THE CONNECTICUT CAMPUS

PUBLISHED SEMI-MONTHLY DURING THE COLLEGE YEAR

VOL. IV

STORRS, CONN., FRIDAY, MAY 3, 1918

No. 14

C. A. C. MEN DO WELL AT TRAINING CAMPS

SIXTEEN NAMES APPEAR ON ELIGIBILITY LIST.

Most of Them in France Now—To Get Commissions When Vacancies Occur.

The Third Officers' Training School, which was held at Camp Upton, Yaphank, Long Island, closed on April 25. Twenty men from the College, including both graduates and undergraduates, trained at this school since its commencement on January 5.

Unlike other camps the commissions will not be awarded until vacancies occur, but a list of the men who have completed this work satisfactorily has been made. These men will continue training until they are called to fill vacancies. Already three-quarters of the Connecticut Aggie men who attended this camp have been shipped "over there", where they will continue their training.

The men whose names were recommended for the eligibility list of the army, are as follows:

W. T. Ackerman, '15.
B. A. Brown, '16s.
M. K. Cadwell, '15.
W. H. Carrier, Jr., '13s.
J. R. Case, '16.
E. N. Dickinson, ex-'18.
J. R. Dillon, ex-'18.
H. E. Evans, ex-'15.
C. A. Johnson, ex-'18.
W. P. Langdon, '15.
J. H. Norton, '17.
W. B. Smith, '17.
R. A. Storrs, '09.
A. E. Upham, ex-'19.
L. K. Burwell, ex-'17.
A. J. Reeve, ex-'19.

POULTRY BREEDING EXPERIMENT CONDUCTED.

In conducting breeding experiments in 1917, the poultry department selected fourteen individuals from seven or eight pens whose eggs hatched out very satisfactorily. These hens, which were scattered through the different pens last year and were mated with different birds, were collected this year and mated with one rooster, to see if it was the individual merit of the hen in producing fertile eggs. 102 eggs were incubated and all proved to be fertile from these birds, except one. This throws a new light on poultry breeding, for if the hens can be picked out whose eggs are all fertile, the per cent. of hatchability will be greatly increased and the loss in hatching lessened.

COLLEGE WILL WORK DURING THE SUMMER

FACULTY TO DO EXTENSION AND PUBLICITY WORK.

Canning Schools and Boys' Training Camps to be Conducted Here.

The College is soon to close for the summer vacation but it does not necessarily follow that the College itself will be closed during the vacation period. On the contrary, there will be much work done and many students will be housed in the dormitories through the entire summer months.

Canning schools almost similar to those which were held last summer, will start June 5 and each session of these schools will be for one week. The number of women who will avail themselves of this opportunity to learn the newer and better methods of canning fruits and vegetables, as well as the making of jellies is not known, but it is expected that the enrollment will surpass that of 1917. This work is in charge of the Extension Department of the College and the teaching will probably be handled by the instructors from the domestic science department.

The boys' agricultural camps, for the training of boys from several high schools in the state, will be started soon after the closing of the College year. The boys who attend these camps have volunteered to work on the farms of the state in an endeavor to help the farmers solve the difficulty of the shortage of labor. The course of training will consist of military drill and elementary courses in farm and garden work. The recruiting of boys for the work is being carried on by Rev. Arthur Howe, of Loomis Institute, who is working in conjunction with the State Council of Defense. Each camp is to be for two weeks and it is presumed that there will be about one hundred enrolled in each camp. The committee in charge of the courses of study is Dr. T. H. Eaton, Prof. W. L. Slate, Jr., and G. S. Torrey. It has not been decided who is to have charge of the military work.

During the vacation period, the faculty members will continue their work with the State Council of Defense and, in addition, will assist in the work of the Extension Service.

PRESIDENT BEACH RETURNS.

President Charles L. Beach returned to his duties, Monday, April 22, after several weeks of illness. On the advice of his physician he took a three-weeks' vacation, spending it in St. Louis, Mo.

COLLEGE PLANS TO BUILD MECHANICAL PLANT AT EAGLEVILLE TO HANDLE COAL

GLENN H. CAMPBELL.

OUR SILENT PARTNER.

Many business organizations have a silent partner and some are more silent than others, but surely none has a more interested, valuable and helpful one, than we. It is to him that most of the improvements in our college paper are due. Through his excellent suggestions and keen interest in our sheet, the "Campus" has reached the end of its most successful year in the history of the College. It has been put on a regular schedule, has contained good and snappy news, has been given a definite and business-like make-up and everyone will agree, deserves to be classed as an A number 1 College newspaper.

Under our silent partner's guiding hand the business department has gone through a successful year, and its books do not show a "hang-over" in the wrong direction. In fact, we are to have a sinking fund, something to start the year with next fall and this alone is an achievement in itself.

Yes, we may have made a mistake in calling our partner silent, for he really isn't,—only when it comes to his share of the credit. He is too modest to claim any for himself, while the editors and members of the board have had so many bouquets handed them, that it is a wonder that they haven't been afflicted with an enlargement of the cranium. However, the members of the "Campus" Board wish to extend to our silent partner and faculty advisor, Glenn H. Campbell, their hearty appreciation for his interest in our paper.

