Are You Prepared To Stay In College?

BIG QUESTION CONFRONTING PROSPECTIVE COLLEGE MEN IS WHETHER THEY HAVE TRAINED THEMSELVES TO THINK.

Thousands of young people are asking: "Can I get into college?" It would be well for them to ask: "Will I be able to stay in college after I get there?"

About 25 per cent. of those who enter each year drop out before they are graduated. In some small, compact colleges only 10 per cent. drop out.

In large, loosely knit institutions sometimes 50 per cent. disappear before the coveted diploma is reached. They enter college full of life and hope, and they fall out baffled and dejected. Why is this?

It may be for excellent or unavoidable causes. It may be because of ill-health or financial disaster or the pressure of home obligations. It may also be because of pernicious friendships or false ideals formed in the freshman year. It may be because the college itself neglects the individual student and leaves him to sink or swim alone.

Unpreparedness a Cause.

But the chief trouble is that the average boy is not "prepared" for college. He does not say in college because he has no staying power, no capacity for attention, no ability to concentrate.

I met in the college library a student from one of our best New England families, bending over a book, weary and bored.

"How are you getting on?" I asked. He answered: "How in the world does a man spend a whole hour looking at one book? After ten minutes I find myself looking out of the window!"

"How old are you?"

"Nineteen."

"Nineteen, and cannot concentrate for one hour? You ought to have learned that," I said, "when you were twelve years of age."

Soon after he "dropped out" and is now wandering over New England looking for a job where success can be won without attention—and there is no such job.

A Common Trouble.

The trouble with many boys when they enter college is not that they have had habits, but that they have no habits at all; not that they are going wrong, but that they are not going anywhere.

They are versatile, attractive and aimless.

They cannot focus their minds for an hour on any object or subject.

They are distracted minds, bundles of scattered energies.

They know a hundred things on

Athletic Notes

BASKETBALL MEN GET C'S.

Five men have been awarded their letters in basketball for the season 1915-16. They are Capt. Dickinson, Shea, Norton, Barlow and Traurig. Manager Ackerman is to receive his letter under the usual conditions. No date has been set as yet for the election of a captain for next year. The candidates for the position of assistant manager are Thompson and Rogers, '17. The election will be postponed until the latter has returned to college.

INDOOR TRACK MEET.

This, the second annual event, was one of the attractions of Alumni Day. The competition was keen enough in nearly all the events to make it of interest to the large number who turned out to see the contest. The two lower college classes made the most creditable showing, the Freshmen winning with 24½ points and the Sophomores taking second place with 17½. The First-Year School were third with 13 points, the Juniors fourth with 5, while the Seniors and Second-Year School were tied for fifth with one point each. Beginning next year the championship of the college will be awarded to those who succeed in breaking any previous records.

The results in detail:

Pole Vault—Hopwood, '19; Gleason, '19; Anderson, '16s. Height, 8 feet.

30-Yard Dash—McCarthy, '17s; A. W. Miller, '18; Horne, '18. Time, 4½ seconds.

High Jump—Gleason, '19; A. W. Miller, '18; Ely, '19, and Leffingwell, '18, tied. Height, 4 feet, 11½ inches.

1 Mile—Goodrich, '19; Ely, '19; Costello, '16. Time, 4 minutes, 22-4-5 seconds (12 laps).

Running Broad Jump—Won by A. W. Miller, '18; Barlow, '17s, 2nd; McCarthy, '17s, 3rd. Distance, 16 feet, 10 inches.

Shot Put—Won by Newmarker, '17; Ude, '17s, 2nd; McCarthy, '17s, 3rd. Distance, 31 feet, 4 inches.

Relay—Won by Sophomores (Barrett, Francis, Horne, A. W. Miller); Freshmen, 2nd; First-Year School, 3rd. Time, 1 minute, 45 seconds.

Officials—Judges at the finish: Messrs. Chase and W. B. Smith. Timers, Messrs. W. T. Ackerman and Ellis. Scorer, W. B. Smith.

the surface, nothing down to the roots.

They have ten times as much information as their father had at the same age, and yet do not know the meaning of work.

They are dazzled by a constantly changing world.

