FUEL SHORTAGE CAUSES FACULTY TO SUFFER

SITUATION CAUSES CONSIDERABLE WORRY

Mr. Longley's Foresight Insures Enough Fuel for College Uses

The coal situation among the Faculty has become extremely serious, some of the members having no more than a week's supply in their bins. Purchasing Agent Longley says that as far as the central heating plant is concerned, there is no need for worry, as he can obtain plenty of fuel at short notice.

The central heating plant has used an enormous amount of coal this winter. Two furnaces have been run steadily and a third at intermittent times. Eighteen hundred tons were purchased last summer and during this winter an average of ten to twelve tons daily has been consumed. At the present time there is a twenty to thirty days supply on hand and much more on order. The new lot has been held up by storms and, as yet, has not reached Eagleville. In case this should not arrive in time the college has five hundred cords of cut wood on hand for any such emergency.

The situation among the Faculty is causing no little worry. Four carloads of nut, pea, and stove coal have been ordered and it is hoped that they will arrive soon to relieve the situation. The college has indeed been fortunate in having had sufficient coal. Coal has been scarce and the winter severe, but these conditions did not change our supply of heat. Two thousand tons of bituminous and eight hundred tons of anthracite coal are now being purchased for next winter.

GAMMA CHI EPSILON ELECTIONS DELAYED

Sickness at Mid-Years Prevents Choosing of New Members

Gamma Chi Epsilon as yet has not held the election of new members which was to have taken place the second week in the semester, and was to have been published some time during March at one of the College Assemblies.

This delay is due to the fact that many of the Juniors, who were sick at mid-years and hence absent from the college, have only recently finished their examinations and the secretary, George Torrey, has been unable to average up the marks. Hence elections have been postponed, but will probably take place very soon.

AG. CLUB LAYING PLANS FOR NEXT FAIR

CORN AND FRUIT SHOW WILL COME NEXT FALL

May Have Judging Contest and Carnival in Spring

A meeting of the faculty and students interested in the Ag. Club was held in the Dairy Building Wednesday afternoon, March 10, to discuss plans for an Ag. Club Fair next year. This year's fair was a success and paid expenses, but the Ag. Club members plan to profit by their experience and put on a much better fair next year.

A number of plans were discussed and several faculty members told of fairs and live stock shows at other colleges.

It was decided that a Corn, Vegetable and Fruit Show would be put on in the fall, probably between Thanksgiving and Christmas. This would give the students an opportunity to prepare their exhibits and would not conflict with the Mansfield Fair. The Home Economics students would have an exhibit at this time, and educational exhibits would be put on by the various departments, much as was done in this year's fair.

For several reasons it was thought best to separate the livestock show and judging contests from the winter fair. In the spring, probably in May,

STORRS 'BUS HAS FORCED VACATION

First Automobile Made Trip to Willimantic Last Monday

On Monday, March 8, for the first time in over four weeks, the Storrs Garage Co. had a machine out of the garage. The car was one of their Buick five passengers and it took the roads around the Campus and the one between here and Willimantic without any serious mishaps.

Since the Company began running busses over four years ago there has not been a time before when the weather compelled it to miss more than two consecutive days. This year, however, the regular bus has not made a trip since early in February. The enforced idleness is being put to account by overhauling the machine and putting it in order for spring business. It will be put on the road again just as soon as the weather permits. In the meantime the Garage Company has been carrying passengers in a sleigh.

Observations have led the board to believe that the average person who contributes to the Safety Valve does not know the rules under which articles for this column are taken.

No anonymous articles will receive any attention from the college paper. All articles submitted must bear the writer's name upon them. If the writer, however, desires to use a pseudonym or pen name which will be published in with the article, he is justified in so doing.

But it is necessary that the Campus should know the names of contributors, if articles of the Safety Valve sort are to be published.

—Editor.

TRADITIONAL BANQUET WILL BE ATTEMPTED

MUCH CONTROVERSY AS TO PROCEDURE

Upperclassmen Decide That the Custom Shall be Continued Sophs Follow Suit

After a considerable discussion and many heated arguments and exciting class meetings, it has been decided that the traditional Freshman Banquet will be attempted this year as usual.

The controversy started last week when at a meeting of the Freshman Class, it was voted to give up an attempt to hold a banquet and instead to assess each member of the class two dollars, the money gained in this manner to be turned over to the Athletic Association.

According to all reports, this action was taken by the Freshmen on the advice of the Sophomores.

Twenty-four hours after the Freshmen announcement, the two upper classes decided to take up the matter. The Juniors convened first and gave their opinion as being favorable to the traditional banquet being attempted and decided to give their strength toward having the tradition kept alive.

On Saturday the Seniors met and after their class meeting a joint meeting of the two upper classes was held in the lecture room of the Armory.

After a very serious consideration of the financial condition of the A.A. as well as the College and Class spirit derived from the banquet, it was voted that a man be sent from the Senior Class to explain the tradition to the Freshmen and urge them to attempt the banquet. Paul Manwaring was chosen.

(Cont. on page 2 col. 2)

STUDENT COMMITTEE IS MAKING INQUEST

NO BETTER BOARD TO BE HAD AT PRESENT PRICES

Student Body Will Wait For More Definite Information

The Students' Organization held a meeting Tuesday evening at 6:45 in the Armory. The meeting was called to hear a report from the Committee appointed to look into the Dining Hall situation and discuss the matter in general.

Frank Wooding gave the report of the committee and told of the interviews with Miss Taft and President Beach. The report as a whole showed that no better board would be served at present prices and that it was suggested that the old Flat Board System with extra coupon books which was used could be adopted. Considerable discussion followed and it was finally suggested that the Student Body take no action on the matter at present, but that the committee should look into the matter further and secure some actual figures and data and present it before the next meeting.

