COMMENCEMENT

2004

COMMENCEMENT

I congratulate the members of the Class of 2004 and your families on the achievement we mark at this Commencement ceremony.

These have been extraordinary years at the University of Connecticut, characterized by dramatic progress and growth. The university you leave today looks very different from the one you came to just a few short years ago. Our campuses, still in the process of physical transformation, are now among the most attractive and advanced in the nation. UConn's capacity to generate new knowledge through research has expanded, private support has grown exponentially, and the quality of student life has increased. Most important, our academic program has grown more exciting and more challenging with every passing year, guided as always by an extraordinary faculty dedicated to the process of teaching and learning. Historically a leading university in our New England region, the University of Connecticut has now moved to a position of national prominence, and the prospects for the future have never been brighter. You yourselves have played an important role in the University's progress. We have been privileged to count you as part of our community.

Just as the University is changing, so is the world around us. You come of age at a time characterized by international conflict, economic dislocation, and rapid social and demographic change. The challenges are tremendous; so are the opportunities. I am confident that your education has prepared you not only to build a constructive future for yourselves and your families, but to work toward a more equitable, just, and peaceful world. I urge you to use what you have learned here, and your own natural talents, to the fullest extent possible for yourselves and for society as a whole. In so doing, you will more than repay the investment in your future made by your professors, your parents, and the people of Connecticut.

Best wishes for an exciting and happy future.

COMMENCEMENT NOTES

COMMENCEMENT DAY at The University of Connecticut is a time of ceremony and pageantry, portions of which represent traditions dating back to medieval times. These notes on the history of the University and the commencement ceremony are offered in the hope that they will be of interest to spectators.

THE UNIVERSITY OF CONNECTICUT WAS FOUNDED as the Storrs Agricultural School in 1881 when the General Assembly accepted a gift of money and land from Charles and Augustus Storrs, natives of Mansfield. In 1893 when it became a land-grant college and officially opened to women, the name was changed to Storrs Agricultural College. As the mission of the institution changed, its name was changed in 1899 to Connecticut Agricultural College. In 1933 it became the Connecticut State College. It grew slowly becoming a small but vigorous college with limited undergraduate offerings in agriculture, home economics and mechanical arts. With the development of a university program it became The University of Connecticut in 1939. The first regional campuses were established in 1946 to deal with the influx of veteran students. Today, the University is made up of sixteen different schools and colleges. Through the various agencies of five Divisions and seven Institutes, including forty-nine Special Facilities, Programs, and Centers, the University is privileged to serve many State citizens. The Graduate program began in 1935, and in 1949 the University awarded its first doctoral degrees.

Enormous expansion has taken place over the years together with increased enrollment. Today, the University has an enrollment of over 26,620 students. At Storrs there are over 19,280 undergraduates and more than 6,000 graduate students, representing some 113 nations.

This year, the University will award over 5,400 degrees. Of these approximately 3,800 will be Bachelor's degrees, 975 Master's degrees, 130 Juris Doctor degrees, 8 Master of Laws degrees, 79 Doctor of Pharmacy degrees, 35 Doctor of Dental Medicine degrees, 69 Doctor of Medicine degrees, 1 Doctor of Musical Arts degree, and 276 Doctor of Philosophy degrees. Also to be awarded are 18 diplomas in Professional Education and 10 Associate's Degrees in the two-year Ratcliffe Hicks School of Agriculture.

THE COMMENCEMENT CEREMONY, because of the number of graduates, is divided into five separate exercises. The Schools of Dental Medicine and Medicine, located at the University's Health Center in Farmington, and the School of Law, located in Hartford, hold their own exercises. The Commencement procession in each of the three exercises at Storrs is heralded by the ceremonial trumpets which were obtained especially for the University commencement.

THE ACADEMIC PROCESSION begins with the heralding of the trumpeters announcing the arrival of the academic procession. The Bearer of the Mace leads the procession. The University Marshal, identified by his Baton, follows the President, together with the speaker, the Board of Trustees, vice-presidents, deans, other University officials, and faculty. The Mace is presented at the center of the stage while those processing enter and take their places. Once the Mace is placed on the stand it signals the beginning of the ceremony.

