WELCOME FROM THE PRESIDENT

Dear Friends:

This is a momentous day for graduates, families and the entire UConn community. To our graduates, I offer my warmest and most sincere congratulations on your success and your achievements. Today's commencement exercises are the culmination of your time as a student and the fulfillment of our mission as a university when it comes to your education.

I share the pride, excitement and immeasurable hopes for the future that I know each of you feel today. Your education is a great credit to you, and to us; you exemplify the very best we have to offer as you prepare to enter the next chapter of your lives.

Today, a degree will be conferred upon you from one of this nation's truly great universities. UConn takes great care to ensure that our students are able to receive an education from outstanding faculty on a campus that is home to many exceptional facilities. It is also vital that each of our students experience a thriving campus where as much can be learned and enjoyed outside the classroom, as in it.

Whatever your plans for the future may be, I hope that your time here has helped give you the knowledge, experience, and confidence that you will need to excel in every aspect of the life you will lead.

The goal of higher education is not confined to academic achievement alone; it is also intended to draw from within you those essential qualities that make each of us an educated, well-rounded individual – and a good citizen. That is one of the simplest, but most important titles we can merit in life and I know each of you will exemplify it, every day. You are a class – and a generation – who will go on to do extraordinary things.

Please enjoy yourselves today and celebrate the honor and distinction that you have earned. And whatever path you choose, I hope you will always carry with you the very fondest memories of your days here at the University of Connecticut. Remember: you are students today, but Huskies forever.

Congratulations and very best wishes,

A handwritten signature in black ink, which appears to read "Susan Herbst". The signature is fluid and cursive.

Dr. France A. Córdova

France A. Córdova is the 14th director of the National Science Foundation (NSF), the only government agency charged with advancing all fields of scientific discovery, technological innovation, and science, technology, engineering and mathematics education. NSF is a \$7.2-billion independent federal agency, with a mission that is vital to supporting our nation's economy, security, and ability to remain a global leader.

Córdova is president emerita of Purdue University, where she served as president from 2007 to 2012. Prior to her tenure at Purdue, she was chancellor of the University of California, Riverside and vice chancellor for research at the University of California, Santa Barbara.

From 1993 to 1996, Córdova was chief scientist at NASA. She is a recipient of NASA's highest honor, the Distinguished Service Medal. She has been a professor of physics and astronomy at UC-Riverside, UC-Santa Barbara and the Pennsylvania State University. Córdova was deputy group leader in the Earth and space sciences division at Los Alamos National Laboratory. Her scientific contributions are in the areas of observational and experimental astrophysics, multi-spectral research on x-ray and gamma ray sources and space-borne instrumentation.

More recently, Córdova served as chair of the Board of Regents of the Smithsonian Institution and on the board of trustees of Mayo Clinic. She also served as a member of the National Science Board (NSB). As NSF director, she is an ex officio member of the NSB.

Córdova has a B.A. from Stanford University and a Ph.D. in physics from the California Institute of Technology. She is a member of the American Academy of Arts and Sciences, the Association for Women in Science, a National Associate of the National Academies, and has been awarded many honorary doctorates. Córdova is married to Christian J. Foster, a science educator, and they have two adult children.

The University's honorary degrees are to be bestowed in recognition of extraordinary and lasting distinction, representing the highest intellectual and moral values. Dr. Córdova's dedication to advancing knowledge, through her own research and her commitment to public institutions that expand society's scientific expertise, is a shining example that our own students can strive to follow.

SCHOOL OF NURSING COMMENCEMENT SPEAKER

Marguerite Littleton Kearney, PhD, RN, FAAN

In January of 2015, Marguerite Littleton Kearney was named as the Director of the Division of Extramural Science Programs in the National Institution of Nursing Research (NINR). In this role, Dr. Littleton Kearney is responsible for leading, managing and actively coordinating NINR's extramural scientific programs, grants management, scientific merit review, and advisory council operations.

Just prior to joining NINR, Dr. Littleton Kearney served as the Interim Dean of the Daniel K. Inouye Graduate School of Nursing at the Uniformed Services University.