GEORGE FRASER GUILTY OF STEALING CHICKEN

SENTENCE ISSUED BY JUDGE RICHARD DODGE

Mock Court Imposes Terrible Penalty on Floriculturist

At the open meeting held at Mansfield Grange, March 9, a mock trial was held. Everybody enjoyed a good time and the clever way in which both sides presented their case afforded great amusement.

The prisoner was G. E. Fraser and he was charged with stealing a rooster from the Poultry Plant. The court was as follows: Judge, R. E. Dodge; Clerk, J. H. Fitts; Sheriff, S. P. Hollister; Jury, Mrs. G. H. Lamson, Foreman; F. Miller, P. Manwaring, Mrs. R. E. Jones, Mrs. Dodge, H. A. Garrigus. Prosecuting Attorneys, G. H. Lamson, W. Stemmons. Counsel for defendant, A. W. Manchester, W. F. Kirkpatrick. Witness for prosecution, W. F. Wood, H. Fieneman, I. G. Davis, D. Warner; Witness for defense, V. Pinkham, M. H. Lockwood, R. E. Jones.

The jury had one-half minute adjournment and found him guilty. The judge sentenced him to bury the remains of the rooster and let him go under bail and custody of himself for three weeks, which was about the most severe punishment he could give.

CONNECTICUT QUINTET NOT TO MEET R. I. STATE

TEAM WINS SEVEN GAMES THIS SEASON

Best Basketball Five the College Has Ever Possessed

With the cancellation of the game with Rhode Island State, our basketball season is ended. The team has had a very successful season, coming through with seven victories and five defeats.

The game with our neighbor State College was scheduled to be played at Storrs on March 6th. Because of the bad weather and the lack of transportation facilities between here and Willimantic, it had to be postponed. Manager Moore tried to arrange for the game to be played during the week following but was unsuccessful. A telegram from the Rhode Island manager stated that they could not make an agreement and would send seasons in a letter later.

The summary of the games is as follows:

C.A.C. 31—Wesleyan 31.4
C.A.C. 52—Middlebury 48.
C.A.C. 28—Mass. Aggie 19.
C.A.C. 25—Trinity 17.
C.A.C. 21—Boston College 13.
C.A.C. 23—Rhode Island State 29.
C.A.C. 75—Wentworth Institute 6.
C.A.C. 22—Mass. Aggie 27.
C.A.C. 24—Trinity 17.
C.A.C. 33—Clark 26.
C.A.C. 20—N. H. State 39.
C.A.C. 17—Worcester Tech. 25.

Games were to be played with Norwich University and Middlebury on February 6 and 7 respectively, but because of the influenza epidemic and bad travelling they were cancelled.

DAIRY MANUFACTURING ICE CREAM ON LARGE SCALE

Shortage of Cattle Feed Causes Dairymen Great Concern

The creamery is now making ice cream on a commercial scale and is supplying the dining hall, fraternities and students with cream. Mr. H. A. Holbrook, who has charge of the work states that there is already a demand for over fifty gallons per week and that in a few weeks he hopes to be able to place ice cream in the book store to be sold over the counter there.

The dairy barn is suffering from a shortage of feed and the herdsmen are becoming worried as to where their hay for the next few weeks is coming from. All of our hay was lost in the fire last fall and as only a very small percentage of our hay is grown here, we are dependent on neighboring states for our feed supply. As a result of the recent storms embargoes have been placed on hay, and New York alfalfa, which was ordered several weeks ago has not arrived yet. The local supply is exhausted and one or two weeks would use up the entire available supply.

TENNIS TEAM TO PRACTICE INDOORS

Considerable Material in Stu- dent Body for Successful Team

Captain Griswold reported that the squad would start practice next week and continue until the outdoor courts were available. Several new men have announced their intention of trying out for the team. Much is expected of Sickler who played two years with the Hartford High team which was not beaten. Taylor who has been a runner-up in the tournament at Norfolk, Conn., will be out. It is rumored that Father Bauer will drop tennis for baseball. Frosthalm, who was entered in the semi-finals of the Danish Tennis Association of Denmark, played a wonderful game until he was eliminated by Ole Skjaarson, the Danish National Champion. This took place after the Armistice was signed while Frosthalm was overseas.

Manager Wood is having the courts remodeled this spring and is having the old ones renovated so that there will be four courts.

PAUL W. MANWARING TO COACH JUNIOR PLAY

President of Dramatic Club Well Fitted to Direct the Play— "Nothing but the Truth"

Owing to the fact that Miss Wallace has been called away, it has been necessary for the Junior class to secure another coach for the play "Nothing but the Truth," which will be presented during Junior Week.

Mr. M. J. Farrell, who very ably coached the Junior Play last year, "A Prince in Buckskins," and also "Stop Thief," presented last spring, has left the Hill, so practically the only alternative was to pick the coach from the student body. The Juniors seemed to be agreed that Paul W. Manwaring '20, is the student best fitted to undertake this task of directing the play. Mr. Manwaring has had a great deal of experience in dramatic presentation, having taken part in many plays and vaudeville acts. He is President of the Dramatic Club and is familiar with all the principles of stage business which are necessary in the presenting of a play. Mr. Manwaring has consented to coach the show and will hold try-outs for his cast as soon as he becomes familiar with the play and can select the people fitted for the various parts.

(Cont. from page 1 col. 3)

On the same afternoon a meeting of the Sophomore Class was convened and the members were against keeping up the banquet tradition.

However early this past week the Class of '22 changed its mind and decided to go through the customary procedure in attempting to prevent the Freshmen from partaking of a feed.

The Freshmen-Sophomore Banquet rules committee has changed the dates between which the banquet can be held to March 16—30 inclusive.

CO-EDS WILL RETURN GAME WITH SIMSBURY

WILL PLAY IN SIMSBURY FAST HIGH SCHOOL TEAM

Possibility That More Than One Game will be Played on Trip

The girls basketball team plays Simsbury High School Friday, March 13, at Simsbury. The return game has been scheduled with some difficulty because of the hardships in finding a floor to play upon; final arrangements have been completed however.

