S. A. C. LOOKOUT.

VOL. I.

STORRS, CONN., JUNE 10, 1896

No. 2.

S. A. C. LOOKOUT.

Published monthly during the college year by the students of Storrs Agricultural College.

Subscriptions 50 cents a year in advance.

Entered as second class matter at the post office at Storrs on May 11, 1896.

BOARD OF EDITORS.

J. H. EVANS, '96, Editor-in-Chief.
JOHN N. FITTS, '97, Business Manager.
A. C. GILBERT, '97,
Ass't Business Manager
DR. G. A. WATERMAN, D. V. S. B. Sc.,
Treasurer.

ROBERT D. BEARDSLEY, '97, Athletics.
VICTOR E. LUCCHINI, '97, College Notes.
F. R. COMBER, '97, Alumni Notes.
MAX SCHAFFRATH, '98, Exchange.

COLLEGE SOCIETIES AND ORGANIZATIONS.

ECLECTIC LITERARY SOCIETY President, J. H. Evans; Vice President, H. B. Luce; Secretary, Grove H. Johnson. Meetings Saturday evenings at 7:30. A cordial invitation is extended to everyone to attend the literary exercises at each meeting. Members, only, will be admitted to the business meeting.

SHAKESPEAREAN CLUB. President, O; F. King; Vice President, F. N. Buell. Secretary, Harry Garrigus. Meetings, Saturday evenings at 7. Our doors are open to anyone interested in literary work.

Y. M. C. A. President, F. N. Buell; Vice President, H. L. Garrigus; Recording Secretary, A. F. Bidwell; Corresponding Secretary, Prof. C. S. Phelps. Meetings at 6:30 Tuesday evenings.

STUDENTS' ORGANIZATION. President, John Fitts; Vice President, V. E. Lucchini; Secretary E. H. Waite. Meetings on first Monday of each term.

COUNCIL. President, John Fitts; Vice President H. L. Garrigus; Secretary Miss Grace Blakeman.

ATHLETIC ASSOCIATION. President, C. T. Curtis; Vice President, F. R. Comber, '97; Sec'y and Treas., E. S. Mansfield, '98.

TENNIS CLUB. President, M. H. Barker, '94; Vice President, Olive N. Clark, '96; Sec'y and Treas., A. C. Gilbert, '97.

FACULTY.

B. F. KOONS, PRESIDENT. Professor of Geology, Zoology and Political Science.

A. B. PEEBLES, Prof. of Chemistry and Physics.

C. S. PHELPS, Professor of Agriculture.

GEO. A. WATERMAN, Professor of Veterinary Science and Human Physiology.

A. G. GULLEY, Professor of Horticulture.

MISS MARGARET KENWILL, Lady Principal.

MISS HARRIET LEZLA SMITH, Professor of Domestic Science.

REV. E. J. LEWIS, Professor of English and Literature.

H. S. PATTERSON, Instructor in Wood and Iron Shop Work.

MISS L. J. BARBER, Instructor in Mathematics and English.

L. P. CHALBERLAIN, Farm Superintendent.

W. T. SHULTS, B. A., Assistant in Horticulture Department.

A POEM.

A stands for Atwood a hairv old boy
Who is always ready for a little joy.
B stands for Buell and also for Bidwell
Two runners at Storrs who always will do well.

C stands for Curtis a senior alone
Who is called Newman Smythe wherever he's known.

D stands for Dump a camera maker
Who is also an excellent picture taker.
E stands for Edwin our Teddy so gay
He's ready to play ball most any day.
F stands for Faunty the bicycle flyer.
Of a spin with a girl he will never tire.
G stands for Grace a poet so true,
Her poems you see wherever you go.
H stands for Hawley so noble and good,
Ho spends most of his time overlooking our food.

I stands for Isaac a man of last year,
He would give us a tune if he only were here.

J stands for Jap and also for Johnson,
Jap now courts the girls who did court Johnson.