THE ACADEMIC GOWNS, HOODS AND REGALIA represent more than elegance or colorful attire. Academic caps and gowns represent a tradition which reaches far back into the early days of the oldest universities of the Middle Ages. The early European universities were founded by the church; the students, being clerics, were obliged to wear prescribed gowns and caps at all times. Caps and gowns were once common forms of clothing and were retained by the clergy when the laity adopted more modern dress. Though some universities here and abroad have other colors, the usual color for gowns in America is black. Hoods are lined with the official color of the college or university which conferred the degree. The velvet edging of the hood varies in length for bachelors, masters and doctoral degrees. The color represents the appropriate degree. Mortar boards (caps) are usually black. The tassel for the Bachelor of Arts, Science, and Engineering may be of color distinctive of the degree, and the tassel for the Doctor of Philosophy may be made of gold thread. The gown and hood of the University Marshal were made specifically for University ceremonies in the official colors of national flag blue and white. The Processional Marshals wear blue velvet "beefeater" berets; the School and College Marshals, who assist in conducting the ceremonies, wear blue Dutch caps.

THE MACE, carried by Professor Sally Reis, is used at all academic ceremonies. In medieval times maces were weapons of warfare, but today a mace is "a staff borne by, or carried before, a magistrate or other dignitary as an ensign of his authority." It is the emblem and symbol of the President's authority to administer the University. This mace was first used at the Inauguration of President Homer D. Babbidge, Jr., on October 20, 1962. It was designed by Nathan Knobler, former head of the Department of Art. The University's early seal, executed in beautiful wood carving, appears on both faces. A penny dated 1881 is affixed to it to commemorate the date of the University's founding.

THE BATON, carried by the University Marshal, Professor Keith Barker, was specifically designed for ceremonial activities at The University of Connecticut and was first used at the Commencement in 1968. The Office of Marshal can be traced back to the medieval period, and the Baton is a symbol of the Marshal's authority. This Baton has silver mountings and is surmounted by a representation of the University's former seal in enamel, which itself incorporates the coat of arms of the State of Connecticut. The University Marshal, carrying the Baton, follows the Mace Bearer as she leads the academic procession into and out of the place of ceremony.

THE SILVER COLLAR/MEDALLION, worn by Philip E. Austin, President, was first used in 1964, at the time of the University's Silver Anniversary. Each link on the collar represents one of the University's Schools or Colleges and consists of a cloissonné circle engraved with an appropriate design for the particular school and enameled with its traditional school or college colors. Hanging from the chain is a large silver medallion containing the University's early seal.

THE AWARDING OF DEGREES at The University of Connecticut is accomplished by a twofold process. First, the candidates for degrees of each respective school or college are presented by the University Marshal. The candidates proceed to the front, receive their diplomas, are congratulated by their administrative officers and return to their seats. The School or College Marshal then officially presents the candidates to the Dean who acknowledges the candidates and *declares* the appropriate degree. Second, when all candidates have been duly presented, the President of the University formally *confers* the appropriate degree. This is accomplished verbally at the time that he speaks the words:

"By virtue of the authority vested in me by the Trustees of The University of Connecticut, and in accordance with the procedures and regulations of the University, I confer upon you the Certificate, Associate's Degree, appropriate Bachelor's Degree, Master's Degree, Juris Doctor, Doctor of Dental Medicine, Doctor of Medicine, Doctor of Musical Arts, or Doctor of Philosophy for which you have been presented at this One Hundred and Twenty Second Commencement of The University."

THE RECESSIONAL of the officials and faculty is once again led by the Mace Bearer and University Marshal. The graduates, along with the audience, are requested to remain seated until the recessional is concluded.