Dr. Littleton Kearney began her career in nursing after graduating from Mercy Hospital in Baltimore, Maryland in 1971. She continued her education by earning both a Bachelor of Science and Master of Science degree in Nursing from the Medical College of Georgia in Augusta. From Georgia she studied at Rush University in Chicago, earning a PhD, and then in 1986 a Postdoctoral Fellowship.

During the 29 years following her study at Rush, Dr. Littleton Kearney has held a variety of positions at varying institutions, in both civilian and military service. During her military life, which began in 1987, she was a dedicated nurse clinician and administrator. She retired from the US Navy in 2010 after nearly 23 years of service, retiring with the rank of Captain.

In her civilian life, Dr. Littleton Kearney worked first as a staff nurse and dedicated herself to various specialty areas, including shock / trauma, dialysis, and surgical / thoracic ICU. She then changed course to academia, bringing her prodigious clinical skills to nursing education. She was a tenured professor, the

Associate Dean for Research, and the Director of the Faye G. Abdellah Center for Military and Federal Health Care Research at the Daniel K. Inouye Graduate School of Nursing at the Uniformed Services University of the Health Sciences (USUHS). Prior to that, she served as an Associate Professor at the Johns Hopkins School of Nursing and Medicine, and held faculty positions at the Rush College of Nursing and the University of Maryland.

Areas of Dr. Littleton Kearney's academic expertise cover hormone status and platelet biology, cerebral ischemia, microvascular blood flow, shock and mediators of shock and ischemia. Dr. Littleton Kearney's interdisciplinary research, funded by NINR since 1996, focused on the effects of sex hormones on cerebral vessel recovery after ischemic cerebral injury. She was awarded a five-year \$1.25 million grant by the National Institutes of Health (NIH) to continue studying how hormone therapy could potentially reduce the severity of stroke. Her clinical expertise covers trauma and critical care nursing as well as disaster management and emergency preparedness. Shortly after the 9/11 disasters, she used her military experiences to design a School of Nursing program that prepares nurses for those pivotal leadership roles during disasters and mass casualty incidents. She has served on NIH study sections in support of the scientific peer review process. Her varied and extensive portfolio of publications spans her 44 year career.

In 2001, Dr. Littleton Kearney became a fellow of the American Academy of Nursing (AAN), the highest honor bestowed in nursing.

DOCTOR OF PHARMACY COMMENCEMENT SPEAKER

Angelo DeFazio

Angelo DeFazio '85 is both a first generation American and a first generation college graduate. An entrepreneur from the outset, he purchased his first pharmacy at age 26 and has served as president and CEO of the Arrow Pharmacy Group since that time. He has grown his businesses in the State of Connecticut and now owns five retail pharmacies, including one at UConn Health, two management consulting companies, and one of only six medical marijuana dispensaries in the state. The company also manages pharmacy services at Charter Oak Health Center, serving some of the state's most vulnerable populations.

Mr. DeFazio is active in many professional organizations both locally and nationally and has held many leadership positions within these organizations. He was named 2012 Pharmacist of the Year by the National Community Pharmacists Association. In 2008, he received the Bowl of Hygieia from the Connecticut Pharmacist Association, which recognizes pharmacists who are leaders in providing community service. He was named Connecticut Pharmacist of the Year in 2002.

Mr. DeFazio is an active leader in the pharmacy community. He has served as an industry expert to the Congressional Delegation from Connecticut. He is also a strong advocate for Connecticut pharmacy, serving as a member of the Connecticut Pharmacy Commission.

Mr. DeFazio is a former chair, and an emeritus member, of the UConn School of Pharmacy Advisory Board. He also serves the university as an adjunct faculty member, precepting UConn pharmacy students on rotation, has partnered with the school on medication management research, and is always on the leading edge of new practice models.

Mr. DeFazio is committed to serving those less fortunate in his community. He takes great personal satisfaction from his work with service organizations including the Malta House of Care Foundation, Mercy Community Healthcare, and the St. Francis Hospital and Medical Center.

Oliver Stone

Mr. Stone is a distinguished screenwriter, film director and producer. During his 40-year career in cinema, he contributed to landmark films of varied genre from political thriller in *JFK* to a musical in *Evita*. Through his works, he has dedicated his enormous talents to bringing provocative and compelling perspectives to challenge our putative understanding of historic figures and moments that have shaped the 20th century. For his contributions and his cinematic artistry, he received numerous recognitions, including three academy awards for *Midnight Express*, *Platoon*, and *Born on the Fourth of July*.