K stands for Kirk who is very very nice,
When there's any chance for cutting ice.
L stands for Loomis a boy built for a show
Who towards the North Pole is often seen go.

M stands for a fellow called Prof Munigle
He is very well known as the pride of Storrs school.

N stands for Norman the attorney at law,
He is now daily hearing a crows plaintive caw.

O stands for Olive and Olcott alack,
They will soon leave Storrs to never come back.

P stands for a fellow who we call Pat,
His motto in foot ball is tit for tat.

Q stands for Quinn a Columbia ball player,
Who can't shack the ball but is an awful score slayer.

R stands for Reed the base ball player,
If he only were here the game would be gayer.

S stands for Schaffrath and also for Snow,
There names will ever united go.

T stands for Taylor in the green house
you'll find Ben,
As quiet and contended as an old setting hen.

U stands for umbrella used cometimes to cover,
A love such young girl and her own spoony lover.

V stands for Vail again he'll be here,
To join our sports and give our good cheer.

W stands for will, "Will you walk down with me."
That is what Kirk said on the 31st see.

X, Y and Z are a bother to all writers see,
So I'll lay them one side as too many for me.

G. E. SMITH

EDITORIALS.

The success of the ball team this season reflects considerable credit on its manager and captain, Prot. Peebles and Mr. Fosket. The personal interest they have taken in the team and its affairs has created much enthusiasm among the members of the team and the students as a whole. The work of the team this season is certainly far better than that done the last three seasons, and the success they have met with, so far, this season is without a doubt the result of good management and training.

The increase in the number of hours the library is open is an improvement. Students can now spend Saturday and Sunday afternoons in reading if they so choose and this is far better than having no particular way open for them to spend their leisure hours in.

The true objects and principles of the Y. M. C. A. were made plain to the students of the college a few Sundays ago by Mr. Cobleigh, secretary of the Norwich Y. M. C. A. Anyone who did not attend his talk that afternoon missed a treat. Mr. Cobleigh is a plain forward speaker and although not "flowery" in language, he is eloquent from the enthusiasm he has on his subject. His remarks were highly appreciated by those who heard him from the pure merit of what he said.

"Loafing" is a habit common among all colleges and one from which this college is not exempt. It is the foundation that all the vices common to colleges is built upon. It is during the half hours before classes, the dining hours, or work—when a great number of the students have nothing particular to do—that we hear the most profanity, vulgarity, etc. It is during this time that students learn to smoke or contract other bad habits. And every student who has a desire to elevate himself in every way aside from the mere accumulations of knowledge should avoid this habit of "loafing" during spare hours. To do this he will find it necessary to provide some useful employment for himself that he can take up at any time and for a short time. Anyone who does this will find themselves at the end of their course free not only from the habit of "loafing" but also free from many other worse habits that come with it.

From the lack of enthusiasm in the sports on Field Day an impartial observer would say that the prospects of the college holding the cup from the Alumni at the commencement meet were not very bright and would undoubtedly be true.

The K's of the 'P. are still flourishing.

STUDENT LIFE AT S. A. C.

WRITTEN BY W. J. WEBB & F. N. BUELL
FOR THE C. S. C.

Some of our readers who may be thinking of coming to Storrs as student may like to know what a day at Storrs is like. So we will try to give you some idea of the routine of a day in the sophomore year.

The student is supposed to rise at 6:30 a. m. and prepare himself for breakfast which is served at seven, after which he has time to clean up his room so that it will pass inspection when the matron comes around some time in the forenoon.

At eight he is to report for work at the place assigned him which is either the horticultural department or on the farm.

It is here that he is supposed to get the practical part of his education. If he is willing to learn and remembers how the work is done it will be of great value to him later in life.

Between eleven and twelve he has an hour to himself which is put into study or reading the papers in the library.

Dinner is served at 12:15 p. m. after which he has classes from 1 to 4 p. m.

