## COMMENCEMENT

---

*The University of Connecticut approaches the end of the twentieth century in the midst of a profound transformation. Long recognized as one of New England's foremost public universities, we are emerging as a national exemplar of excellence in undergraduate, graduate, and professional education, establishing a physical presence that matches the quality of our programs, and forging a close and productive relationship with the people and institutions of our state.*

*The graduates in the Class of 1999 have witnessed our progress at close hand. For them, as for our other students, faculty, and administrative staff, the inconvenience of construction has been more than offset by the benefits that come with our magnificent new structures, and by the spirit of aspiration and achievement generated throughout the University. Nor have our graduates been passive observers as the transformation moves from promise to reality. University of Connecticut students have played a vital role in guiding the institution's rededication and rebuilding.*

*Some things, however, have not changed. As it has been throughout its history, the University remains dedicated to the concept that education is the greatest gift society can bestow on its young people. An essential instrument of scientific progress and economic advancement, it is even more valuable simply as an end in itself—as the activity that defines and nourishes the human spirit.*

*I hope and believe that today's graduates will continue to reap the benefits of their University of Connecticut education throughout their lives. We are glad they were with us, we wish them the greatest good fortune, and we hope that each will continue to be part of the UConn community in the years ahead.*

## COMMENCEMENT NOTES

COMMENCEMENT DAY at The University of Connecticut is a time of ceremony and pageantry, portions of which represent traditions dating back to medieval times. These notes on the history of the University and the commencement ceremony are offered in the hope that they will be of interest to spectators.

THE UNIVERSITY OF CONNECTICUT WAS FOUNDED as the Storrs Agricultural School in 1881 when the General Assembly accepted a gift of money and land from Charles and Augustus Storrs, natives of Mansfield. In 1893 when it became a land-grant college and officially opened to women, the name was changed to Storrs Agricultural College. As the mission of the institution changed, its name was changed in 1899 to Connecticut Agricultural College. In 1933 it became the Connecticut State College. It grew slowly becoming a small but vigorous college with limited undergraduate offerings in agriculture, home economics and mechanical arts. With the development of a university program it became The University of Connecticut in 1939. The first regional campuses were established in 1946 to deal with the influx of veteran students. Today, the University is made up of sixteen different schools and colleges. Through the various agencies of five Divisions and seven Institutes, including forty-nine Special Facilities, Programs, and Centers, the University is privileged to serve many State citizens. The Graduate program began in 1935, and in 1949 the University awarded its first doctoral degrees.

Enormous expansion has taken place over the years together with increased enrollment. Today, the University has an enrollment of over 21,900 students. At Storrs there are over 11,680 undergraduates and more than 3,640 graduate students, representing some 94 nations.

This year, the University will award over 4,445 degrees. Of these approximately 2,735 will be Bachelor's degrees, 1,077 Master's degrees, 179 Juris Doctor degrees, 15 Master of Laws degrees, 40 Doctor of Dental Medicine degrees, 120 Doctor of Medicine degrees, 2 Doctor of Musical Arts degrees, and 222 Doctor of Philosophy degrees. Also to be awarded are 39 diplomas in Professional Education and 17 Associate's Degrees in the two-year Ratcliffe Hicks School of Agriculture.

THE COMMENCEMENT CEREMONY, because of the number of graduates, is divided into five separate exercises. The Schools of Dental Medicine and Medicine, located at the University's Health Center in Farmington, and the School of Law, located in Hartford, hold their own exercises. The Commencement procession in each of the three exercises at Storrs is heralded by the ceremonial trumpets which were obtained especially for the University commencement.

THE ACADEMIC PROCESSION begins with the heralding of the trumpeters announcing the arrival of the academic procession. The Bearer of the Mace leads the procession. The University Marshal, identified by his Baton, leads the President, together with the speaker, the Board of Trustees, vice-presidents, deans, other University officials, and faculty. The Mace is presented at the center of the stage while those processing enter and take their places. Once the Mace is placed on the stand it signals the beginning of the ceremony.

THE ACADEMIC GOWNS, HOODS AND REGALIA represent more than elegance or colorful attire. Academic caps and gowns represent a tradition which reaches far back into the early days of the oldest universities of the Middle Ages. The early European universities were founded by the church; the students, being clerics, were obliged to wear prescribed gowns and caps at all times. Caps and gowns were once common forms of clothing and were retained by the clergy when the laity adopted more modern dress. Though some universities here and abroad have other colors, the usual color for gowns in America is black. Hoods are lined with the official color of the college or university which conferred the degree. The velvet edging of the hood varies in length for bachelors, masters and doctoral degrees. The color represents the appropriate degree. Mortar boards (caps) are usually black. The tassel for the Bachelor of Arts, Science, and Engineering may be of color distinctive of the degree, and the tassel for the Doctor of Philosophy may be made of gold thread. The gown and hood of the University Marshal were made specifically for University ceremonies in the official colors of national flag blue and white. The Processional Marshals wear blue velvet "beefeater" berets; the School and College Marshals, who assist in conducting the ceremonies, wear blue Dutch caps.