Mr. Stone is also at heart a student and commentator of history. His selection of projects has highlighted lessons learned from individuals of great positions and power, but with great moral defects, that have led their organizations and countries astray. His new project in partnership with Professor Peter Kuznick of American University, entitled *Untold History of the United States*

is an important case in point. This book and series shown on Showtime reviews "human events that at the time went under-reported, but that crucially shaped America's unique and complex history over the 20th Century...from the atomic bombing of Japan to the Cold War and the fall of Communism". In the spirit of Howard Zinn's *A People's History of the United States*, Mr. Stone's work asks citizens to question some of the bedrocks of historical foundation and to be critical of existing society and that it is our "responsibility to bring to the attention of others information they do not have, which has the potential of causing them to rethink long-held ideas".

Mr. Stone has participated in compelling discussions on college campuses where he inspired students to delve deeply into their studies. His work in *Untold History of the United States* drives lessons about heritage, and to develop the perspectives and the courage to challenge the status quo to make a difference to their community and society.

Jane Chu

Jane Chu is the eleventh chairman of the National Endowment for the Arts. With a background in arts administration and philanthropy, Chairman Chu is also an accomplished artist and musician. She leads a dedicated and passionate group of people to support and fund the arts and creative activities in communities across the nation.

Chu was born in Shawnee, Oklahoma, but was raised in Arkadelphia, Arkansas, the daughter of Chinese immigrants. She studied music growing up, eventually receiving bachelor's degrees in piano performance and music education from Ouachita Baptist University, and master's degrees in music and piano pedagogy from Southern Methodist University. Additionally, Chu holds a master's degree in business administration from Rockhurst University and a PhD in philanthropic studies from Indiana University.

In addition to awarding nearly \$220 million in grants during her tenure to-date, Chu has issued new research reports on arts participation and the impact of the arts and cultural industries on the nation's gross domestic product; has made hundreds of trips to communities across the nation to see first-hand how the arts are impacting people and places; and launched the Tell Us Your Story project that demonstrates the importance of the arts in our lives.

And, on the date marking the agency's 50th anniversary—

September 29, 2015—Chairman Chu announced the details of her signature leadership initiative, Creativity Connects. The program will show how central the arts are to the country's creativity ecosystem; investigate how support systems for the arts have changed; and explore how the arts connect with other industries.

"We have an opportunity to start a new dialogue on the ways in which the arts—and the ways the NEA supports the arts—are an essential component of our everyday lives," says Chu. "Although many may not realize it, the arts actively intersect with areas such as the economy, human development, and community vitality. The arts and artists who are funded and supported by the NEA are an integral part of the solution to the challenges we face in all parts of our society."

Chu has a deep understanding of and commitment to the arts. From 2006 to 2014, Chu served as the president and CEO of the Kauffman Center for the Performing Arts in Kansas City, Missouri, overseeing a \$413-million campaign to build the center. She was a fund executive at the Kauffman Fund for Kansas City from 2004 to 2006, and vice president of external relations for Union Station Kansas City from 2002 to 2004. Previously, she was vice president of community investment for the Greater Kansas City Community Foundation from 1997 to 2002.

Mr. Anthony Yurgaitis and Mr. George Malkemus

Entrepreneurs George Malkemus and Tony Yurgaitis first met famed designer Manolo Blahnik when Malkemus was copy chief at Bergdorf Goodman. Since 1982, when they became the licensee for the Manolo Blahnik brand in the Americas, it has become one of their passions. Today Blahnik's designs are sold at top retailers including Neiman Marcus, Bergdorf Goodman, Saks Fifth Avenue, Barneys and Nordstrom. In 2014, Malkemus and Yurgaitis started an exciting project with actress Sarah Jessica Parker, recently launching a collection of shoes and handbags under the label SJP.