At 4:30, three nights in the week, there is military drill for an hour. Chapel is at 5:45 which all must attend immediately after which is supper.

After supper the student can use the time as he see fit. Almost every evening there is some meeting which he should attend, as it will give him an insight into the affairs of the students and he will find out what is going on in the college.

In the evening the student is supposed to prepare his lessons for the next day, retiring for the night when he wishes.

This is a brief out-line of the life of a student at Storrs.

The other class-men have nearly the same routine except they have classes from 8 till 12 a. m. and work from 1 to 4 p. m.

There are many changes in the routine that keep it from becoming monotonous. On the nights we have no drill the athletic team goes out for practice.

If in the fall for football, in the winter for polo and in the spring for baseball.

If a person is so inclined he can go out and practice with the team, in so doing he will become better acquainted with the players and take more interest in the games with other team. Almost every Saturday afternoon there is a game with some other school or college or between classes on the athletic field.

A student should join one of the literary societies which hold their meeting on Saturday evening. He will find them both entertaining and instructive and before long he will look forward to Saturday evening with pleasant anticipations.

On Sunday the students are supposed to attend church in the morning. Dinner is served at 1 p. m.

In the afternoon the students are free to roam over the green clad hills of Toland county. Many an otherwise dreary afternoon has been made enjoyable by ramble after arbutus or other wild flowers. On many an otherwise unpleasant day the student will find plenty to do sleeping, writing letters or reading.

A student should at least give a part of his time to reading. There is some required reading in the course of studies but besides this he should read some of the standard works of science, fiction, history or travels all of which he can find in the college library.

A number of students here now have set up as photographers. They find considerable enjoyment in it, beside its being instructive. It is one of the best ways to spend your time as it gives you something to remember your college days with in after years.

Besides these a student can find time to hunt, fish, take part in the field contest and do many things that in after years as he thinks of his alma-mater it will help him to live over his college days again.

OUR SUN.

H. B. LUCE.

When we speak of the sun we immediately think of an immense luminous body which we have seen from childhood rising and setting as sure as the day comes. It is indeed small compared to the millions of the larger ones in the universe. He may be spoken of as a high private in the rear rank.

It is not like the moon causing a few disturbances on the earth's surface, but is master over both. To him we may trace back all the chemical, mechanical and vital phenomena.

If the rays were to be cut off from the earth for one month all form of life would become extinct.

Men from the very earliest times have recognized this fact and made it the object of their worship as with Persians. Some people have the power of looking at the sun without being affected by its rays and to them it appears as a round white disk about one-half of a degree in diameter or 700 suns placed side by side would just fill up the circle of the horizon.

If we watch the sun carefully beginning on March 21st we notice that each noon it is higher in the heavens until the 22nd of June when it rises to the same height for several days and then slowly subsides till September when it passes the starting point, keeping on until it reaches its farthest southing when it returns and day and night are again equal.

Modern astronomy tells us that the average distance of the sun is 93,000,000 miles, which gives it a diameter of 865,000 miles. If the sun were to be weighed against the earth it would contain a quantity of matter nearly three hundred and thirty thousand times as great, while the average density would be about one-fourth that of the earth. The bright surface of the sun is called the photosphere, which looks smooth but when examined by the telescope is found finely mottled with brilliant granules separated by a luminous net-work.

It revolves on its axis once in 25 1/4 days. We find that the specific gravity of the

sun is 27 1/2 times as great as at the earth, so that a man weighing 150 pounds on the earth would weigh nearly two tons.

Every little while we observe dark red prominences on the sun's surface which are claimed by some to be outbursts of intensely heated hydrogen which move at the rate of one hundred miles per second. The light far exceeds the brightest light we have on the earth.