THE MACE, carried by Keith Barker, Co-Chairman of the Commencement Committee, is used at all academic ceremonies. In medieval times maces were weapons of warfare, but today a mace is "a staff borne by, or carried before, a magistrate or other dignitary as an ensign of his authority." It is the emblem and symbol of the President's authority to administer the University. This mace was first used at the Inauguration of President Homer D. Babbidge, Jr., on October 20, 1962. It was designed by Nathan Knobler, former head of the Department of Art. The University's early seal, executed in beautiful wood carving, appears on both faces. A penny dated 1881 is affixed to it to commemorate the date of the University's founding.

THE BATON, carried by the University Marshal, Professor Peter L. Halvorson, was specifically designed for ceremonial activities at The University of Connecticut and was first used at the Commencement in 1968. The Office of Marshal can be traced back to the medieval period, and the Baton is a symbol of the Marshal's authority. This Baton has silver mountings and is surmounted by a representation of the University's former seal in enamel, which itself incorporates the coat of arms of the State of Connecticut. The University Marshal, carrying the Baton, follows the Mace Bearer as he leads the academic procession into and out of the place of ceremony.

THE SILVER COLLAR/MEDALLION, worn by Philip E. Austin, President, was first used in 1964, at the time of the University's Silver Anniversary. Each link on the collar represents one of the University's Schools or Colleges and consists of a cloissoné circle engraved with an appropriate design for the particular school and enameled with its traditional school or college colors. Hanging from the chain is a large silver medallion containing the University's early seal.

THE AWARDING OF DEGREES at The University of Connecticut is accomplished by a twofold process. First, the candidates for degrees of each respective school or college are presented by the University Marshal. The candidates proceed to the front, receive their diplomas, are congratulated by their administrative officers and return to their seats. The School or College Marshal then officially presents the candidates to the Dean who acknowledges the candidates and *declares* the appropriate degree. Second, when all candidates have been duly presented, the President of the University formally *confers* the appropriate degree. This is accomplished verbally at the time that he speaks the words:

"By virtue of the authority vested in me by the Trustees of The University of Connecticut, and in accordance with the procedures and regulations of the University, I confer upon you the Certificate, Associate's Degree, appropriate Bachelor's Degree, Master's Degree, Juris Doctor, Doctor of Dental Medicine, Doctor of Medicine, Doctor of Musical Arts, or Doctor of Philosophy for which you have been presented at this One Hundred and Sixteenth Commencement of The University."

THE RECESSIONAL of the officials and faculty is once again led by the Mace Bearer and University Marshal. The graduates, along with the audience, are requested to remain seated until the recessional is concluded.

---

*Out of respect and courtesy to all graduates, participants and guests  
are requested to remain in their seats until the ceremony has concluded.*

### HONORARY DEGREE RECIPIENTS

NOAM CHOMSKY, PH.D.

*Doctor of Letters*

Described by various commentators as "the most important linguist who has ever lived," "arguably the most important intellectual alive," and "a 20<sup>th</sup> century Rousseau," Professor Noam Chomsky is not only one of the world's seminal theoreticians in the field of linguistics, but is a political analyst whose critiques of American government and society have attracted a large and devoted following. A native of Philadelphia, son of immigrant parents (both of them Hebrew teachers, and his father one of the world's foremost Hebrew grammarians), Professor Chomsky earned his undergraduate, masters and doctoral degrees in linguistics at the University of Pennsylvania, and joined the faculty at the Massachusetts Institute of Technology in 1955. Since 1976 he has held the rank at that institution of Institute Professor, a title reserved for a small number of faculty members of unusual distinction. Professor Chomsky's extensive body of work on language (dozens of books and more than 200 articles) has redefined the nature and scope of linguistics, and exerted a significant impact on fields ranging from cognitive science to biology, philosophy, political economy, law, intellectual history, and music theory. The most cited living author, Professor Chomsky has influenced thousands of scholars and, through them, the international intellectual community. His political writing, provocative and controversial, has helped shape national debate over American foreign and domestic policy. Professor Chomsky has received honorary degrees from fourteen universities. His many other awards and honors include the 1988 Kyoto Prize for Basic Sciences, the American Psychological Association Distinguished Scientific Contribution Award, and the Helmholtz Medal of the Berlin-Brandenburg Academy of Sciences.