It will be remembered that the Simsbury girls displayed fast and clean playing on our floor here. Rumor has it that a game may be arranged for the following night; featuring a week-end trip for the team, but nothing definite has been made public.

Captain Arnold and the regular team with three "subs" will make the trip.

DAIRY MAIDS MAY DEVELOPE AT COLLEGE

Freshmen Girls Enrolled in the Dairy Course Under Prof. Fisher

The whole class of Freshmen girls are taking a one-semester course in Home Dairying under Prof. R. C. Fisher. The course is essentially a study of milk and its products, their manufacture and uses. Especial emphasis is placed on the food value of milk and its importance in the human diet. The girls have had ice cream making and will study butter making, starting this week. Before the completion of the course, Prof. Fisher hopes to touch upon the clarification and pasteurization of milk; milk separating and testing; and the manufacture of milk products; and in all probability the twenty-seven white aproned freshmen will change into twenty-seven full fledged dairy maids by June.

FARM NOTES

Prof. H. L. Garrigus and M. H. Lockwood, '21, attended the Eastern Berkshire Congress and Sale at Brattleboro, Vt., March 2nd and 3rd.

The College consigned six animals to the Eastern Berkshire Congress Sale, five of which were bought by Connecticut breeders and one by a Massachusetts farm.

Prof. Garrigus bought a sow consigned by Flintstone Farm, and a boar of W. S. Rorsa breeding for the College.

M. H. Lockwood represented the Connecticut Swine Growers' Association at the Congress and Sale.

The farm horses have been affected lately with colds. One grade gelding developed pneumonia and died Monday, March 8th. The cold and complications are doubtlessly the results of inclement weather combined with the unusual strain of duty put upon the teams by transportation difficulties.

CHANGE IN CHEERING SYSTEM UNDER WAY

Committee Will Outline New Basis for Cheer Leading

At the Athletic Association meeting last Monday night, it was voted that henceforth cheer leading at C. A. C. will be carried out in a systematic way. It is the intention of the Athletic Council to have someone responsible for, and capable of leading organized cheering at all times.

A student is to become leader in his Senior year and he will be privileged to wear a "C" as are the men who earn their letters in the various sports.

There will be assistant cheer leaders, probably two Juniors and two Sophomores. These men will be allowed to wear a letter when leading cheers.

All students are eligible to try out for this position and anyone who wishes to do so will be coached and instructed in cheer leading.

The president of the Association has appointed a committee of three to look into this matter and to see that the cheering from now on is carried out on the same sound basis as our sports are.

COLLEGE DRAMATIC CLUB ADMITTED INTO THETA ALPHA PHI

Has Distinction of Being First Chapter in Connecticut

The College Dramatic Club has been admitted into Theta Alpha Phi, a national honorary dramatic fraternity and will hereafter be known as Connecticut Alpha No. 8. The local club has the distinction of being the first chapter in Connecticut.

Theta Alpha Phi was originated by Professor J. R. Pelsma of the Oklahoma Agricultural and Mechanical College of Stillwater, Oklahoma. Although this work was begun but a short time ago, already eight chapters have been founded and many clubs have petitioned for admittance. The present officers of the national organization are Grand President, Professor C. W. Newcomb of Ohio Wesleyan University; Grand Vice-President, Professor C. Mamie of University of Kentucky and Grand Secretary-Treasurer Professor J. R. Pelsma of Oklahoma Agricultural and Mechanical College.

Members in Theta Alpha Phi requires that a student or alumnus successfully carry minor speaking parts in four plays or two important parts in two plays. A student is also eligible who has creditably performed in three plays, the duties of business manager, stage director, property man, scene painter or other similar positions.

The following local students are eligible to Theta Alpha Phi and will be initiated in the very near future: Loretta W. Guilfoile, Earle W. Cramton, Paul N. Manwaring, Salome C. Smith, Everett D. Dow, William F. Maloney and Herbert F. Webb. Pins have been sent for and are expected in a few days.

HAS AN ENVIABLE RECORD IN WAR

A. B. Yankovitch Enrolled for Course in Agriculture

Connecticut Agricultural College is gaining rapidly in its reputation among students coming from foreign countries. The latest student to arrive here is Mr. A. B. Yankovitch, who comes from Serbia. During the past six months, no less than thirty Serbian students have come to the United States, of whom Mr. Yankovitch was the first to arrive. Before coming to college here at Storrs, he spent five months at the University of Virginia, but upon deciding to work for his degree in Horticulture, he came to Connecticut.

Few of us here have had as varied and thrilling experiences during the Great War as has Mr. Yankovitch. While attending a preparatory school at Belgrade he saw the first shell fired by the Austrians explode in that city. During the bombardment which followed, the inhabitants had to seek shelter in cellars and other places of safety.

Serbia had been attacked and every man, old and young alike, enrolled in some military organization to make himself useful to his country. Mr. Yankovitch enrolled in what was known as the Students' Voluntary Battalion. From this organization, the students were taken into active service, as the government saw fit. Mr. Yankovitch served in the Serbian army until the Albanian retreat, when he was wounded in the knee, during a campaign in the Albanian mountains. Had it not been for the butt of his rifle the wound would have been much more serious. The bullet hit the butt, shattering it and then continued on its mission.

The wound was dressed and the march continued for six days. The knee became infected, so dangerously in fact, that three efforts were made to amputate the leg, each of which was prevented by the plucky soldier.

Three months were spent in the French Hospital at Korfu. From here he went as a convalescent to Corsica for four months. Then, however, the Serbian government decided to send him to school. The following two years were spent at Oxford where he took the academic course.

Upon the liberation of Serbia, Mr. Yankovitch wished to see his people from whom he had been separated for such a long time. While at home opportunity was offered him to come to America and study agriculture. As a result we have Mr. Yankovitch as a four year student, working for a degree.