Malkemus's and Yurgaitis's other passion is farming. In 1999, they opened Arethusa Farm on 200 acres in Litchfield with the intention of producing and bottling milk for sale to the local community. As the farm grew, Malkemus and Yurgaitis became interested in the world of dairy cattle. At the 2004 World Dairy Expo, Arethusa Farm's Hillcroft Leader Melanie and Huronia Centurion Veronica were named Supreme Champion and Reserve Supreme Champion, respectively. Show success fueled major growth of the farm. New heifer, calf and milking facilities

were built, and the herd is now almost entirely home-bred. Cows from Arethusa's herd have received numerous Junior Champion, Grand Champion, Supreme Champion, Premier Breeder, Premier Exhibitor, All-American and All-Canadian awards. Development of the herd continues through embryo transfer and in-vitro fertilization and their cattle genetics are in demand worldwide. Today, the state-of-the-art operation houses award-winning Jersey, Holstein and Brown Swiss cows. Dairy products from these cows are featured at Arethusa Farm's creamery and a farm-to-table restaurant, Arethusa al tavolo. They are also available in specialty stores, including Whole Food Markets, Eataly and Murray's Cheese Shop in New York City and at Arethusa retail shops in Bantam and New Haven. In 2015, they hosted two sales of Manolo Blahnik shoes, donating the proceeds, more than \$280,000, to fund scholarships in the College of Agriculture, Health and Natural Resources. In all of their projects and ventures, Malkemus's and Yurgaitis's objectives are the same: quality, passion and hospitality.

Dr. Dianna R. Wentzell

Dr. Dianna R. Wentzell has been an educator in Connecticut for more than 25 years. She was appointed as Commissioner of Education by Gov. Dannel P. Malloy in April 2015, after serving as Interim Commissioner since January 2015. Dr. Wentzell began her career in education as a social studies teacher and later as a teacher for gifted students.

Before her appointment as interim commissioner, she served as the State Department of Education's chief academic officer, overseeing the Bureau of Curriculum, Instruction, and Assessment, and the Standards Implementation Division. Before

joining the Department, Dr. Wentzell served as assistant superintendent of schools in Hartford, and in district leadership positions with a focus on curriculum, instruction, and assessment in both South Windsor and the Capitol Region Education Council (CREC) magnet schools.

Dr. Wentzell has a bachelor's degree in Russian studies from Mount Holyoke College, a master's degree in educational leadership from the University of Massachusetts–Amherst, and a doctorate in educational leadership from the University of Hartford.

Peter Constantine

Peter Constantine, a current Fellow at the University of Connecticut Humanities Institute, is an award-winning literary translator and editor specializing in translation from Russian, German, French, Modern Greek, and other European languages. His recent translations include *Little Apples: And Other Early Stories* by Anton Chekhov, and, for Modern Library, *The Essential Writings of Rousseau*, *The Essential Writings of Machiavelli*, and works by Tolstoy, Gogol, and Voltaire. Constantine's translation of the complete works of Isaac Babel received the Koret Jewish Literature Award and a National Jewish Book Award citation. He has been a Guggenheim Fellow, a Fellow at the Cullman Center for Scholars and Writers at The New York Public Library and a Berlin Prize Fellow at the American Academy in Berlin.

A central interest for Peter Constantine has been locating and translating vital but forgotten or lost works, bringing essential new perspectives to the literary canon. In 1997 he translated *Six Early Stories* by Thomas Mann, works that were unknown in the English-speaking world and had never been translated. For this translation he was awarded the PEN Translation Prize. Throughout the late 1990s, Constantine was also researching the corpus of Anton Chekhov's work, identifying masterful short stories that had not been translated into English. The first book that resulted from this research, *The Undiscovered Chekhov: Thirty-eight New Stories*, was awarded the National Translation Prize. He worked on a number of expanded editions, publishing more previously unknown and untranslated Chekhov stories. He also published the first translation of Dostoevsky's *Siberian Notebook*, a secret journal Dostoevsky kept while he was interned in a prison camp in Omsk, writing

on strips of bedding the strange and remarkable things he heard the other inmates say. Constantine also co-edited a special edition of the literary magazine *Conjunctions* in which were gathered unknown works by Nabokov, Ionesco, Proust, Kawabata, and the untranslated and unpublished works of other foremost literary figures.

