UPPER CLASSMEN ELECTED TO GAMMA CHI EPSILON

HONORARY FRATERNITY PICKS NEW MEMBERS

Eight Juniors and Two Seniors Win Highest Honor Offered

On March 22 the Gamma Chi Epsilon fraternity met in the Horticulture Building to elect members from the Junior and Senior classes. From the list of men in both classes who ranked scholastically in the upper sixth of the Senior class and in the upper third in the Junior class ten were chosen for membership. Two of the new members are Seniors and eight were picked from the Junior class.

Douglas A. Evans and Howard B. Goodrich were both unanimously chosen from the Senior class.

From the Junior class Newton Alexander, Carleton Austin, Charles Compton, Everett D. Dow, Maurice Lockwood, William Maloney, Evington Osborn and John C. Taylor were unanimously chosen.

The college records of these men are enviable, especially because their many activities have not interfered with their scholastic standings.

Douglas A. Evans is president of the Senior Class and also of the Agricultural Club. He has represented the college on various judging teams and was delegate to the recent collegiate conclave at Des Moines. He is also Vice-President of the Y. M. C. A. and a member of the Mediator.

Howard B. Goodrich holds the highest standing for his college course of all members of the class of 1920. He is a prominent track man and has won places in many meets while running for Connecticut.

Newton W. Alexander holds the highest standing in the Junior class. He is a major of the cadet battalion, a member of the Student's Council and the Campus Board and has served on various dance committees. He has been prominent in class athletics and played on the varsity basketball team during his Freshman year.

Carleton Austin, who comes from Vermont is circulation manager of the Campus and has served on various dance committees.

Charles C. Compton is also from Vermont. He is a member of the Glee Club and of the Blackguards.

Everett D. Dow is Editor-in-Chief of the Nutmeg and Managing Editor of the Campus. He is a member of Theta Alpha Phi and holds the managership of the 1920 Football team. He is also president of the Junior class and director of the Blackguards.

Maurice Lockwood is a prominent

MAY HAVE A HIGH SCHOOL DAY IN MAY

STUDENTS WILL DECIDE WHETHER OR NO

Invitations Must be Limited if Affirmative Decision is Made

The Connecticut Agricultural College will hold its annual High School Day at the college some time between May fifteenth and twenty-ninth. The date could not be officially decided upon by the Publicity Committee because there is no varsity baseball game scheduled to take the place of the Colby game, which was to have been played here on May fifteenth.

Due to our lack of dormitory space only invitations for 500 High School Seniors will be sent out. Every High School in the State cannot be represented this year but the committee plans to have certain schools invited this year and the others next year. Both boys and girls will be able to come. A further requirement is that

(Cont. on page 5 col. 1)

NEW INSTRUCTOR IN MECH. ENGINEERING

Assistant for Professor Fitts Has Been Engaged

Prof. J. N. Fitts has announced that Mr. A. Harry Dreesner of New Haven has been engaged as assistant instructor for the Mech. Eng. Dept.

Mr. Dreesner, who is 27 years of age, is a graduate of New Haven High and Boardman Training School, and comes to us highly recommended. He received an honor diploma from Boardman for excellence in several courses. After graduation he spent one year at Holy Cross taking special work. Since then, he has taught Manual Training and so has had practical experience.

He will assume his duties April 1 and will assist in various Engineering courses especially the teaching of Forging in the School of Agriculture and Wood-turning in the Freshman Engineering Course.

He will be especially valuable during the coming summer in helping to move and arrange the Mechanical Equipment in the building originally designed for this department.

Owing to the increase in enrollment this year Prof. Fitts has for some time felt the need of an assistant. He has been teaching all of the practical work in the Engineering Dept. and this required so much time that it seriously interfered with his other duties. He will continue some of the teaching especially the second year men and will have general supervision of all the work.

ACTIVE STUDENTS HAVE HIGH SCHOLARSHIP

INACTIVE CLASS RANKS LOWEST IN STANDING

Correlation Between Activity and Scholarship Seems Evident.