*Out of respect and courtesy to all graduates, participants and guests
are requested to remain in their seats until the ceremony has concluded.*

DENNIS W. ARCHER *Doctor of Laws*

For Dennis W. Archer, the presidency of the American Bar Association is merely the latest in a long list of accomplishments. A native of Detroit, Mr. Archer graduated from Western Michigan University with a degree in Education and went on to the Detroit College of Law (now Michigan State University Detroit College of Law) where he received his J.D. in 1970. Following graduation, he was a trial lawyer and a partner in several Detroit firms and served as associate professor of the Detroit College of Law and adjunct professor at Wayne State University Law School. Governor James Blanchard appointed Mr. Archer an Associate Justice of the Michigan Supreme Court in 1985 and he was elected to an eight-year term the following year. In his final year on the bench, he was named the most respected judge in Michigan by *Michigan Lawyers Weekly*. He served two four-year terms as Mayor of the City of Detroit (1994-2001) and was President of the National League of Cities in 2001. After leaving the mayor's office, he was elected chairman of Dickinson Wright PLLC and sits on the corporate boards of a number of companies. He has been active in the organized bar and served as president of the Wolverine Bar Association, the National Bar Association and the State Bar of Michigan. Mr. Archer became president of the American Bar Association in 2003, and is the first person of color elected to the highest office of the association. He is a Life Member of the Fellows of the American Bar Foundation and the National Bar Association, a Fellow of the International Society of Barristers, and Life Member of the Sixth Circuit Judicial Conference. Mr. Archer is the recipient of many honorary degrees and has received a number of awards, including designation by *Governing* magazine as Public Official of the Year, inclusion by *Newsweek* as One of the 25 Most Dynamic Mayors in America, and by the *National Law Journal* as one of the 100 Most Powerful Attorneys in the United States.

LINDA DARLING-HAMMOND *Doctor of Humane Letters*

Few, if any, issues of domestic policy have generated more heated debate than the question of how America should educate its children. Particularly in the past decade, practitioners, policy-makers, parents and political leaders have explored a dizzying array of reform proposals, implemented new laws and funding mechanisms, and otherwise sought to rework the nation's schools. One of the few points of agreement has been that our system, despite its strengths, has room for improvement; for those seriously committed to this issue, there is a growing consensus that progress should be guided not by ideology or emotion, but by well-grounded scholarship focused on realistic means of reaching attainable ends. Dr. Linda Darling-Hammond, universally recognized within the education profession and increasingly beyond education circles as among the key figures in the education reform movement, has contributed immeasurably to the quality of the national debate. A native of Cleveland, Ohio and graduate of Yale University, Dr. Darling-Hammond earned her doctorate at Temple University with a focus on urban education; over the course of her career she has served as Director and Senior Social Scientist in the Education and Human Resources Program at RAND; a member of the faculty at Columbia University and Co-Director of the National Center for Restructuring Education, Schools, and Teaching at Teachers College at Columbia; and as Executive Director of the National Commission on Teaching and America's Future, which produced the widely-heralded 1996 report, *What Matters Most: Teaching For America's Future*. She currently serves as Vice Chair of the Commission, and is the Charles E. Ducommun Professor of Education at Stanford University School of Education. A prolific author and researcher, she serves on numerous national task forces and commissions, and her work, widely cited in the nation's media, reflects a deep understanding of the educational process and a profound respect for those on the front lines of the teaching profession. As she wrote in *The Right to Learn: A Blueprint for Creating Schools That Work* (1997), "Bureaucratic solutions to problems of practice will always fail because effective teaching is not routine, students are not passive, and questions of practice are not simple, predictable, or standardized. Consequently, instructional decisions cannot be formulated on high and then packaged and handed down to teachers." The answer, she has argued in *What Matters Most*, is to create a system that guarantees every one of the nation's children a "caring, competent, and qualified teacher working in schools organized for success." Her work has been focused on achieving that goal.

GERHARD GIEBISCH, M.D.