They can tell the name of every automobile that whizzes by the front door, but can not solve any problem

(Continued on page 4)

Alumni Attention

It will be the policy of the *Campus*, so far as is practical, to print the Alumni Notes by classes. For this reason all are requested to send notes and notices for publication to Walter T. Clark, Alumni Editor, who will classify them for printing. An Alumni Department is never successful unless all co-operate to make it so. If each and every one of the Alumni will do his best this feature of the *Campus* will be a success.

Alumni Day

A VERY SUCCESSFUL TIME.

In spite of the bad weather and floods threatened by "Uncle Horace," March 25th came off bright and fair. It was a fine day overhead but the snow and slush underfoot made the traveling bad. The Alumni began to come in on Friday afternoon by way of Eagleville, as the roads were so bad that the 'bus line to Willimantic had been discontinued. Friday night was spent in renewing old acquaintances but with much in store for Saturday not much revelry was indulged in. By noon Saturday about fifty Alumni had registered and many visitors were present in addition. The day was filled with various attractions but all found time to look around the campus besides. The celebrations were inaugurated with an Inter-Class Track Meet in the Hawley Armory at 10.00 a. m., the results of which are given elsewhere under the Athletic Notes.

COMPANY B WINS THE CUP.

At 2.30 the battalion assembled in the Armory for the Second Indoor Competition for the Armory Cup. Before an unusually large crowd of spectators the companies were marched on the floor separately where they executed the prescribed close order movements and the bayonet exercises after which they were inspected.

The competition was followed immediately by battalion parade, after which Capt. W. E. Dove, U. S. A., Commandant at Rhode Island State College and chairman of the committee of judges, stepped forward. He complimented the battalion as a whole upon their excellent work and said that in his opinion we excelled among the Land Grant colleges of our size. The task of choosing the winners, he said, was very difficult, as all had done great work; the judges, however, had decided that Company B was entitled to the cup. Capt. D. V. Dooley, '16, received the cup amid great applause and thanked his men for the good spirit and support that has been shown. Company B, which is composed of College Freshmen, has done very fine work throughout the year

Commencement Plans

A FURTHER ANNOUNCEMENT.

In the last issue of the *Campus* the announcement of the time of the Commemorative exercises was omitted. They are to be held Monday evening, June 12th, at 7.30 p. m., in the Hawley Armory. During Alumni Day the committee held an informal meeting, and many valuable suggestions were offered. It is hoped that in addition to the participation of the students and Glee Club that the Board of Trustees, Faculty and Alumni will all play a prominent part. In all probability the Governor of the State will be present and with Dr. L. H. Bailey to deliver the address at Commencement an unusually fine time is in prospect.

Along the same line arises the question of class reunions. Up-to-date only one class, 1891, has made any move. Mr. Fred Rosebrooks, of Willimantic, their class secretary, has stated that a considerable number plan to return in June. Following the five-year rule, all the "ones" and "sixes" are expected back.

and all were glad to see them win. Besides Capt. Dooley it is officered by Lieutenants Fellows and Metcalf and First Sergeant Shea.

1919 VS. 1916'S.

Immediately after the competitive drill Newmarker, '17, and Crampton, '19, gave an exhibition on the flying rings, trapeze and horizontal bars. The trapeze work was especially good and called out much applause. During the intermission of the game the same two men and Crawford, '17s, presented some very clever tumbling stunts.

The basketball game between the College Freshmen and the Second-Year School teams was the final in the Inter-Class Series which has been running throughout the winter. The game was well played on both sides and during the first period neither team seemed to have any great advantage over the other. The first half ended with the score, 5-2, in favor of the Freshmen, but during the second half the School team slowed up a little and allowed their opponents to accumulate sixteen additional points, while they failed to score once. The final result was 21-2.

The line-up:

Freshman.	Second-Year School.
Hopwood	LF Green, Foote
Upham	RF Brown
Gleason	C Anderson
Mallett	LG Charter
Reeves	RG Isele

Referee—Shea, '17.

"THE COLLEGE"

Editorials

A recent letter from E. C. Eaton, '11, calls our attention to the fact that there is an organization of C. A. C. alumni called the Massachusetts Club and that this association has, since 1911, been accustomed to hold reunions and banquets each year on the last Saturday night in December.

