## Editorials

---

THE LOOKOUT does not feel inclined to draw attention to anything which smacks of business at this season of joy and festivity, but a few words seem advisable. As the May and present issues show, material changes have been made in the appearance of the magazine. These have been done only after the board felt convinced that the changes would increase the attractiveness of the paper.

Another change is the reduction of the current volume to nine issues. In former years the Junior Class remained at college throughout the summer and issued a mid-summer number. When, in 1902, this term was abolished, the editors, after a hasty consultation, decided to publish in September a number to take the place of that formerly issued in the mid-summer term. Time has proven that, as college does not open until near the end of September, it is impossible to get out the first issue of the magazine before the middle of October. However, as the amount of reading matter has been greatly increased, we feel no hesitancy in greeting you next autumn with the October LOOKOUT.

We sincerely regret that a year book is not published by the Junior Class. The importance of a work of this character can hardly be overestimated inasmuch as it offers the only complete record of the life and happenings of the student body for the previous years. It is also a book of reference in which may be found the accounts of former student life.

It is with the hope that the current issue of the magazine may, to a slight extent, fill this vacancy that we offer this number. That it is incomplete we acknowledge, but if we have succeeded in publishing something which our senior class will consider worth preserving, we will have accomplished our purpose.

While upon this subject of preservation of records we think that our college has long needed a Trophy Room. As the years pile up and new faces take the place of old, the part which the alumni took in college activities is soon forgotten. THE LOOKOUT would suggest that the Athletic Association obtain the privilege of using the recitation

room in the Dairy Building, or some other suitable place as a room where framed photographs of the various teams may be hung and where trophies of victories won may reside, inspiring coming generations of students to excel for C. A. C.

---

Although this subject has been mentioned in THE LOOKOUT on several previous occasions, the continued and unabated depredations and vandalisms committed upon the notices posted on the bulletin board of the main building, compel us to draw the attention of the student body to it once more. Such acts of mutilation are perhaps to be expected of the younger and less learned members of the lower classes. However, these acts are not strictly confined to these two classes, for it seems to be the ambition of certain students from all the classes to display their erudition and wit by adding postscripts to the notices posted upon the board and also by posting false notices. It is our desire that the upper class men, by refraining from these acts, set a good example to be followed by those who will soon fill their places, and the disrespect shown to the officers of our organizations and to our professors will be done away with.

We sincerely hope that this will be the last occasion upon which we shall be obliged to call attention to these misdemeanors.

## The Prospects of New England farming

---

THE welfare of New England farming is an important question to the country, and most vital for the people of New England. The importance of it is evident but the prospects of success are often doubtful, especially to men lacking the power of observation, or who are not acquainted with the work done by the Grange, the Dairy and Pomological Associations, and other agricultural societies in co-operation with the agricultural colleges and experiment stations.

The work of these farmers' organizations and institutions is very valuable. Thus they have shown us what can be done when some knowledge and education are mixed with the soil, and it is noticed by a great many people; yet it seems that only an outsider can judge and appreciate the great work of these meetings.

If you should transfer yourself to some other place, or to another country where the farmers' meetings and associations do not exist, the things which you observe would cause much sympathy for that place, and a feeling of great joy for your own community. The lack of prosperity and prosperous farmers is noticed at once. The farmers do well while the land is fresh and naturally rich; but as soon as

the cream or the excess of available plant food is taken from the soil, they begin to decline, little by little; and in the end only a few who have special ability and observing power, continue to prosper, and selfishly view the starvation of their neighbors and the community at large. If some of the poorer people begin to look in and observe the prosperity of their neighbors, there are usually enough swindlers, who are just waiting for their opportunity to fool the ignorant "hay seed." Thus the farmer, after dealing once or twice with a dealer in fertilizers, who sells him 90 per cent. of earth for a double price, or with an agent of a seedless apple, soon loses all faith in advancement and plunges into ignorance and inactivity. If, for example, the farmers in Russia had such communities and associations as the farmers have here, they would not need to face famine and appeal to the humanity of other countries for help.

Now turn back to your own hills; can anything be more instructive to you than to see on the platform a man like T. B. Terry, the Clover King of Ohio? Decorated with gray hairs and in the sunset of his life, telling a few hundred farmers what he did and how he did it. We can say he is one of the faithful knights of agriculture who has left the city with all its temptations, and has gone to the country to struggle with, and to conquer Nature. He has succeeded. Now he comes from the West to tell his New England brothers what he has accomplished, and to prevent them from making the blunders that he made, and to encourage them to continue the fight with inconvenient surroundings, and to succeed.

The attention paid to the speaker is uniform among young and old, full of desire to get all the healthful information possible. For instance one of the front seats is occupied by an old man; he has lived his life; his days are numbered; he can hardly keep his eyes open; yet he listens with attention and tries to catch every word, and asks questions every time his line of thought gets confused. Now he interrupts the speaker with an inquiry: "What is humus?" He has heard many times and knows himself very well what humus is, but he thought that he himself had given a wrong definition to this important word and that it was, therefore, the reason for his failure. He had been struggling all his lifetime, but he was not so successful; so he came to find out where he was wrong. He did not give up the idea of success; he has the spirit of our great-grandfathers, who had fought for independence. Such an enthusiasm and love for the farm is pleasing, and here the young men ought to take an example of devotion to an ideal.