Morris S. Downs, ex-'21, is now testing for the Experiment Station and is temporarily acting as one of the official supervisors on the road.

Miss Frances B. Bristol entertained her sisters, the Misses Florence and Aleca Bristol from St. Margaret's, Waterbury, for the week end.

ALUMNI DAY COMMITTEE BEGINS PUBLICITY WORK

Junior Class Sends Letter to All the Alumni of the College

The Alumni Day Committee is working hard to thoroughly advertise the coming Alumni Day, May 22. In order to reach as many alumni as possible a circular letter has been prepared which condenses the program of the day.

In case these letters do not reach all members of the alumni, a copy of the letter is given below:

Storrs, Conn.

Dear Alumnus:

The members of the Junior Class of 1921 have decided to set aside one day of the customary Junior Week program as Alumni Day, and take pleasure in inviting you as an alumnus to be present as a guest.

This is the first Alumni Day since 1916 and everything possible will be done to make this event interesting and entertaining to the Alumni. There will be something going on all the time and you will not find a slow moment from the time you land on the Hill until the program is completed.

The program of Alumni Day, May 22, 1920, will be something as follows: The first event of the morning will be a parade and review of the college battalion. The military ceremonies will be followed by the planting of the Junior tree, after which will come a monster outdoor college sing, which will give you an opportunity to practice the college songs and cheers again.

After dinner a bronze tablet will be dedicated to the memory of Gardner, who was killed playing football last autumn. The dedication will be followed by a baseball game between Connecticut and her old rival Rhode Island State. After the game Alumni meetings will be held.

In the evening the members of the Junior Class will present a farce comedy, "Nothing but the Truth," in Hawley Armory, after which there will be opportunity to renew old acquaintances of your college days.

These arrangements have met with the approval of many of the Alumni and were received with enthusiasm at the Alumni banquet in Hartford, February 11. This will be a big day and we want you to be here and see the college when it is really alive and all the students here. Write us and let us know what you think of these plans.

Yours for C. A. C.

Chairman, Alumni Day Com.

HORT. NOTES

Professor Stevens attended a meeting of the New York State Horticultural Society at Poughkeepsie, N. Y., last Thursday and Friday, February 26 and 27. Peach conditions are reported about the same there as in Connecticut.

In New York a system of spray service is maintained whereby one man who is an expert in his line is assigned to each county to advise the farmers in the proper methods and materials to use in spraying. One farmer stated that this advice saved him \$50.

MASS. CLUB TO HAVE HOME IN BOSTON

All Members will be on "Hill" for Alumni Day

At the last meeting of the Massachusetts Club of the Connecticut Agricultural College it was decided that they would obtain some permanent rooms in Boston, that its members could gain any information desired when visiting there. Clifford E. Wood is in charge of finding a room and has the Little and University Buildings in mind. It was also decided at the meeting that they would attend Alumni Day, May 22, as a body.

Suggestion was made that the Club hold a dance and invite the Hartford County Club and the New York Club of the College. It was voted that any alumni of the Connecticut Agricultural College, who shall go to a Massachusetts institution to further their education, shall be eligible for membership to the Club.

The members have a resolution that when they finish reading their Campus they will turn them over to some young person who is a possible student for C. A. C.

JOE PRITCHARD SEEKS INFORMATION OF BOYS

Goodearle has Conversation with Shepherd About Poultry Students

The other day Joe Pritchard said to me "Say, what makes all of those fellows come up to the poultry plant so early every morning? I never saw any of the students before this year come up every morning like these fellows do. That big lad, Maguire, is up there every morning before breakfast. Seems to me that they would like to stick down on the 'campus' in this kind of weather."

"Yes," I answered, "probably they would. But those boys are taking Mr. Warner's course in pen management, and old Mother Nature is giving them a course in what they are liable to run up against in the poultry business in New England. Each man has charge of a pen of birds and its up to him to show what he actually can do. Naturally the birds have to be cared for properly and thus the man in charge of the pen must be on the job every morning."

But their work does not end with simply feeding the birds. Every egg is marked with the hen's number and these eggs are being graded for hatching purposes. In a few weeks each fellow will have his eggs for hatching in a section of the new mammoth incubator.

After the eggs have hatched the members of the class will each have his own chickens to care for. So you may expect to see those same fellows coming up here every morning this spring.

"Well," said Joe, "I've got to admit that there is a whole lot more to that poultry course, than I thought there was."

STUDY NOW!

When beautiful winter days as we have just been witnessing come around the village scribe usually begins to sing of bluebirds and crocuses and warm winds and all those beautiful things which demonstrate that he is gotten spring fever. At any rate, the poet is just as much a harbinger of spring as is the Robin, so spring cannot be much longer delayed, for the customary spring poetry is beginning to crop out in the magazines and newspapers and we are all welcoming the time when rubber boots will not be a necessity.

Spring is a most beautiful season at Connecticut and it is in the springtime that the thoughts of the alumnus returns to his alma mater. Also there are certain reactions which the students always show from the stimulus of springtime. On Saturday afternoons and Sundays the roads about the Campus will be alive with pedestrians and it is quite certain that Codfish Falls and the Pink Cemetery and Fifty Foot will be magnetic to the couples who go hiking. There will always be a merry, noisy crowd in front of the dormitories at all times, and the boys will congregate on the lawn after dinner to sun themselves and cuss classes in general. Moreover there will be the customary song fests after supper, and everybody will have a strong desire to keep away from the studies.

Therefore it may be a good thing for many of us to overdo ourselves a bit while the Campus is still in the grasp of winter. There is no time like the present to write term papers and book

reports, and it will not hurt to get the thesis that is probably worrying you, well on to completion. When spring comes there will be a strong desire to be out-of-doors all of the time, and the studies will suffer. Get all the work possible out of the way now, and then you will be able to sing louder and rest more peacefully when the spring fever hits you.