BOARD OF TRUSTEES TO CONSIDER IT THIS MONTH.

Cost to be Under \$5,000—Will Reduce the Cost of Hauling Coal.

The College is planning to build a bunker and mechanical plant at Eagleville this year in order to handle its coal supply more efficiently. The Board of Trustees have not yet passed upon this project, but the plans will be presented at the May meeting for action.

This plant will be built on the siding about 500 feet south of the Eagleville station. An option on the land has been granted the College for this work, by Lydia Harris, the owner. The plans call for a concrete pit to be constructed under the railroad track so that the cars can be emptied into it through the pockets in the car bottoms. This pit will be so built that the coal will be slid out by gravity to one side of the track, where it will be picked up by an endless chain conveyor and emptied into a bunker of ten to fifteen tons capacity.

This bunker will be of plank and will be built high enough in the air so that the bottom of it will be about twenty-five feet above the ground. The floor will be tapered and a hopper will be provided so that the coal can be dropped into an automatic car. Provision is also made so that teams can be loaded directly from the bunker, which will be the method followed, unless large quantities of coal are received at one time, when it will be held in storage. The distributing of the coal to be held in reserve is to be done by a car of one ton capacity suspended upon a cable. The trestle

(Continued on page 5.)

K. B. MUSSER ACCEPTS A NEW POSITION IN WASHINGTON.

Karl B. Musser has accepted a position with the State University and Agricultural College at Pullman, Washington, as State Leader of Dairy Extension Specialists.

Mr. Musser received his B. S. degree at Kansas State College in 1912 and his M. A. degree at the University of Missouri in 1913. In 1914 he came to this College as instructor of dairying, in which position he remained for one year. Since then he has been extension dairyman. Mr. Musser leaves to take up his new duties about May 15.

STUDENTS TAKE TRYS AT CATTLE JUDGING

VISIT PROMINENT HERDS.

Preparing for Judging Team to Judge at the Fairs this Fall.

The class in cattle judging started on an inspection trip with Professor G. C. White on Wednesday afternoon. This trip is being made in order to give the students an opportunity to familiarize themselves with some of the best individuals of the four dairy breeds. This work is in preparation of a team to judge at some of the fairs and cattle shows next fall.

The first place that was visited was that of Edmund Butler at Mount Kisco, N. Y., where the men saw some of the champions of the Jersey breed, as well as attending the sale which was conducted at the farm on Thursday. In addition they got acquainted with a number of Jersey breeders who came to the sale after attending the meeting of the American Jersey Cattle Club the day before.

Today they will journey to Strathglass Farm at Portchester, N. Y., owned by Hugh Chisholm. This herd consists of about fifty Advanced Registry Ayrshires, and is the most prominent herd of its kind in the United States, and comprises some of the best individuals of the breed. The Guernsey herd of C. I. Mackay at Roslyn, L. I., will be visited next. It is noted for its Advanced Registry and show stock.

On Saturday the class will return to the College, stopping off at Wallingford to see the Holstein herd owned by the Wallace Holstein Company and managed by R. A. Buell, an alumnus of this College.

DRAMATIC CLUB HOLDS FIRST BANQUET AT COTTAGE.

Miss Wallace Presented With Gift.

The Dramatic Club held its first banquet Friday evening, April 19, at Grove Cottage. On this occasion the club took the opportunity to show their appreciation of the work of Miss Anna M. Wallace, director of the club, by presenting her with a bronze desk set inlaid with silver. S. B. Morse, acting as toastmaster, made the presentation.

There were twenty-two members at the banquet and it was the unanimous opinion that such an affair should be held every year, in order that the members might become more strongly associated.

The committee in charge was Gladys V. Daggett, Loretto Guilfoile, Gertrude Luddy, P. L. Sanford and W. F. Maloney. A great deal of credit is due Vera A. Lee, who had charge of the decorating, which consisted of palms, roses, banners of each class, and the College colors, blue and white.

The regular monthly military muster and inspection was held on Wednesday, May 1.

PERCIL LYMAN SANFORD.
Hadlyme, Conn.

Sigma Alpha Pi; Gamma Chi Epsilon; Honor Student (2, 4); Junior Prom. Committee (2); Senior Alumni Council (3); President (4); Class Treasurer (3); President (4); Nutmeg Board (3); Dramatic Club (3); Secretary-Treasurer (4); Crops Judging Team (3); Manager Baseball (4); Athletic Council (4); President Student Council (4); Treasurer Student Friendship War Fund (4); Mid-year Informal and Spring Informal Committees (4); Captain (4); Commencement Committee (4); Poultry.

"Pecky", the class youngster, comes from Hadlyme, a small town down the river, but it does not follow that he still possesses "small-town" ways. After a year of College life and activity, he blossomed forth and is now, despite his youth, a help to many who seek advice.