The same enthusiasm is noticed in all the farmers' meetings. People come from North and South, East and West to tell each other their experiences in different branches of agriculture. But the

main theme of their discussions is how to attract the younger generation to the soil, those who are the main factors for the good prospects of farming; how to make them stay on the farm and to reclaim the abandoned farms. Careful observation will show that the prospects for the old farmers to keep the younger generation on the farm and the opportunities for the young men to stay on the farm, were never more promising than they are now.

Let us first consider why the younger generation have left the farms. If we will go back to the time when our country was first settled, we find that the pioneers were nothing but farmers, who, as soon as they had cleared the land and scratched the ground with the wooden plow, had planted corn. The crop grew well and gave good results. When the population grew larger and the country became more settled, there came many opportunities where the young man could employ himself better than on a farm. It was necessary that he should leave the farm, because otherwise the country could not exist. There was an abundance of raw products and factories were needed for making them available; ships and trains were required to carry the raw and finished products to the different parts of the country.

The last and main reason was that the young men, as is every civilized and prosperous country, were striving for education. They were looking for a place where they could employ their brains as well as their muscles. They could not very well show their mental ability on the farm, or better, did not know how, because the soil was rich and fertile, and no effort was needed to get good crops. They had seen new fields for development, where they could give their brains an opportunity to work, and become great men. They began to invent; they have gone into the mines and forests; have built railroads and steamboats; have established telegraphs and telephones; have created markets and large cities, and have developed our country to the extent we see it at the present time.

One of the noted financiers has recently said that every enterprise, no matter how successful, always comes to a reaction point. Mr. James J. Hill, the railroad magnate, expressed the same thing in different words in the address, "The Nation's Future." "Our great resources are four—the sea, the forest, mines and the soil. \* \* \* From the sea we can draw little more. Forests are disappearing. Mines, coal and iron. Coal will last for fifty years; iron for less. The sea, forest and mine have reached, or will soon reach, their limits. There remains the soil. This is the only asset that does not perish, because it contains within itself the possibility of infinite renewal."

We can also say that the inventions have almost reached per-

fection in all fields except farming. It is not necessary to know much about electricity or engineering to run a factory. Everything is adapted to its purpose. Learn a dozen rules when and which button is to be pressed and the factory is in operation. A child of 10 years takes the place of a full-grown man. It does not require an educated man to run an electric engine. A man who can hardly read learns a few rules necessary to operate the controller and the car goes. We cannot say that it does not require any sense or brain—but there is no place for initiative. It is merely a matter of strength and common sense, and often strength is also an unnecessary factor, as with the child in the mill.

Now comes the time to return to the soil, which is the last and inexhaustible source. It is true that the cream was taken off. The farms were run down and abandoned, but all this only opens a new field for work, a new field to show your mental ability as well as to improve your physical condition which was neglected in the chase for success in the cities and mines. It is true that many machines were invented and much was discovered in agricultural fields, yet there is much work left for the enterprise of intelligent and active mind. We cannot press the button and let the plow dig our fields. It is necessary to know where, when, and how to do it. There are many things in farming in which you can follow the rules set down by others, but you must apply your own judgment—your own brains.

This above mentioned fact is one of the most important. It is the reason why the young men are now coming back to the farm, and why they will all come back to the hills of New England, because they recognize where they can apply their education to good advantage. They have recognized that now it is not a question of the number of acres, but how much you can produce from an acre; that it is not a matter of quantity only, but also of quality. Another reason, and the last, is that the factories which the same young men developed, demand now from them the raw material to carry on their work; the railroads and steamboats they built require products to transport; and the people whom they have attracted from the whole world, from all ends of the globe, are demanding food and clothing; and they all together command the young generation to go to the farm.

Observing all the facts mentioned you will see how good are the prospects for New England farming, and how great is the value of the farmers' institutes to their community, as well as to the whole country. Only one thing is left for them to continue the promotion of agricultural education, and to introduce in the public schools and in the high schools the study of the principles of agriculture, so that the boys and girls from childhood should have a glance into Nature.

They should imbibe the love for Nature and the understanding that they may become great and useful citizens to their country by getting the broadest education and living on the farm working the soil, as they would live in the city and work in any other line. That they can achieve more by mixing their educated brains with the soil, and though their hands may become dirty, their hearts will be clean.

G. W. SIMON, '07.

## Alumni Notes

**A**MONG the large attendance at the Junior-Senior banquet, were the following alumni: C. A. Wheeler, '90; J. N. Fitts, '97; H. L. Garrigus, H. O. Edmond, '00; G. H. Lamson, '02; Miss Elizabeth Donovan, '05; S. P. Hollister, '05; Miss Grace Seage, '06, and W. W. Ohlweiler, '05.

The meeting of the Quinebaug Pomona Grange with the Mansfield Grange was held at the College May 25th. About one hundred and thirty members were in attendance. The following alumni were present: C. B. Pomeroy, '90; Warren, '94; Fitts, '97; H. L. Garrigus, '98; B. H. Walden, '99, and Pearl ex. '05.

