## COMMENCEMENT

---

*I congratulate the members of the Class of 2006 and your families on the achievement we mark at these Commencement exercises.*

*These past years have been a time of progress and challenge. Our University, already a leader in our region, has grown stronger every year you have been with us, and many of you contributed mightily to our success. You arrived at UConn well prepared for higher learning, intellectually curious, and perhaps a bit anxious about the new chapter in your lives that was about to commence. Now, on this days you can take satisfaction in knowing you met high standards in and out of the classroom, availed yourself of the opportunities the University offered, and prepared well for the challenges that lie ahead.*

*Those challenges may be substantial. You enter a world shaped by acts of terror, religious and ethnic conflict, breathtaking economic change, and technological advances that may bode good or ill. It will be for you, each in your own individual way, to try to build a better, more just, more peaceful society even as you strive to build meaningful and productive lives for yourselves. It has been said that of those to whom much is given, much is asked. You have been given supportive families, a nation built on democratic values, and, now, a first-class education. You will be asked much in return.*

*I have every reason to think you are equal to what lies ahead. I wish you the very best in the years to come.*

## COMMENCEMENT NOTES

---

COMMENCEMENT DAY at The University of Connecticut is a time of ceremony and pageantry, portions of which represent traditions dating back to medieval times. These notes on the history of the University and the commencement ceremony are offered in the hope that they will be of interest to spectators.

THE UNIVERSITY OF CONNECTICUT WAS FOUNDED as the Storrs Agricultural School in 1881 when the General Assembly accepted a gift of money and land from Charles and Augustus Storrs, natives of Mansfield. In 1893 when it became a land-grant college and officially opened to women, the name was changed to Storrs Agricultural College. As the mission of the institution changed, its name was changed in 1899 to Connecticut Agricultural College. In 1933 it became the Connecticut State College. It grew slowly becoming a small but vigorous college with limited undergraduate offerings in agriculture, home economics and mechanical arts. With the development of a university program it became The University of Connecticut in 1939. The first regional campuses were established in 1946 to deal with the influx of veteran students. Today, the University is made up of sixteen different schools and colleges. Through the various agencies of five Divisions and seven Institutes, including forty-nine Special Facilities, Programs, and Centers, the University is privileged to serve many State citizens. The Graduate program began in 1935, and in 1949 the University awarded its first doctoral degrees.

Enormous expansion has taken place over the years together with increased enrollment. Today, the University has an enrollment of over 28,000 students. At Storrs there are over 16,100 undergraduates and more than 6,150 graduate students, representing some 113 nations.

This year, the University will award over 6,920 degrees. Of these approximately 4,825 will be Bachelor's degrees, 1,250 Master's degrees, 231 Juris Doctor degrees, 32 Master of Laws degrees, 84 Doctor of Pharmacy degrees, 45 Doctor of Dental Medicine degrees, 78 Doctor of Medicine degrees, 2 Doctor of Musical Arts degrees, 1 Doctor of Audiology, 1 Doctor of Education degree, and 290 Doctor of Philosophy degrees. Also to be awarded are 57 diplomas in Professional Education and 25 Associate's Degrees in the two-year Ratcliffe Hicks School of Agriculture.

THE COMMENCEMENT CEREMONY, because of the number of graduates, is divided into five separate exercises. The Schools of Dental Medicine and Medicine, located at the University's Health Center in Farmington, and the School of Law, located in Hartford, hold their own exercises. The Commencement procession in each of the three exercises at Storrs is heralded by the ceremonial trumpets which were obtained especially for the University commencement.

THE ACADEMIC PROCESSION begins with the heralding of the trumpeters announcing the arrival of the academic procession. The Bearer of the Mace leads the procession. The University Marshal, identified by his Baton, follows the President, together with the speaker, the Board of Trustees, vice-presidents, deans, other University officials. The Mace is presented at the center of the stage while those processing enter and take their places. Once the Mace is placed on the stand it signals the beginning of the ceremony.

