19	Percentage of Total Occupied Housing Units by Type of Cooking Fuel Used.....	79
20	Percentage of Total Owner Occupied and Renter Occupied Housing Units by Number of Automobiles Available.....	83
21	Total Number and Percentage of Negro and Spanish American Occupied Housing Units by Tenure Status for Selected Towns.	87

The research reported in this publication was supported in part by Federal funds made available through the provisions of the Hatch Act.

Received for publication January 1, 1974

INTRODUCTION

Housing characteristics of towns and communities within Connecticut provide a useful basis to assess the general level or standard of living in each community. This report contains twenty-one tables of selected housing data based upon the 1970 Census of Housing, as contained in the 4th Count Summary Tapes. While it should be noted that there are slight differences between some of the data items contained in the printed reports of the Census Bureau and data items as contained in the 4th Count Summary Tapes, such discrepancies were minor and tables presented here may be considered directly comparable to those the reader might derive from other Census printed volumes.

With the exception of the first table showing total housing units by occupancy and tenure status, other tables have been converted to percentage form for comparability. However, if the reader requires the number for a given data item, rather than the percentage figure, it may be approximated by multiplying the appropriate number in Table 1 by the percentage figure in question. For example, Table 1 shows 2,491 owner occupied housing units in Bethel and Table 2 shows 58.7 percent of the owner occupied housing units in Bethel were valued between \$20,000-34,999. The number of owner occupied housing units for that value category may be approximated by $2,491 \times .587 = 1,462$.

This volume is intended to serve as a general reference and source book for local government agencies, planning commissions, university personnel, and other individuals or groups requiring housing facts for a specific local area within Connecticut. Unfortunately a similar housing report for 1960 was not prepared by the Department of Rural Sociology and persons interested in changes in housing characteristics from 1960 to 1970 will have to refer to various housing volumes in the 1960 Census for the needed data.

This housing report is also intended as a companion volume to the previously published population report: The Population of Connecticut, Town and County Fact Book, 1970, by T. E. Steahr, V. Bolduc, and C. Skambis, The University of Connecticut, Agriculture Experiment Station Bulletin No. 426 (February, 1974). That volume contains twenty-four tables on selected population and socioeconomic characteristics for towns in Connecticut. These two volumes will enable any interested person to compile a profile of forty-five population and housing characteristics for each town in the state.

Housing Characteristics for Towns and Counties Connecticut: 1970

1. Housing units comprise houses, apartments, groups of rooms, or single rooms, which are occupied, or vacant but intended for occupancy, as separate living quarters. Specifically, there is a housing unit when the occupants do not live or eat with any other persons in the structure and there is either (1) direct access to the unit from the outside or through a common hall, or (2) complete kitchen facilities for the occupants' exclusive use.
2. Total year-round units are all occupied units plus vacant units which are intended for year-round use. Vacant year-round units include vacant units available for sale, vacant units available for rent, vacant year-round units rented or sold awaiting occupancy, vacant year-round units held for occasional use, and vacant year-round units held for other reasons. Excluded from this category are vacant units intended for seasonal occupancy and vacant units held for migratory labor.
3. Vacant seasonal units are vacant units intended for occupancy during only a season of the year; for example, units for summer or winter recreational use. Vacant migratory units are seasonally vacant units intended for occupancy by migratory workers.
4. A unit is occupied if it is the usual place of residence of the person(s) living in it at the time of enumeration. Included are units occupied by persons only temporarily absent (on vacation, etc.) and units occupied by persons with no usual place of residence (for example, migratory workers).
5. Housing units are owner occupied when respondents living in the unit report that it is "owned or being bought" (i.e., owned outright, mortgaged, or being bought on land contract) by someone in the household. (The owner need not be the head of the household.)
6. Renter-occupied year-round housing units includes all year-round units for which cash rent is paid and all year-round units which are vacant but for rent at time of enumeration. One family houses on ten acres or more are excluded from this category as are renter units occupied without payment of cash.
7. The number of owner occupied and renter occupied housing units in Union were suppressed in the census housing tapes. The figures presented here for owner and renter occupied housing units were deduced from the available data in the table.

Table 2 - Percentage* of Total Owner-Occupied
Housing Units by Value of Unit¹

	Median Value ² (Dollars)	Less Than \$10000	\$10000- \$14999	\$15000- \$19999	\$20000- \$34999	\$35000- \$49999	\$50000 or More

* Percentages are based on total owner-occupied housing units for the state, counties, and each town.