'90. C. A. Wheeler spoke well at the Junior-Senior banquet, his subject being "Love of Money."

'97. J. N. Fitts also spoke well at the same banquet upon "Action and Reaction."

'98-'05. H. L. Garrigus and Sherman P. Hollister attended the Yale-Brown baseball game at Providence, May 30

'99. E. C. Welden, who is employed as civil engineer by the Mexican Central Railroad, is at home on his father's farm in Scotland, Conn., for a short vacation.

'02. One of the best speeches at the Junior-Senior banquet was given by Prof. G. H. Lamson, Jr., his subject was "In and Out of Rome."

'05. Charles W. Dewey, who has been teaching in Burnside, has been secured to teach in Wapping High School.

'05. At the annual business meeting of the Engineering Society of Brown University, I. W. Patterson, '09, was elected vice president for the ensuing year.

'05-ex '06. C. W. Dewey and Barnes were at the college for the Junior-Senior banquet.

Dairy '07. Thompson has been appointed to the position of cheesemaker to fill the vacancy left by the departure of T. W. Issajeff.

Ex '09. Turkington has returned to his home from the Philadelphia School of Dentistry, for the summer vacation.

## Department Notes

---

THE coming field meeting of the Connecticut Poultry association at Storrs will probably be an event long to be remembered. The meeting is to be held at the poultry grounds of the College, on the 24th day of July. Professor Rice of Cornell University will speak, and Horace Atwood of the West Virginia Experiment Station will also address the meeting. Special railroad rates have been secured for those wishing to attend the meeting, and it is expected to be one of the largest field meetings ever held at Storrs.

The Poultry Department has practically outgrown itself. The administration has expressed a desire that the plant have at least twice as many birds the coming year as it has had in previous years. Professor Graham has found that with the present space allotted to the Poultry Department, such a growth is out of the question. At the present time one piece of land has three kinds of tenants, Professor Clinton's sheep, Mr. Garrigus's calves and about a thousand chickens.

Mr. C. L. Harris's services have been secured for the summer months to take up a special line of poultry investigation.

Professors Clinton and Gulley attended the semi-centennial anniversary of the Michigan Agricultural College, one of the oldest in this country. President Stimson was also present, and delivered an address, representing the East.

Mr. Dox of the Experiment Station recently addressed the Biological Society of Yale.

## Athletic Notes

---

### CONNECTICUT 16, BULKELEY 8.

CONNECTICUT won an easy victory on May 8th over the Bulkeley School at New London.

The game was slow and the playing ragged on both sides. Conzelman pitched his first game for Connecticut and not a hit was made off him in the first seven innings, and but four in the eighth. He then retired in favor of L. Marsh. This was certainly the bad inning, as Bulkeley secured seven runs. Captain O'Neil was in the box for the Bulkeley boys. Connecticut took very kindly to his benders, securing eighteen hits off his delivery. This is the first victory for Connecticut this season. The team showed a marked improvement in their hitting. Bacon, the Bulkeley catcher, split his finger in the

BASEBALL TEAM 1907.

third inning and was forced to retire. Vance's batting was the feature of the game, he getting five hits out of seven times at the bat. The line-up:

## CONNECTICUT 7, WILLISTON 8.

Connecticut lost a close game on May 11 to Williston at Easthampton. The game was loosely played and was called at the end of the fifth inning as our team had to catch the train. Connecticut started off with a rush, scoring five runs in the first inning. In the second Williston sent four men across the plate. There was no more scoring until the fourth, when Connecticut scored two runs, and Williston four. The game was certainly a hard one to lose. Dasey, who pitched for Williston, was hit hard throughout, twelve hits being made off his delivery. Marsh only allowed four hits, but gave six bases on balls. Murphy's fielding was the feature of the game; he made a sensational catch in the second inning of a line drive that looked good for three bases. The line-up:

## CONNECTICUT 5, RHODE ISLAND 4.

Connecticut defeated the team representing Rhode Island on May 18 at Storrs. The game was very fast and exciting from start to finish, both teams playing very snappy ball. Rhode Island started the scoring in the second inning, when they scored three runs through a base on balls, a hit and three costly errors. They also scored one more in the fourth, and things began to look doubtful for Connecticut. But the fun began in the fifth, when Connecticut came to bat. Vance started with a pretty single and then stole second, Purple was out on a fly ball to second base. Then H. Marsh got a hit which scored Vance. The next three men up all made hits, scoring three more runs. Kendricks retired in favor of Crandall. Miller scored on Murphy's hit to left field, giving Connecticut one run to the good. The rest of the game was a pitchers' battle in which neither side scored. Marsh pitched a great game for Connecticut, allowing but three hits and striking out six men. Smith played the best game for Rhode Island, while H. Marsh excelled for Connecticut. The umpiring of Mr. Patterson was very satisfactory to both sides. The line-up:

CONNECTICUT.							RHODE ISLAND.						
	AB	R	H	PO	A	E		AB	R	H	PO	A	E

Summary. Struck out—by Marsh 6, by Kendricks 5, by Crandall 1. Bases on balls—off Marsh 4, off Crandall 1. Umpire, Pattison. Scorer, Wemett.