Constantine grew up in Greece, both in Athens and the Peloponnese, in a multilingual family of British, Turkish, Austrian, and Greek background. Though most of his work has centered on nineteenth- and twentieth-century Russian and German literature, one of his key interests has been Modern Greek literature. He co-edited *A Century of Greek Poetry: 1900-2000*, and the anthology *The Greek Poets: Homer to the Present*, which was published by W.W. Norton in 2010. He held fellowships in the Program in Hellenic Studies at Princeton in 2002 and 2003, and has since 2007 been a Fellow in Columbia University's Program in Hellenic Studies.

In Greece, Constantine grew up in areas that spoke both Greek and the endangered language Arvanitika, one of the regional languages of Greece. Arvanitika, like many lesser spoken and indigenous languages of the world, is now facing extinction, and Constantine has spent the last decade recording the poetry and narratives of the last fluent speakers in his Peloponnesian community.

As of the fall semester of 2016, Constantine will be inaugurating and directing the University of Connecticut's new Translation Studies Program.

Shareen Hertel

Shareen Hertel is an Associate Professor of Political Science at the University of Connecticut, jointly appointed with the university's Human Rights Institute. She holds a doctorate in Political Science from Columbia University (2003) and has served as a consultant to United Nations agencies, foundations, and nongovernmental organizations (NGOs) and in the United States, Latin America and South Asia for over two decades. Her published work including books published by Cornell (2006)

and Cambridge University Press (2007, 2011) and several dozen scholarly articles and book chapters, all focusing on themes central to development and rights issues. Hertel is editor of *The Journal of Human Rights*, co-editor of the Routledge *International Studies Intensive* book series, and serves on the editorial boards of *Human Rights Review* and *Human Rights and Human Welfare*.

Morad Behandish

Morad Behandish started his Ph.D. program in Mechanical Engineering (ME) at UConn in January 2010. He concurrently pursued a Master's degree in Computer Science and Engineering (CSE) to serve an interdisciplinary set of interests. Before UConn, he received his Bachelor's degree in ME from the University of Tehran, Iran, in 2008.

As a Research Assistant in the Computational Design Lab (CDL) at UConn, he has been tackling problems in geometric modeling, computing, and reasoning over the past six years with applications in computer-aided design and manufacturing (CAD/CAM), assembly automation, digital prototyping, and protein engineering. His research accomplishments have been recognized by three consecutive Best Paper Awards in ASME IDETC/CIE'2014, IDETC/CIE'2015, and SIAM GD/SPM'2015 international conferences, and a Research Competition Award along with a pre-doctoral fellowship at the ME department of UConn in 2015. His work on virtual reality (VR) and haptics was among the selected projects showcased to the state legislators in the NextGenCT signing ceremony in 2013 and the follow-up exhibition in CT State Capitol in 2015.

With the rapid growth of UConn's entrepreneurial opportunities in the past few years, Morad decided to explore commercialization of his research developments, for which he received the Auran J. Fox Award (1st place winner) and

Scholarship in the Innovation Quest (iQ) competition in 2014. Since then, he mentors both undergraduate and graduate students in the iQ program and InQbator, with the purpose of helping his colleagues in taking academic ideas to the marketplace.

Alongside his graduate education, Morad has served in multiple student leadership positions. He is the President of the Student Association of Graduate Engineers (SAGE), an organization dedicated to the professional development of 800+ graduate engineering students, and has overseen the coordination of more than 30 career development workshops and seminars in different executive capacities over the past three years. For his efforts in the School of Engineering, he received the John Lof Leadership Award and Scholarship in 2015. He also served as the Activities Director of the Graduate Student Senate (GSS), the student government advocating 6,900+ graduate students from a variety of disciplines. Before being elected to that position in 2015, he was nominated by multiple authorities for the GSS Service Award during his service as an at-large Senator.

After his graduation from UConn (class of 2016), he will continue his research career in the International Computer Science Institute (ICSI) affiliated with UC Berkeley, where he will develop modeling tools for information-intensive manufacturing environments of the 21st century.

Charles Osgood

Charles Osgood is an American radio and television commentator and writer who has contributed significantly to the cultural and social development of the U.S. and the world. His daily program, "The Osgood File," has been broadcast on the CBS Radio Network since 1971. Each three-minute Osgood File focuses on a single story, ranging from a breaking development of national importance to a whimsical human-interest vignette. He has also been anchor of the two-time Daytime Emmy Award-winning "CBS News Sunday Morning" since 1994.