The editor knew that such a club had been organized but was under the impression that the body was no longer in existence. We are glad to know that the club is still alive and kicking and must acknowledge that first place goes to our Massachusetts alumni for the organization of the out-of-state men.

Mr. Eaton will be glad to answer all letters pertaining to the activities of the Massachusetts Club at his home address, 246 Central Street, Newton, Mass.

This is the opening wedge and we trust it will not be long before the New York and New Jersey men can get together. Later on we hope the county organizations can be formed in all eight counties of the state.

*

With the snow piled up against us, with the recent quarantine of the college and with a change in printers, the CAMPUS has struggled along. Our last few issues have been far behind schedule and we are not caught up yet. We are trying, however, to give you the best we can. The next issue will be made up largely of material contributed by members of the Freshman class and later we hope to have a Sophomore issue. Let us hear from you. Are you satisfied? Shall we continue this style paper next year? What are you doing and how many Alumni Notes can you send in?

Over half the student body at Brown has signed a petition asking that basketball be restored as an intercollegiate sport.

Professors In The Student Eye

Misunderstandings are responsible for so many misfortunes that, if they were to be graded as trouble-makers, their percentage could hardly be placed too high; but in the majority of cases misunderstandings are not the flighty, incoherent processes of mind they are reputed to be. The fact is that they are usually quite logical—except that they proceed from false premises. Fighting the prevalence of misunderstandings resolves itself into emphasizing the importance of correct starting points.

A close study of college troubles, those that arise between faculties and student bodies, would undoubtedly reveal that most of them have had their source in misunderstandings; and probably the misunderstandings have in over half the cases (to make a "rough guess") been in the student mind. If the student eye can be trained to take the right view of the instructor and his functions a service will be rendered to the college world which will result in the elimination of a multitude of unfortunate happenings, the happenings that cripple both the work of a college and its reputation. It is probably not saying too much to assert that the average student does not properly value his instructor. Even the student who respects his professor is often without a true estimate of the man whom he, for the sake of convention or for the sake of conscience, respects.

Professors are not mere purveyors of information. Their work is a far nicer task. Since education means "leading out," the professor is charged with the delicate task of leading the student mind out and forth. And again, the leadership in question is of so sensitive a nature that the real essence of the professor's work is inexpressibly subtle. Every entrance of the student into the classroom is the placing of the wonderfully constituted "mechanism" of his mind and soul into the instructor's hands for adjustment, regulation, and the importation of impulse.

A scientist tells us that one day as he approached a stone fence a section of it suddenly fell. No immediate cause could be assigned except the slight vibration of the earth caused by his step, he being three or four yards away when the wall fell. The real cause was a long, slow, silent process of decay and disintegration, which had begun the moment the wall was laid years before, and which culminated just as he approached it that day. The crash of the wall was the final summing-up of more than fifty years of atomic changes in the material of the wall. All that while gravity stood ready to complete the work just as soon as the last resisting atom or two should give away.

Education is to large extent the setting in motion of "atomic" mental and spiritual changes, though not for deterioration, but for betterment. No adequate judgment of the work of the educator can be handed down until the test of time has delivered its verdict. It is for this reason that in later life thousands of students transfer their allegiance from professors whom they admired in their college days to those whom they then disliked. Inner apol-

ogies offered by students to the memory of undervalued professors are countless.

With this in mind, the sensible student will put aside the usual standards of gaging his instructors' worth. He will tell himself that he cannot rightfully expect of his professors that they be infinite in information and perfect in patience. He will learn to look for personality, individuality, strength of character, fineness of soul, earnestness of purpose, fulness of energy, and kindred traits; and when he discovers these he will be content. He will at the same time learn to understand the worth of a faculty in which various temperaments are represented. He will be willing to choose his Alma Mater not by the brilliance which scintillates from her faculty roster, but by the radiance which glows there. He will suspend many an impatiently champing judgment. And the misunderstandings which he will thereby help to avoid not only will be happily missed in college life but they will prove typical of many missteps which he will avoid later in "real" life.—From the American Lutheran Survey.

ALUMNI DAY

(Continued from page 1)

ALUMNI DINNER.