The sun spots are thought to be deep depressions on the surface. In the light of the sun we may observe through the spectrum different colored lines, many of which have been identified. In this way many of our terrestrial elements are found to exist in the sun—so many, in fact, that we know that the sun's nucleus, or core, must be composed substantially of the same elements, the same sort of matter as exists on earth—that is to say that we are "a chip of the old block."

The immense amount of heat may be caused by many things but no accepted theory has been found. The clashing together of meteorites is one. Twenty millions of years ago the sun was a cold body and in six million more years it will be a dark cold body.

The earth being so small and so far away receives only a very small portion of the sun's heat, the amount being about 1-2,000,000,000 part of the energy given out by the sun, but what we receive is indeed a vast amount. The heat emitted would melt a stratum of ice at the rate of 2,400 feet per hour, or boil seven hundred thousand millions of cubic miles of water.

The sun will surely shrink and grow cold and all life must cease, but, the man of today or the new woman of the twentieth century need not worry over it.

COLLEGE NOTES.

V. E. LUCCHINI.

Memorial day at S. A. C., was a busy one, the time being well spent in games and other events. The day was perfect and consequently a large crowd turned out to witness the exercises.

The exercises were begun by the "falling in" of the military company at 8:45 in the morning. The company marched around the main building, halting at the crossing between the main building and chemical laboratory. Here the young ladies and others bearing floral decorations for the graves fell in the rear of the company. The entire company then marched to the burying ground where President Koons delivered a short address on his recollections of "the Shenandoah valley." After decorating the graves and singing a couple patriotic songs the company marched back to the main building where it was dismissed.

The annual class field day exercises commenced at 10:30 at the usual place, in the road down in front of the main building. An unusual large crowd gathered to witness the exercises. There were no records broken although a number of the events were very exciting. A full account of the events will be found under "athletics."

F. Comber '97 and A. Bidwell '98 while crawling through a ladder in the obstacle race had quite a tussle with the

same, but no one was seriously injured.

There were over three hundred people gathered around the athletic field in the afternoon to witness the ball game which took place between the Columbias of Hop River and the home team.

In the evening a play, "Enlisting For the War" was presented by the grange in the college chapel. It was the best and most interesting play ever presented at the college. A box supper followed the entertainment. Mr. Bushnell '97 (acting as colored boy) received many hearty applause.

Mr. Cobleigh, secretary of the Norwich Y. M. A. C. gave a very interesting talk in the college chapel Sunday afternoon May 31, on the subject of "Manhood." He also addressed the Y. P. C. E. society in the evening, giving a history of Christian work in this country.

The program which will be presented by the Senior class Tuesday evening June 16th is as follows:

Music,	"Auf Werderschn,"
	Orchestra.
Address of Welcome,	H. G. Barber.
Class Index,	Miss Olive N. Clark.
Music,	Guitar duet,
	Miss Smith and Miss Barber.
Class History-Prophecy,	L. M. Tucker.
Class Story,	Miss Ethel E. Freeman.
Music,	"Reign of Cupid,"
	Orchestra.
Horseshoe Oration,	J. H. Evans.
Class Oration,	Miss Grace E. Blakeman.
Music,	Piano duet,
	Miss Evans and Miss Babbitt.
Class Poem,	A. E. Coles.
"Quotations,"	Miss Grace E. Snow.
Music,	Cornet Solo,
	C. L. Waite.
"Phrenologist,"	E. H. Waite.
Farwell Address,	C. T. Curtis.
Music,	"Love's Dreamland Waltz,"
	Orchestra.

The program for commencement day has not as yet been completed, so I will only give the subjects of the essays which shall be produced by the graduating classes.

Long course, "4 yrs."

Miss Grace E. Blakeman, "The creative Power in Literature."
Miss Grace E. Snow, "Co-education."
Miss Eugene U. Freeman, "The Advancement of Education."
Miss Olive N. Clark, "The College Girl in the World."
J. H. Evans, "The Beautiful in Nature."
E. H. Waite, "Entomology."
C. T. Curtis, "Anglo-American Arbitration."