The theme of his reporting has centered on cultural and social values of different segments of the society in this country and globally. His stories have shown heroism, innovation, humanism, will power, and determination in role models for success and meaningfulness in life. Osgood won an Emmy Award in 2005 for his story "Playing for Peace," a basketball group created by Americans to bring strife-torn children of

different religions and races together.

Osgood also narrated Dr. Seuss' "Horton Hears a Who," the 2008 animated feature film adaptation of the beloved children's book, performed with the Mormon Tabernacle Choir, and played the piano and banjo with the New York Pops and Boston Pops Orchestras.

Among his personal trademarks are his bow tie, his weekly TV sign-off "Until then, I'll see you on the radio," and his propensity for delivering his commentaries in whimsical verse. Osgood has served as a trustee for Fordham University and St. Bonaventure, and is an overseer at Colby College and a trustee at the School of Strings in Manhattan. His honorary degree symbolizes UConn Health's dedication to strong and inclusive educational programs in the practice of medicine and dental medicine as an art with humanity.

BOARD OF DIRECTORS FACULTY RECOGNITION AWARD RECIPIENT

Marc Lalonde, Ph.D.

Marc Lalonde, Ph.D., founding chair of the Department of Genetics and Genome Sciences, is this year's recipient of the Board of Directors Faculty Recognition Award, honoring outstanding contributions to research, teaching, and mentoring.

The Health Net, Inc., Endowed Chair in Genetics and Developmental Biology, Dr. Lalonde has been at the forefront of studying human developmental disorders caused by chromosome abnormalities, such as Prader-Willi and Angelman syndromes. His lab has made significant contributions to the field of chromosome imprinting and is using gene-editing technology and RNA sequencing to better understand these disorders.

As director of the UConn Stem Cell Institute, he spearheaded the University's research in the area of human induced pluripotent stem cells (iPSCs), and he and his colleagues were the first to generate iPSCs for Angelman and Prader-Willi syndromes.

A faculty member since 1998, Dr. Lalonde was instrumental in

attracting The Jackson Laboratory for Genomic Medicine to the UConn Health campus in Farmington and, as director of the University's Institute for Systems Genomics, now leads UConn's collaborative research endeavors with JAX scientists.

Dr. Lalonde graduated from Laurentian University in Ontario, Canada, with a bachelor's in physics and earned both a master's and a Ph.D. in medical biophysics from the University of Toronto. He's an elected member of the Connecticut Academy of Sciences and Engineering and has received numerous honors including the Dr. Claudia Benton Award for Scientific Research from the Angelman Syndrome Foundation and the Health Care Hero Award for Advancements in Healthcare Innovation by the Hartford Business Journal. He has current and numerous past graduate student and postdoctoral trainees and teaches genetics to UConn medical students.

The UConn Health Board of Directors recognizes Dr. Lalonde's longstanding and continued service to both the institution and the scientific community.

Honorable Christopher F. Droney

Judge Christopher F. Droney serves on the United States Court of Appeals for the Second Circuit, which decides appeals from the U.S. District courts in Connecticut, New York and Vermont. He was appointed to the appeals court by President Obama and unanimously confirmed by the U.S. Senate in 2011, after receiving the American Bar Association's highest recommendation.

He previously served 14 years as a United States District Court judge for the District of Connecticut, having also received the Senate's unanimous confirmation for that appointment, preceded by four years as United States Attorney for the District

of Connecticut. Before entering government service, Judge Droney worked in private practice as a trial attorney and was a partner in the Hartford law firm of Reid & Riege, P.C. He was elected to the Town Council of West Hartford in 1983, and served as mayor of West Hartford from 1985 to 1989.

Judge Droney was born in Hartford and received his bachelor of arts degree, magna cum laude, from Holy Cross College. He received a Juris Doctor degree from UConn School of Law, where he was notes and comments editor of the Connecticut Law Review.

COMMENCEMENT NOTES

Commencement Day at the University of Connecticut is a time of ceremony and pageantry, embracing traditions dating back to medieval times.

