COMMENCEMENT

In the life of a great university, no day is more important than the day of Commencement. For our proud graduates, it marks one of life's great milestones and signifies the successful completion of a lengthy, rigorous course of study. For the institution itself Commencement is the occasion on which we stand apart from our day-to-day tasks, evaluate how far we have come to meet the university's goals, and rededicate ourselves to our overriding missions of teaching, research and service.

To the graduates of the Class of 1998 and to your families I extend my heartiest congratulations. Your years with us have been a time of transformation for you as individuals, and for the academic community of which you have been such an important part. The University of Connecticut is in the midst of a great transformation, moving from a position of regional strength to the status of one of the preeminent public institutions of higher education in the nation. This has been an exciting time for all of us, and every student on campus has played a part in making that transformation succeed.

At its heart this university, like any university worthy of the name, is first and foremost a center of learning. Here at the University of Connecticut we endeavor to serve many constituencies; we strive to be a resource for all the people of the state. But our central purpose is, as it always has been, to prepare our own students to take their place among the educated men and women of the world. I hope that in the years to come today's graduates can look back with pride on the education we offered here at UConn - and that you continue, as active members of our community of alumni, to hold us to the same high standards that we celebrate at the University on this great day.

COMMENCEMENT NOTES

COMMENCEMENT DAY at The University of Connecticut is a time of ceremony and pageantry, portions of which represent traditions dating back to medieval times. These notes on the history of the University and the commencement ceremony are offered in the hope that they will be of interest to spectators.

THE UNIVERSITY OF CONNECTICUT WAS FOUNDED as the Storrs Agricultural School in 1881 when the General Assembly accepted a gift of money and land from Charles and Augustus Storrs, natives of Mansfield. In 1893 when it became a land-grant college and officially opened to women, the name was changed to Storrs Agricultural College. As the mission of the institution changed, its name was changed in 1899 to Connecticut Agricultural College. In 1933 it became the Connecticut State College. It grew slowly becoming a small but vigorous college with limited undergraduate offerings in agriculture, home economics and mechanical arts. With the development of a university program it became The University of Connecticut in 1939. The first regional campuses were established in 1946 to deal with the influx of veteran students. Today, the University is made up of sixteen different schools and colleges. Through the various agencies of five Divisions and seven Institutes, including forty-nine Special Facilities, Programs, and Centers, the University is privileged to serve many State citizens. The Graduate program began in 1935, and in 1949 the University awarded its first doctoral degrees.

Enormous expansion has taken place over the years together with increased enrollment. Today, the University has an enrollment of over 22,300 students. At Storrs there are over 11,300 undergraduates and more than 3,860 graduate students, representing some 94 nations.

This year, the University will award over 5,100 degrees. Of these approximately 3,311 will be Bachelor's degrees, 1,162 Master's degrees, 200 Juris Doctor degrees, 20 Master of Laws degrees, 41 Doctor of Dental Medicine degrees, 78 Doctor of Medicine degrees and 273 Doctor of Philosophy degrees. Also to be awarded are 46 diplomas in Professional Education and 20 Associate's Degrees in the two-year Ratcliffe Hicks School of Agriculture.

THE COMMENCEMENT CEREMONY, because of the number of graduates, is divided into five separate exercises. The Schools of Dental Medicine and Medicine, located at the University's Health Center in Farmington, and the School of Law, located in Hartford, hold their own exercises. The Commencement procession in each of the three exercises at Storrs is heralded by the ceremonial trumpets which were obtained especially for the University commencement.

THE ACADEMIC PROCESSION begins with the heralding of the trumpeters announcing the arrival of the academic procession. The Bearer of the Mace leads the procession. The University Marshal, identified by his Baton, leads the President, together with the speaker, the Board of Trustees, vice-presidents, deans, other University officials, and faculty. The Mace is presented at the center of the stage while those processing enter and take their places. Once the Mace is placed on the stand it signals the beginning of the ceremony.