Peck's greatest delight is, or seems to be, the Co-ed tables in the Dining Hall and he takes excellent care of the young ladies who are under his supervision. He is in a position to do this in a very creditable manner, since he is the second assistant manager of the boarding department.

Always working for the best interests of the College and his fellow-students, "Laddie" has made a friend of every person on the Hill and success will surely be his when he starts out in the world.

J. A. MANTER UNDERGOES SERIOUS OPERATION.

Had Sudden Attack of Appendicitis—
Been in Ill-Health About a Year.

J. A. Manter, instructor in Zoölogy at the College, was taken seriously ill with appendicitis Friday, April 26, and was taken to St. Joseph's Hospital in Willimantic, where he was operated on the same day, as the case demanded immediate attention. Mr. Manter has suffered attacks of ill health for about a year, but until his severe attack of last Friday, it was not known what had caused them. After the operation, it was acknowledged that he was in a serious condition.

No Worry About Harvest

HAVE you noticed how

discussion of the food supply situation seems to center around the number of acres it is possible to plant rather than around the harvesting of those planted acres?

It is an unconscious, but none the less wonderful, tribute to the genius of the inventors of the reaper and binder that the American public takes the harvesting of the greatest grain crop ever planted as a matter of course. The sole question now is, "How many acres can we plant?" The power and help required by the planting will be amply sufficient for the harvest where **Champion, Deering, McCormick, Milwaukee or Osborne** binders and binder twine are used.

And, where they are used, the harvest will be complete. No matter whether the grain be tall or short, heavy or light, standing or down, lodged and tangled, an International Harvester binder cuts and binds it all without waste.

It is an easy matter to be fully prepared for harvest. Buy the largest binder you can use. An 8-foot is better than a 7, and a 7 better than a 6 or 5 because the larger sizes conserve labor. Buy a new machine if there is any question about the efficiency of the old one. There is a limit, you know, to the dependability of repaired machines, while a new one is absolutely reliable.

Through our 90 branch houses and over 30,000 dealers, we furnish promptly either new machines or repairs for old ones. Do not hesitate to call on our organization for any help we can give in the harvesting of this year's grain crop—the most important crop ever raised. See the local dealer or write us direct.

NO CAMP WEEK TO BE HELD THIS YEAR

SHORT COLLEGE YEAR MAKES IT IMPOSSIBLE.

Battalion Officers for Next Year to be Announced at Drill May 2.

Because of the shortening of the College year, the faculty have decided to dispense with the usual military week. In the past the custom has been to devote an entire week in the early spring to military drill and tactics. When it was possible the battalion spent this time at Fort H. G. Wright, otherwise it was taken up here at the College.

This year it was planned to devote the week of April 29 to this purpose, here at the College. Unlike in previous years, classes were to be held in the morning, as usual, and the afternoons were to be given over to ceremonies, close order drills, and field problems. In addition, guard details were to have been stationed from 2 until 8 p. m., with reliefs every hour.

The regular drill will be carried on until the end of the year. On May 2 there will be a battalion parade and review at which the officers for the coming College year will be announced. At this time the battalion will be turned over to them by the Senior officers.

HORTICULTURE CLASSES INSPECT NURSERIES.

Opportunity Given to See Nursery Operations.

The Junior class and the Senior class in horticulture, together with the instructor, S. P. Hollister, visited the Burr Nurseries in Manchester on Friday, April 19. The purpose of the trip was to familiarize the students with the growing, storing and packing of nursery stock for market.

This nursery is the largest in the state and has a number of farms, three of which were visited by the students. Opportunity was given to see the ornamental shrubbery and fruit trees in all their processes from growing to the packing for shipment, as well as to learn the methods and policies of the company in the growing and selling of their stock.

PROFESSOR KIRKPATRICK ATTENDS POULTRY MEETING.

On April 22, Professor W. F. Kirkpatrick was sent to represent Connecticut at a meeting of poultrymen in New York. This meeting was the outcome of an action of the Chicago Convention of Poultrymen and it was called to organize a War Emergency Poultry Federation. It was decided among other things, to organize a Poultry Producers' Exchange in New England.

SANFORD BOUGHTON MORSE.
Syracuse, N. Y.

Alpha Phi; Gamma Chi Epsilon; Honor Student (1, 2); Glee Club (1, 2, 3, 4); Leader (2, 3, 4); Dramatic Club (1, 2, 3, 4); President (4); Junior Prom. Committee (1, 2); Mid-year Informal Committee (3); Class Secretary (2); Senior Alumni Council (2, 3, 4); Crops Judging Team (3); President Students' Organization (4); "Campus" Board (3, 4); Managing Editor (4); Major of Battalion (4); Class Editor (4); Science.

Our "Sammy" came all the way from the West—Cleveland—to be exact, to old Aggie in quest of knowledge. The College has benefitted and grown through his presence, for, since his arrival, several new buildings have been erected.

Although a staunch supporter of Connecticut, "Sam" is not a farmer, but is an ultra, super-fine chemist and his life work, as mapped out, is to manufacture tri-nitro-toluol. That is, after he comes back from the war.