Doctor of Science

With a career that spans more than five decades, Dr. Gerhard Giebisch is recognized worldwide as one of the leading experts in the field of kidney research. Born and raised in Vienna, Dr. Giebisch received his medical degree in 1951 from the University of Vienna Medical School, where he also served as an instructor of pharmacology before accepting an internship at Milwaukee Hospital in 1952. The following year he went to the Department of Physiology at Cornell University in Ithaca, New York, where he was a fellow and then an instructor. In 1956, he returned to the University of Vienna as an Assistant Professor of pharmacology, and the following year, he returned to Cornell. During his years of service at Cornell, he was an Assistant Professor, an Associate Professor, and then Professor of Physiology. In 1968, he was appointed Professor and Chairman of Physiology at the Yale School of Medicine. In 1970, Dr. Giebisch was elected the Sterling Professor of Cellular and Molecular Physiology at Yale, a position he currently holds. Throughout his exceptional career, Dr. Giebisch has been honored with dozens of awards and prizes, including the American Physiological Society's prestigious Homer Smith Award in 1971 for his findings in the field of potassium transport in kidney cells. In 1984, he was elected to the National Academy of Sciences and, in 1985, to the American Academy of Arts and Sciences. Some of his many other awards include the Berliner Award from the American Society of Physiology, the A.N. Richards Award from the International Society of Nephrology, and the Distinguished Service Award from the Association of Chairmen of Departments of Physiology. He received honorary doctorates from the University of Vienna, the universities of Lausanne and Bern in Switzerland, and Uppsala University in Sweden. He has served in a number of editorial capacities, including editor of *Physiological Reviews*, authored more than 400 papers, and has published countless chapters for major kidney and other textbooks. He is a member of numerous professional societies and has served in leadership positions for the American Society of Nephrology, the Executive Committee of the International Society of Nephrology, and the National Institutes of Health. Dr. Giebisch is also recognized as an exceptional mentor whose students have become leaders in the field of kidney research.

GENE E. LIKENS

Doctor of Science

The last quarter of the twentieth century, characterized by radical transformation on so many fronts, may best be remembered as the time when society came to a better understanding of the full impact of environmental change. An eminent researcher, educator, author and advocate, Gene E. Likens has played a leading role in fostering that comprehension; as one of the pre-eminent figures in the international community of ecologists, he has been a compelling spokesman for rational, scientifically-based policies to protect the world's environment for future generations. Perhaps best known to the wider community as the person who discovered acid rain in North America, Dr. Likens is described by one colleague as, "quite simply, one of the best ecologists the world has ever had." Born in Pierceton, Indiana, Dr. Likens received his undergraduate degree in Biology from Manchester College in North Manchester, Indiana; he subsequently completed his graduate training in Zoology at the University of Wisconsin-Madison. Faculty appointments followed at Dartmouth College, Cornell University, and, for the past twenty years, Yale University; concurrently, from 1983 to 1993 he served as Vice President of The New York Botanical Garden and as Founding Director of the Institute of Ecosystem Studies and Director of the Mary Flagler Cary Arboretum in Millbrook, New York. Since 1993 Dr. Likens has served as Director and President of the Institute of Ecosystem Studies, and holds the G. Evelyn Hutchinson Chair in Ecology. His primary area of academic focus is the biogeochemistry of forest and aquatic ecosystems, and among his nearly 500 publications are some of the definitive works in that field. Dr. Likens has received numerous honors, including election to the National Academy of Sciences, the American Academy of Arts and Sciences, and the British Ecological Society, and in 2001 he was awarded the National Medal of Science. He is well known to members of the University of Connecticut scientific community on the basis of his international standing and, more immediately, as the 1998 Edwin Way Teale Lecturer.