COMMON SENSE AND ACTION NEEDED

After a considerable delay, the Students' Organization decided to take a move that resembled action in settling the dining-hall problem, and appointed a committee to look into conditions which caused the dining department to be so inefficient. This committee returned to the students with very little accomplished and were sent out for more data to present at a future meeting.

There seems to be a degree of hesitancy among the student leaders, namely among the upperclassmen, as to whether or not they should hurl themselves wholeheartedly into a battle to improve eating conditions at Connecticut, or sit back and stall. There certainly must be some reasons for the loss of money in feeding the students, and there must be some contributive causes for the service at the dining club being so generally considered unsatisfactory.

There are plenty of good starters among the student body, who have energy and ability enough to organize this, that and the other thing, but those who have sufficient weight and courage to finish what they start are in the minority. The student body has been dillydallying around for a very considerable period in an endeavor to learn facts about the dining hall. But it is undeniable that nothing will be accomplished by a spirit of hesitancy and half-hearted inquiry.

A man that is willing to express an opinion, and moreover, back it up with enough energy to put his idea across, providing the students see it as right, is not necessarily a radical or a Bolshevik. Neither can a student body which is indignant over living conditions be considered as an unreasonable mob; and our student body seems truly indignant. Something certainly must cause this feeling and this something should be isolated at the earliest opportunity.

It is unreasonable to think that the inquiries of the student body will be ignored, especially when the leaders are well backed up, and the students are firm and sensible in desiring to know the whys and wherefores of the present unfortunate situation. The most grievous thing that could happen would be to have the students back down and let the sore spot become closed to the light only to fester and cause trouble in the future, when the wound should be healed.

If the dining conditions are the main causes for indignation among the students, the solution of the problem is simple. The student leaders must show themselves to be heart and soul for finding the exact reasons for the loss and inefficiency and demonstrate that for once they are going

to complete the movement they started. The student body must back these men to the last minute and give them unbiased but firm support.

Such a procedure may not bring about turkey dinners three or four times a week, but it may produce results which will act as a pain pacifier for those who three times a day turn their backs on the dining hall, with an empty stomach and a feeling that they have been 'taken in.'

HELP THE CIRCULATION MAN

The "Campus" wasn't out on time last week nor the week before, and many of the students were more or less upset because they did not receive their papers when they were due. The members of the board are extremely sorry that these issues were late, but they were in no way to blame. It seems to be the habit of certain students and local people to be present when the "Campus" is delivered by the bus driver, that they may get their papers before the rest of the persons on the Hill. The "Campus" packages have been broken into repeatedly by such people and by the time the manager gets the package, many of the papers have been taken.

This means that the board does not have enough to go around on the day of publication, and also means that some individuals are getting two copies. It will be appreciated if these light-fingered persons will cooperate with the board and allow its members to take care of the circulation functions.

HARMONY IS THE THING

As things look now, Connecticut is starting on one of the best baseball seasons of its history. There is no doubt that our nine will be backed loyally by the students, with that Connecticut spirit which has spurred our teams on in the past and which has been the envy of visiting college men and players.

However, it is to be hoped, that the unpleasantness which arose last year from various sources, culminating in attacks upon the coach and friction among the players, will be totally lacking this year. We are fortunate in having Mr. Swartz, even for a short time, but his departure and the filling of his place with a new man is likely to cause some friction almost in the middle of the season.

This year we should try to get through with the least amount of dissension. Connecticut stands at the fork of the road in athletics and we have no energy to put into fighting among ourselves. We need the highest efficiency we can get and want no one here who is continually throwing sand into the machinery. We want bigger crowds than ever at the games. We want better cheering than ever. We want less crabbing than ever. We want better playing than ever. Think over the work which you are doing to help the baseball season to success and see if you cannot better this work in any way.

SAFETY VALVE

How many of us have stopped to think what we really owe the Farm Department for the excellent transportation service it has given during the period that the roads have been impassible for autos.

A reliable driver with a pair of fine Percherons has left the Main Building promptly at 8 o'clock each morning for Willimantic. Mr. Walker of Storrs Garage has used a College team for a trip at 1 o'clock nearly every day. Special trips have also been made when necessary.

All food, grain and fuel arriving at Willimantic or Eagleville has been transported without delay.

When we read of the complete isolation of towns having both train and trolley service it makes us realize that "Storrs" has not been so completely shut off from civilization after all.

Signed: "MployE"

STUDENT BATTALION

The cadet battalion does not take as an important place in the life of the students as it used to in the days past, because where as it was once required of all students who were physically fit to drill, now the two lower classes only are required to soldier. In the old days battalion spirit was always very high and a 'good feller' was pretty liable to be 'somebody' in the battalion. At any rate, the battalion was taken seriously and much valuable work was accomplished.

At the present time with the two lower classes only taking drill the officers are not so well equipped to train the men under them as they were when seniors held down the commissioned jobs. As there is no incentive for an upperclassman to take drill, the battalion will be much shorter of officer material, when the present ex-service men have stopped drilling, and when certain interested juniors and seniors will have withdrawn.

This means that the work done will not be of the desired standard, and the disciplinary training will not have its proper effect. This seems too bad, because the college battalion serves as a wonderful field of endeavor for the average student, and has a most marked effect on class and college spirit. Commissions in the battalion used to be more in demand than in certain of the activities, and the good gained through this training won many an Aggie man a commission during the past conflict, where without his student battalion experience he would have been lost.

Perhaps it will be possible to interest upperclassmen to the extent that they will give their time to the battalion. At least an attempt should be made to do so. The college battalion should be a fine organization; much better than it is. This means that somebody outside of the military department will have to help.

KAMPUS KLIPS

Will someone please ask Louis Metteli how deep the snow was in Eagleville last week?

Some of the girls had to stay over at the Johnson House last Sunday night. They secured bed and board for \$1.25. The board was in the bed.

Stenog. in Treasurer's Office: "Listen to that wind moaning outside."