1. Value of unit is the respondent's estimate of how much the property would sell for on the 1970 market or (for vacant units) the asking price at the time of enumeration. Value is ascertained only for units which are owner occupied or vacant available for sale. Value is not ascertained for owner occupied and vacant available for sale units which are in multiunit structures, trailers, rural units on farms or places of ten or more acres (whether farm or nonfarm), or on properties any part of which is used as a business (commercial establishment such as a restaurant or gas station or medical office). Such units are excluded from value distributions because of heterogeneity in the use and size of the property.
2. Median value is that value which divides the total distribution in half. Half of the total owner-occupied housing units will have a value greater than the median value and half of the total owner-occupied housing units will have a value lower than the median value. The median value shown in this table was calculated using the intervals printed here.

* Percentages are based on total renter-occupied year-round housing units for the state, counties, and each town.

1. Renter-occupied year-round housing units includes all year-round units for which rent is paid and all year-round units which are vacant but for rent at time of enumeration. One family houses on ten acres or more are excluded from this category, as are renter units occupied without payment of cash.
2. Gross rent is the contract rent plus the estimated average monthly cost of utilities (electricity, gas, water) and fuels (oil, coal, kerosene, wood, etc.), if these items are paid for by the renter (or paid for him by someone else, such as a relative, welfare agency, or friend) in addition to rent. Thus, gross rent is intended to eliminate differentials which result from varying practices with respect to the inclusion of utilities and fuel as part of the rental payment.
3. The gross rents for the total renter occupied housing units were not available on the census tapes.

* Percentages are based on total occupied housing units for the state, counties, and each town.

1. Household head is the household member reported as head by respondent. Where a married woman living with her husband is reported as head, the husband is classified as head. Household heads are either family heads or primary individuals.

* Percentages are based on total year-round housing units for the state, counties, and each town.

1. A structure is defined as a separate building that either has open space on all four sides, or is separated by dividing walls. Housing units are classified here by the number of units (including occupied and vacant, excluding business units or group quarters) in the structure in which they are located. Thus, types of structures used in this table include one unit structures, two unit structures, three and four unit structures, five to nine unit structures, and ten or more unit structures. Mobile homes or trailers are included as a separate category in this table.

Table 7 - Percentage* of Total Occupied Housing
Units by Number of Persons in Unit

	Units Containing:						
	1 Person	2 Persons	3 Persons	4 Persons	5 Persons	6-8 Persons	9 or More Persons

* Percentages are based on total year-round housing units for the state, counties, and each town.

1. Number of rooms means only whole rooms used for living purposes, such as living rooms, dining rooms, kitchens, bedrooms, and finished recreation rooms. This excludes kitchenettes, strip or pullman kitchens, bathrooms, porches, balconies, foyers, halls, utility rooms, unfinished attics or basements, or other space used for storage.

* Percentages are based on total year-round housing units for the state, counties, and each town.

1. A complete bathroom is a bathroom with all plumbing facilities, including hot piped water, a flush toilet, bathtub or shower, and wash basin for the exclusive use of the occupants. The facilities must be located inside the structure but need not be in the same room. A half bathroom is a bathroom with toilet facilities (flush toilet) or bathing facilities for exclusive use but not both.
2. None includes both units with no bathroom and units with only a half bathroom.

- * Percentages are based on total occupied housing units for the state, counties, and each town.
1. Husband-wife families are families in which the head and his wife are enumerated as members of the same household. Only husband-wife families with their own household are recognized.
 2. Families with male head are families where the head is male and there is no wife present.
 3. Families with female head are families where the head is female and there is no husband present.
 4. Primary individuals are household heads living alone or with non-relatives only.

- * Percentages for source of water supply and type of sewage disposal are based on total year-round housing units for the state, counties, and each town.
1. This category includes water coming directly from springs, creeks, rivers, and all other sources.
 2. This is a residual category which includes any means not included under public sewer and septic tank or cesspool. Public sewer includes units connected to a city, county, sanitary district, neighborhood, or subdivision sewer system. Septic tank or cesspool includes an underground tank or pit for sewage disposal.

* Percentages for each household convenience are based on total occupied housing units for the state, counties, and each town.

1. A unit is occupied if it is the usual place of residence of the person(s) living in it at the time of enumeration. Included are units occupied by persons only temporarily absent (on vacation, etc.) and units occupied by persons with no usual place of residence (for example, migratory workers).
2. Television set must be in working order.
3. This category includes car radios, transistors, and other battery-operated sets in working order or needing only a new battery for operation.

* Percentages for each household facility are based on total year-round housing units for the state, counties, and each town.