DAVID MACAULAY
Doctor of Fine Arts

In honoring David Macaulay, the University of Connecticut recognizes an extraordinary individual whose talents touch multiple fields and whose work enables students and lay members of the public alike to understand many interrelated aspects of the physical world of the past and present. Artist, illustrator, author and educator, Mr. Macaulay has produced a body of work focused on architecture and urban forms that has won critical acclaim and a readership of adults and children that totals in the millions. A brief sample of titles includes *Cathedral* (1973), which describes the building of a gothic cathedral; *City* (1974), which examines the construction of a Roman town; *Underground* (1976), which dissects the maze of subterranean systems essential to a large city; *Castle* (1977), which shows the building of a medieval fortress; *Mill* (1983), which chronicles the growth of a New England mill town; perhaps his best-known book, *The Way Things Work* (1988, with an updated version in 1998), which conveys the mysteries of technology to the widest possible audience; and, on the twenty-fifth anniversary of *Cathedral*'s publication, *Building the Book Cathedral* (1998). Mr. Macaulay has also brought his abilities to bear in other media; the acclaimed five-part public television series "Building Big" (2000) covered the main areas of civil engineering structures: bridges, domes, skyscrapers, dams and tunnels. A native of England, Mr. Macaulay moved with his family to New Jersey when he was eleven years old. He earned a bachelor's degree in architecture from the Rhode Island School of Design, and worked for several years in interior design and as a public school art teacher. He then embarked on his extraordinary artistic and literary career, and he continues to serve on the faculty of the Rhode Island School of Design. Mr. Macaulay's work has won numerous awards, including the Caldecott Medal, the Boston Globe-Horn Book Award, the Washington Children's Book Guild Nonfiction Award, and a medal from the American Institute of Architects for being "an outstanding illustrator and recorder of architectural accomplishments."

IOGNAID G. O'MUIRHEARTAIGH
Doctor of Science

Dr. Iognaid G. O'Muirheartaigh, one of the preeminent figures in Irish higher education, is an internationally acclaimed statistician and an adept, visionary leader of one of his nation's major universities, the National University of Ireland, Galway. Dr. O'Muirheartaigh's relationship with the University of Connecticut, marked by today's conferral of an honorary degree, includes service as a visiting faculty member in our Departments of Statistics and Marine Sciences, numerous publications co-authored with UConn faculty, and strong support for ongoing collaborations between the faculties of the University of Connecticut and his own institution. Born in Dublin, Dr. O'Muirheartaigh earned his baccalaureate and master's degrees at University College, Dublin and received his doctorate in Statistics at the University of Glasgow, Scotland. He joined University College, Galway (predecessor institution of the NUI, Galway) in 1970; following years of distinguished service as a faculty member, he was appointed Registrar and Deputy President in 1998 and named to the Presidency in 2000. As leader of his University, Dr. O'Muirheartaigh has compiled a record of progress that includes the lowest attrition rate in Ireland, excellence in research (NUI Galway was awarded more research funding – some \$60 million – than any other Irish university in 2003), promotion of access for economically and socially disadvantaged students, and extensive interactions with educational institutions in other nations. A network of relationships with universities in Northern Ireland has helped forward the movement toward peace in that troubled land. In 2003, NUI Galway was nominated Ireland's first ever Irish University of the Year. Along with his administrative duties, Dr. O'Muirheartaigh has continued to build on a body of scholarship that includes publication of more than seventy papers in international journals and that brings rigorous statistical methodology to problems in areas ranging from economics to oceanography to medicine. His honors include the award of a Fulbright Fellowship at Stanford University, and a United States National Academy of Sciences Senior Research Associateship, held at the Naval Postgraduate School in Monterey, California.

JOHN W. ROWE, M.D.
UNDERGRADUATE COMMENCEMENT SPEAKER

One of the nation's outstanding medical researchers and, as Chairman and CEO of Aetna Inc., a leading member of the Connecticut business community, Dr. John W. Rowe serves as Chairman of the University of Connecticut Board of Trustees. Dr. Rowe graduated in 1966 from Canisius College in Buffalo, New York, and in 1970 earned his medical degree with High Honors and Distinction in Research from the University of Rochester School of Medicine and Dentistry in Rochester, New York. After post-graduate training at Harvard Medical School and the National Institutes of Health, Dr. Rowe joined the faculty at Harvard where he served as Professor of Medicine and founding Director of the Division on Aging at Harvard Medical School and Chief of Gerontology at Beth Israel Hospital in Boston. Author of more than 200 scientific publications and a leading book on geriatric medicine, Dr. Rowe has earned several honors, including selection as a member of the Institute of Medicine of the National Academy of Sciences. Dr. Rowe has also been a leader in medical education and administration, serving as President of The Mount Sinai Hospital and the Mount Sinai School of Medicine in New York City from 1988 to 1998, and, from 1998 to 2000, President and Chief Executive Officer of Mount Sinai NYU Health. In 2000 Dr. Rowe came to Connecticut as the leader of Aetna Inc., one of the major health care and related benefits organizations in the United States. In addition to his service on the University's Board of Trustees, he serves on the boards of Lincoln Center Theater and numerous other medical, cultural, and academic organizations.