THE ACADEMIC GOWNS, HOODS AND REGALIA represent more than elegance or colorful attire. Academic caps and gowns represent a tradition which reaches far back into the early days of the oldest universities of the Middle Ages. The early European universities were founded by the church; the students, being clerics, were obliged to wear prescribed gowns and caps at all times. Caps and gowns were once common forms of clothing and were retained by the clergy when the laity adopted more modern dress. Though some universities here and abroad have other colors, the usual color for gowns in America is black. Hoods are lined with the official color of the college or university which conferred the degree. The velvet edging of the hood varies in length for bachelors, masters and doctoral degrees. The color represents the appropriate degree. Mortar boards (caps) are usually black. The tassel for the Bachelor's and Master's degree may be of color distinctive to the degree, and the tassel for the Doctoral degree may be made of gold thread. The gown and hood of the University Marshal were made specifically for University ceremonies in the official colors of national flag blue and white. The Processional Marshals wear blue velvet "beefeater" berets.

THE MACE, carried by Professor Sally Reis, is used at all academic ceremonies. In medieval times maces were weapons of warfare, but today a mace is "a staff borne by, or carried before, a magistrate or other dignitary as an ensign of his authority." It is the emblem and symbol of the President's authority to administer the University. This mace was first used at the Inauguration of President Homer D. Babbidge, Jr., on October 20, 1962. It was designed by Nathan Knobler, former head of the Department of Art. The University's early seal, executed in beautiful wood carving, appears on both faces. A penny dated 1881 is affixed to it to commemorate the date of the University's founding.

THE BATON, carried by the acting University Marshal, Professor Keith Barker, was specifically designed for ceremonial activities at The University of Connecticut and was first used at the Commencement in 1968. The Office of Marshal can be traced back to the medieval period, and the Baton is a symbol of the Marshal's authority. This Baton has silver mountings and is surmounted by a representation of the University's former seal in enamel, which itself incorporates the coat of arms of the State of Connecticut. The University Marshal, carrying the Baton, follows the Mace Bearer as she leads the academic procession into and out of the place of ceremony.

THE SILVER COLLAR/MEDALLION, worn by Philip E. Austin, President, was first used in 1964, at the time of the University's Silver Anniversary. Each link on the collar represents one of the University's Schools or Colleges and consists of a cloissoné circle engraved with an appropriate design for the particular school and enameled with its traditional school or college colors. Hanging from the chain is a large silver medallion containing the University's early seal.

THE AWARDING OF DEGREES at The University of Connecticut is accomplished by a twofold process. First, the candidates for degrees of each respective school or college are presented by the University Marshal. The candidates proceed to the front, receive their diplomas, are congratulated by their administrative officers and return to their seats. The School or College Marshal then officially presents the candidates to the Dean who acknowledges the candidates and *declares* the appropriate degree. Second, when all candidates have been duly presented, the President of the University formally *confers* the appropriate degree. This is accomplished verbally at the time that he speaks the words:

"By virtue of the authority vested in me by the Trustees of The University of Connecticut, and in accordance with the procedures and regulations of the University, I confer upon you the Associate's Degree, appropriate Bachelor's Degree, Master's Degree, Juris Doctor, Doctor of Dental Medicine, Doctor of Medicine, Doctor of Musical Arts, Doctor of Education, or Doctor of Philosophy for which you have been presented at this One Hundred and Twenty Sixth Commencement of The University."

THE RECESSIONAL of the officials and faculty is once again led by the Mace Bearer and University Marshal. The graduates, along with the audience, are requested to remain seated until the recessional is concluded.

---

*Out of respect and courtesy to all graduates, participants and guests  
are requested to remain in their seats until the ceremony has concluded.*

*The flowers displayed during the ceremonies are from the University's Plant Science Department greenhouses.*

## UNDERGRADUATE STUDENT REPRESENTATIVES

Our student speakers were asked to provide their own profiles. Following are their statements.