That activity does not materially interfere with collegiate standing might be assumed from the following figures issued from the office of the secretary which denote the standing of various classes of students in the College based on last semester's marks. Students were ranked in the various classes according to the opinion of the managing editor and a prominent senior.

	No. in Class	Per ct. A	Per ct. B	Per ct. C	Per ct. D	Per ct. E & F	Av. No. credit hours
Athletes	21	6.2	25.	44.2	21.6	2.9	17.8
Ultra-athletes	8	12.2	18.8	55.9	13.3	—	17.9
Grinds	17	20.7	38.9	25.0	11.4	3.8	19.2
Ultra-active men	12	16.3	27.6	33.5	19.8	2.8	17.6
Active men	31	15.7	32.9	32.8	14.9	3.5	18.9
Non-active men not including Freshmen	42	3.9	20.3	31.2	30.3	9.0	18.7

Some very interesting deductions can be gathered from this table of figures. It can readily be seen from the figures, which though for a very few students, can be reasonably taken as somewhat of an index as to the standings of these classes. The inactive students rank scholastically below the other classes. The inactives in which grinds are not included are lowest in number of A students and much higher than any of the classes in percentage of D students and flunkers.

The largest number of A students as might be expected is found among the grinds, which class is followed by the ultra active men with the ultra athletes in third place. But on the other hand, we find that the largest percent of the flunkers with the exception of the inactives is with the grinds, which class is followed very closely by the actives. Moreover we find that the ultra athletes have not one flunker chalked against them.

It is found that the grinds are taking the highest number of credit hours and that the ultra active men are taking the lowest number. It is noticeable, moreover, that the active men are not far below the grinds in excellence of scholastic standing.

Many more deductions could be made but due to the small number of men dealt with and the short period of time over which these observations were made, it is unnecessary to bring these to light. However, this data seems to point to the fact that activity and high standing go hand in hand, even in spite of the fine record of the grind; and that low standing, inability in college activities and lack of activity are somewhat related to each other in many ways.

PRESS CLUB HOLDS ELECTION OF OFFICERS

OLD ORGANIZATION IS SOMEWHAT REMODELLED

All Students Interested in Publicity Work are Eligible

A meeting of the Connecticut Agricultural College Press Club was held in Room 7 Main Building at 7:30 o'clock P.M. on Thursday, March 25. constitutional committee consisting

The Constitution drawn up by the of William Maloney and Maurice Lockwood was read. After discussion and remodelling the Constitution was approved and accepted.

Election of officers followed and Harry B. Lockwood '20 was elected president. Miss Ann Flannigan '23 was elected secretary-treasurer and Earl Blevins was chosen as Director.

After a long discussion about procedure in the future the meeting adjourned.

The Press Club is being reorganized on a slightly different plan from that which was followed on organization. The Club intends to maintain a press bureau open to all students who are interested in writing for their home papers or other state papers. As these students become efficient they will be made members of the Press Club at that body's discretion.

To be eligible to the Press Club a man must have submitted an amount

(Cont. on page 2 col. 3)

VARSITY CLUB NOW HAS CONSTITUTION

WILL PROMOTE COLLEGE SPIRIT AND ATHLETICS

Election of Officers Delayed but Will be Held at Early Date

At a meeting of the Varsity Club held March 18th the proposed constitution was read by Paul Manwaring. After some discussion and a few changes made it was accepted.

ARTICLE I.

The name of this organization shall be the Varsity Club of the Connecticut Agricultural College.

ARTICLE II.

Its object shall be to promote college spirit among the students especially with regard to Athletics; to encourage men who are capable to engage in the various sports; to encourage men in secondary schools who have athletic ability to come to this college; to create and maintain proper respect for the wearing of the "C."

ARTICLE III.

Any man who has earned the "C" in any major sport in this college is eligible for membership.

ARTICLE IV.