FRANCISCO JIMENEZ
HEALTH CENTER COMMENCEMENT SPEAKER

The son of Mexican farmworkers, Dr. Francisco Jiménez was born in San Pedro Tlaquapague, a suburb of Guadalajara. At the age of four he crossed the border with his family into California, where he worked in the fields along with his family and attended numerous schools. Learning was initially difficult for Dr. Jiménez because he did not speak English, and frequent moves added to his challenge. However, he persevered and excelled in high school, graduating in 1962 with honors and three scholarship offers. He continued his education at Santa Clara University in California and during his junior year became a U.S. citizen. In 1966, he graduated with honors and a Woodrow Wilson fellowship. Dr. Jiménez earned his master's degree in 1969 at Columbia University in New York, where he also earned his doctorate in 1972 in Spanish and Latin American Literature. In 1973, he left Columbia, where he was serving as an assistant professor in Spanish, to take a similar position at his alma mater. Dr. Jiménez's illustrious career at Santa Clara included appointments as a member of the Board of Trustees, and director of the Division of Arts and Humanities and of the Institute of Poverty and Conscience. He also served as Associate Vice President for Academic Affairs and is currently the Fay Boyle Professor of Modern Languages and Literature and Director of Ethnic Studies at Santa Clara. Dr. Jimenez also served as a member of the Board of Directors of Far West Laboratory for Educational Research and Development, Vice-Chairman and Chairman of the California State Commission for Teacher Preparation and Licensing, and Vice Chairman of the California State Humanities Council. He was a co-founder of the *Bilingual Review* and is a board member of the Bilingual Review Press. At Santa Clara he created the East Side Future Teachers Project, an outreach program to encourage historically underrepresented students to become teachers by providing scholarships, mentoring, and practical experience for six students annually. Dr. Jiménez is the author or editor of numerous textbooks, literary anthologies, and award winning books, including two autobiographical works, *The Circuit: Stories from the Life of a Migrant Child*, and *Breaking Through*, recounting memorable experiences of his Mexican-American family's migration from farm to farm as laborers and of his struggles to continue his education while coping with poverty. He has received numerous teaching awards and honors, most recently in 2002 the National Teaching Award from the Council for Advancement and Support of Education and the Carnegie Foundation for the Advancement of Teaching.

COMMENCEMENT

UNIVERSITY MEDAL PETER W. MCFADDEN

Among the University of Connecticut's highest honors, the University Medal is awarded in recognition of distinction in a field or profession in public service, for outstanding achievement or leadership on a community, state, national or international level, or for outstanding service to the University of Connecticut. The first University Medal was presented to Governor John N. Dempsey in 1983. This year the Board of Trustees confers the 27th University Medal on Dr. Peter W. McFadden, Professor Emeritus of Engineering. Native of Stamford, member of the UConn undergraduate Class of 1954 and graduate Class of 1957, Peter McFadden has contributed immeasurably to the University's progress over the past five decades. With the exception of a fifteen-year sojourn at Purdue University, where he received his doctorate in engineering and served on the faculty and administration, Dr. McFadden has devoted his career as teacher, scholar, and academic leader to our own university in a series of critically important roles. In 1971 he returned to UConn as Dean of the School of Engineering and Professor of Mechanical Engineering, a position he held until 1985. Retaining his faculty responsibilities, he then became part of the leadership of the University of Connecticut Foundation, helping to guide the University's external fundraising program in its formative years and building a strong basis for dramatic progress in the 1990s. He later served as Interim Vice President and Provost and, from 1989 to 1997, as Executive Assistant to the President of the University and Executive Secretary to the Board of Trustees. The years of Dr. McFadden's service in the University's administration covered both the pre- and post-UCONN 2000 era, and he played a profound role in UConn's transition from a position of regional leadership to a place among the nation's major public universities. Several times since 1997 Dr. McFadden has attempted to retire; on each occasion he has been called back into special service. In 1998-99 he directed the University's Alumni Association through a critical transition period, leaving that important organization well poised for continuing contribution to the University and its graduates.