The University of Connecticut was founded as the Storrs Agricultural School in 1881 when the General Assembly accepted a gift of money and land from Charles and Augustus Storrs, natives of Mansfield. In 1893 when it became a land-grant college and officially opened to women, the name was changed to Storrs Agricultural College. As the mission of the institution grew, its name was changed in 1899 to Connecticut Agricultural College, and in 1933 to the Connecticut State College. At first a small but vigorous college with limited undergraduate offerings in agriculture, home economics and mechanical arts, with the development of a university program it became The University of Connecticut in 1939. The Graduate program began in 1935, and in 1949 the University awarded its first doctoral degrees. The regional campuses were established in 1946 to accommodate the influx of veteran students. Today, the University is made up of fourteen different schools and colleges. Through its administrative Divisions, Institutes, and Centers, the University is a Land Grant and Sea Grant College and a Space Grant Consortium Institution, privileged to serve the citizens of the State of Connecticut, and beyond.

Enormous expansion has taken place over the years together

with increased enrollment. Today, the University has an enrollment of over 31,624 students. At Storrs, there are over 18,826 undergraduates and more than 8,217 graduate students, representing some 111 nations.

This May, the University will award over 8,760 degrees. Of these, approximately 6,015 will be Bachelor's degrees, 1,813 Master's degrees, 156 Juris Doctor degrees, 56 Master of Laws degrees, 99 Doctor of Pharmacy degrees, 35 Doctor of Dental Medicine degrees, 83 Doctor of Medicine degrees, 3 Doctor of Musical Arts degrees, 15 Doctor of Audiology, 3 Doctor of Education degrees, 4 Doctor of Nursing Practice degrees, 27 Doctor of Physical Therapy degrees, and 363 Doctor of Philosophy degrees. Also to be awarded are 54 diplomas in Professional Education and 34 Associate's degrees in the two-year Ratcliffe Hicks School of Agriculture.

The Commencement Ceremony, because of the large number of graduates, is divided into separate exercises, by college or school. The Schools of Dental Medicine and Medicine, located in Farmington, and the School of Law, located in Hartford, hold their own exercises. The Commencement procession in each of the exercises at Gampel Pavilion in Storrs is heralded by the ceremonial trumpets, acquired especially for the University's commencement.

The Academic Procession is led by the Bearer of the Mace, followed by the faculty. The University Marshal, identified by his Baton, follows the President, together with the speaker, the Board of Trustees, vice-presidents, deans, and other University officials. The Mace is presented at the center of the stage while members of the platform party enter and take their places. Once the Mace is placed on the stand, it signals the beginning of the ceremony.

The Academic Gowns, Hoods and Regalia represent more than elegance or colorful attire. Academic caps and gowns continue a tradition which reaches far back into the early days of the oldest universities of the Middle Ages. The early European universities were founded by the church; the students, being clerics, were obliged to wear prescribed gowns and caps at all times. Caps and gowns were once common forms of clothing and were retained by the clergy when the laity adopted more modern dress. Though some universities here and abroad have other colors, the usual color for gowns in America is black. Hoods are lined with the official color of the college or university which conferred the degree. The velvet edging of the hood varies in length for bachelors, masters, and doctoral degrees. The color represents the appropriate degree. Mortar boards (caps) are usually black. The tassel for the Bachelor's and Master's degree may be of color distinctive to the degree, and the tassel for the doctoral degree may be made of gold thread. The gown and hood of the University Marshal were made specifically for University ceremonies in the official colors of national flag blue and white. The Processional Marshals wear blue velvet "beefeater" berets.

The Mace is presented at all academic ceremonies. In medieval times maces were weapons of warfare, but today a mace is "a staff borne by, or carried before, a magistrate or other dignitary as an ensign of his authority." It is the emblem and symbol of the President's authority to administer the University. This mace was first used at the Inauguration of President Homer D. Babbidge, Jr. on October 20, 1962. It was designed by Nathan Knobler, former head of the Department of Art. The University's early seal, executed in beautiful wood carving, appears on both faces. A penny dated 1881 is affixed to it, to commemorate the date of the University's founding.