At 6.00 p. m. the dining hall was crowded to the limit when the students, alumni, faculty, and guests assembled for the second annual alumni dinner. The following menu was served, the excellence of which caused many to wonder why banquets were not held more frequently on the hill, rather than in Hartford or other cities.

Oyster Cocktail

Olives	Pickles
Sea Food in Patty Shells	
Fillet of Beef	Mushrooms
French Fried Potatoes	
Peas in Timbale Cases	
Rolls	
Fresh Tomato Salad	
Wafers	
Frozen Pudding	Angel Food
Coffee	

Greeting from the undergraduates were extended by R. C. Ackerman, president of the Senior Class, and responded to by A. J. Brundage, '10, who served as the toastmaster of the evening.

E. M. Stoddard, '07, of the New Haven Experiment Station, was the first speaker on the list and gave an interesting talk on the work now being done by our alumni in experimental lines. C. B. Pomeroy, '91, followed with a few of his usual witty stories and gave some good sound counsel as to ways and means of boosting our Alma Mater. Harry G. Hanks, '07, urged a more thorough co-operation

among the alumni for organization and publicity. Leo Marks, '15, speaking upon "Democracy," stated that it has been said and ably demonstrated that at Connecticut their exists among the student body not only an ideal spirit of good fellowship and recognition of the other man's equality but that these traits are more prominent here than in any other institution in our class. Professor C. A. Wheeler, '88, chose for his topic, "Investments," and advised all to go slow not only in our investments at college but in our later life. The list of speakers was brought to a close by President Beach who was eagerly applauded. He spoke upon "What the Alumni Can Do for C. A. C.," and also outlined the plans for the development of the college for the year coming.

"THE COLLEGE WIDOW."

At 8.30 the Hawley Armory was crowded with an audience of unusual number who anxiously waited the rise of the curtain for the first act of the "College Widow." This comedy was presented by the C. A. C. Dramatic Club who had prepared it under the supervision of Miss A. M. Wallace. All of the cast were well chosen and took their parts in a very pleasing manner. Mention must be made, however, of the work of the Misses Clark and Daggett and Messrs. Dow and Watson, who excelled.

The entire cast is as follows:

Billy Bolton, a half-back	G. D. Wierpert
Dr. Witherspoon, A. M.; Ph. D.	President of Atwater College
Hiram Bolton, D. D.; LL.D.	A. B. Watson
President of the K. and H. Railroad	D. G. Horton
"Matty," McGowan, a Trainer	J. L. Crowley
Hon. Elam Hicks, of Squantum-ville	J. R. Case
"Bub" Hicks, a Freshman	T. H. Eich
Jack Larrabee, the Football Coach	E. J. Bailey
Copernicus Talbot, Post-Graduate Tutor	S. B. Morse
"Silent" Murphy, Center-rush	A. C. Gustafson
"Stub" Tallmadge, a busy Under-graduate	J. H. Norton
Tom Pearson, Right Tackle	P. N. Manwaring
Ollie Mitchell	W. H. Francis
Dick McAllister	E. N. Dickinson

FINALE.

The rest of the evening was given over to Frat reunions and all kept open house till a late hour. The visitors were transported to the trolley by the college team during Sunday and all left with great reluctance. The celebration was very successful and credit is mostly due to W. H. Allen, '16, the chairman of the committee, who was untiring in his efforts.

INTERCOLLEGIATE.

The four Universities of Manitoba, Saskatchewan, Alberta, and British Columbia, have each agreed to raise an entire company of graduates, undergraduates and other friends. Toronto University intends to form a training battalion of all students who have not already enlisted.

During the past year 35 per cent. of the students registered at the University of Illinois earned a part or all of their expenses.

Benjamin F. Cook of the University of Missouri, is publishing a four page periodical while attending school. He published a newspaper before entering Missouri.

At Purdue, they publish in the "Exponent," a list of freshmen who have failed to wear their freshmen caps. The list is called "The Dishonor Roll."

The College Book Store

In speaking of a co-operative store the *Campus* emphasized in the last issue the need of more space than has been available. The first step towards providing a suitable location for the book store has now been taken. It has been decided to use the room occupied by Prof. Smith. New shelving, a counter, show cases and an entrance from the rear for use in moving in supplies, will be provided. It is also hoped that an extension from the office telephone can be installed.