L. M. Tucker, "Relation of Animal Disease to Public Health."
H. G. Barber, "The Power of an Ideal."

A. E. Coles, "Iceland, Its People and Literature."

Short Course "3 yrs."

H. E. Atwood, "Practical Dairying."
O. F. King, "Tile Draining."
Miss Erma L. Fuller, "Cooking in Health and Disease."
A. C. Gilbert, "Nitrification."
R. D. Gilbert, "Our Native Birds."

The lectures given throughout the state during the past month were as follows:
April 30th. Prof. Peebles, Walling-

ford. "Plant Physiogomy." Pres. Koons, Brookfield, "Entomology."

May 1st. Pres. Koons, Newtown, "Yellow Stone Park."

May 6th. Pres. Koons, North Stonington. "Yellow Stone Park."

May 7th. Pres. Koons, Canterbury, "Zoology."

May 8th. Pres. Koons, Jewett City, "Yellow Stone Park."

May 14th. Dr. Watermon, Sharon, "Tuberculosis." Pres. Koons, Hampton, "Entomology."

May 19th. Prof. Peebles, Thompson, "Beauties of Nature."

May 22nd. Pres. Koons, Vernon City, "Geology."

May 27th. Pres. Koons, North Granby, "Entomology."

May 28th. Pres. Koons, East Canon, "Yellow Stone Park."

The subject as selected by the faculty for the annual Radcliff Hicks prize is "Some Important Elements of an Education." The prize which consists of fifty dollars is awarded to the student who presents the best essay on the the above subject.

In the Electic society it was decided, (after an exciting debate) "that the city man is greener in the country, than is the country man in the city."

Mr. Bidwell '98 was the first to operate the pony lawn mower which the horticultural department has purchased.

One of the carpenters while driving to Storrs to work on the new building was thrown from his wagon and received slight injuries. He was able to proceed with his work after a little limping.

The Baccalaureate sermon will be preached by the Rev. E. J. Lewis in the Congregational church at Storrs, on the second Sunday in June.

Miss Grace Snow '96 gave a very interesting talk on "The Bloomer Girl" the other evening.

Willis Hawley '98, spent Sunday, May 31st at his home in Hawleyville.

G. C. Bailey who is in the country for his health is working for the Horticultural department.

Professor Chamberlain has engaged W. H. Pierce of South Hadley, Mass., to work for him during the summer.

J. W. Pincus and Evonlenko, recently students at Baron Von Hursh Institute are taking the examinations of the Sophomore class, expecting to enter the Junior class next fall.

G. H. Skerner '98 went home in the middle of May, but expects to return and take his examinations.

Miss Louise O. Hellgren of Griswold, Ct., was the guest of Miss Grace Dawley '98, and M. L. M. Tucker, '96, on Saturday and Sunday, May 30-1.

J. N. Fitts '97, sprained his ankle field day and so he has been on the sick list for the past week.

Photography is becoming quite a fad amongst the students here, there being at present ten cameras in the college.

John Fitts '97, has purchased of the church, the old organ which stood in the conference house. He has had it removed from the conference house to the veterinary recitation room where it is used by the Shakespearian club.

Heretofore the library has not been open on Saturday afternoons or Sundays, but as the students asked that it might be open at these times. It is open two to six Sundays and from four to seven Saturdays.

A rat in the dining room caused considerable commotion around the young ladies' table, the other day.

The junior class gave a reception in honor of the class of '96, Friday evening, May 22. After indulging in dancing and games, the party adjourned to the dining room to partake of light refreshments. The tables were prettily decorated with flowers and ferns. Mr. A. C. Gilbert, president of the junior class acted as toastmaster. Members of the '96 class and faculty were called upon for remarks which were readily given and received with hearty applause.

Miss Julia N. Hawley, of Hawleyville was here on a visit to her brother, Clarence Hawley '97, Friday, May 22. She returned to Hawleyville the following Monday Morning.