THE ACADEMIC GOWNS, HOODS AND REGALIA represent more than elegance or colorful attire. Academic caps and gowns represent a tradition which reaches far back into the early days of the oldest universities of the Middle Ages. The early European universities were founded by the church; the students, being clerics, were obliged to wear prescribed gowns and caps at all times. Caps and gowns were once common forms of clothing and were retained by the clergy when the laity adopted more modern dress. Though some universities here and abroad have other colors, the usual color for gowns in America is black. Hoods are lined with the official color of the college or university which conferred the degree. The velvet edging of the hood varies in length for bachelors, masters and doctoral degrees. The color represents the appropriate degree. Mortar boards (caps) are usually black. The tassel for the Bachelor of Arts, Science, and Engineering may be of color distinctive of the degree, and the tassel for the Doctor of Philosophy may be made of gold thread. The gown and hood of the University Marshal were made specifically for University ceremonies in the official colors of national flag blue and white. The Processional Marshals wear blue velvet "beefeater" berets; the School and College Marshals, who assist in conducting the ceremonies, wear blue Dutch caps.

THE MACE, carried by Keith Barker, Co-Chairman of the Commencement Committee, is used at all academic ceremonies. In medieval times maces were weapons of warfare, but today a mace is "a staff borne by, or carried before, a magistrate or other dignitary as an ensign of his authority." It is the emblem and symbol of the President's authority to administer the University. This mace was first used at the Inauguration of President Homer D. Babbidge, Jr., on October 20, 1962. It was designed by Nathan Knobler, former head of the Department of Art. The University seal, executed in beautiful wood carving, appears on both faces. A penny dated 1881 is affixed to it to commemorate the date of the University's founding.

THE BATON, carried by the University Marshal, Professor Peter L. Halvorson, was specifically designed for ceremonial activities at The University of Connecticut and was first used at the Commencement in 1968. The Office of Marshal can be traced back to the medieval period, and the Baton is a symbol of the Marshal's authority. This Baton has silver mountings and is surmounted by a representation of the University seal in enamel, which itself incorporates the coat of arms of the State of Connecticut. The University Marshal, carrying the Baton, follows the Mace Bearer as he leads the academic procession into and out of the place of ceremony.

THE SILVER COLLAR/MEDALLION, worn by Philip E. Austin, President, was first used in 1964, at the time of the University's Silver Anniversary. Each link on the collar represents one of the University's Schools or Colleges and consists of a cloissoné circle engraved with an appropriate design for the particular school and enameled with its traditional school or college colors. Hanging from the chain is a large silver medallion containing the University seal.

THE AWARDING OF DEGREES at The University of Connecticut is accomplished by a twofold process. First, the candidates for degrees of each respective school or college are presented by the University Marshal. The candidates proceed to the front, receive their diplomas, are congratulated by their administrative officers and return to their seats. The School or College Marshal then officially presents the candidates to the Dean who acknowledges the candidates and *declares* the appropriate degree. Second, when all candidates have been duly presented, the President of the University formally *confers* the appropriate degree. This is accomplished verbally at the time that he speaks the words:

"By virtue of the authority vested in me by the Trustees of The University of Connecticut, and in accordance with the procedures and regulations of the University, I confer upon you the Certificate, Associate's Degree, appropriate Bachelor's Degree, Master's Degree, Juris Doctor, Doctor of Dental Medicine, Doctor of Medicine, Doctor of Musical Arts, or Doctor of Philosophy for which you have been presented at this One Hundred and Fifteenth Commencement of The University."

THE RECESSIONAL of the officials and faculty is once again led by the Mace Bearer and University Marshal. The graduates, along with the audience, are requested to remain seated until the recessional is concluded.