As an actor and a singer, "Sam" is "there" and he has always been a conscientious worker for his class and for all activities in which he has been engaged. Before settling down, "Sam" expects to have a bit of excitement and fun helping Uncle Sam to clean out the Germans from France and Belgium. His one hope is that the war will last long enough for him to get into the game.

ETA LAMBDA SIGMA NOTES.

Walter T. Clark, ex-'18, and Harry Hanks, '06, were recent visitors on the Hill.

E. S. Ely, ex-'19, has enlisted in the Naval Reserves and is stationed at Newport, R. I.

Andrew Schenker, '21, has accepted a position at the New Jersey Experiment Station as a milk tester.

Frederick Maier, '21, has withdrawn from College to take up his new duties as assistant garden supervisor of the city of Boston.

L. W. Cassel, '19, was on the Hill over the week-end of April 20.

J. R. Dillon, ex-'18, has been transferred to Company E, 307th Infantry, U. S. N. A.

KEEPING QUALITY OF MILK

In order that a milk shall possess the keeping quality necessary to insure that the greatest satisfaction shall result from its sale every source of bacteria should be as far as possible removed.

Since bacteria imbeds itself in minute particles of grease and other foreign matter, that power of

to clean thoroughly every crack and crevice of dairy utensils is a factor which again proves the peculiar fitness of this cleaner in that it prolongs the keeping quality of the milk.

Nothing is of greater importance during this period of world strain than that everyone contribute his bit in the Nation's effort to conserve the food supply. Since the results produced by the use of this cleaner assist not alone in protecting the food value of your product, but your dairy profits as well the reason is evident why it merits the preference of so large a number of users.

Every order for this cleaner is accepted on our money back guarantee. Order from your supply house.

Indian in Circle in every package of

Wyandotte Dairyman's Cleaner and Cleanser.

This cleaner has been awarded the HIGHEST PRIZE wherever exhibited.

THE COLLEGE YEAR.

We are now at the close of a college year, the first one that has been modified by war conditions. This fact was brought to the attention of the upper-classes last fall when the entering classes more than equalled all the other classes in the College, by having slightly over one hundred of the 193 students who enrolled.

This condition impressed upon the minds of the students that we were at war and it meant that it was our duty to carry on the work which had been started along with our new duties. In spite of these conditions, we can say that this year has been one of the most successful in the history of our College. Never before have opportunities been opened in agriculture as they have this year, because agricultural production is absolutely necessary to the prosecution of the war. A record-breaking entering class indicated that agriculture has been receiving just consideration and throughout our shortened year the courses have been intensified in order to produce efficient leaders in this line of work.

The college functions have been modified to some extent in accordance with the present crisis, but by no means have we given up activities at the cost of losing our morale. Our dances have been informal and inexpensive and our dramatic club presentations have been numerous and fully up to the standards of pre-

vious years. In addition, a college orchestra has been formed which deserves no little credit for its musical ability; an active debating club has been established and, finally, under the able direction of our faculty advisor, G. H. Campbell, the "Campus" has completed the most prosperous and successful year that it has ever had.

We owe these things, not only to our own activities, but to our president, Charles L. Beach, and other members of our faculty, who have been anxious to cooperate with us and have permitted us the privilege of student self-government. The one great thought continually in their minds has been that of fitting us for service, both at the front and at home.

Throughout the year, we have dwindled down to barely 115 students and of those who have seen fit to leave us during the year fifteen have gone into the service. A number of our men will go into the Officers' Training Schools and Camps during the summer, while the rest will go into some work essential to the winning of the war.

As a student body, we are determined to win this war by sticking to our duties and doing our best, not because we have selfish interests at stake, but because we owe it to our Government and our boys "over there." When the government sees fit to change our duties, our responses will be made with the same spirit.

SAVE AND SUBSCRIBE NOW.

While in College, as students, the greater part of us have not been in a position to contribute to our Government's war fund campaigns, such as the Liberty Loan. Nevertheless, we can and should promote all of these efforts, not by simply expressing our thoughts to the extent of saying that they are a good thing, but by actually persuading our friends to buy war bonds and war savings stamps.

We do not realize what it really means to sacrifice, but, with the continuation of this war, conditions will compel us to save and sacrifice. There is no better time than now for us who are supposed to be leaders to develop that habit and begin to invest in war funds, even though in small amounts. By so doing, that spirit of giving will be so engraved in our characters that we cannot help but make it contagious with our associates.

Many of the boys have made a sacrifice, by offering their lives in service, that we cannot fully realize, but we can get behind them with the same spirit and set our minds and efforts to help them overthrow autocracy. Let every Connecticut man and woman start now to develop this spirit of saving and giving and keep it a-burning, not only in ourselves, but in those with whom we come in contact.

The editor wishes to extend a vote of appreciation to Miss Elizabeth Ellis for her hearty cooperation in assisting the Board throughout the year in the stenographic work.

Students' Safety Valve

CREDITS FOR STUDIES.