1. A unit has complete kitchen facilities when it has all three of the following: (1) an installed sink with piped water, (2) a range or cookstove, and (3) a mechanical refrigerator. All kitchen facilities must be located in the structure, but need not be in the same room. Sole use means the facilities are for the exclusive use of the occupants in the unit. Shared or none means either the facilities are also used by occupants of another unit or the facilities are not complete.
2. A unit has a flush toilet (supplied with piped water) if the toilet is inside the structure and available for the use of occupants. Sole use means the toilet is for the exclusive use of the occupants in the unit. Shared or none means either the toilet is also used by the occupants of another unit or there is no flush toilet in the unit.
3. A unit has a bathtub or shower if either facility is supplied with piped water (not necessarily hot), is located inside the structure, and is available for the use of the occupants. Sole use means the bathtub or shower is for the exclusive use of the occupants in the unit. Shared or none means either the bathtub or shower is also used by the occupants of another unit or there is neither a bathtub nor shower in the unit.

* Percentages are based on total year-round housing units for the state, counties, and each town.

1. The category room heaters with flue includes room heaters with flue or vent, burning gas, oil, or kerosene. This category consists mainly of gas burning circulating heaters; excluded are fireplaces or stoves burning coal or wood. The category room heaters without flue includes room heaters without flue or vent, burning gas, oil, or kerosene. This category consists of unvented room heaters (circulating and radiant) burning gas or liquid fuel; excluded are portable heaters.
2. Fireplaces as the principal source of heat is self-explanatory. Stoves means room heaters that burn coal or wood (either vented or unvented). Portable heaters are heaters that can be picked up and moved around at will, either without limitation (kerosene, oil, gasoline heaters) or within the radius allowed by a flexible gas hose or an electric cord (gas, electric heaters). All electric heaters that get current through a cord plugged into a convenience outlet are included as portable heaters.

* Percentages are based on total occupied housing units for the state, counties, and each town.

1. For definitions of the categories of heating fuel, see footnotes one through five in Table 19.

Note: For some categories in this table, a county total may be reported as "0.0" while certain towns within that county show percentages greater than "0.0". This is due to rounding of percentages "0.05" or less to "0.0" and percentages of "0.06" or more to the nearest tenth of a percent, i.e. "0.1".

* Percentages are based on total occupied housing units for the state, counties, and each town.

1. Utility gas is gas from underground pipes serving the neighborhood supplied by a public utility company, municipal government, etc.
2. Bottled, tank, or LP gas is bottled, tank, or liquefied petroleum gas stored in tanks which are replaced or refilled as necessary.
3. Fuel oil, kerosene, etc. includes fuel oil, kerosene, gasoline, alcohol, and other combustible liquids and semi-fluids.
4. Wood includes salvage wood as well as trees felled by users and purchased wood.
5. Other fuel is all other fuels not specified elsewhere, including purchased steam, fuel briquettes, waste materials such as corncobs, etc.

Note: For some categories in this table, a county total may be reported as "0.0" while certain towns within that county show percentages greater than "0.0". This is due to rounding of percentages "0.05" or less to "0.0" and percentages of "0.06" or more to the nearest tenth of a percent, i.e. "0.1".

* Percentages are based on total owner occupied and total renter occupied housing units for the state, counties, and each town.

1. Automobiles available means passenger cars owned or regularly used by any member of the housing unit. This includes company cars kept at home but excludes taxicabs, pickups, larger trucks, cars being junked, and cars permanently out of working order.
2. The numbers of automobiles available for owner and renter occupied housing units in Union were not available on the census tapes.

Table 21 - Total Number and Percentage of Negro
and Spanish American Occupied Housing Units
by Tenure Status for Selected Towns¹ (Continued)

1. Selected for this table are the twenty towns with the largest total of Negro and Spanish American occupied housing units respectively. The towns are listed in descending order according to the number of Negro and Spanish American total occupied housing units in each town. The category all other includes all Negro and Spanish American occupied housing units respectively located in Connecticut towns not specifically listed in this table.
2. This represents the percent of all Negro occupied and Spanish American occupied housing units respectively in the state, the selected towns, and all other towns which is owner occupied.
3. This represents the percent of all Negro occupied and Spanish American occupied housing units respectively in the state, the selected towns, and all other towns which is renter occupied.
4. The "All Other" totals for owner and renter occupied housing units represent 14.9% and 3.1% of Negro owner and renter occupied housing units in the state respectively. This means that 85.1% of all Negro owner occupied housing units and 96.9% of all renter occupied housing units in the state are accounted for in the twenty towns listed here.
5. The "All Other" totals for owner and renter occupied housing units represent 39.8% and 10.9% of Spanish American owner and renter occupied housing units in the state respectively. This means that 60.2% of all Spanish American owner occupied housing units and 89.1% of all Spanish American renter occupied housing units in the state are accounted for in the twenty towns listed here. It should be noted that Windham reported a total of 220 total housing units occupied by Spanish Americans, which ranks 12th highest of all towns in Connecticut. However, Windham is included here in the all other category because the data for owner and renter occupied units were suppressed.