Second Stenog: "That isn't the wind. It's the students paying their seven dollars for board."

Freshman: "Give me three Peter Schuyler cigars."

McCarron: "Strong or weak?"

Freshman: "Better give me strong ones. The weak ones break too easily in my pocket."

1st Student: "What are hieroglyphics?"

2nd Student: "Those pictures Prof. Lamson draws on the blackboard."

McCarron walked in his sleep the other night and wound up in the Freshman meeting. Hereafter, Mac, keep your shoes on in the presence of ladies.

What did that girl say over the phone that made Ossey so mad the other day? Better build iron telephone booths.

A tea wagon is nothing more than a push cart which has sneaked into a private residence.

Beauty used to be a matter of line and form; now it's a matter of concealing the ears, arching the eyebrows, redding up the lips and giving the neck and back more air.

IS YOUR WIFE WHAT SHE SHOULD BE?

If your wife is not efficient, you should know it at once. Here is a table (an educator would call it a scale if he had a chance), prepared after years of slowly developing judgment, that shows you how to caliper her. It was assembled by a man who has had at least six wives and still lives—with one of them. He ought to know whereof he per cents:

Education	08.9
Learning	00.9
Sense	10.0
Common Sense	15.0
Uncommon Sense	20.0
Ability to Cook	10.9
Scientific knowledge of cook- ery	00.3
General amiability	08.0
Native Charm	12.0
Sophistication	06.0

100.0

Note: Unless you have been married only a short time, your wife will not total much over a hundred. (From Kansas Industrialist)

The Service of an Electrical Research Laboratory

The research facilities of the General Electric Company are an asset of world-wide importance, as recent war work has so clearly demonstrated. Their advantages in pursuits of peace made them of inestimable value in time of war.

A most interesting story tells of the devices evolved which substantially aided in solving one of the most pressing problems of the war—the submarine menace. Fanciful, but no less real, were the results attained in radio communication which enabled an aviator to control a fleet of flying battleships, and made possible the sending, without a wire, history-making messages and orders to ships at sea. Scarcely less important was the X-ray tube, specially designed for field hospital use and a notable contribution to the military surgical service. And many other products, for both combatant and industrial use, did their full share in securing the victory.

In the laboratories are employed highly trained physicists, chemists, metallurgists and engineers, some of whom are experts of international reputation. These men are working not only to convert the resources of Nature to be of service to man, but to increase the usefulness of electricity in every line of endeavor. Their achievements benefit every individual wherever electricity is used.

Scientific research works hand in hand with the development of new devices, more efficient apparatus and processes of manufacture. It results in the discovery of better and more useful materials and ultimately in making happier and more livable the life of all mankind.

Booklet, Y-863, describing the company's plants, will be mailed upon request. Address Desk 37

AUCTION STAGED AT VALENTINE HOUSE

Girls Bid for Various Articles Appealing to Feminine Tastes

There is still some originality among the co-eds in their "dorms," though much of it may not be made public.

Posted on the bulletin board in the Valentine House, Saturday, was a notice to the effect that an auction was to take place at 2 P.M. of that day in the "Back Apartment." Featured on this poster were articles, feminine in nature, from cold cream to ballet slippers.

The result of this auction has not been made known but it is hoped that the attendants were not hopelessly robbed.

SHAKESPEAREAN NOTES

D. H. Horton, '18, has left his position as superintendent of the poultry department of Gilbert Farms and on March 1st assumes charge of Hilltop Poultry Yards, Suffield, Conn. The latter farm furnishes the Bowles res-

H. G. Hallock, '07, and J. H. Norton taurant with their famous fresh eggs. '17, were on the Hill for the dance.

H. L. Garrigus, '98, attended the meeting of livestock men of Middlesex County, which had been called by the Farm Bureau. He spoke on "Possibilities of Beef Production." On the 2nd and 3rd he was present at the annual meeting of the Eastern Berkshire Congress at Brattleboro, Vt.

N. P. Pierport, '03, writes that despite bad weather he has covered his route every day.

ETA LAMBDA SIGMA

Lawrence W. Cassel, '19, has returned to the Hill to accept a position with the Poultry Department.

Willard Allen, '16, of the Poultry Department has resigned his position with that department to accept a similar position as assistant Extension Poultryman of the state. This is a new berth created to meet the increased demand in this field.

Frederick C. Pierce has given up his drug business in New London because of ill health. He has purchased a tobacco farm in Wapping, Conn.

E. S. Ely, ex-'19, has left his farm at Lyme, Conn., and has gone to New Orleans for the winter.

C. Dewey Knott, ex-'21 of the Eastern Bridge and Structural Company of Worcester, Mass., drew the plans for the steel structure of the new Dining Hall. He is now working on the plans for the proposed buildings on the Campus.

Russell Manchester, '23, was called home last week because of a death in the family.

Thomas F. Keating, '13, Captain of the C. A. C. baseball team of 1911-13 has signed a contract to play baseball with the St. Louis Nationals this coming season.

Harold Bridges, '20, of West Hartford attended the Junior Informal Dance. He is making good with Thompson, the Florist. At present he has charge of three large green-houses.

MEETING OF CAMPUS STAFF MEMBERS

News Values Explained and Outlined by Managing Editor

There was a meeting of all of the members of the Campus staff in Horticulture 13 at 12:30 P.M., on Friday, March 5th. Twenty-five persons were present. The meeting was called by Mr. Dow in order that he might explain to the reporters the common errors made in writing articles for the paper.

The common faults were shown and a plea was made for the prompt preparation of all assigned work so that all articles could be in the printer's hands on Wednesday night of each week.

Mr. Dow also discussed the factors influencing the value of an article for a college paper. He emphasized the value of a good lead as a means of drawing the reader's attention.

It is hoped that this meeting will influence the character of the news service and the general make-up of Campus articles.

NU ALPHA OF PHI MU DELTA

Arthur Bird '19 has given up his job at Schovill's and is working for A. Dallas & Company, Florists of Waterbury. He is doing special work in decorating and green house management.