The additional space allowed with a better arrangement of shelving will permit the store to buy in much larger quantities, thereby lowering the cost of supplies. It will also permit the keeping of a larger variety of supplies in stock. This means better service in every way.

The Denison line is to be more complete. Fountain pens, photographic supplies, souvenir cards and pennants will be carried in stock. It is not likely, however, that the supply of photographic material will be purchased until late in the summer because of the very high prices now being quoted.

An agreement has been made with the Sterling Desk Company of Grand Rapids, Michigan, to handle their line of desks. There will be a sample desk kept in stock and shipments made direct from factory. It will also be

possible to buy through the store Dornette and Cutler desks at about 25 per cent. below list price.

It is expected that the store will soon be in a position to offer special prices on steel die stamped letter heads for classes, clubs and fraternities. These will be similar to the college letter sheets now carried in stock.

Although the cost price of loose leaf binders and fillers has advanced 25 per cent. the store prices have been increased only 20 per cent. Envelopes and most paper has increased from 25 per cent. to 50 per cent. The store is, however, still able to sell at the old price, a considerable quantity of these supplies having been placed in stock before the advance.—Advertisement.

ARE YOU PREPARED TO STAY IN COLLEGE?

(Continued from page 1)

that demands twenty minutes of honest thinking.

They are charming young fellows to know, but nearly useless to any college or in any business office.

They are not "self-starters;" they must be cranked constantly by some employer or teacher, or they can not move.

It would be an immense gain to American colleges if about one-quarter of the students now in them could be immediately excluded, and their places filled with the eager out-siders who were longing for a chance to study—but who is wise enough to select the men that are not worth while? We shall have to depend on the clumsy examination system for a long time to come.

But two things we can do. We can remind every one who wants to enter college that "preparedness" is vastly more than cramming down the languages and mathematics.

To be prepared means to have acquired a real ambition. It means the power to say "no" to foolish things and "yes" to the big things of life.

It means to possess a backbone that is more than a "chocolate eclair." It means getting done with "kiddishness" and resolving to play the man. He who is still a child—in fickle purpose

"Natco On The Farm"

is the title of our new book that every farmer who takes pride in his farm buildings should have. It shows with many fine illustrations the use of Natco Hollow Tile for barns, houses, corn cribs, etc. Send for it. Study it. Heavy Mail at Hickory, N. C.

International Harvester Cream Separators Lily—Primrose

Do you realize the great interest there is in modern, profit-building dairy methods just now? At a big Farmers' Union Meeting, comprising 18 counties in North Carolina, 20 of our booklets, "Facts and Figures on Dairying," were passed through the crowd from man to man. Those desiring copies were asked to write to the Catawba Creamery, Hickory, North Carolina.

In 25 days, 462 requests for booklets were received. Farmers are realizing that three cows with a good cream separator are as profitable as four without one. A good separator is one that gets all the cream down to one drop in each gallon of skim milk. That's efficiency—and that's the reason for the popularity of International Harvester separators, Lily and Primrose. Lily and Primrose separators skim to this fine standard for years, because they are built on a sane design, strong, simple, reliable, sanitary. The few easy adjustments necessary, anyone can make. The single automatic oiling arrangement takes care of every bearing and sidesteps trouble. "Facts and Figures on Dairying" will help you, too. Write for it and for a catalogue. See the IHC dealer who can furnish you with a Lily or a Primrose separator.

and flabby will—should stay out of the college which will treat him as a man.

The Care of Freshmen.

The other thing we can do is to insist that the college itself shall take better care of the freshmen. All the colleges are now waking up to the waste and wreckage of the freshman year. In different ways we are all attacking the same problem.

At Harvard the remedy is offered through freshman dormitories, practically segregating the freshmen class. At Princeton the remedy is found in a system of preceptors, each one having a squad of five or six students under his personal guidance.

At Amherst it is proposed to open to the freshman a course in economics, which will lead them out of "prep. school studies" into the discussion of the fundamental problems of modern society.

At Brown we shall require all new students this year to take a course of one hour a week in what we call the "Orientation of Freshmen"—instruction in the origin and purpose of the American college, the meaning and value of the different departments and studies, student standards of honor, the use and abuse of fraternities, student activities, etc.

