases sharply, dropping from 36% to 27%. In the 1990's, the percentage increases from 27% to 32%.

Retrospective indication of tuition and fees as the single major reason for attending UConn oscillates with a slight upward trend from 1980 to 1988. After 1988 to the present, the percentage decreases from 36% to 26% linearly at 1% per year. Table 24 concerns within-school indication rates, given as percentages and ranked.

Table 2.4: Retrospective Reasons for Attending UConn, Ranked Within-School Percentages.

Educational Programs	
Pharmacy	73%
Allied Health	65%
General Studies	49%
Education	43%
Family Studies	39%
Nursing	33%
Business	32%
Agriculture	32%
Engineering	28%
Fine Arts	25%
Arts & Sciences	21%

Tuition and Fees	
Engineering	39%
Arts & Sciences	31%
Nursing	30%
Business	29%
Fine Arts	29%
Family Studies	22%
Agriculture	22%
Education	20%
Allied Health	14%
Pharmacy	6%
General Studies	4%

For retrospective indication of reasons for attending UConn related to educational programs, Pharmacy (73%) and Allied Health (65%) rank highest. For retrospective indication of tuition and fees, Engineering (39%) ranks highest.

3. Evaluation of Academic Experience

3.1. Helpfulness of UConn

Respondents were asked to rate the importance of 21 potential benefits of a college education and the extent to which they believed that UConn had helped to provide each benefit. Table 3.1 gives both rating averages and also ranks for both benefit importance and perceived helpfulness of UConn. Relative helpfulness, average perceived helpfulness rating minus average benefit importance rating, is also given and ranked.

Table 3.1: Benefit Importance, Perceived Helpfulness of UConn, and Relative Helpfulness, Rating Averages and Ranks.

Benefit	Perceived Importance 1 = Not Important 7 = Very Important		Helpfulness of UConn 1 = Not Helpful 7 = Very Helpful		Relative UConn Helpfulness (Helped - Importance)	
	Rating	Rank	Rating	Rank	Rating	Rank
a. Obtain career training -- knowledge and skills applicable to specific job/work	6.33	3	4.59	16	-1.74	21
b. Acquire background for further education in a professional, scientific or scholarly field	6.04	12	4.80	10	-1.24	12
c. Gain a range of information that might be relevant to a career	6.33	3	4.98	6	-1.35	13
d. Develop an understanding and enjoyment of literature, art, and drama	5.08	21	4.52	18	-0.56	1
e. Write clearly and effectively	6.41	1	5.05	4	-1.36	14
f. Become fluent in the computing of your discipline	5.92	13	4.55	17	-1.37	15
g. Obtain a general foundation in computing regardless of your discipline	5.84	14	4.34	20	-1.50	19
h. Become aware of different philosophies, cultures, and ways of life	5.52	15	4.88	9	-0.64	3
i. Develop your own values and ethical standards	6.13	9	4.63	14	-1.50	19
j. Understand yourself, your abilities, your interests and personality	6.28	6	4.89	8	-1.39	16
k. Understand and be able to get along with different kinds of people	6.26	7	5.16	2	-1.10	10
l. Understand the nature of science and experimentation	5.22	20	4.66	13	-0.56	1
m. Understand new scientific and technical developments	5.34	18	4.43	19	-0.91	6
n. Become aware of consequences of new applications in science and technology	5.23	19	4.19	21	-1.04	8

o.	Think analytically and logically	6.13	9	5.13	3	-1.00	7
p.	Think in quantitative terms, understand probabilities, proportions, etc.	5.47	16	4.70	11	-0.77	5
q.	Learn on your own, pursue ideas, and find information you need	6.40	2	5.36	1	-1.04	8
r.	See the importance of history for understanding the present as well as the past	5.46	17	4.70	11	-0.76	4
s.	Know how to speak before groups, actively participate in group discussions	6.20	8	5.03	5	-1.17	11
t.	Know how to lead and supervise groups of people	6.08	11	4.63	14	-1.45	18
u.	Formulate creative and original ideas	6.33	3	4.91	7	-1.42	17

Based on relative UConn helpfulness, the most highly ranked benefits are (d) "develop an understanding and enjoyment of literature, art, and drama" and (l) "understand the nature of science and experimentation". Note, however, that these benefits rank at the bottom with respect to perceived importance: (d) is ranked 21 and (l) is ranked 20.