Dear Editor:

I wonder if you, or any others of the student body, outside of those directly affected, have thought of the unfairness of taking off a portion of the credits of those fellows who left early to take up garden supervision jobs? Last year men left to enter this work and lost even more time than the students this year, but they didn't lose any credits by doing so. It is true that these fellows this spring are going to lose four-fifteenths of their classes, but nearly one-fourth of this is exams, and they surely do not learn anything from them. It's a fair bet that they are doing twice as much work as they did here, and even though they do get paid for it, the money is not all clear. As for the educational part of it, I'll wager they are learning more of real educational value now, than they would in the same time in a classroom.

But this is not the only side of the argument. Don't you suppose the College is getting any direct returns from their work? Their being scattered around through the state and mixing with people is one of the greatest advertisements the College has ever had. In a direct way their influence is going to be responsible for at least twenty per cent. of the new students coming to C. A. C. If you don't believe this, just keep your eye on the new men next fall and find out how many were persuaded to come to Connecticut by some garden supervisor. I know of one town now where there are four high school fellows who are planning to come here when they finish their high school course.

It seems, for this reason alone, that they should be allowed full credit for the term, for that five or six credits that they lose may mean considerable to those who are planning to graduate when they get the required 150.

X. Y. Z.

1918 CLASS HISTORY.

Early in the fall of 1914, there came unto the campus of the Connecticut Agricultural College thirty-five innocent, green and peppery freshmen. They were the members of the class of 1918 and it was not long before the College knew that they had arrived. Their domineering sophomores, the class of 1917, kept the new arrivals under their care and guidance and, at length, the freshmen were duly initiated into the intricacies of College life.

During the first year of our residence at Connecticut, we were well represented in all branches of athletics, took active part in all student activities and in the classroom we showed the "Profs" what we could do in the line of gleaned knowledge from text-books. In the second year,

we had the opportunity to be the domineering sophomores and, since we "knew the ropes", we used our knowledge to the utmost. A spirit of friendship soon grew up between the classes of 1918 and 1919 and, at the end of the year, all petty quarrels were over and the hatchet was buried.

The fall of 1916 found the membership of the class cut down to twenty-four men, the remainder having dropped out for one reason or another. Things went along peacefully enough during the Junior year until, in the spring, there loomed across our horizon that sinister word war. Immediately several of our men left College to enter the army and help the country, while a few of the others went onto the farms and into garden work.

Upon the reopening of College in October, 1917, there were only twelve of the veterans of the class who came back to take up their work where they had left off and carry it to completion in their big year. Seven of the boys who did not return had received their commissions in the army and three more had entered the army by enlistment or draft, while two men had taken hold of farms in an effort to serve. Much responsibility rested upon the shoulders of the meagre handful who were left, but they tried to bear it as well as possible and to keep things going as they had been before the war. In the passing of time during this college year, we have continued to lose men, both for the service and for agriculture work, until there are but five of us left at graduation.

And now comes the thought that soon we are to leave these dear old buildings and the familiar surroundings of old Aggie. Each of us goes from Connecticut's environs to take up the greater things which are before us and we go with a feeling of sorrow and yet one of joy. We have tried to help as best we might, while we have been students, and we shall still try to make Connecticut a larger College and a better one, while we are citizens.

"We will praise her for her teachings,

For the brightness of her life;
For the noble inspiration to be earnest in the strife.

So we'll live for home and country
And for all that's good and true,
While waves above the campus
The White and Blue, the White and Blue."

COLLEGE SHAKESPEAREAN NOTES.

H. H. Gleason, '19, has received his commission in aviation and has been transferred to Camp Dick.

R. J. Vance, '09, has recently been decorated for bravery in action in France.

F. A. Paul, '21, has been very ill with plural pneumonia at his home in Waterbury.

On Saturday, May 11, the fraternity will hold its annual reunion.

J. H. Norton, '17, is now in training in France.

Brooklyn, N. Y.

College Shakespearean Club; Class Football (1); Agricultural Exhibition Committee (1); Class Baseball (2); Vice-President of Class (2); Class Treasurer (4); Assistant Manager Social Committee (3); Manager Social Committee (4); Secretary Senior Alumni Council (4); Commencement Committee (4); Captain (4); Poultry.

"Pep" is one of those poor unfortunates at Connecticut upon whom the world must always look down. He says it is a bit discouraging to have to elevate his field of vision in order to recognize his classmates but, nevertheless, he plays his one-man-band and plods right along.

Hart showed his remarkable good sense in the fact that, besides coming to C. A. C., he specialized in Poultry when he got here. By choosing this branch of the art of agriculture, he chose an occupation in which he will deal with individuals nearer his own size than cows would have been.

In spite of the handicap of being so short, D. H. has always been a hard worker for his class and the College and we will hate to bid him good-bye in the near future.

TO BUILD COAL PLANT. (Continued from page 1.)

upon which this cable will run is to be made of light timbers and is constructed so that the cable will have a three per cent. grade, and as soon as the car is filled at the bunker, it will roll down until it strikes a movable trip which empties it. An iron triangular weight at the end of the cable pulls the empty car back to the bunker automatically.