SEC. 1. The officers of this club shall consist of the following: President, Vice-President and Secretary and Treasurer. They shall be elected at the last meeting in the second semester of each college year.

SEC. 2. The duties of the various officers shall be as follows: The President shall preside at all meetings and control the disbursement of funds. He shall have the power to call special meetings. The Vice-President shall act in the capacity of President in the absence of the latter; and he shall succeed to the office of President in the case of a vacancy. The Secretary and Treasurer shall keep the minutes, attend to all correspondence, and have control of all funds. He shall be responsible to the President in the disbursement of funds.

ARTICLE V.

Meetings shall be held on the first Monday of each month.

ARTICLE VI.

This constitution may be amended by a two-thirds vote of all members of the club.

It was decided at this meeting to hold a short meeting immediately after the students org. meeting Monday night but as the meeting did not finish till late it was too late to get the fellows together. A meeting was called for 6:45 Wednesday night for the election of officers but as only a few men showed up it was called off.

That the number of scholastic failures this year has broken all records in the universities represented is reported from a conference of ten university Deans of Men held at the University of Illinois, February 20-21. University standards in general were reported lower than usual, while interest in social affairs and student activities was greater. The war was blamed as one cause.

FRESHMEN WEILD PICK AND SHOVEL ON FIELD

ATTEMPT MADE TO CLEAR OFF ICE AND SNOW

Baseball Diamond in Very Bad Condition Due to Poor Drainage

In an effort to make Gardner Dow Field ready for baseball practice as soon as possible Coach Swartz armed his two classes in Physical Education with picks and shovels last Tuesday morning and sent them out to break up the ice and shovel the snow into large piles. It is hoped that by so doing the field will become hard and dry much sooner than if the thick bed of ice was left intact.

Wednesday afternoon and evening more Freshmen reported to the field and shoveled some of the snow and ice away. At present there is quite a bit of ice and water there. The snow is gone and probably the ice will be melted away before the week end.

As the field is lower than the surrounding ground water settles there and causes considerable trouble. Probably the field will be dry enough for practice after the one week vacation which begins next Wednesday noon.

COMMITTEE ON CHEER LEADING APPOINTED

Organized Cheering to be Had At All Times

As the Athletic Association wishes to have our cheer leading organized and carried out on a sound basis, Francis Mahoney, President of the Association has appointed E. D. Dow, P. Manwaring, M. L. Osborn and P. H. Dean to draw up rules to govern the coaching and instructing of fellows who wish to try out for Cheer Leader.

It is the wish of the Association to have someone capable of leading organized cheering at all times. Hereafter it has been the custom that any one who chose should jump up to lead a cheer, and many times the results have been very unsatisfactory, so now the Association intends to have organized cheering led by men who have been coached, instructed in and therefore capable of leading cheers.

A person will become Leader in his Senior year and he will be allowed to wear a letter. He will probably have two Juniors and two Sophomores as his assistants. These fellows will wear a letter when they are leading cheers.

JUNIOR PROM.

The Junior Prom. Committee on receiving data and prices from various orchestras has decided in favor of the Peerless Dances Orchestra of Willimantic, which has always rendered good service to the college organizations.

CONNECTICUT PILL TOSSERS OPEN SEASON WITH BROWN

QUANTITY OF GOOD MATERIAL SHOULD GUARANTEE A VERY SUCCESSFUL SEASON

In less than three weeks the blue and white nine will be donning the cleated shoes to show their ability to the Brown University combination and yet the diamond on Gardner Dow Field would make a much better swimming pool at the present time than it would a baseball diamond, so that the probable result will be that the Aggie nine will face the Brown boys with little or no outside practice.