Based on perceived importance, the most highly ranked benefits are (e) "write clearly and effectively", (q) "learn on your own, pursue ideas and find information you need", (a) "obtain career training", (c) "gain a range of information that might be relevant to a career", and (u) "formulate creative and original ideas".

Benefit (a) "obtain career training" is the lowest ranked based on relative UConn helpfulness. However, the relative UConn helpfulness ratings vary across schools to a statistically significant degree. Table 3.2 ranks the average relative UConn helpfulness ratings by school. The ratings for Allied Health, Nursing, and Pharmacy are significantly higher than those for Agriculture, Family Studies, Arts and Sciences, and General Studies.

Table 3.2: Relative UConn Helpfulness for Obtaining Career Training, Average Rating by School (1 = Not Helpful; 7 = Very Helpful).

	Helpfulness of UConn
Allied Health	6.19
Nursing	5.96
Pharmacy	5.41
Education	5.16
Business	5.11
Fine Arts	5.07
Engineering	4.96
Agriculture	4.59
Family Studies	4.35
Arts & Sciences	4.00
General Studies	3.84

3.2. Satisfaction Ratings

Respondents were asked to rate their overall UConn experience in the areas of general education requirements, required courses outside of their major field, and required courses in their major field. Table 3.3 summarizes the average ratings by school; ratings in each are ranked.

Table 3.3: Average Satisfaction Ratings
(1 = Extremely Dissatisfied; 7 = Extremely Satisfied).

(a) General Education Requirement		(b) Courses Outside Major Field		(c) Courses Within Major Field	
General Studies	5.39	General Studies	5.31	Fine Arts	6.33
Allied Health	5.37	Allied Health	5.30	Family Studies	6.14
Fine Arts	5.25	Fine Arts	5.21	Allied Health	6.04
Nursing	5.07	Family Studies	5.14	Agriculture	6.00
Business	5.04	Agriculture	5.03	Business	5.78
Family Studies	4.95	Business	4.93	Arts & Sciences	5.76
Arts & Sciences	4.86	Pharmacy	4.91	Nursing	5.70
Engineering	4.83	Arts & Sciences	4.86	General Studies	5.70
Pharmacy	4.76	Nursing	4.81	Education	5.51
Education	4.62	Education	4.61	Engineering	5.45
Agriculture	4.59	Engineering	4.48	Pharmacy	5.33

For each school, the highest average rating appears in column (c) for courses within the respondents' major field.

Respondents were also asked to rate the appropriateness of the number of required courses. Graph 3.1 represents average appropriateness ratings for number of courses as general education requirements and as major field requirements.

Graph 3.1: Appropriateness Ratings for Number of Courses. (1 = Too few, 7 = Too many)

Appropriateness ratings for the majority of schools are clustered in the upper left quadrant of graph 3.1, indicating an average perception of too few courses as major field requirements and too many courses as general education requirements.

Recall from section 3.1 that based on relative UConn helpfulness "obtain career training" is the lowest ranked potential benefit. Presumably, this low ranking is related to the perception of too few courses as major field requirements.

Ratings for Engineering, General Studies, and Pharmacy indicate too many courses as both major field and general education requirements.

3.3. Recommendation Rates

Overall, 88% of the respondents would recommend UConn to friends or relatives. Table 3.3 summarizes the UConn recommendation rates by school.

Table 3.3: Recommendation Rate, Ranked Within-School Percentage

Education	95%
Allied Health	94%
Fine Arts	89%
Business	98%
Family Studies	88%
Engineering	88%
General Studies	87%
Arts & Sciences	87%
Agriculture	83%
Pharmacy	82%
Nursing	81%

Recommendation rates do not vary across schools to a statistically significant degree. The overall rate has been approximately 90% for the past two decades.