The unloading capacity of the plant will be at least ten carloads daily and the only power required to run the plant is a five horsepower motor. The cost of erecting this outfit would not be over \$5,000.

In the past the College has had to pay heavy demurrage bills because cars of coal, although ordered some time apart, collect in transit and arrive at one time or so close together that they could not be unloaded rapidly because of the lack of hauling

facilities. This condition has made it necessary to hire outside teams for hauling coal and has taken teams away from other important work. With such a system cars can be unloaded as fast as they come in, and what could not be hauled immediately would be piled in reserve and removed later, when the roads were in good condition, and time could best be given up to the work.

With fuel conditions as they were

RED CROSS ENTERTAINMENTS NET GOOD RETURNS.

The local chapter of the Red Cross Society netted \$151.86 from the two entertainments held recently,—\$86.86 from the vaudeville show on April 13, and \$65 from the entertainment on April 20. The proceeds of the vaudeville was donated for materials for the Red Cross work, and those of the entertainment for surgical dressings.

FACULTY NINE TRIM STUDENT TEAM 9-6

GAME WAS CLOSE THROUGHOUT

Errors and Wild Throws Feature—
Contest Arouses Much Enthusiasm.

Age and experience triumphed over youth on Saturday, April 27, when the Faculty defeated the students on the diamond, 9 to 6. Despite the fact that the College is not represented by a varsity nine this year, due to a short season, the contest aroused much enthusiasm, and lovers of the national pastime had the opportunity of witnessing a battle royal.

At 3 p. m., "Brub" Dow called "play ball", and from then on it was "nip and tuck" until the final ball was twirled. The opposing pitchers seemed to be somewhat wild at times, but both delivered plenty of speed with an abundance of twisters. The veteran, "Gus" Brundage, had a mighty arm and caught many of the opposing base runners napping, with his line pegs. "Prof." Lamson, thinking he could excel in pulling down the high ones, retired from short field to the left garden in the middle of the game, but the batters then changed their objective, giving Kirkpatrick and the wizard, Fraser, a chance to fill their peach baskets. "Juddy" covered the initial sack like a big leaguer, but was weak with the stick.

Brigham and Mahoney played a strong game for the students, while the out-fielders were kept busy chasing the "pills" which managed to slip through the fingers of the basemen.

Among others, Professor H. R. Monteith and Colonel J. S. Parke had seats along the first base line and were loyal rooters for the faculty.

The line-up:

Faculty		Students
Brundage	C	Mahoney
Moss	P	Averill
Judkins	1B	H. Lockwood,
		Manchester
Smith	2B	Brigham
Lamson, Hollister	SS	Murphy
F. Miller	3B	Maloney
Hollister, Lamson	LF	Hayes
Kirkpatrick	CF	Smith, Knott
G. Fraser	RF	Mallett

Umpire, E. D. Dow.

PROFESSOR WHEELER GIVES TALK TO DEBATING CLUB.

The regular meeting of the Debating Club was held in Horticultural Hall, on Wednesday evening, April 24, at 8 o'clock. Professor C. A. Wheeler spoke on "Financing the War", and S. B. Morse gave an interesting talk on the Officers' Training Camp held at Madison Barracks, N. Y., last summer. A general discussion of the current events of the week concluded the program.

ADOLPH GUSTAVE TAPPERT.
Plantsville, Conn.

Class Secretary (4); Captain (4); Commencement Committee (4); Science.

Beyond all question of doubt, God and Uncle Sam willing, "Taps" intends to become a 33rd degree Estenite, for ever since he had his first glance through a microscope, A. G. has been pursuing the wary bacteria and vitamins.

"Taps" has a decided aversion to spending his week-ends in Hamden or Plantsville, we are unable to learn which, and any early riser on Monday mornings may hear the steady "put, put" of his Indian.

After the Germans are hopelessly beaten and the boys come home, we may expect to learn of the discovery of several new bacilli and bacteria by our renowned bacteriologist, A. G. Tappert. We are looking for great things from this scientist and we will not be disappointed.

EPIDEMIC AT HORSE BARN.

A recent outbreak of distemper at the Horse Barn threatened all the animals, including the colts and the best breeding stock. The origin of the outbreak is unknown, although it came from some outside source. Dr. Dow, the College Veterinarian, promptly treated the stock with an anti-toxin so that the epidemic is now under control.

PROFESSOR GARRIGUS BUYS CATTLE IN THE WEST.

Professor H. L. Garrigus recently returned from a trip to the Chicago and Kansas City Stockyards, where he purchased six carloads of beef cattle. This work was conducted under the supervision of the State Council of Defense. The cattle were purchased to fill orders for Connecticut farmers and is a result of an effort to increase our live-stock production.

MEET ME AT THE

Thread City Restaurant

The Arrow at the Fork in the Road Points to Horsfall Clothes

This Spring you, Mr. Clothes Buyer, are halting with puckered brow, at the Fork in the Highway. Straight ahead leads on to the broad and safe macadam of Quality-as-Usual. Sharp left takes you along the snaky, risky road of Quality Knifed. Follow the arrow straight ahead to Horsfall Clothes.