James Case has left Hampton and is now at Hilton, Virginia. He is Instructor in Agriculture, Vocational Training Division, Education-Recreation Office, Camp Eustis.

James Godkin is studying for his Ph.D. at the University of Wisconsin, Madison, Wisconsin. He says that this is not much if we take the Irishman's interpretation (Post Hole Digger).

Leonard Healey of Richmand Hill, New York is now classified as Manufacturers Agent selling Greenpoint Metallis Beds and Greenpoint Southern mattresses. This position is not much like tilling the soil but it is not condusive to gray hairs.

Stoughton and Morris Downs are doing Official Milk Testing for Leroy Chapman of the Extension Department.

"Sid" Wheaton has returned from the oil fields of Texas and will spend the rest of the winter with his parents in Manchester. About the last of next month he will leave for Montana where he will take up a home-stand.

COSMOPOLITAN CLUB

The pool table ordered by the club was setup on Thursday evening Mar. 4th. The New Haven representative of the firm from which it had been ordered did the work.

The table is full size and was made by the Brunswick, Balke, Collander Co.

Mr. Dennison, the former secretary of the club, left the Hill on March 5th. He plans to work until next fall and then to take a course in engineering at some technical school in New England.

ZOOLOGY DEPT. PRESENTED WITH PLUMES

Audabon Society Presents College with Unique Exhibits

A glass case will soon be set up in the College Museum in the Main Building in which will be exhibited a display of rare bird's plumes. These plumes were sent to Prof. George H. Lamson by the National Audubon Society of New York City.

These plumes were taken by custom house officials from smugglers who attempted to bring them into the country for millinery purposes. Rather than destroy them, they were sent to the Audubon Society, which gives them to the college to be exhibited and not used for ornaments.

The collection consists of eleven beautiful specimens and is valued at \$238.00. The plumes were taken from Egrets, Goura Pigeons and Birds of Paradise. The most beautiful plume in the collection is one taken from a Bird of Paradise and which has a valuation of \$75.00. The other plumes range in value from \$6.00 to \$24.00 a piece.

ALPHA PHI

The Annual Fraternity Banquet will be held Saturday evening, May 8, at the Hotel Bond in Hartford.

Benjamin P. Storrs, '13-S, is at present market reporting in Hartford and Waterbury and can be found at the Hartford Farm Bureau Office on Church Street on Mondays, Wednesdays and Fridays.

Herbert G. Steele, '13, has rented a farm in Thompson, Conn.

Edward A. Swanson, ex-'22, is employed on architectural drawing work in the Sales Service Department of the Winchester Repeating Arms Co., New Haven. "Ed" entered Yale Suffield School as a Freshman last fall, but was forced to withdraw for the remainder of the year on account of a nervous breakdown.

PHI EPSILON PI

Two new chapters have been installed at Northwestern University and the University of Illinois. These chapters will be known as Gamma and Psi respectfully.

Louis Traurig, ex-'22, has been confined to his bed for the last two weeks with influenza.

Donald Hirsh '19 is engaged in the poultry business in New York State.

Victor Rome, ex-'22, is pursuing a business course preparatory to entering business with his father.

"Bob" Perksy, '16, is the proud father of Upsilon's first niece.

Harold Kaseawitz who has been in Cuba for the past year is expected back this month.

During the thaw of last week the fraternity room resembled a miniature flood, the water entering through the foundation and covering the floor.

A Press Club will soon be started by some of the enthusiastic journalists of the College.

NEW DINING HALL NOT READY FOR OCCUPANCY

Was to Have Been Used This Semester but Storms Cause Delay

The new Dining Hall will not be ready for occupancy this semester as was expected, due to the difficulties of transportation of supplies which have been encountered during the last six weeks. Work on the building has been practically suspended for five weeks.

Nevertheless the new "beanery" is beginning to look like something. The windows have been put in, the plastering is completed and the floors have been laid. As soon as spring comes Mr. Fraser and his class in landscape gardening will be on the job to plan the grading, walks, shrubbery, etc., about the exterior of the building.

The cafeteria plan of serving is going to be in effect as at present. But the plans for this arrangement as they are now entirely inadequate and is up to the local management to remedy the defect. The tables, chairs, cooking ranges and all equipment now at the old dining hall will be transferred to the new. Lack of funds prevent the purchasing of any new equipment. Whether tablecloths and napkins will be used has not yet been decided.

A very fine refrigerating plant is going to be located in the basement. This is the chief advantage the new building will have over the old. With four large compartments to the refrigerator 1,500 pounds of meat can be stored at a time, enough for a week's consumption. This, together with ample storage room for vegetables, canned goods and other supplies will make us independent for a while if severe storms tie up transportation as they did this winter.

The seating capacity is about three hundred, so small that next year two shifts will have to be run. The original plans were for a building about twice the size of the present one but due to the limited appropriation made they had to be cut down to what we now have. However, we may soon have a girls' dormitory, which will contain eating quarters for the female portion of our student body and the erection of fraternity houses will take care of many of the upperclassmen. Perhaps the new building will be adequate if we have several other buildings soon.

GLEE CLUB

The Glee Club held a business meeting Thursday evening, March 4, in Room 7, Main Building.

It was stated at this meeting that Director Farrel was leaving and would have to give up directing the club. It is hoped that Mr. Torrey will take his place as he has had previous experience directing the Glee Club several years ago.

Paul Manwaring resigned as President of the Club because of other work, and Evington Osborn was elected to fill the place.

CHURCH NOTES

Church service 10:45, March 14, 1920 in the church on the Campus.
VESPER SERVICES

Vesper service at 4:45 in the church on the Campus. Deacon Copeland, who was announced as the speaker a few weeks ago, will speak next Sunday instead. Deacon Copeland has been actively connected with the church for some years and his experience can be profited by.