### MATTHEW BILLARD

MATTHEW BILLARD has had the benefit of many enriching multicultural experiences. Half South African and half American, Matt spent a number of years living in South Africa, the United Kingdom, Brazil, and Egypt. After graduating from high school in front of the Egyptian pyramids, Matt and his twin brother, Justin, both enrolled at the University of Connecticut. Justin graduated in December with a Bachelor of Science degree in Mechanical Engineering. Matt also started in the Engineering program but later switched his major to become a graphic designer and illustrator.

During his time at UConn, Matt has been very active on campus. He has been awarded several academic and artistic distinctions, including the Babbidge Scholar Award and the Fine Arts Talent Scholarship. He has also been involved with a number of campus organizations and is a charter member of Reformed University Fellowship. Last summer, Matt spent a month with a famous painter in Inner Mongolia. While there, he not only learned two styles of traditional Chinese painting, but he also learned a lot about the culture and customs of the Chinese people. This was made possible thanks to an Honors program scholarship and by the connections of Matt's older brother, a graduate from UConn's School of Business. Matt hopes to work in the print and web design industry for a number of years. Speculating on the future, he would like to use his time and talents to help others and to share his faith in Christ with those in need.

### ANDREA GROSS

ANDREA GROSS is receiving a Bachelor of *Science* in Physiology and Neurobiology from the College of Liberal Arts and Sciences.

Andrea is from Simsbury, Connecticut and graduated at the top of her *class* from Simsbury High School in 2002. A member of the eight-year combined program in medicine, she has done research both at the University of Connecticut Health Center in Farmington and at the Storrs campus. Working under Dr. Roger Thrall in Farmington and Dr. Andrea Hubbard at Storrs, Andrea has been researching allergic airway disease and asthma in mice for the past four years. As part of this research she participated in the Summer Fellowship Program offered by the UConn Health Center in 2004.

Andrea is an Honors Scholar and was accepted as a University Scholar in Fall 2004 to complete her asthma research project. She has been named a Babbidge Scholar three times and was inducted into the Phi Beta Kappa honor society in 2004. Andrea has been actively involved in many campus clubs and activities throughout the University. In addition to being a founding member of UC-Med (the club for members of the eight-year baccalaureate/medical program), she has been active in the Honors Council, UConn Model UN, UConn Junior Club, and UConn Huskython, a fundraising event which benefits the Connecticut Children's Medical Center. She has also volunteered weekly as a tutor at Mansfield Middle School. Andrea is looking forward to beginning her study of medicine at UConn's Farmington campus in the fall. She would like to thank her friends and family for all their love and support through the years.

## HONORARY DEGREE RECIPIENTS AND COMMENCEMENT SPEAKERS

ARTHUR L. CAPLAN, PH.D.

*Doctor of Science*

ARTHUR L. CAPLAN has long been recognized as a major national figure in bringing bioethical issues of human life and death into the domain of public discourse. Author or editor of twenty-five books and over 500 papers in refereed journals of medicine, science, philosophy, bioethics and health policy, over the course of a highly distinguished career in the academy and in public service he has made complex concepts of moral theory and medical technology comprehensible to the public and to national leaders alike. Born in Boston, Dr. Caplan received his undergraduate degree at Brandeis University, and did his graduate work at Columbia University, where he received a doctorate in the history and philosophy of science in 1979. Currently the Emmanuel and Robert Hart Professor of Bioethics and Chair of the Department of Medical Ethics and the Director of the Center for Bioethics at

the University of Pennsylvania, Dr. Caplan previously taught at the University of Minnesota, the University of Pittsburgh, and Columbia University, and served as Associate Director of the Hastings Center from 1984 to 1987. Among his public positions he has chaired the Advisory Committee to the United Nations on Human Cloning and the Advisory Committee to the U.S. Department of Health and Human Services on Blood Safety and Availability, and served as a member of the Presidential Advisory Committee on Gulf War Illnesses, the Ethics Committee of the American Society of Gene Therapy, and the Special Advisory Panel to the National Institutes of Mental Health on Human Experimentation on Vulnerable Subjects. Dr. Caplan is a frequent guest and commentator on radio, television, and in newspapers, and holds several awards and honors, including six honorary degrees.