Thus we are all trying in different ways to save students from blind groping, stumbling and dropping out. But we can not save them unless they want to be saved.

Perhaps thirty thousand young people entered our colleges in September, to write after their names the magic figures "19." Some of them will be out of college again in January. "Can I get in?" That is not the real question. The question to be asked now is: "Can I stay?" Can I survive the sifting process and prove that I was worth educating?"

By WILLIAM H. FAUNCE,
President Brown University.

Vistas of Mt. Lowe

BY LESLIE C. BARNARD, '07.

Just a few lines to picture Mt. Lowe and its incline railway and miles of electric car line 3,000 feet and more above the sea, leading through scenes of beauty and grandeur to Alpine Tavern at an altitude of 5,000 feet.

From Inspiration Point, a short distance beyond the tavern, one can look down over the valley nearly a mile below spread out like a broad fan and dotted with farms and villages like a checkerboard with the beautiful city of Pasadena at its head, Pasadena meaning in the Indian tongue, "head or crown of the valley." Los Angeles is also plainly visible and when the air is clear enough the coast cities and pleasure resorts beyond it. The summit is 1,100 feet above the Alpine Tavern and the view obtained from there more than repays one for the three miles of walk to reach it, for in one direction one can look over a vast sea of mountains, backed by Old Baldy in the distance, a high peak which is snow capped the greater part of the year and in the other direction is a broader sweep of valley as seen from the greater height and when very clear the ocean is seen gleaming like a golden band in the sunlight, while at

The Brisk Smoke—"Bull" Durham

When you see an alert-looking young man in a lively argument roll a "Bull" Durham cigarette—it's the natural thing. He likes to punctuate a crisp sentence with a puff of "Bull" Durham. His mind responds to the freshness that's in the taste of it, and his senses are quickened by its unique aroma. A cigarette of "Bull" Durham just fits in with keen thinking and forceful action.

GENUINE

"BULL" DURHAM SMOKING TOBACCO

Made of "bright" Virginia-North Carolina leaf, "Bull" Durham is rich, fragrant, mellow-sweet—the mildest, most enjoyable of smokes.

Ask for FREE package of
"papers" with each 5c sack

"Roll your own" with "Bull" Durham and join the army of smokers who have found that so good a cigarette cannot be obtained in any other way.

FREE An Illustrated Booklet, showing correct way to "Roll Your Own" Cigarettes, and a package of cigarette papers, will both be mailed, free, to any address in U. S. on request. Address "Bull" Durham, Durham, N. C.

THE AMERICAN TOBACCO CO.

Feed Your Crops Available Potash

Insoluble plant foods are cheap in the beginning but may be dear in the end. We feel good when we hear that the soil contains enough Potash to raise 5000 crops, but we feel tired when we discover that it will take 1000 years or so to make it available. We will be converted into plant food ourselves long before that.

POTASH

The acids derived from green manure may make insoluble phosphate of lime more available. But the feldspathic Potash in the soil is less soluble in these acids than in the slightly alkaline waters of the best soils. A little soil Potash becomes available yearly, but not enough to provide for profitable crops. Crops have two periods of Potash hunger. One just after germination and the other when starch formation is most rapid—when the grain is filling. Rational fertilization requires ample available Potash at these periods and if you provide it you will find that Potash Pays. Send for our pamphlet on making fertilizers.

such times Santa Catalina Island, the far-famed fishing resort, looms up like a high shadow against the horizon.

One of the most surprising views is to be had by coming down on the last car after dark where from Inspiration Point are to be seen Pasadena and Los Angeles spread out 5,000 feet below with their myriad of lights glistening and twinkling like stars on a frosty night and the distance seems more vast after the sunlight has departed and quiet reigns supreme.

Three or four miles further along the same range is Mt. Wilson, a peak slightly lower than Mt. Lowe, on the summit of which is an astronomical observatory. In this observatory is being mounted the largest telescope in the world with a lens of 100 inches diameter. Two years ago an automobile road was opened to the summit but even now most people prefer climbing the nine-mile trail from the town of Sierra Madre at its base.

Value of a Trained Agriculturist

ANDREW M. SOULE, PRESIDENT
GEORGIA STATE COLLEGE OF
AGRICULTURE.