Last year he accepted the responsibility of guiding one of the University's major research entities through a challenging period, again creating a framework for ongoing success. Throughout these assignments—and, indeed, over the course of more than a half century's association with the University, as student, professor, and leader—Dr. McFadden has consistently demonstrated qualities of loyalty, integrity, good judgment, and good humor. Few individuals on our campus are more widely admired or more deeply respected, and the University Medal awarded today is a token of the esteem in which Peter W. McFadden is held.

ACADEMIC HONORS

University Scholar

The University Scholar designation is the highest scholastic honor at the University. The individualized undergraduate programs of these students, which in some cases include work toward a graduate degree, are supervised by faculty committees. Up to thirty students are selected as University Scholars in the junior year. Candidates for the University Scholar designation wear *gold and blue* recognition cords at the commencement exercises.

Honors Scholar

Honors Scholars are outstanding students who complete intensive two- or four-year programs, including Honors courses of unusual breadth and depth. Honors requirements include a senior thesis in the major field. Candidates for the Honors Scholar designation wear *gold* recognition cords at the commencement exercises.

With Distinction

"With Distinction" is the University's designation for degrees earned by students who give evidence of significant achievement in their major fields. Candidates for the graduation "with Distinction" wear *silver* recognition cords at the commencement exercises.

The names in this program do not constitute an official list. The students whose names are listed herein were considered candidates for the degree indicated when the program was printed, except where a prior date of graduation (August 31 or December 14, 2003) is given.

THE GRADUATE SCHOOL

The parenthetical indication of a conferral date following a degree recipient's name signifies confirmed completion of degree requirements. If no conferral date is indicated, completion of degree requirements could not be confirmed at press time. Conferral of a degree is contingent upon verification by the Graduate School that a student has completed all requirements.

On the cover of this Commencement book is the official seal of the University of Connecticut. The University's seal depicts the ancient and mighty oak. For Connecticut and the University alike, the oak's symbolism is significant. Beautiful and sacred, the venerable oak is synonymous with wisdom, longevity and hospitality. To Aristotle, the oak represented human potential.

The oak holds a special place in Connecticut's history. In a time long before statehood, the Connecticut colony's self-governing status was guaranteed by a charter issued by King Charles II of England. When, in 1687, his successor King James II attempted to reinstate the monarchy's authority, his emissary's efforts were foiled as the Royal Charter was secretly spirited to a temporary hiding place—a majestic oak in Hartford, forever after known as the Charter Oak. The oak became a symbol of freedom worldwide.

The oak has unique meaning for the University as well. In 1884, the commencement exercises of the second graduating class of the Storrs Agricultural School were held in an oak grove on the Storrs campus. This grove, long a favorite gathering place for a variety of open-air meetings, served as the spiritual home to the growing community of scholars.

The University of Connecticut's graphic interpretation of the oak is a stylized synthesis of two acorns and three oak leaves, representing maturation, intellect and moral strength. The seal is the symbol of a large and diverse institution; it is used by all of the University's schools, colleges, regional campuses, professional schools and its Health Center. The UConn Husky dog is the beloved and official mascot of the University's athletic program. While the Husky symbolizes the vitality and excitement of campus life, the oak seal communicates the broader mission of the University as a center for the pursuit, the creation and the sharing of knowledge. The University of Connecticut, like the mighty oak, is rooted in a proud past and reaching toward a limitless future.