*Out of respect and courtesy to all graduates, participants and guests
are requested to remain in their seats until the ceremony has concluded.*

HONORARY DEGREE RECIPIENTS

GEORGE BUSH
Doctor of Laws

George Herbert Walker Bush, 41st President of the United States, is one of the preeminent world figures of the late twentieth century. Though born in Massachusetts, he has deep Connecticut roots, as his family moved to Greenwich when he was an infant, and his father, Prescott Bush, later ably represented the state in the United States Senate. For George Bush, a lifetime of outstanding public service began when at age 18, in the midst of the Second World War, he became the Navy's youngest pilot. His heroic service in the Pacific theater earned him the Distinguished Flying Cross. On his return from the war he completed his education at Yale and, to the surprise of some, turned his back on a secure future in his father's investment banking firm to strike out for himself in the Texas oil industry. Success in that endeavor led him to pursue a political career, where he helped build the Texas Republican Party and served in the United States House of Representatives in the 1960s. In the following decade, Mr. Bush held in quick succession the positions of United States Ambassador to the United Nations, chairman of the Republican National Committee, envoy to the People's Republic of China, and director of the Central Intelligence Agency. Elected vice president in 1980 on the ticket headed by Ronald Reagan, Mr. Bush loyally served for eight years in an administration that transformed American government. In 1988 he capped an extraordinary career with his election as president. During his four years in the White House the nation witnessed the demise of the Soviet Union and the end of the Cold War, the triumphant American leadership of an international coalition that thwarted Saddam Hussein's aggression in the Persian Gulf, and the strengthening of environmental protections and programs for the disabled. Since leaving the White House, President Bush continues to exemplify the concept of public citizenship.

JUDGE JOSÉ A. CABRANES
Doctor of Laws

José A. Cabranes, Judge of the United States Court of Appeals for the Second Circuit, has traveled a long path from his birthplace in Mayaguez, Puerto Rico and childhood in the South Bronx to the federal bench. A graduate of Columbia College, Yale Law School and Cambridge University, at the age of 38 Judge Cabranes was appointed a United States District Judge for the District of Connecticut in 1979 by President Carter. Prior to his judicial service he also served as chairman of the boards of directors of two influential Puerto Rican civic organizations: Aspira of New York, and the Puerto Rican Legal Defense Fund, of which he was a founding member. In fifteen years on the district court, including two years as chief judge, Judge Cabranes attained a reputation as a jurist whose rulings defied easy ideological labels, but were intelligent, fair, and characterized by an acute sense of compassion. In the words of one legal analyst, Judge

Cabranes' rulings were defined by "a sensitivity to newcomers and outsiders, because he is one." President Clinton appointed Judge Cabranes to the United States Court of Appeals in 1994.

ALPHONSE CHAPANIS, PH.D.
Doctor of Science

Alphonse Chapanis, a member of the University of Connecticut Class of 1937, is one of the founders of the field of engineering psychology, and a pioneer in the development of ways to apply psychological research to the problems of an increasingly technological society. A native of Meriden, Connecticut, Dr. Chapanis grew up in disadvantaged circumstances. The sole surviving son of an immigrant father and a second-generation mother, he learned English as a second language. His dedication and natural talents earned him a scholarship to the University of Connecticut, where he found himself lured by an inspirational professor, Louis Gellermann, to the then relatively esoteric discipline of psychology. From UConn he went to Yale, where he completed his masters and doctoral degrees. His service during the Second World War as an aviation physiologist helped steer Dr. Chapanis toward his ultimate field, alternately characterized as engineering psychology, human factors, or ergonomics. The author of the first systematic text in this area, he pursued his work as a member of the Psychology and Industrial Engineering faculty of The Johns Hopkins University, and on assignments with the research laboratories of major corporations, the military, and civilian government agencies. The author of more than 160 articles and books, Dr. Chapanis is known for a sharply honed focus on the essence of research, asking of each effort, "What does this study tell us that's important about what people do in their daily lives?" That approach to his work led to the development of such practical and common devices as the modern push-button telephone keyset—and to the development of human factors research as a discipline of economic and social importance to the modern world.