## CONNECTICUT 11, NORWICH FREE ACADEMY 1.

Connecticut had no trouble in defeating the team representing the Norwich Free Academy on May 25th. The game was far too

one-sided to be interesting. Connecticut played fine ball, both in the field and at the bat, no errors being chalked up against the team. Norwich's playing was very ragged at times and they were unable to hit Conzelman. Norwich scored their only run in the ninth, when they made two hits and got a base on balls. Conzelman was in the box for Connecticut and pitched good ball, allowing but four hits and striking out six men. Pierson was very effective until the eighth inning, only four hits being made off him up to that time. In the eighth he was touched up for eight hits, and was forced to retire in favor of Wilber. Mr. Vinton, as umpire, gave good satisfaction. The line-up:

CONNECTICUT.							NORWICH.						
	AB	R	H	PO	A	E		AB	R	H	PO	A	E

(Struck out—by Conzelman 6, by Pierson 1. Bases on balls—off Conzelman 2, off Pierson 1. Umpire, Vinton. Scorer, Stack.

### CONNECTICUT 5, WILLIMANTIC 4.

Connecticut won a close game on Decoration Day from the Kirby team of Willimantic. The game was fast and exciting. Willimantic started off well by getting two runs in the first inning. Connecticut got one run in the first and one in the second, which tied the score. There was no more scoring until the sixth, when Willimantic scored two, and Connecticut scored one. Connecticut practically won the game in the seventh, when they made two runs on singles by Vance and Miller and a pretty two-bagger by Conzelman. L. Marsh pitched the first six innings and then retired in favor of Conzelman. Conzelman was in fine form, allowing no hits and striking out eight men in the last three innings. Doyle pitched good ball, allowing eight hits and striking out three men. Vanasse played the best game for Willimantic, both in fielding and at the bat. The line-up:

Two base hit—Conzleman. Struck out—by Marsh 5 by Conzleman 8, by Doyle 3. Bases on balls—off Marsh 2, off Doyle 1. Base on balk—off Marsh 1. Umpire, Dr. Lehnert. Scorer, Stack.

## CONNECTICUT o, DEAN ACADEMY 3.

Connecticut received a defeat at the hands of the strong Dean Academy team on June 1st. It was the first time Connecticut has been shut out this year. The defeat resulted from inability to hit either of the pitchers used by Dean. Dean played very fast ball from start to finish and hit the ball when hits were needed. Conzelman pitched a steady game for Connecticut, allowing but seven hits and striking out six men. Dodd pitched seven innings for Dean and allowed but three scattered hits; he was replaced in the eighth by Barnicle, who did not allow a hit. The game was one of the fastest seen here this year. The line-up:

## College Notes

**M**ILLER recently skipped Latin class and explained his absence by saying he was obliged to attend Mr. Savage's auction in order to buy his household furniture. We are now convinced that women are not the only ones who snap up bargains.

Sunday, May 12, Miss Grant and Miss Hubbard walked to Mount Hope.

Did Stack like the pie served to the Williston Seminary boys, or does he believe in the saying, "Three times and out?"

Until recently, Briggs was satisfied with the work of the domestic science students at the Cottage, but now, when he wants torn pockets mended, he applies at the Experiment Station office and finds that even this line of work is carried on there.

Heard on the tennis court:

Miss B.—"Ugh, why doesn't it go over?"

Mr. L.—"Put a little more ginger it in."

Spectator—"Ugh, her hair!"

Is the drum the only thing Stack beats? "We beats it" all the time, how about him?

Miss Raisch spent Sunday, May 12, at Hank's Hill.

Those who attended the Junior-Senior banquet and were Cottage guests, May 24, were Miss Watrous of East Hampton, Mrs. and Miss Sanford of Bridgeport, Miss Barrows of Hartford, Miss Reed of Broad Brook, Miss Inglis of Middletown, Miss Gallup and Miss Keller.

Tuesday evening dance hour at the Cottage was observed May 28, as the rain during the day made it impossible for the young ladies to enjoy their usual pleasant evening on the tennis court

Bird books and field glasses are quite the vogue at the Cottage now. The latter are sometimes convenient to focus on songsters which do not inhabit trees.

The appearance of the croquet set was hailed with delight by some of the Cottage inmates and others who do not indulge in fennis.

The evening class in private dancing lessons is progressing nicely, and by commencement time the pupils will doubtless be prepared to trip the light fantastic with the others.

---

### THE JUNIOR-SENIOR BANQUET.

The Junior-Senior Banquet was held May 24th. The first part of the program consisted of a dance of nine numbers. The hall was prettily decorated with flags, evergreens and class bunting.

After the dance was over a grand march was formed, led by Professor E. O. Smith, followed by the class presidents, members of the Senior and Junior classes and their friends. The grand march led from the College Hall to the dining-room. The dining-room was decorated with apple blossoms and evergreens. An elaborate dinner awaited the guests.