Statistics show that the earning capacity of every man the university is increased by about \$20 a day for every day of the four years he is ordinarily in college, or to the extent of \$24,000 for his life-earning period. These figures are based on public school training providing a life-earning ability of \$32,000, high school training \$48,000 and University training \$72,000.

Georgia has invested half a million dollars in higher education in agriculture, and, according to these figures, is destined to secure from graduates and post-graduates alone \$1,920,000; from short course men, based on one-twelfth the return from college course, \$3,472,000, or a grand total of \$5,392,000.

No line of human activity is more likely to give returns equivalent to these figures than agriculture, the least understood, appreciated or scientifically correlated of our vocations. In fact, what investment can a state hope to make which will pay so large a dividend as the training of her youth to participate with efficiency in her basic agricultural industries?

Thus, the formations for initial leadership have been established, for Georgia has been fortunate in returning within her own borders practically every man who has ever attended a course at the College of Agriculture, and the great majority of the small but loyal and efficient body of alumni are now working for the state in some capacity.

Campus Notes

On March 16th President and Mrs. Beach entertained the members of the Senior Class. Lunch was served and a very pleasant evening was reported by all.

Professor—"Why is the funny bone so called?"

Student—"Because it borders on the humorus."

Coke—"May I have your mug to shave?"

Bloke—"Shave your own mug."

At St. Lawrence University the standing of all students is to be made public at the end of each semester.

A new burglar alarm and fire whistle has been installed at the pump-house in the rear of the Main Building. It is tried out every Saturday noon.

Fresh—"Gotta couple of thumb-tacks?"

Ditto—"What for?"

No. 1—"I'm going out in the wind and I want something to keep my hat on."

The farm department has recently purchased of J. R. Kelsey, of Woodville, Ont., Nock, the champion Shropshire ram, at Toronto, 1915. Nock 43 (01409R) 380954 is a three-year-old and the sire of a sensational yearling that was first at nine Canadian fairs as a lamb 1914, first at Toronto and was brought by Professor Barton to head the flock at McDonald College. He also sired the third and fourth prize five sheep, any age or breed, get of sire at Toronto. He is the sire of the ram at the head of the flock at the Davison Farm at Ottawa.

On Saturday, March 18th, Dr. Peter MacQueen, F. R. G. S., gave an illustrated travelogue in the Hawley Armory. His subject was "The Great War." Dr. MacQueen is a Scottish-American graduate from Princeton, who has traveled extensively all over the world. He followed the American armies through the campaign of the War of 1898 and the Philippine disturbances, he was in South Africa at the time of the Boer War and has kept in the storm centers ever since. He has published several books of his travels and counts among his personal friends Kings, Presidents, Diplomats and Generals. His recent experiences in Europe furnished first hand material for his talk.

Extensive changes have been recently made in the main building. Room three has been partitioned into a new post office and an office for the secretary of the faculty. The rooms on the other side of the hallway are to be made into one and the space devoted to the coop and the bookstore and also to provide a much needed enlargement of the Chief Clerk's office.

The new sheep barn is now occupied by a flock of forty "woolies" which were brought up from Georgetown a short time ago by Cahill. "Hank" had a hard time to get them through the freight jam and spent several nights with sheep before they reached Willimantic. Even then the deep snow prevented their being driven up and the farm teams were sent down. Professor Garrigus has now built up a very fine flock of sheep and is to be congratulated.

Rev. Mr. Dawson, the new minister at the College Church, has recently delivered a series of sermons on "Lessons from Great Lives." These talks have been very interesting and have attracted an unusual number of students.

DE LAVAL

**O.K'd by
nearly
two
million
cow owners**

MORE De Laval separators are being sold than all other makes combined—nearly 2,000,000 are now in use. Year by year an ever increasing proportion of farm separator buyers reach the conclusion that the De Laval is the only cream separator they can afford to buy or use.

In fact, about the only excuse ever offered for buying any other separator nowadays is that its first cost is a little less than the De Laval.

But they soon find out that the last cost of a cream separator is what really counts, and when they realize that the De Laval gives the most and best service for the money they buy a De Laval.

Over 40,000 users of inferior machines discarded them for De Laval during the past year in the United States and Canada alone.

Better be right in the first place and start with a De Laval.