Prof. Peebles informs Mr. Luce that he had better say what he means.

Professor Gulley has set out over 40 different varieties of tomatoes.

The college has again changed cooks, this time getting Mr. Murkett and wife who cooked here once before. It almost puts new life into the students to see them return, as they were liked very well by the students when here before.

The Eclectic Literary society held a closed meeting in the college chapel on Saturday evening, June 6th. After the literary program was rendered, refreshments were served and the spare time spent in games, etc.

J. N. Fitts is positive that there is a cave under the knoll by the church. He expects to investigate in the near future.

The college has purchased a fine 18 in. globe which stands in the library. It is a great consolation to some people, especially those who want the "earth." commencement week.

Prof. Schultz has completed the grade where the old barn stood. Things will look a little different to the students who return commencement day.

The night blooming cactus has produced three perfect flowers so far and has several buds on it at present.

The young fox, which Mr. Shults dug out a short time ago is getting along nicely. It is nearly as tame as a dog, but is not allowed to run free, as he might investigate Mr. Chamberlain's hen coop.

Ray Gully has two young crows which were given him by one of the students. He intends to tame and keep them as pets.

The physical laboratory is so well fixed up with apparatus, that the students delight in performing the different experiments, especially those in which electricity is involved.

Dr. Waterman is having the horse barn which was recently bought with the Storrs farm hauled over from top to bottom. On the right side, as you enter the main door, there will be seven single stalls and one box stall. The partition which separates the carriage house from the main barn floor having been torn

down. Now you may drive in the main door and push your wagons back on either side which makes it very handy.

The work on the "young ladies' cot tage" is progressing rapidly; the frame work having been completed.

Professor Gulley says that the centre of the tree is one side, nearly always.

The Rev. Mr. Brown of Willington lectured in the college chapel, Friday evening, May 29th.

Mansfield Grange, No 64, presented a program before the Willington Grange, No. 137, Wednesday evening, June 3rd. Quite a number of the boys went up that evening in the college teams. The team in which Mr. and Mrs. Phelps, Miss Rosebrooks, Mr. A. C. Gilbert and another young man rode in met with a slight mishap. The back seat upturned and gave its occupant (as it had only one, the others walking up hill) quite a scare which she is not over yet.

Prof. Phelps has commenced on his new house which is to be erected in the vicinity of the grass garden. Mr. Snow is at work on the cellar.

Prof. Patterson of Torrington expects to have his family move to Storrs very soon.

Miss Grace E. Dawley, while in the botany class one day last week had a slight fainting fit. With prompt attention on Prof. Gulley's part she soon revived.

Prof. Gulley went to Kingston last week with the ball team with the idea of getting a knowledge of what sort of a college Rhode Island has.

Mr. Schultz has two young hen hawks which he intends to make pets of.

The Alumni will give a reception and banquet Commencement night, June 17.

ATHLETICS.

R. D. BEARDSLEY.

The third annual field day of the S. A. C. Athletic Association was held the morning of May 30, 1896. The judges were W. L. Chamberlain, W. A. Stocking and M. H. Parker. Starter, O. F. King, '97; Time Keeper, Prof. Gulley.

Programme.

50 yards dash, Beardsley, '97, 1st, Johnson, '97, 2nd, Mansfield, '98, 3rd. Time, 6 1-5 seconds.

100 yards dash, Beardsley, '97, 1st, Mansfield, '98, 2nd, Johnson, '97, 3rd. Time, 11 sec.

Pole vault, Fitts, '97, 1st, Johnson, '97, 2nd, Bushnell, '97, 3rd. Height, 6 feet, 7 inches.

Running broad jump, Beardsley, '97, 1st, Johnson, '97, second, Webb, '98, 3rd. Distance, 17-7/4.