Professor E. O. Smith was toastmaster and introduced the speakers in the following order:

1. Address of Welcome ..... H. E. Marsh, Junior President
2. Response ..... E. M. Stottard, Senior President
3. E Pluribus Unum ..... President Stimpson
4. Clams ..... Professor H. R. Monteith
5. Love of Money ..... Professor C. A. Wheeler
6. Searching for the North Pole ..... Professor L. A. Clinton
7. In and Out of Rome ..... Professor G. N. Lamson, Jr.
8. How We Moved ..... Professor A. G. Gulley
9. Action and Reaction ..... Professor J. N. Fitts
10. Education and the State ..... Lieut.-Governor E. J. Lake

Professor Gulley was obliged to be absent from the speaking because of making arrangements to start for Michigan the next day. Lieutenant-Governor Lake was unable to attend.

The following guests were present from out of town: Miss Barrows, Miss Monteith, Mrs. Dietrich, Hartford; Mr. and Mrs. C. A. Capen, Miss Gallop, Willimantic; Miss Reed, Broadbrook; Mrs. and Miss Sanford, Bridgeport; Miss Watrous, East Hampton; Miss Inglis, Middletown; Miss Kellogg, Danielson; Mr. E. L. Brown, Norwich.

---

Professor Graham entertained the Junior Class, Friday evening, May 10th, at his home.

A large number of the faculty went to Hartford to attend the meeting of the legislative committee on appropriations.

The Rhode Island State College baseball team was entertained at Storrs Hall, Friday evening, May 18th. After the baseball game Saturday a short dance was held in the College Hall.

The Sophomore Rhetoricals were held Wednesday, May 15th, with a program of sixteen numbers and a musical selection by Misses Olin and Raish.

A joint meeting of the Quinebaug Pomona Grange, with Mansfield Grange, was held in College Hall, Saturday, May 25th. About one hundred and fifty delegates and members were present from neighboring granges.

The morning program consisted of the business meeting. The afternoon program commenced at 2 p. m., and consisted of an open meeting in which several selections, both instrumental and vocal were rendered by the students of the College.

The Sophomore-Senior Dance was held in College Hall, May 17th. The hall was prettily decorated with class flags and bunting. A dance program of twenty numbers was rendered.

A number of the members of the legislative committee of appropriations visited the College recently in automobiles.

The baseball game that was to be played with the Hotchkiss School, at Lakeville, was cancelled on account of rain.

At a meeting of the baseball team held recently, A. E. Miller, the former captain, resigned. H. W. Wooden was elected as his successor.

Messrs. Pomeroy and Hurlbert, who have been absent from College on account of illness, have returned to College duties again.

Professor and Mrs. L. A. Clinton, Professor and Mrs. A. G. Gulley, and President Stimson went to Lansing, Mich., May 25th.

President Stimson went to represent the College and Experiment Station at the annual convention of the Association of American Agricultural Colleges and Experiment Stations, that was held in connection with the semi-centennial celebration of the Michigan Agricultural College.

After winning the Rhode Island baseball game there was one of the usual evening celebrations and torch-light parades. The parade was led by our worthy bugle sergeant and his band. Of course there was a bon-fire and the surrounding woodpiles had to suffer.

The score of the game was conspicuously painted about the campus by some the College artists for the convenience of future generations of students. The party were, later in the evening, treated to a large bunch of bananas, Mr. Proudman being the donor.

Roger Briggs has been confined to his room with the mumps. We are all glad to see his smiling face about again.

---

#### GLEANINGS FROM THE BASEBALL GAMES.

One of the girls wished to give a cheer for Arthur, but the others objected as they had their particular Clifford, Joe, or Harry in the game.

Some of the stags get a chance while the ball game is in progression.

The band was out to the Rhode Island game.

Joe being a star pitcher has won his laurels at the Cottage.

Wooden deserves an honorable mention from over the hill.

---

A large party of students went to a circus recently at Willimantic and returned by automobile; some of them, as usual, were taken in. Cupid was so enraptured with the surroundings that he intends to join a side show this summer.

Any one wishing a liniment for the face, guaranteed to toughen the skin and improve the complexion, should apply to Josh Cohen, Storrs Hall.

Loveland says he can learn elocution best on sentinel duty.

The Sophomores scored the third victory over the Freshmen, Decoration Day, in the last cannon rush of the season.

The Sophomores had three more men than the Freshmen or without a doubt the Freshmen would have won the rush.

Mr. Hallock wishes to notify Mr. Purple that he does not intend to run an *orchestra* and therefore he cannot support a *second fiddle*.

A certain student was overheard in conversation with a co-ed. He said, "When I get married I will try to marry a cooking school graduate." Would she come from Storrs, Briggs?

ONE ON DOMESTIC SCIENCE.

Little troutlets in a brook,  
Purple, catch them with a hook,  
Pauline, fry them in a pan;  
Now they'll eat them—if they can???

Be sure and take a look at Miller for all the latest styles in men's furnishings; he will also give you any desired information on how to develop a perfect figure. Interview him any where between Storrs Hall and Beebe's store, from 7.00 a. m. to 9.30 p. m.

The Professor was discussing social affairs and the reluctance of men towards making calls. "What man," said he, "loves to go calling."

Then up spoke English in all truthfulness, "I do."

The Professor of Physiology announced that a woodchuck would be dissected for laboratory work.