Woolens—pure wool—expressly culled for their easy-draping softness. Colorings of the brighter sort, as befits green and gay Spring. Patterns, which are a crisp relief from the drab monotony of winter.

Throughout, a certain quiet smartness, which is in keeping with these thoughtful times when over-dressing is unpardonable.

REV. GEORGE GILBERT AND J. D. ELMENDORF SPEAK.

At the President's Hour on Wednesday, April 17, Rev. George Gilbert of Middletown spoke on "The Place of the Country Church Should Play in the Community." In treating this subject he emphasized the manner in which people, especially college men, could adapt themselves to conditions as they are found in a community. The value of a clean, wholesome, sound life and the way in which the Church could work to accomplish this end was emphatically brought out.

On April 24, J. D. Elmendorf, secretary of the Willimantic Y. M. C. A., gave a talk on Y. M. C. A. work. He briefly outlined the history of this work from the time of its commencement in England in 1844 to the present day. During this time it has so universally organized that it has established buildings throughout the world and has been divided into many departments in order to be managed efficiently. The most recent and greatest work of the Y. M. C. A. has been the enlargement and extension of the Army and Navy departments into the foreign countries as well as in the United States.

Mr. Elmendorf expressed his desire of seeing the College students cooperate with the Willimantic Y. M. C. A. in their work in the near future. He invited the members of the student body to make use of the Y. M. C. A. any time at their convenience.

President Beach was present for the first time in about a month, his absence during this time being due to illness.

LETTER FROM DEWELL.

I received this morning your letter outlining the service being rendered by the College to the country, and I am writing you at once to let you know that it makes me prouder than ever of the college and of the fact that I am a graduate. Being so far away I am unable to keep in as close touch with the college as I desire and hence am more than glad to be advised of what the college is doing.

Due to the fact that Dwight K. Shurtleff, one of my classmates graduated from West Point and is still in the Army, I feel an added interest in the War.

With congratulations to yourself and your associates and wishing you all and the college continued success, I am

Yours very truly,

ROBERT T. DEWELL.

COMMONS CLUB NOTES.

Sergeant William H. Brown, Jr., of Co. I, 304th Inf., stationed at Camp Devens, paid a visit to his old friends on the Hill, over the week-end of April 20.

John McCarthy was at the College April 27.

ALAN THACKER BUSBY.
Worcester, Mass.

Honor Student (2); "Campus" Board (3, 4); Football Second Team (3); First Lieutenant (4); Dairy.

"Tack", the class dairyman, came from Worcester to old Aggie with the determination to work his way through College and he has succeeded in so doing, as well as having become one of the most-liked fellows in College. The old adage that "all work and no play makes Jack a dull boy" is firmly upheld by our "Buz". He plays as hard as he works and woe be unto any man when Thacker starts out to "get" him.

As a Dairy student, Thacker has been the shining light of the class and we look for great developments when he starts on his life-work.

ALPHA PHI NOTES.

Because of the present state of affairs, it was decided not to hold the annual reunion in Hartford, as has been the custom, but instead a Reunion and Smoker was held in the Fraternity room on the evening of Saturday, April 27. Following speeches made by the Alumni members, a buffet lunch was served.

I. F. Fellows, '16, is now serving with the Headquarters Company of the 38th Infantry, "Somewhere in France."

W. T. Ackerman, '15, has been transferred to Camp Gordon, Atlanta, Ga.

Seth Benton, ex-'18s, is working at Beach's Creamery in Litchfield.

F. J. Rimoldi, '13, is doing Entomology work in Connecticut and Rhode Island, being connected with the U. S. D. A.

H. F. McDonnell, '19s, is at St. Joseph's Hospital, Willimantic, where he was taken after breaking his leg.

W. H. Carrier, Jr., '13s, and B. P. Storrs, '13s, are on duty with the American Expeditionary Forces in France.

D. G. Horton, '16, and J. G. Shirley, '17, spent the week-end of April 27 on the Hill.

M. L. Benham, ex-'19s, visited on the Hill April 28.

TO GIVE PLAY WEEK OF COMMENCEMENT

FIRST PLAY OF ITS KIND EVER
PRESENTED HERE.

Dance following to Take Place of the
Usual Alumni Dance.

Friday evening, May 10, at eight o'clock, the Dramatic Club will present "The Amazons", by Arthur Pinera. This play is the first of its kind ever presented at the College.

The success of "The Amazons" as a professional production has been tremendous, and with the talent in the Dramatic Club it is being successfully rehearsed. It will be presented on the evening of Class Day, and following it will be dancing to a later hour than usual, which will take the place of the usual alumni dance.

The play represents a scene in a park of an English estate in which Lady Castlejordan, the mother of three girls, brings her daughters up as boys, insisting on all kinds of rugged exercise. The costumes are particularly unique, and coupled with the attractive stage setting, are very effective.