CHRISTIAN ENDEAVOR

The regular Christian Endeavor service will be held in the church on the Campus at 6:45 Sunday, March 14, 1920. Topic for the evening—Everyday Courtesies. Reference 1 Peter 3:8-12. Leader, Mr. Mulford Simonson. Here is a topic everyone can speak on. Let us have another meeting like last Sunday's.

VARSITY CLUB IS UNDER WAY AGAIN

Organization Founded by Daniel
Chase in 1916

The Varsity Club which was organized at Connecticut in 1916 by then Physical Director Daniel Chase and was made up of men who had received their letters in any varsity sport is being reorganized.

Two meetings have recently been held at which the "C" men were present and plans are under way for getting a good organization.

The purpose of the Varsity Club is to keep a closer communication between the college athletes, and to advise and propose methods by which the athletic organization may be improved at Connecticut.

STATUS OF COSMOPOLITAN CLUB SETTLED

Organization is Considered as
Non-Frat. by Mediator

At a meeting of the Mediator Thursday night the status of the Cosmopolitan Club, which has apparently been misunderstood by many of the students, was definitely settled.

The Cosmopolitan Club is not a fraternal organization and is not recognized as a fraternity. Any male non-fraternity member of the college may join the organization if he desires, and he is in no way prohibited thereby in becoming a fraternity man if he desires to accept a bid.

The Cosmopolitan Club, though three of its members hold seats in the Mediator, is not recognized as an organization eligible to membership on that council. Its members are considered as non-frat men and as a club it is part of the non-fraternity body which to date is allowed two votes in the Mediator.

FOUR-YEAR COURSE in Home Economics. Open to young women who are high school graduates. B. S. degree.

SHORT WINTER COURSES in Agriculture.

Recent appropriations have provided additions to lands, buildings and equipment valued at \$950,000. Expenses low. No tuition charge to residents of Connecticut. Military instruction. A catalog will be sent upon request.

CHARLES LEWIS BEACH, President

NUTMEG EDITOR ANSWERS MANY INQUIRIES

Outlines Reason for Discarding Student Favorites Vote

Several letters have recently appeared in the "Safety Valve" inquiring into the reasons why the Nutmeg Board had decided not to use the results obtained in the Student Favorite vote.

The vote was not declared illegal by the Nutmeg Board. However, due to the fact that there was a balloting combination, which the members of the Board considered undesirable, it was decided not to use the material in the year book.

Before the ballot was taken, it was the opinion of the Board that the virtue of such a contest would be destroyed by other than individual balloting. Also the members agreed to do all in their power to prevent clubbing together on the vote. As their endeavors were in vain, they voted not to publish the results of the contest.

Trusting this will inform "Miss Information" and others, I am,

Sincerely,

Everett D. Dow,
Editor-in-Chief, Nutmeg.

DAIRY NOTES

Ralph W. Brown, college herdsman, has returned to his work after a sickness of nearly a month. During his absence the herd was almost entirely in charge of students and very good results were obtained.

Harry Lockwood now has charge of the laboratory work in the creamery.

A Guernsey bull calf was sold Monday to Clarence Bosworth, Eagleville, Connecticut. The calf is two months old and is of the oldest son of the present Guernsey herd sire, and the second calf of Tate Storrs Masher, one of our very promising Guernsey cows who made an excellent record as a two year old.

Mr. Bosworth was formerly employed here but is now running a dairy farm near Eagleville.

The creamery will have cottage cheese on sale in a few days.

(Cont. from page 1 col. 1)

the athletic field would be available for showing and judging live stock, and the students would have the benefits of a year's work with the animals.

It was suggested that a carnival or festival be staged in connection with the live stock show in order to attract a larger number of people.

Another suggestion was that the spring show be during the first part of Junior Week, leaving the middle and latter part for the Junior program and Alumni Day. A sheep-shearing contest and an auction sale of surplus College live stock were among the other possibilities for the spring show.

More meetings will be held later in the year and a definite program for the fall fair will be drawn up before College closes in June.

COLLEGE PAPER MAY HAVE NEW HEADQUARTERS

Campus Board is in Hopes of Getting Room in Koons Hall

Because Mr. Longley wants the present Campus office in the north tower of the Armory for the use of the Janitors, the Campus Board is looking for a new office in one of the dormitories. It hopes to obtain Room 41, Koon's Hall.

The janitors complain that they cannot sleep in the dormitories and have asked for a room elsewhere.

The present office is of little use because of its isolation. It is also too small and there are seldom lights there.

The Campus Board believes that much better work can be done in a new office which will be more centrally located. Better results can be obtained when the reporters are able to call often. It will tend to build up a more permanent and efficient organization.

The several editors will have their desks in the new room. It will also be the headquarters of the circulation manager, from which the paper will be distributed.

There is one great objection to the office being in the dormitories as women reporters and members of the board will not be able to use it.

The Campus Board is looking forward to the time when it will have a larger and better situated office which will virtually be the home of the Campus.

POULTRY NOTES

Prof. William F. Kirkpatrick, head of the poultry department, attended a meeting in New York on Tuesday, March 2nd, of the American Society of Poultry Instructors and Investigators.

The meeting was called for the purpose of discussing a proposed meeting of the poultrymen of the world, to be held at The Hague, some time during the coming year.

Clifford Peck of Windham has been engaged by the poultry department for the coming summer. Mr. Peck has completed his year's work at the Windham High School and expects to remain with the department until the opening of school next fall.

SHAKES NOTES (Continued)

Arthur M. Mitchell, '22, has left college for this semester. He has gone home to help his people on the farm. "Mitch" says, "You bet I'm coming back for football next year, all the farms in the state could not keep me home then."

Tuesday night was faculty night and a good time was enjoyed by every one. The alumni present were G. H. Lamson, A. W. Manchester, A. E. Moss, J. H. Fitts, H. C. Garrigus, S. P. Hollister, F. Miller, A. J. Brundage.