Coach Swartz is working the squad hard in the armory daily and they are fast rounding into form. There are many holes caused by the members of last year's team leaving but a number of good men are on the squad and a strong nine should be turned out to represent the Nutmeg College with Coach Swartz teaching them the fine points of the game. Captain Mahoney and Mettelli are the leading candidates for the backstop position and they are a clever pair. Mahoney needs no introduction to the Aggie fans and we can rest assured that the backstop place will be taken care of in the best manner possible. There is a wealth of material trying for the twirling staff and if the men live up to their past reputation C. A. C. will have the classiest pitching staff in its history. "Bobby" Sawin, last year's star, is back in his old time form and can still burn the pill across the plate at a mile a minute clip and will make the opposing batters stand on their heads to solve his delivery and Johnson, who held Middlebury without a hit for eight innings last spring, can still make the ball hop and float in a manner that will cause his opponents to have a fit.

Alexander is showing an assortment of curves that made a big name for him in the amateur circles around Waterbury and there is little doubt in the minds of his followers that his name is to be blazoned among the

(Cont. from page 1 col. 4)

of news aggregating five columns to news or agricultural papers. Editors and Business Managers of the Campus and Nutmeg are eligible to membership.

The purpose of the club is to get better and more publicity in state papers and in those out of state places from which our students come. To help pay the expenses of this work, the Publicity Committee of the College has set aside a sum of money.

Any student who so desires may try out for the Club and thereby become a member of the press bureau by handing his or her name to Mr. Blevins.

Apple trees and grape vines are in full bloom in the greenhouse. A large bunch of bananas are also well on their way to maturity.

honor roll of Aggie baseball heroes. Lord's reputation that he won on the Loomis field seems well grounded and he should prove a big addition to the already classy combination of mound artists. The loss of Eaton at first base is a heavy one but if rumors come true we may still have a chance of seeing "Pop" in action because he has left Dartmouth and may return to his old alma mater. If he does not come back Coach Swartz ought to be able to develop a good man out of the candidates trying for that job.

Ex-Captain Brigham will make all comers step lively if they desire to play at the keystone corner and the chances are very favorable that Brig will guard that sack himself. He didn't hit heavily last season but if he can get back his form of previous years he ought to turn in a few clouts to fatten the Aggie batting average. Hopwood who played on the team before he left for Europe is the leading candidate for shortstop and Alexander is also a clever infielder and may be used in this position when he is not on the mound. Sickler is showing up well and may be given a chance to show his wares around the dizzy corner and Lord is also a good third sacker and can be used there if necessary.

The loss of Ryan especially in the batting column is a hard one but this pair ought to be able to fill his shoes in perfect style. Last year's outfield is on deck but will have to show more ability than they did last year or they may find new men covering their positions. The outfield was the weakest part of the team last year and did practically no hitting whereas the outfielders should be the heavy hitters of the squad. The men who are showing up the most prominently are Jacquith, Putnam, Brow, Lilley, Ricketts, Sneiderman, Angerman and Resnick.

HELEN BOLAN LEAVES EXTENSION SERVICE

Miss Helen Bolan, formerly assistant Club Leader, recently resigned from the Extension Service to teach in the Waterbury High School. Miss Bolan has charge of the equipping and opening of the home economics department of the Wilby High School which will be opened this spring.

William H. Darrow who was to have taken up this work in the Economics Department in April will be unable to come because his house will not be completed by that time.

Professor Stevens has recently purchased a powder spraying machine that he intends using for spraying his vegetables this coming season. This machine has not been in use but a short time but it has proved very successful in many parts of the country. Mr. Stevens is in hopes that it will turn out to be a success with him.