All right, piped up Stack, "we'll disinsect him."

---

CADET OFFICERS AND NON-COMS 1906-7.

Commandant, T. W. D. Edmond; Captain, A. E. Miller; First Lieutenant, T. B. Reed; Second Lieutenant, H. F. Barber; First Sergeant, M. W. Falk; Quartermaster Sergeant, E. M. Stoddard; Color Sergeant, W. W. Lehneider; Second Sergeant, C. S. Watrous; Third Sergeant, C. F. English; Fourth Sergeant, E. J. Buchtenkirch; Fifth Sergeant, F. A. Rathgeb; Corporals, J. A. Gamble, C. L. Woodruff, N. W. Purple, M. B. Griswold, R. T. Beanain, F. S. Morris, L. Lynch.

---

CADET OFFICERS.

June 10, 1907.

The following men are appointed officers and non-commissioned officers in the Connecticut Agricultural College Cadet Company: Captain, C. W. Bonner; First Lieutenant, C. T. Woodruff; Second Lieutenant, H. E. Marsh; First Sergeant, H. J. Bothfeld; Quartermaster Sergeant, O. P. Burr; Bugle Sergeant, G. H. M. Devine; Color Sergeant, C. E. Harris; Second Sergeant, J. E. Houston; Third Sergeant, N. W. Purple; Fourth Sergeant, M. H. Griswold; Fifth Sergeant, C. W. Pomeroy; Corporals, H. P. Hurlburt, S. A. Clark, G.

Cadet Officers 1906-1907.

Cadet Band 1906-1907.

M. Stack, G. B. Treadwell, J. Conzleman, R. Briggs, E. Garrigus, W. Storrs. To be obeyed and respected accordingly.

Per Order, H. D. EDMOND, Commandant.

---

#### THE BAND.

Leader, E. H. Lehnert; Drum Major, C. W. Bonner; Bugle Sergeant, E. Bemis; Bugle Corporal, G. H. M. Devine; First Cornets, G. H. M. Devine, R. E. Wadsworth; Second Cornets, S. A. Close, J. M. Brush; French Horn, E. H. Lehnert; Baritone Horn, E. Bemis; Bass Horn, J. B. Ashcraft; Clarinet, F. H. Rose; Trombone, J. M. Fitts; Drums, P. H. Murphy, G. M. Stack; Base Drum, J. H. Pierpont; Cymbals, A. G. Clark.

x x x

#### Our Seniors

---

**H**OWARD FRANCIS BARBER was born at East Windsor, Aug. 2, 1888. He entered the class in the freshman year. He was a member of the Eclectic Literary Society and vice-president of the class. He was second lieutenant in the military company. He intends to be a farmer.

MERRIL NELSON FALK was born at Merril, Mass., in 1885. He joined the class in the junior year. He was president of the Students Organization, first sergeant of the cadet company and a member of the Eclectic Literary Society which he served as president in the winter term of the senior year. He intends to be a landscape gardener.

RUDOLPH THOMAS BEAUPAIN was born in New York City, on Aug. 24, 1888. He resided there two years, when his parents moved to Bethel, Conn., his present home. At Bethel he attended the public school and High School where he graduated in 1905. The summer after graduating from High School, Beaupain sought work in gardening and that fall entered the College to study along the same line of work. After graduation "Bopeep" intends to work on a large market garden and fruit farm near Bridgeport where he expects to fit himself for his life work.

EARL BEMIS was born at Woodstock in 1884. He entered the class in its sophomore year from the Woodstock Academy. He was bugle sergeant, president of his class in the junior year and a member of the Eclectic Literary Society. He served as president of this society in the spring term of the present year. He intends to be a farmer.

PATRICK HENRY MURPHY was born at Essex, Conn., Dec. 25, 1887. From the Essex High School he entered the class in the junior year as a mechanical student. He was a member of the baseball, football, and basketball teams; also a member of the Eclectic Literary Society and the College band. He intends to be a civil engineer.

EDWIN JAMES BUCHTENKIRCH lived in New York City from June 30th, 1884 until 1905, when he came to Storrs taking the two years' Horticultural course. His preparation was at the DeWitt Clinton High School of New York City. He was a sergeant in the cadet company. He will enter a floral establishment at Southport after leaving C. A. C.

CHESTER F. ENGLISH was born in Sivar, Turkey, April 28th, 1888. Becoming dissatisfied with the life in Turkey, he removed to East Windsor, Connecticut, and there received his early education. The store of knowledge in East Windsor being insufficient for him, he went to Monson Academy, but here also he was dissatisfied. In 1905, he entered this College and finding the conditions satisfactory decided to remain. Having time to spare he went out and successfully made the football and baseball teams of the year 1906. He butted into the fusser's club at the first favorable opportunity and is at present one of the most prominent members of that organization.

He became a member of the College Shakesperean Club on the night of September 27th, 1906.

After leaving this College he intends to study medicine at Dartmouth.