DAVID T. CHASE

RHODA L. CHASE

*Doctors of Humane Letters*

Few couples have made greater contributions to the quality of life in the State of Connecticut, over a sustained period of time, than have David and Rhoda Chase of West Hartford. Individually and in combination, they have brought to their professional lives and their philanthropic pursuits an exceptional degree of vision, integrity, and commitment to excellence for the common good. David Chase, a native of Poland, survived Nazi concentration camps by escaping at age 16 while on a death march; he was later liberated by American troops. Shortly thereafter he immigrated to the United States, settled in Hartford, attended the University of Connecticut, and, at age 23, established Chase Enterprises. That firm, which began in real estate and later expanded into domestic and international industries in mass media, banking, manufacturing and petroleum, is now among the State's most successful enterprises. Rhoda Chase, born in New Britain, Connecticut, met her husband at UConn, worked actively in Chase Enterprises, and achieved her own success as a commercial interior designer, newspaper columnist, musician, art collector and hotel executive. Both Mr. and Mrs. Chase have been mainstays of the Connecticut civic, religious, and cultural community, serving on the boards of numerous organizations and providing generous financial support to the University of Hartford, Eastern Connecticut State University, the New Britain Museum of American Art, and other organizations. Our own university was recently the beneficiary of major gifts from the Chase Family Foundation to the School of Law and the School of Medicine, supplementing other gifts provided over the years. Their public engagement, however, goes well beyond the borders of our State, and includes work to improve relations between the Vatican and the State of Israel, a key role in the establishment of the U.S. Holocaust Memorial Museum, support for the Rabbinical College of America, and scholarships for students in the United States.

## HONORARY DEGREE RECIPIENTS

## AND COMMENCEMENT SPEAKERS

FRANCIS S. COLLINS, M.D.

*Doctor of Science*

### HEALTH CENTER COMMENCEMENT SPEAKER

Director of the National Human Genome Research Institute, physician-geneticist Dr. Francis S. Collins is internationally recognized for his landmark discoveries of disease genes and his leadership of the Human Genome Project at the National Institutes of Health. Under his direction, the Human Genome Project consistently met projected milestones ahead of schedule and under budget. The international project culminated in April 2003 with the completion of a finished sequence of the human genetic blueprint. From its outset in 1990, the public sequencing effort swiftly deposited all of its data into free databases for use by scientists around the world. Building on the foundation laid by the Human Genome Project, Dr. Collins is currently leading the Genome Research Institute's effort to ensure that this new trove of sequence data is translated into powerful tools and thoughtful strategies to advance biological knowledge to improve human health. Dr. Collins' own research initiatives have included the development of "positional cloning," a fundamental approach to identify disease genes in the absence of known functional abnormalities. His laboratory has discovered a number of important genes, including those responsible for cystic fibrosis, neurofibromatosis, Huntington's disease and most recently, the gene that causes Hutchinson-Gilford progeria syndrome, a dramatic form of premature aging. In addition to his scientific achievements, Dr. Collins is known for his continuing emphasis on the importance of ethical and legal issues in genetics. He has been a strong advocate for protecting the privacy of genetic information and has served as a national leader in efforts to prohibit gene-based insurance and employment discrimination. Dr. Collins received a bachelor's degree from the University of Virginia, a doctorate in physical chemistry from Yale University, and a medical degree from the University of North Carolina. His many accomplishments have been recognized with numerous awards and honors, including election to the Institute of Medicine and the National Academy of Sciences.