The cast is as follows:

Barrington, Viscount Litterly,
P. L. Sanford
Galfred, Earl of Tweenwayes,
W. F. Maloney
Andrew, Count de Grival,
E. R. Sherman
Rev. Roger Minchin,
George Heid
Fitton, a gamekeeper, W. E. Brockett
Yonatt, a servant, C. B. MacKay
Miriam, Marchioness of Castlejordan,
Vera A. Lee

Her daughters:

Lady Meline Belturhet,
M. Gertrude Luddy
Lady Wilhelmina Belturhet,
Salome C. Smith
Lady Thomasin Belturhet,
Helen L. Clark
"Sergeant" Shuter, Alice Simonson

LETTER FROM OLSEN.

Dear Editor:

The writer, a private in Co. I, 105 U. S. Infantry, is very anxious to know if there are any Connecticut Aggies or alumni members in the 27th Division. If there are any, would you be kind enough to advise me what regiments they belong to, so that I, an old Aggie, can look them up? The 27th Division is the old N. Y. N. G.

Hoping to hear from you in the near future,

Very truly yours,

EDWIN A. OLSEN, Ex-'14, S-'17.
Co. I, 105 U. S. Inf., 27th Div.,
Camp Wadsworth,
Spartanburg, S. C.

At a meeting of the Torrey Botanical Club of New York City on April 6, Dr. E. W. Sinnott, Professor of Botany at the College, gave a talk on "The Plants of Australia."

SHORT COURSE STUDENTS ENTERTAINED AT COTTAGE.

The young ladies, who were enrolled in the short course in vegetable gardening, were entertained by the co-eds at the Cottage on Tuesday evening, April 16.

The Misses Anna Larsen and Gertrude Luddy, who attended the conference of New England Colleges and Normal Schools, which was held recently at Smith College, spoke on the woman's part in the war as was brought out at that meeting, and on the relief work being done by the Smith College Unit, now in France.

Miss Helen C. Bishop, who also attended the conference, said that College women may help most by reporting to the community extension leader for service in one of the following branches: organization of groups for study of food conservation; the getting of food conservation work into the homes through children; enrolling for extensive training at various short-courses; helping on farms and in farm homes; and the making of posters. Miss Bishop concluded by saying, "College women were noted for their seeing things through, and for their 'team work' and that they certainly would not fail in these critical times."

The hour was pleasantly concluded by a playlet on "Food Conservation" given by Gertrude Benson and Christine Beebe, and by the singing of Cottage songs by all the girls.

SIGMA ALPHA PI NOTES.

William Quigg, Jr., '21, has accepted a position for the summer on the estate of Edgerton F. Parsons at Hadlyme.

Perry H. Wallace, '21, has accepted the position of supervisor of home gardens in Meriden.

John C. Taylor, '21, has accepted a position with the Belle-Ellen Stock Farms of Sussex, N. J.

H. S. Schwenk, '16, visited on the Hill from April 20 to 24.

H. B. Goodrich, ex-'19, from the third Officers' Training School at Camp Devens, visited the College, April 25 and 26.

Arnold Rasmussen, '15s, has been engaged by the New Haven County Farm Bureau to supervise the home gardens for adults in Waterbury and Naugatuck.

Ernest Rasmussen, ex-'17, has recently been promoted to the rank of captain.

R. E. Tomlinson, '13s, is taking a course in the Boston Mechanics Training School, from which he will enter the service.

R. T. Mattoon, ex-'19, of the Merchant Marine Service, was a recent visitor on the Hill.

As a result of the conditions caused by the war, the annual banquet and reunion was not planned but instead a social was held in the Fraternity room on the evening of April 25. Among the members who returned for the event were S. A. Edwards, ex-'18, and H. B. Goodrich, ex-'19.

Something To Crow About!

Book Store sales this year will be double the sales for 1912-13. We think 100% growth in five years something to crow over. Then too our sales for the six months of the present year came within \$50 of the total of last year's sales. We do not want the Book Store to be judged by its volume of business alone, but by the service which it gives and the saving effected by reason of its low prices.

It is expected that there will be a small margin of profit on Book Store sales this year. If such proves to be the case, whatever money is available will be used for additional shelving and equipment. On your return to college next fall you may expect to find a bigger, better-equipped, well-stocked store.

The College Book Store

IN THE MAIN BUILDING.

The Connecticut Agricultural College

Storrs, Conn.

FOUR-YEAR COURSE in Agriculture, designed to train young men as Scientific Farmers, Teachers, and Agricultural Experts. Entrance requirements, four-year high school course. B. S. degree.

TWO-YEAR COURSE in the School of Agriculture, for those who have not the preparation, time, funds, or inclination to take the four-year course. Open to those who have completed the work of the common school.

FOUR-YEAR COURSE in Mechanic Arts. Four years of high school work required for entrance. B. S. degree.

FOUR-YEAR COURSE in Home Economics. Open to young women who are high school graduates. B. S. degree.

SHORT WINTER COURSES in Agriculture.

Recent appropriations have provided additions to lands, buildings and equipment valued at \$650,000. Expenses low. No tuition charge to residents of Connecticut. Military instruction. A catalog will be sent upon request.

CHARLES LEWIS BEACH, President.