Mile walk, Johnson, '97, 1st, Smith, '98, 2nd, Rosebrooks, '98, 3rd. Time, 8.43.

Running high jump, Fitts, 1st, Beardsley, '97, 2nd, Johnson, '97, 3rd. Distance, 4 feet, 11 inches.

Mile run, Bidwell, '98, 1st, Buell, '97, 2nd, Johnson, '97, 3rd. Time, 5 minutes, 40 seconds.

Obstacle race, Luce, '97, 1st, Beardsley, '97, 2nd, Bidwell, '98, 3rd.

Putting shot, Webb, '98, 1st, Beardsley, '97, 2nd, Fitts, '97, 3rd. Distance, 32 ft. 7 1/2 inches

High kick, tie between Fitts, '97, Johnson, '97, Bushnell, '97. Beardsley, '97.

Summary of Points.

	'97	'98
50 yard dash,	5	1
100 yard dash,	4	2
Pole vault,	6	0
Running broad jump,	5	1
Mile walk,	3	3
Running high jump,	6	0
Mile run,	3	3
Obstacle race,	5	1
Putting shot,	3	3
High kick,	6	0
	46	14

All of the contestants showed a lack of training, and there was very little excitement except in the mile walk and obstacle race. There were none of the last year's records broken and only one equaled, that of the hundred yard dash. The list of events are as follows: 50, 100 and 220 yard dashes, running high jump, running broad jump, shot put, mile walk, mile run, high kick and pole vault.

The Storrs base ball team will go to Kingston the 6th of June to play the Rhode Island Agricultural College. They will play the Willimantic at Willimantic the 13th and with the Alumni commencement afternoon.

Storrs 9, Eagleville 12,

The first game played away from the college was at Eagleville with "Vinton's combination." The turf had been removed from the diamond, and the soil beneath was well dried. Every little breeze would raise such a cloud of dust that even an X ray couldn't have penetrated it.

Both Prue and Bushnell pitched a good game but Storrs errors were the most costly. Chamberlain did well behind the bat, though he showed lack of practice.

The Storrs boys did not bat and run bases with as much confidence as they had shown in their former games.

The heavy batting and fine work of Prue at critical moments, especially the striking out of Mansfield and Beardsley in the ninth inning when the bases were filled, won the game for Eagleville.

Ross cf,	5	0	0	4
Bicknell 3b,	4	1	2	2
	51	12	9	27

Two base hits, Mansfield 2; home run, Bushnell. Struck out by Bushnell, 8; by Prue, 11. Left on bases, S. A. C., 3; Eagleville, 12.

Eagleville 0 5 7 1 0 2 1 0 1—12
Storrs 1 0 0 1 4 0 2 0 1—9

Storrs met her second defeat on the college grounds May 23. Among the Eagleville players were Hall, ex-catcher for Wesleyan; McFarlane, formally member of Willimantic league team, and Bicknell and Squires of South Coventry. Besides Representative Fred Vinton of Eagleville as captain.

The game was won by the heavy batting of Eagleville, especially when the bases were filled. Bushnell made several wild throws with a man on third.

Prue at second played the best game for Eagleville, making several difficult stops of hot liners. Comber pulled down four flies. A one hand catch by Beardsley when there were three men on bases was a surprise to everyone.

Storrs 4 0 1 1 0 5 0 0 3—14

The third victory for the ball team was won from Columbia on Memorial Day and though very one sided it was at times quite interesting.

Bushnell was at his best and allowed the visitors only seven scattering hits.

The runs scored by Columbia were on two wild throws in the first and last innings. The Columbian pitcher did very well at the start but after the college boys had stolen home on him several times he became slightly rattled and was relieved by Richards, the colored pitcher, who seemed to be a little out of practice.

The Columbia's poor showing was partly do the absence of their catcher. It was the best batting practice that Storrs has had this year.