FRANK MCCOURT
Doctor of Letters

A native of Brooklyn, Frank McCourt spent most of his childhood in Limerick, Ireland. His experiences growing up in the midst of nearly incomprehensible poverty and desperation formed the basis for the Pulitzer Prize winning memoir *Angela's Ashes*, a work that in one critic's words is "astonishing and uplifting . . . almost entirely free of bitterness and anger." McCourt's life experience, like his written work, is indeed astonishing and uplifting. At age 13, following his father's desertion of the family, he left school to help support his family. The McCourts eventually returned to the United States, and Frank, following military service, entered New York University on the GI Bill and later completed graduate school at Brooklyn College. A teacher in

New York City schools for 28 years—described by a colleague as “the most human teacher I ever knew”—McCourt kept a journal, wrote pieces for local newspapers, collaborated with his brother on a two-man show they performed in the mid-1980s, and began work on what would be one of the major books of autobiography of the 1990s. *Angela's Ashes* appeared in 1996, won several honors in addition to the Pulitzer Prize, and sold more than 1.6 million copies. McCourt's revue *The Irish . . . And How They Got That Way* opened in New York in 1997, and he is currently working on a sequel to *Angela's Ashes* that chronicles his life through the early 1970s.

JACK PAAR
*Doctor of Fine Arts**

Jack Paar is an icon of American television. He is the creator of the widely imitated “talk” show format, a pioneer in late night television, and the premier host of the “The Tonight Show” in the early 1960s. He is still acknowledged as the greatest monologist of our time, even though he retired from television more than three decades ago. Yet for all his skillfulness in delivering monologues, what sets him apart from his successors is that he knew how to listen. When you watched Paar at work, you were sitting in on a conversation, not a session of tedious verbal one-upmanship. His shows brought an almost countless number of today's greatest stars to national prominence. Paar saw to it the television programs he hosted were more than showcases for entertainers, but were also topical and literate. He influenced politics by introducing politicians to the American public in a whole new way. And no matter if he was interviewing a starlet or a statesman, he was the epitome of the quick-witted, brash and urbane raconteur. As a documentarian, he held audiences spellbound, taking them to far away places and treating them to the beautiful eccentricities of life as he saw it. Whether comedy or conversation, journalism or pure, live entertainment, the wit and sophistication he introduced to America created a historical influence on American culture, the impact of which continues to this day.

** To be awarded in Stamford.*

RAYMOND R. SACKLER, M.D.
Doctor of Humane Letters

BEVERLY SACKLER
Doctor of Humane Letters

Raymond and Beverly Sackler of Greenwich, Connecticut are among the nation's most generous supporters of the arts, medical research, and education. Philanthropists whose generosity is informed by a critical sense of history's scope and science's possibilities, they have provided vital assistance to institutions as far afield as the British Museum, Cambridge University and Tel Aviv University, and as close to home as the University of Connecticut School of Fine Arts—at which

they established the Raymond and Beverly Sackler Artist-in-Residence Program in 1996 – and the Thomas J. Dodd Research Center. Dr. and Mrs. Sackler have been instrumental in the support of biomedical sciences at Tufts, Clark, and New York Universities, art at the National Gallery of Art in Washington, D.C., and Harvard University, and myriad other projects in the United States and abroad. Dr. Raymond R. Sackler, a psychiatrist by training, is president and co-owner of Purdue Fredrick Company, an international pharmaceutical manufacturer based in Norwalk. Under his leadership Purdue Frederick has grown from a tiny manufacturer with a handful of employees to a company with production and research facilities in eight countries on three continents and earned a key position in the pharmaceutical industry. Author of nearly fifty scientific papers, he is the recipient of many academic and professional honors; his academic activities include, among others, service as a Trustee of the New York University Medical Center and honorary chairmanship of the Board of Governors of Tel Aviv University. Beverly Sackler, Chairperson of the Raymond and Beverly Sackler Foundation, is a major benefactor to the Metropolitan Museum of Art, the Metropolitan Opera, and a host of medical and cultural organizations in Greenwich. She serves on the Board of Directors of pharmaceutical companies in the United States, Canada, Germany, Austria, Denmark, Switzerland and Great Britain.