\*TOMIE DEPAOLA

### HONORARY DEGREE RECIPIENTS

DAVID MCCULLOUGH  
*Doctor of Letters*

No one of this generation has done more to make American history and culture accessible to a wide audience than has David McCullough. A Pulitzer Prize-winning biographer for his 1992 work, *Truman*, and author of *Mornings on Horseback*, a biography of the young Theodore Roosevelt, Mr. McCullough first came to public notice as the writer of three highly acclaimed works that concern humanity's relationship with the physical world—*The Johnstown Flood*, *The Great Bridge* (the story of the construction of the Brooklyn Bridge), and *The Path Between the Seas: The Creation of the Panama Canal 1870-1914*. These books have earned him Honorary Membership in the American Society of Civil Engineers; he was the first non-engineer to be so honored. Through his books, as essayist, narrator of numerous television documentaries, and host of *The American Experience* on PBS, Mr. McCullough demonstrates the extraordinary capacity to tell complex stories in a manner that is as clear as it is compelling, mindful of his audience's need for detail but abundantly respectful of his readers' or viewers' intelligence. Through his efforts he has conveyed to millions a sense of their relationship with their nation's past; as one critic wrote of *Truman*, "McCullough has done the hard work necessary for good history and has added zest and imagination... The Truman story meets a deep need to reaffirm personal values and to dream that the country can somehow 'go home'..." In addition to the Pulitzer Prize, he is twice winner of the National Book Award, twice winner of the Francis Parkman Prize, and has been honored with both the National Book Foundation Medal for Distinguished Contribution to American Letters and the National Humanities Medal. A native of Pennsylvania, Mr. McCullough graduated with honors in English literature from Yale in 1955.

FRANK D. RICH, JR.  
*Doctor of Laws*

Business leader, inventor, philanthropist, community activist, essayist, and longstanding friend to the University of Connecticut, Frank D. Rich, Jr., is one of the leading citizens of Fairfield County and the State of Connecticut. A Connecticut native, Mr. Rich graduated from Stamford High School and received a Bachelor of Science in Engineering from Princeton University in 1944. He served in the Marine Corps both during World War II and the Korean Conflict. In 1947 Mr. Rich joined the family firm, and as President and Chairman, has been involved in numerous construction and real estate projects throughout the continental United States, Alaska and the Caribbean. The firm's accomplishments are notable for its emergence as one of Stamford's major enterprises and best known for its role in Stamford's urban renewal which has created a central regional city for

the 21<sup>st</sup> century. As a member and leader of numerous community organizations, his engagement with the Stamford community fully complements Mr. Rich's role as a business leader. Founder and President of the Stamford Center for the Arts, he has vastly strengthened Fairfield County's role as a center for the visual and performing arts. He also serves as Chairman of Stamford's Ferguson Library. Appointed to the University of Connecticut Board of Trustees in 1974 and serving faithfully for 19 years, Mr. Rich contributed significantly to the University's progress through a challenging period in its history, and played a central leadership role at the University Health Center and notably contributed to the long effort that ultimately culminated in the opening of the downtown Stamford campus in 1998. A loyal and generous supporter of the University of Connecticut, Mr. Rich was awarded the University Medal in 1994. He has also received the National Human Relations Award from the regional National Conference of Christians and Jews, the Connecticut Arts Award, and the Angel Award of the International Society of Performing Arts Administrators. Awarded membership in Chi Epsilon, the National Civil Engineering Honor Society, he also holds an honorary doctorate from Sacred Heart University.

HAROLD C. SLAVKIN  
*Doctor of Science*

As director of the National Institute of Dental Research, Dr. Slavkin has been instrumental in advancing our knowledge of craniofacial, genetics and developmental biology. From his position overseeing 450 scientists and administrative personnel and an annual budget of \$234 million, he fosters fundamental and clinical research and sets priorities for future investigations in the health sciences that will improve the oral, dental and craniofacial health of the nation. Dr. Slavkin spent much of his career at the University of Southern California where he created and launched the country's first graduate program in craniofacial biology. As director of the university's Center for Craniofacial Molecular Biology, he led a team of scientists investigating the genetic origins of normal and abnormal craniofacial, oral and dental development. His work centered on the processes behind inherited and acquired craniofacial and oral birth defects. He is the author of more than 250 articles in scholarly journals and 100 additional book chapters that have contributed significantly to basic science in his field. Through his ability to build collaborations and partnerships with the public and private sectors and encourage individuals to work together towards a common goal, Dr. Slavkin sustains growth in science that will promote health and reduce disease and suffering throughout the United States and the world.

*Depicted on the cover of this Commencement book is the official seal of the University of Connecticut which was adopted last year to represent the rich array of academic activities occurring in our schools, colleges and professional schools and at our regional campuses and Health Center. The seal represents the University as a fully integrated institution and an academic resource for the 21<sup>st</sup> century.*

*The University of Connecticut's symbol is the ancient and mighty oak. For Connecticut and the University, the oak's significance is compelling.*

*Beautiful and sacred, the venerable oak is synonymous with wisdom, longevity and hospitality. To Aristotle, the oak's acorn represented human potential.*

*A majestic oak in Hartford became the hiding place of the Royal Charter. This charter, issued by England's King Charles II, had provided self-governing status to the Connecticut colony for twenty-five years. Officials dispatched by King James II in 1687 to retrieve the legal document were foiled when the charter was secretly spirited to a temporary shelter—the Charter Oak. The oak is now the official state tree and an international symbol of freedom.*

*In 1884, the commencement exercises of the second graduating class of the Storrs Agricultural School were held in an oak grove on the Storrs Campus. This grove was long a favorite gathering place for a variety of open-air meetings.*

*The University of Connecticut's graphic interpretation of the oak is a symmetrical and elegant synthesis of three oak leaves and two acorns, together representing maturation as well as intellectual and moral strength. It communicates a powerful message about an institution that is rooted in a proud past and destined for an extraordinarily bright future.*

*The UConn Husky dog remains the beloved and official mascot of the University's athletic programs.*