Two base hits, Bushnell 3, Foskett 2, Beardsley 1, Comber 1. Home run, Foskett. Umpire, Prof. Peebles. Scorer, G. Smith, '98. Time of game, 2¼ hours.

ALUMNI NOTES.

COMBER.

We have been favored with something of a reunion of the '95 class, Mr. Shedd, Green, Hall paying us a flying visit Memorial Day. from the interest they showed in the inter-classical field day and questioning the weak points that related thereto, it looked as if they might have been delegated to the convention and will earnestly labor to obtain the cup the 17th inst. I might add that the under graduates are equally confident, and without question a brisk competition will be witnessed.

Should time permit we will be pleased to meet the alumni on the base ball field and verify what a year under the management of Prof. Peebles has accomplished for us.

With regard to accommodation this year. So far as can be learned it will be a repetition of the former year furnishing table board at usual place and cost together with the night's abode in the upper rooms there reserved and furnished.

Mr. E. B. Fitts holds the positions of Tobacconist and farm manager of the La Experiment station situated at Baton Rouge, a man of wide experience and possesses a thorough knowledge of growing and curing the crop. From the detailed accounts of the Station Bulletin he is evidently showing them how to reap the maximum crop from the minimum expenditure.

Mr. Tregaskis, '99, has taken the cake for the breakage bill record. We suppose his papa is rich.

Mr R. D. Beardsley, '97, will be sure of the position as full-back on the foot ball team next fall, if he does not lose the marvelous style of kicking that he showed in the base ball game Saturday.

AN ORIGINAL RIDDLE.

BY THE "JOLLY CHEMIST."

My first starts a word that "Jap" like to say,

Some day he will say it another way.

My second is first in a senior's name,

And he is a person who "Zoobie" don't shame.

My third starts a name that is heard far and wide

As a maker of pills whose use you can't hide.

My fourth in "professor" is found twice the same

And my fifth starts the lazy boy's Christian name.

My sixth is a letter which is found in "hay,"

And my seventh starts a game that Miss Loomis doth play.

My eighth is a letter that stands for a fool.

My ninth is a letter that comes once in "snow."

My tenth you will find in the little word "ten,"

And the first of my riddle has come to an end.

My first starts a girl's name in the Sophomore class

Who has been running a senior here, in the past.

My next starts the study we all wish to learn,

And my last ends a thing we all wish to earn.

Now this ends the riddle, to guess if you can;

If you cannot succeed, why, "try, try, again."

G. E. SMITH.

THE FACE LINES.

Some Interesting Facts About the Story Told by the Features.

A single vertical wrinkle between the eyebrows shows strict honesty in money matters.

Economy broadens the nose, making it rather short and thick above the nostrils; it gives in age a broad double chin.

Lines extending downward from the angle of the mouth toward the chin, when marked, show a tendency to sadness and melancholy.

The lines raying outward from the eyes show capacity for enjoyment as well as the two deep furrows framing the mouth by the upper lip. The former are the penalty we pay for mirth and form the future channel of the tear.

When one has short vertical lines in the red parts of the lips strongly marked they indicate a capacity for friendship. If the lips be full, the chin well developed and square, one has much vital power over others, a strong capacity for loving and self reliant spirit.

Centurial Years.

Centurial years—years which end a century—are not leap years unless they are divisible by 400. This is one of the rules of the Gregorian calendar, and helps to keep this calendar in such close touch with the movements of the sun. Thus 1900 will not be a leap year.

FUN.

Mr. Outhrup, '98, is a very strong batter if he hits the ball. That little word (if) is all that stands between him and fame.

"There is no telling what may come out of a man's head." Mr. Smith, '98.

Lord Fauutleroy, '98, still continues to take his morning ride on his wheel, around the second story class rooms before breakfast. We only hope and pray that he will never ride through the wall on the southeast side of the museum.

How we all miss "Prof" Munigal when he is off on his lecturing tours, It isn't right of him to stay so long. Now is it?