VARRO E. TYLER, PH.D.
Doctor of Science

Varro E. Tyler, holder of the first doctoral degree granted by the University of Connecticut School of Pharmacy, is Dean and Distinguished Professor Emeritus of Pharmacognosy at Purdue University. Over the course of an extraordinarily productive career, Dr. Tyler has served as an outstanding model for the University of Connecticut Ph.D.—a researcher of the first order, a teacher within the academy and in the wider world, and a farsighted institutional administrator. The author of hundreds of scientific and educational articles and several texts in the field of pharmacognosy, he is also one of the nation's leading experts on herbal medicine, a topic for which he is an active and articulate communicator to a large, and growing audience. Dr. Tyler's early academic assignments included positions at the University of Nebraska and the University of Washington. In 1966 he was appointed dean of the School of Pharmacy and Pharmacal Sciences at Purdue University, and when the school was enlarged in 1979 he became dean of the schools of Pharmacy, Nursing and Health Sciences. From 1986 to 1991 he served as executive vice president for academic affairs at Purdue. He has held leadership positions in several national pharmacy organizations, and is a fellow of the Academy of Pharmaceutical Research and Science, the American Association of Pharmaceutical Scientists, and the American Association for the Advancement of Science.

ACADEMIC HONORS

University Scholar

The University Scholar designation is the highest scholastic honor at the University. The individualized undergraduate programs of these students, which in some cases include work toward a graduate degree, are supervised by faculty committees. Up to thirty students are selected as University Scholars in the junior year.

Honors Scholar

Honors Scholars are outstanding students who complete intensive two- to four-year programs, including honors courses of unusual breadth and depth. Honors requirements include a senior thesis in the major field.

With Distinction

"With Distinction" is the University's designation for degrees earned by students who give evidence of significant achievement in their major fields.

The names in this program do not constitute an official list. The students whose names are listed herein were considered candidates for the degree indicated when the program was printed, except where a prior date of graduation (August 31 or December 31, 1997) is given.

THE GRADUATE SCHOOL

DOCTOR OF PHILOSOPHY

The parenthetical indication of a conferral date following a degree recipient's name signifies confirmed completion of degree requirements. If no conferral date is indicated, completion of degree requirements could not be confirmed at press time. Conferral of a degree is contingent upon verification by the Graduate School that a student has completed all requirements.

Depicted on the cover of this Commencement book is the new symbol of the University of Connecticut which has been adopted to represent the rich array of academic activities occurring in our schools, colleges and professional schools and at our regional campuses and Health Center. The new mark will be used effectively to represent the University as a fully integrated institution and an academic resource for the 21st century.

The University of Connecticut's new visual symbol is the ancient and mighty oak. For Connecticut and the University, the oak's significance is compelling.

Beautiful and sacred, the venerable oak is synonymous with wisdom, longevity and hospitality. To Aristotle, the oak's acorn represented human potential.

In 1687, Hartford's Charter Oak became the hiding place of the Fundamental Orders, believed to be the first written constitution that created a government. This historic event earned Connecticut its designation as the Constitution State.

In 1884, the commencement exercises of the second graduating class of the Storrs Agricultural School were held in an oak grove on the Storrs Campus. This grove was long a favorite gathering place for a variety of open-air meetings.

The University of Connecticut's graphic interpretation of the oak is a symmetrical and elegant synthesis of three oak leaves and two acorns, together representing maturation as well as intellectual and moral strength. It communicates a powerful message about an institution that is rooted in a proud past and destined for an extraordinarily bright future.

The UConn Husky dog remains the beloved and official mascot of the University's athletic programs.