CORA DUNHAM GRANT was born August 12th, 1887, in Mansfield, Conn. Her early education was received in Mt. Hope District School. She entered the Connecticut Agricultural College in the fall of 1903 and took up the Domestic Science Course, but became a special student in her Sophomore year. Cora has always been popular among her classmates and friends and her cheerful disposition has been a bright spark to enliven the College life of her companions. She played forward on the basketball team and has worked hard for four years in the interest of the team. Cora's ability to cook is well-known and her skill with the needle has been well attested. She was vice-president of her class in the junior year and played 'cello in the orchestra in her freshman and sophomore years. She has not as yet decided what offer she shall accept for next year.

CLIFFORD SELLEW WATROUS was born in 1888, in Moodus, Conn. He received his education in the schools of the town and in the fall of 1903 entered the freshman class at Connecticut. He is a member of

the College Shakesperean Club into which he was initiated Jan. 24, 1904. He played on the football team in '04, '05, and '06, and was captain during his senior year. He was a member of the basketball team during '05-'06 and '06-'07, and a player on the baseball team for four years, '04, '05, '06, and '07. During the past year he has been business manager of THE LOOKOUT. He will study surveying.

CHARLES MORTON WEMETT was born at Rockville, Dec. 10, 1888, and entered the class in the freshman year. He was the youngest member of the class. He was a member of the Glee Club and of the Eclectic Literary Society and served as vice president in the senior year. Although he never made any of the athletic teams, he refereed many basketball games. He expects to study civil engineering.

STANLEY BURDETT REED was born at Broad Brook, Sept. 9th, 1887, he was very popular among the students and was cheer leader in athletics. He was secretary of his class, president of the Eclectic Literary Society in the fall term of the senior year, and first lieutenant of the military company. He intends to be a landscape gardener.

HERBERT GILBERT HALLOCK was born Jan. 10, 1889, at Washington Depot, Conn. He received a common district school education and shortly after leaving the district school he spent a year at Upson's Seminary at New Preston, Conn. Mr. Hallock entered the Connecticut Agricultural College in the fall of 1904, choosing the agricultural course of study. He is a member of the College Shakesperean Club, into which he was initiated Nov. 11, 1905. Other offices he has held during his stay at College are, manager of 1906 football team and Alumni editor of THE LOOKOUT. Upon graduation Mr. Hallock expects to return to his father's farm at Washington Depot, Conn.

LENA MAY HURLBURT was born in Litchfield, Conn., Oct. 23, 1884. Shortly after her birth her parents moved to Waterbury, where she has resided since. Her early education was obtained in the Lincoln Street School, the Gerard School, and the Crosby Grammar School. She attended Monroe's Business College in 1902 and entered the Connecticut Agricultural College in the fall of 1903. Miss Hurlburt selected the General Science course and pursued her studies vigorously throughout her course. She has held the office of secretary and treasurer in her class, played guard on the basketball team and was captain of the team of '06-'07, took second Botany prize and second Hicks prize in her Sophomore year, and received the distinction of being the first girl to hold an office on THE LOOKOUT board, being college note editor of Vol. XI.

She expects, after graduation, to follow the lead of several of

her predecessors and become a school ma'm in some little district school, where she will, without doubt, do justice to her freshman nickname, Ginger.

ARTHUR EDGERT MILLER was born in Rockville, Conn., Feb. 10th, 1886, and has lived there since. At the age of fourteen he went to work in a shop where he remained for three years. He entered the freshman class of C. A. C. in the fall of 1903, and became a member of the College Shakespearean Club on the night of Feb. 13th, 1904. He has always worked for the interests of athletics and the College. The following are some of the offices held by him: President of Athletic Association, vice-president of Students' Organization, class president '04-'05, captain of military company, captain of basketball team, captain of baseball team, editor of department notes. He intends to complete his education at Dartmouth.

FRANK S. MORRIS was born in Wethersfield on October 11, 1887. His education before entering C. A. C. was obtained in the public schools of Wethersfield. After graduating from the Wethersfield High School, in June, 1905, Mr. Morris entered the class of '07 in the junior year. He has followed the horticulture line of study taking as special subjects, celery and lettuce. While at College he has distinguished himself as a tennis player, hunter and fisherman. After graduation he intends to help his father in market gardening.

About nineteen years ago F. A. RATHGEB, better known among us as "Kibbe," was born in the town of Danbury, Connecticut. The early years of his life were spent in that town where he attended the grammar school and then the high school. He finally became possessed of the idea that he would like to become a horticulturist. In the fall of 1905, therefore, he entered the junior class at the Connecticut Agricultural College. At the end of his junior year, feeling that he must in some way rid himself of some of his pent-up energy, he secured a position as waiter at a Block Island hotel, where he remained during the summer. In the fall he returned to Storrs as an exalted senior and following the custom of his class, handed in his application to the Storrs matrimonial agency; but being of a rather fussy nature he failed to meet his affinity until rather late in the year.

After leaving College he expects to become a nurseryman in which work we are sure he will make a success. He is a member of the College Shakespearean Club which he joined the night of December 5th, 1905.

HENRY WALTER SCHNEIDER was born at Hartford, Conn., 1884. He entered College in the junior year. He was an expert violin player

LADIES' BASKETBALL TEAM.

MEN'S BASKETBALL TEAM.

and a member of the College orchestra. He was color sergeant in the cadet company and corresponding secretary of the Eclectic Literary Society. He intends to be a landscape gardener.