LARGE ATTENDANCE EXPECTED AT LEAP YEAR DANCE

Program of Sixteen Dances Has Been Decided Upon

All plans for the Leap Year Informal are progressing and a large attendance is expected. The program has been selected and is as follows:

1. One Step—"In and Out."
2. Fox Trot—"Dardenella"
3. One Step—"Whose Baby are You"
4. Fox Trot—"Karavan"
5. Waltz—"Mississippi Moonlight"
6. Fox Trot—"When the Sun Goes Down."
7. One Step—"You Know"
8. Waltz—"My Isle of Golden Dreams" (Moonlight) Intermission
9. One Step—"Wild and Wooly"
10. Fox Trot—"Slow and Easy"
11. One Step—"Oriental Stars"
12. Fox Trot—"Mystery"
13. Waltz—"Yearning" (Moonlight)
14. One Step—"Happy Days"
15. Fox Trot—"Bolabo"
16. Waltz—"Home Again"

COLLEGE HAS VERY COMPLETE HERBARIUM

Collection of Over 200 has been Mounted this Winter

During the past winter the College Herbarium has been experiencing a surprising change under the supervision of Mr. G. S. Torrey. Within the last six months 2200 different specimens have been mounted and filed away. Of this number Mr. Torrey has collected about 1800 and has donated them to the College Herbarium. The specimens which he gave to the College are excellently preserved and constitute a fair representation of the flora of New England.

Besides the native flora, the College Herbarium now has a creditable collection of specimens from Canada, Newfoundland and various parts of the United States. It is also interesting to note that a few of the preserved plants, although over a hundred years old, look as if they were but recently collected.

In the process of mounting and classification Mr. Torrey, with the assistance of A. I. Weinstein, a student here, has eliminated all duplicates and sent some specimens to the Massachusetts College. At present approximately 1000 more plants remain to be mounted and added to our collection.

Perhaps few of us realize the necessity of having a good Herbarium here at College. It is of value not only to the students pursuing the study of Botany but also to the various other departments.

Mr. Torrey states that the Herbarium is always glad to identify plants provided that the necessary data, such as name of collector, date and locality is furnished. It seems that the Herbarium offers a splendid opportunity to the College departments as well as to the people of the state whenever data concerning a certain plant is being sought.

FRESHMEN MADE BIG TIME OF THEIR BANQUET

RETURN TO STORRS TO PARTAKE OF BREAKFAST

Not Satisfied with Eating Alone They Held Dance in Putnam

Leaving the Horticultural Building a few minutes after 1 P.M. on Thursday, March 18th, eighty-five members of the Freshman class made an unopposed get-away and started for their banquet which was held at Putnam Inn, in Putnam.

The cars, all high-powered machines driven by competent chauffeurs, came up around the Hort. Building, slowing down a little to allow the Freshmen to get in and then continued down past the Valentine House and out onto the main road and on to Putnam. In a few minutes the Hill and the Sophomores were several miles behind the fleeing Frosh.

A short distance outside of Willimantic the line of cars halted to allow the drivers to take the chains off and then the trip was uninterrupted, the first ten machines reaching Putnam at 2:30, closely followed by the machines that were bringing the girls.

Realizing that the Sophomores would soon be down upon them the Freshmen formed a strong guard at every door and window. The hotel proprietor heard that the Sophs were coming so he called in the police to protect his property and the other guests.

Wood and Beisiegel, who were handcuffed and held prisoners by the Freshmen were the first to arrive in Putnam. The entire Sophomore class soon assembled on the outside of Putnam Inn, but the looks and actions of the twelve members of the Putnam police force that were stationed at various points about the building caused them to stand and gaze through the windows at the victorious Freshies.

Block, Steere and Steck, who were captured by the Sophomores, escaped and arrived at the Inn in time for the banquet. Several others arrived late in the day.

The afternoon passed quietly on and at 8 P.M. the Sophomores, realizing their defeat, cheered the Freshmen and went away leaving the visitors to enjoy their banquet.

About an hour later someone announced that all was ready and the Freshmen hordes filed into the dining room to partake of that long-looked-forward-to feast.

The menu was as follows:

Oysters on the Half Shell	Olives
Celery	
Roast Chicken	
Cream of Salmon	
French Fried Potatoes	Peas
Salad	
Ice Cream	
Demi Tasse	

The hungry Freshmen who had stood guard over the various entrances for five long hours, did justice to the meal.