The Baton, carried by the University Marshal, was specifically designed for ceremonial activities at The University of Connecticut and was first used at the Commencement in 1968. The Office of Marshal can also be traced back to the medieval period, and the Baton is a symbol of the Marshal's authority. This Baton has silver mountings and is surmounted by a representation of the University's former seal in enamel, which

itself incorporates the coat of arms of the State of Connecticut. The University Marshal, carrying the Baton, follows the Mace Bearer as she leads the academic procession into and out of the place of ceremony.

The Silver Collar/Medallion, worn by Susan Herbst, President, was first used in 1964, at the time of the University's Silver Anniversary. Each link on the collar represents one of the University's Schools or Colleges and consists of a cloisonné circle engraved with an appropriate design for the particular school and enameled with its traditional school or college colors. Hanging from the chain is a large silver medallion containing the University's early seal.

The Awarding of Degrees at the University of Connecticut is accomplished by a twofold process. First, the candidates for degrees of each respective school or college are presented by the University Marshal. The candidates proceed to the front, receive their diplomas, are congratulated by their administrative officers and return to their seats. The School or College Marshal then officially presents the candidates to the Dean who acknowledges the candidates and declares the appropriate degree. Second, when all candidates have been duly presented, the President of the University formally confers the appropriate degree. This is accomplished verbally at the time that she speaks the words:

"By virtue of the authority vested in me by the Trustees of The University of Connecticut, and in accordance with the procedures and regulations of the University, I confer upon you the Associate's Degree, appropriate Bachelor's Degree, Master's Degree, or degree of Doctor for which you have been presented at this One Hundred and Thirty-Seventh Commencement of The University."

The Recessional of the officials and faculty is once again led by the Mace Bearer and University Marshal. The graduates, along with the audience, are requested to remain seated until the recessional is concluded.

*Out of respect and courtesy to all graduates, participants and guests
are requested to remain in their seats until the ceremony is concluded.*

The flowers displayed during the ceremonies are from the University's Plant Science Department greenhouses.

ACADEMIC HONORS

University Scholar

The University Scholar designation is the highest scholastic honor at the University. The individualized undergraduate programs of these students, which in some cases include work toward a graduate degree, are supervised by faculty committees. Up to thirty students are selected as University Scholars in the junior year. Candidates for the University Scholar designation wear medals on gold and blue ribbons at the Commencement exercises.

Honors Scholar

Honors Scholars are outstanding students who complete intensive two- or four-year programs, including Honors courses of unusual breadth and depth. Honors requirements include a senior thesis in the major field. Candidates for the Honors Scholar designation wear medals on blue and white ribbons at the Commencement exercises.

Please Note: An asterisk () after a graduate's name indicates that they are a candidate for dual degrees.*

THE GRADUATE SCHOOL

The parenthetical indication of a conferral date following a degree recipient's name signifies confirmed completion of degree requirements. If no conferral date is indicated, completion of degree requirements could not be confirmed at press time. Conferral of a degree is contingent upon verification by the Graduate School that a student has completed all requirements.

The official seal of the University of Connecticut depicts the ancient and mighty oak. Beautiful and sacred, the venerable oak symbolizes wisdom, longevity and hospitality. To Aristotle, the oak represented human potential.

The oak holds a special place in Connecticut's history. In a time long before statehood, the Connecticut colony's self-governing status was guaranteed by a charter issued by King Charles II of England. When, in 1687, his successor King James II attempted to reinstate the monarchy's authority, the Crown's emissary's efforts were foiled as the Royal Charter was secretly spirited to a temporary hiding place—a majestic oak in Hartford, forever after known as the Charter Oak. The oak became a symbol of freedom worldwide.

The oak has unique meaning for the University as well. In 1884, the commencement exercises of the second graduating

class of the Storrs Agricultural School were held in an oak grove on the Storrs campus. This grove, long a favorite gathering place for a variety of open-air meetings, served as the spiritual home to the growing community of scholars.

The University of Connecticut's graphic interpretation of the oak is a stylized synthesis of two acorns and three oak leaves, representing maturation, intellect and moral strength. The seal is the symbol of a large and diverse institution; it is used by all of the University's schools, colleges, regional campuses, professional schools and UConn Health. It communicates the broader mission of the University as a center for the pursuit, the creation, and the sharing of knowledge. The University of Connecticut, like the mighty oak, is rooted in a proud past and reaches toward a limitless future.