WALLACE LYNCH was born Jan. 7, 1886, in Brooklyn, N. Y. His education before entering College was obtained in the grammar schools of Brooklyn. He spent two years in the Boys' High School of that city.

In the fall of 1905, he entered the Horticultural Course of the 1907 class. Mr. Lynch is a member of the Eclectic Literary Society and a member of the '06 football team. He intends to be a landscape gardener.

GEORGE WILLIAM SIMON was born in Berdiansk, Russia, in 1881. He came to this country in the fall of 1904 and spent eight months at the Baron Hirsch Agricultural School at Woodbine, N. J. Then he spent the summer on a farm at Derby, Conn., and entered the junior class in the fall of 1905. Mr. Simon has excelled in all his college work, both text book and practical. He is a member of the Eclectic Literary Society. He will remain at college throughout the summer as butter maker. He expects to become a teacher.

ROGER E. SPERRY, otherwise known as "Spud," was born in Clinton, Conn., twenty-four years ago this next July. He attended the public schools in that town and later the Morgan High School, from which he was graduated. In the fall of 1904 he entered the Connecticut Agricultural College, taking up horticulture as a study. "Spud" early developed a fondness for animals and it is said that he sometimes brought snakes and frogs to school for the amusement of the small girls. However, he has outgrown these tricks and since coming to Storrs has led a quiet and sequestered life, issuing from his seclusion only at long intervals to attend a dance or take a hand in a game of whist.

He will probably return next year for special studies and will then enter upon some line of horticulture.

ERNEST MARION STODDARD was born in 1889 in the town of Litchfield, Conn., where he now resides. He obtained a district school education before entering the Litchfield High School, from which he was graduated in 1905. In the fall of 1905 Mr. Stoddard entered the junior class of the Connecticut Agricultural College; while here he has been a member of the College Shakespearean Club, holding the office of president in the fall term of his senior year. Among other offices held are editor-in-chief of THE LOOKOUT and class president.

Mr. Stoddard expects to take up post-graduate work at the college in the fall of 1907.

## Exchanges

---

**P**LEASE pass me "*The Review of Reviews*," he said;  
 The landlady's eyes did flash,  
 For another boarder looked absently up,  
 And solemnly passed the hash.

—Ex.

E. Stone—"Mr. Williams, how long can a person live without brains?"

Mr. Williams—"Oh, I don't know—how old are you?"—Ex.

Teacher (speaking of Ottawa)—"Can you see the city from where you are sitting on the map?"—Ex.

Teacher—"Will, you are tardy this morning."

Will—"Teacher, it was so slippery that every time I took one step forward I slipped back two."

Teacher—"Well, if you slipped back two steps every time you took one forward, how do you account for the fact that you are here at all this morning?"

Will (smiling)—"I walked backwards."—Ex.

Professor—"What came before chapter V. in our lesson?"

Freshman—"Chapter IV., I think."

If a toper and a quart of whisky were left together, which would be drunk first?—Ex.

"Sambo, did you ever see the Catskill mountains?"

"No, sah, nebber, but I've seen 'em kill mice."—Ex.

Professor—What is electricity?

Student—I knew last night, but I can't remember just now.

Professor—Ye Gods! The only man who ever knew has forgotten.—Ex.

Skiddoo unto others as you would have them skiddoo unto yu.—Ex.

Teacher—"What animal is satisfied with least nourishment?"

Willie—"The moth—he eats holes."—Ex.

He—"Love is like a trunk."

She—"How?"

He—"There's always someone ready to express it."

She—"Is that the only similitude?"

He—"As far as I know. Do you see any other?"

She—Yes, if it isn't checked, it is apt to go too far. Good night, sir.—Ex.

# United States Cream Separator

**CLEAN SKIMMING**  
**EASY RUNNING**  
**LONG WEARING**

THE THREE ABSOLUTELY NECESSARY QUALITIES.  
But *all* separators do not have them *ALL*.  
**Cream is money.** If your separator  
doesn't skim clean, you lose money.  
Then you don't want a hard running  
machine to turn twice a day.  
And to be permanently profitable, *your*  
separator must be durable.

The United States Separator gets **ALL** the cream.  
Holds the **WORLD'S RECORD** for Clean Skimming.  
It turns easy—many users say **EASIER** than others.  
Time has conclusively **PROVED** its durability.

New London, Wis., Nov. 8, 1906.

To whom it may concern :

The undersigned has used the U. S. Cream Separator for fifteen years and it has given perfect satisfaction and has cost nearly nothing for repairs. I can recommend it to any one needing a separator as being a very close skimmer and an easy running machine.

JOHN SIEGEL

Grant Park, Ill., Mar. 26, 1907.

We are pleased with our No. 6 U. S. Separator. I have a little boy 8 years old and little daughter 11 years old that often turn my machine with perfect ease. My wife who is a small woman, weighing about 120 pounds, runs my machine about one-third the time since I bought it.

HENRY WILLE.

Write us to "Send new 1907 Separator Catalog No. 29." The many pictures show every detail of the construction and operation of the U. S. It is **Free** to every one looking for the best separator. Send to day and ask for No. 29.