ROSAL L. DELAURO

*Doctor of Laws*

### UNDERGRADUATE CEREMONY COMMENCEMENT SPEAKER

Following in a family tradition, United States Representative Rosa L. DeLauro has devoted her lifetime to public service. Born and raised in New Haven, Ms. DeLauro is the daughter of parents who both served as elected officials in that city's government; her mother Luisa's 35 years as a member of the Board of Alderman is a New Haven record. Rosa DeLauro received her baccalaureate degree with honors from Marymount College, studied at the London School of Economics, and received a Master of Arts degree in international relations from Columbia University. Soon thereafter she began what would become an extraordinary career in government and political advocacy, serving in development administration in New Haven; chief of staff to Senator Christopher Dodd; executive director of Countdown '87, a group devoted to ending arms trade with the Nicaraguan Contras; director of EMILY's list, an organization devoted to increasing the number of women in elected positions; and, beginning in 1990, as a representative in Congress from the Connecticut district that encompasses New Haven and surrounding communities. In the House of Representatives Ms. DeLauro has fought vigorously on behalf of educational opportunities for the disadvantaged, better health care coverage for all citizens, notably including women and victims of cancer, and improved rights for working people. In her capacity as a senior member of the Appropriations Committee and the Budget Committee, and as a member of the Democratic Party's leadership in the House, she has worked to promote fundamental values of equity and access, and has in so doing often

championed the University of Connecticut and other institutions of higher education. This year, Representative DeLauro particularly honors the University and its graduates by serving as our Undergraduate Commencement speaker.

THE HONORABLE ALLYSON K. DUNCAN  
*Doctorate of Laws*

### SCHOOL OF LAW COMMENCEMENT SPEAKER

The Honorable Allyson K. Duncan graduated from Hampton University in 1972 and Duke University School of Law in 1975. She is currently serving on the United States Court of Appeals for the Fourth Circuit. She was nominated to the position in April of 2003 by President George W. Bush and was sworn in on August 15, 2003. She is the first African-American woman from North Carolina to serve on the Fourth Circuit. Judge Duncan's career has been marked by a number of "firsts." In June 2003, she was sworn in as the 109th president of the North Carolina Bar Association, making her the first African-American and only the third woman to hold this position. Prior to joining the Fourth Circuit Judge Duncan was a partner in the Raleigh offices of Kilpatrick Stockton, LLP. Previously she was a member of the North Carolina Utilities Commission where she served in leadership positions in the National Association of Regulatory Utility Commissioners, and as a member of the Harvard Electricity Policy Group and the Electric Power Research Institute (EPRI). Judge Duncan also served on the North Carolina Court of Appeals, was an Assistant Professor of Law at North Carolina Central University, and held various positions at the Equal Employment Opportunity Commission in Washington, D.C. Judge Duncan is married to U.S. Magistrate Judge William A. Webb, a 1974 graduate of the University of Connecticut School of Law.

BARBARA EHRENREICH, PH.D.  
*Doctor of Humane Letters*

Six years into the twenty-first century, it is more apparent than ever that the concept of human rights is inextricably linked to issues of economic justice. In some ways, these concerns grow more and more complex as technology and globalization exercise increasingly powerful impacts. But in a more fundamental sense, the cause of economic democracy exercises as powerful a moral force as it has over the course of our nation's history, and dealing with the growing gap between rich and poor is, or should be, at the top of our nation's priorities. As writer, teacher, advocate, and, in the truest sense of the term, investigative reporter, Barbara Ehrenreich has brought such issues to the nation's consciousness, and conscience. Born in Butte, Montana, Ms. Ehrenreich received her academic training in the sciences: a bachelor of arts degree in chemical physics from Reed College in Oregon, and a doctorate in cell biology from Rockefeller University in New York. Soon, however, engagement in political activism led to a career in journalism. Over the past three decades she has written about disparities in health care between the wealthy and the disadvantaged, changing social and sexual mores, the impact of public welfare policy on the poor and in what is perhaps the best-known of her thirteen books, *Nickel and Dimed: On (Not) Getting By In America* (2001), the realities of life for the working poor. Ms. Ehrenreich's articles have appeared in *The New York Times Magazine*, *Ms.*, *Esquire*, *The Atlantic Monthly*, *Harper's*, *The Nation*, and multiple other journals in the United States and abroad, and her work has been widely honored. Many University of Connecticut students know her well through books studied in economics, sociology, and political science classes here.