4. Post-Graduate Experience

4.1. Employment Rates

Overall, 86% of respondents are employed either full-time or part-time; 97% are either employed or have entered graduate school. Only 3% of respondents are either unemployed or did not answer this question. Table 4.1 ranks percentages by school in each of these three categories.

Table 4.1: Employment and Graduate School Rates by School.

(a) Full- and Part-time Employment		(b) F/P Employment or Graduate School		(c) Unemployed or No Response	
Pharmacy	100%	Pharmacy	100%	Nursing	11%
Fine Arts	96%	Fine Arts	100%	General Studies	6%
Allied Health	96%	Education	100%	Business	6%
Business	94%	Engineering	99%	Allied Health	4%
General Studies	93%	Agriculture	98%	Arts & Sciences	3%
Engineering	89%	Arts & Sciences	97%	Family Studies	3%
Nursing	89%	Family Studies	97%	Agriculture	2%
Family Studies	88%	Allied Health	96%	Engineering	1%
Agriculture	88%	General Studies	94%	Pharmacy	0%
Arts & Sciences	83%	Business	94%	Fine Arts	0%
Education	57%	Nursing	89%	Education	0%

For the full-time or part-time employment rate in column (a), all schools except Education are above 80%. For the employment or graduate school rate in column (b), all schools except Nursing are above 94% or above. Education does not stand out in column (b), with a rate of 100%. Graph 4.1 shows full-time and full- or part-time employment rates from 1987 to 1998.

Graph 4.1: Employment Rates since 1987.

From the mid to late 1980's, the full-time employment rate exhibits a pronounced peak, reaching toward 80%. From 1989 to 1991, full-time employment decreases sharply by 15% through. After 1991 to 1998, full-time employment rate increases at roughly 1% per year. The part- or full-time employment rate mirrors the full-time employment rate at an approximately 10% higher level.

4.2. Use of UConn Career Services

Respondents are asked if they had used UConn Career Services when seeking job information. Overall, 42% of respondents have used Career Services; 58% have not.

Table 4.2 shows that Business and Engineering have the highest percentage of using the service (both 76%); Allied Health and General studies have the lowest (both 10%).

Table 4.2: Use of Career Services

Business	76%
Engineering	76%
Nursing	48%
Agriculture	46%
Family Studies	44%
Arts & Sciences	39%
Fine Arts	25%
Education	21%
Pharmacy	18%
General Studies	10%
Allied Health	10%

4.3. Type of Employment

Respondents were questioned about their current employment; they were asked to either choose from a list of eleven general types of employer or specify some other type. Table 4.3 ranks the results for 1997 and 1998 for respondents who were employed full-time. The results are generally stable across the two years.

The largest number of respondents (33%) held a position in business, followed by the health industry (16%) and education (10%). Other types of employers identified by respondents include ski resort, casino, and child care facility.

Table 4.3: Employment Rate, Ranked by General Type of Employer

Type of Employer	1997	1998
a. Business	35%	33%
b. Health Industry	16%	16%
c. Education	8%	10%
d. State/Local Gov.	4%	5%
e. Factory/Industry	3%	5%
f. Non-profit	4%	4%
g. Self-employed	3%	2%
h. Media	2%	2%

i. Military Service	1%	1%
j. Federal Government	1%	1%
k. Agriculture	1%	1%
l. Other	22%	20%
Total	100%	100%

5. For Further Elaboration

Recent Alumni Survey data are virtually the only source of information about UConn's graduates and their opinions on various aspects of UConn. We would be happy to extend our analysis upon request. Besides completing the questionnaire, many respondents commented on various aspects of University life. Due to the variety of the topics covered, the comments are not summarized here. They are files in the Office of Institutional Research. Appropriate departments and offices are welcome to look at these comments.