AMARTYA KUMAR SEN, **PH.D.**  
*Doctor of Laws*

GRADUATE CEREMONY COMMENCEMENT SPEAKER

Amartya Kumar Sen, Lamont University Professor and Professor of Economics and Philosophy at Harvard University, is best known **for** his work on famine, human development theory, welfare economics and the underlying mechanisms of poverty. Born in Santiniketan, India, Dr. Sen studied at Presidency College in Calcutta and at Trinity College, Cambridge, England, where he **earned** a baccalaureate degree in 1956 and a doctorate in 1959. His earlier academic positions included posts as Professor of Economics at Jadavpur University Delhi University, the London School of Economics, and Oxford University. Dr. Sen's books, which have been translated into more than thirty languages, include *Collective Choice and Social Welfare* (1970), *On Economic Inequality* (1973, 1997), *Poverty and Famine* (1981), *Choice, Welfare and Measurement* (1982), *Resources, Values and Development* (1984), *On Ethics and Economics* (1987), *The Standard of Living* (1987), *Inequality Reexamined* (1992), *Development as Freedom* (1999), and *Rationality and Freedom* (2002), among others. His most recent book is *The Argumentative Indian*, and will be followed soon by *Identity and Violence: The Illusion of Destiny*, to be published by Norton this year. Dr. Sen received the Nobel Prize for Economics in 1998, with the citation indicating in part that, "Dr. Sen's contribution to welfare economics... (and) applications of his theoretical approach have enhanced our *understanding* of the economic mechanisms underlying famines... . By combining tools from economics and philosophy, he has restored an ethical dimension to the discussion of vital economic problems."

## ACADEMIC HONORS

### *University Scholar*

The University Scholar designation is the highest scholastic honor at the University. The individualized undergraduate programs of these students, which in some cases include work toward a graduate degree, are supervised by faculty committees. Up to thirty students are selected as University Scholars in the junior year. Candidates for the University Scholar designation wear medals on *gold and blue* ribbons at the commencement exercises.

### *Honors Scholar*

Honors Scholars are outstanding students who complete intensive two- or four-year programs, including Honors courses of unusual breadth and depth. Honors requirements include a senior thesis in the major field. Candidates for the Honors Scholar designation wear medals on *blue and white* ribbons at the commencement exercises.

### *With Distinction*

"With Distinction" is the University's designation for degrees earned by students who give evidence of significant achievement in their major fields. Candidates for the graduation "with Distinction" wear medals on *blue* ribbons at the commencement exercises.

The names in this program do not constitute an official list. The students whose names are listed herein were considered candidates for the degree indicated when the program was printed, except where a prior date of graduation is given. Questions or concerns regarding names not listed should be directed to the Office of the Registrar.

*On the cover of this Commencement book is the official seal of the University of Connecticut. The University's seal depicts the ancient and mighty oak. For Connecticut and the University alike, the oak's symbolism is significant. Beautiful and sacred, the venerable oak is synonymous with wisdom, longevity and hospitality. To Aristotle, the oak represented human potential.*

*The oak holds a special place in Connecticut's history. In a time long before statehood, the Connecticut colony's self-governing status was guaranteed by a charter issued by King Charles II of England. When, in 1687, his successor King James II attempted to reinstate the monarchy's authority his emissary's efforts were foiled as the Royal Charter was secretly spirited to a temporary hiding place—a majestic oak in Hartford, forever after known as the Charter Oak. The oak became a symbol of freedom worldwide.*

*The oak has unique meaning for the University as well. In 1884, the commencement exercises of the second graduating class of the Storrs Agricultural School were held in an oak grove on the Storrs campus. This grove, long a favorite gathering place for a variety of open-air meetings, served as the spiritual home to the growing community of scholars.*

*The University of Connecticut's graphic interpretation of the oak is a stylized synthesis of two acorns and three oak leaves, representing maturation, intellect and moral strength. The seal is the symbol of a large and diverse institution; it is used by all of the University's schools, colleges, regional campuses, professional schools and its Health Center. The UConn Husky dog is the beloved and official mascot of the University's athletic program. While the Husky symbolizes the vitality and excitement of campus life, the oak seal communicates the broader mission of the University as a center for the pursuit, the creation and the sharing of knowledge. The University of Connecticut, like the mighty oak, is rooted in a proud past and reaching toward a limitless future.*