At the completion of the feast Chairman of the Banquet Committee, Sickler, addressed the class. President

(Cont. on col. 3)

OLD PRINT SHOP TO BE BEE CULTURE LAB.

Mr. Crandall Busy Forming Beekeepers' Institutes

Mr. A. C. Miller of Providence will speak at the spring meeting of the Connecticut Beekeepers' Association which will be held in the State Building at Hartford on April 3rd. G. M. Scofield of Berlin and J. W. Parker of Waterbury will be the other speakers.

Mr. Miller is known through the country as an interesting writer, a brilliant speaker and an exponent of the most modern ideas of Bee Culture. He has greatly aided the progress of the Bee Keeping industry in his country. One of his most note worthy achievements is the invention of the observation hive, which allows people to watch the bees at their work. Mr. Crandall displayed one of these hives in the Entomological Laboratory last fall and he has another one in his office at the present time.

The old print shop in the basement of the Fourth Section, Storrs Hall, has been fitted with benches and equipped so that Mr. Crandall can use this room as a Bee Culture laboratory. The work will be organized on a factory like basis so that a student will learn all about the construction and fitting together of the hives. By using this plan Mr. Crandall hopes to be able to accommodate larger classes and give each student more personal attention at the same time.

Outdoor feeding began last Wednesday and from now on the work should prove very interesting for those who are taking Bee Culture or Apiary Management.

Mr. Crandall, assisted by Mr. Gates and Mr. Coley, has formed three Beekeepers' Institutes in this state during the past three weeks. One at Ellington, one in Stamford, and one in New Milford. The meetings were well attended and much interest is being shown in the work. Mr. Crandall spoke on "Bee Culture" in the Grange at Preston City one night last week.

(Cont. from col. 2)

Voorhees and Faculty Representative Swartz each gave a short address. Senior Class President, Douglas Evans, then spoke to the Freshmen and told how successfully the banquet had been and what the Freshman banquet meant to the upperclassmen as a tradition of the college. Several cheers were given and then all joined in singing the Alma Mater.

The party broke up shortly after eleven o'clock and the joyous Freshmen went to a nearby dance hall to continue the revels of the night until the State of Maine Express, which was two hours late, arrived to take them to Willimantic. From "Willy" the journey continued and the greater part of the class arrived on the Hill, tired out but jubilant, at seven A.M.

The Banquet Committee, composed of Sickler, Katz, Ashman, Voorhees, Crofts, Daly, and Flynn, deserves much credit for the splendid work that they did and they accomplished much toward making the banquet the most successful of any ever held in the history of the Connecticut Agricultural College.

THINK—BUT DON'T YELL

About the time of any athletic association election for a managership there is always some talk about the co-ed vote, and the effect and intelligence of the same. Many are of the opinion that the greater number of the girls in most instances, know very little about the candidates for managerships and more especially that they are in ignorance of the managerial ability of the men running for office.

This is apparently quite true, for the girls have very little opportunity to see a candidate for manager in action and they are quite liable to be influenced more by what they hear than what they see. Then again there have been many cases where girls have voted for athletic association officers, without knowing all of the candidates and in such an instance, it is quite natural that they should vote for the person whom they know, which does not mean that he may be the best man for the position. Some are of the opinion, too, that the girls are sometimes easily manipulated in their voting.

A few are of the opinion that the girls can be educated to vote intelligently, though these persons have never suggested any plausible plan for so doing. There are many girls who probably vote with as much knowledge of the candidates and as fairly minded as men students but the fairly minded men students, but the average fellow is in a position to cast a more intelligent ballot than any of the co-eds. Some of the girls have expressed the opinion that they did not think it right for the girls to have a vote for A. A. officers for they believed

ed that the girls did not have enough information of the men in question to vote rightly. It would be unreasonable certainty, for the men to want the right to vote for the manager of the girls basketball team, and to many, it seems as if the rule worked both ways.

In the near future the co-ed vote is certain to be a real live issue in the A. A. for the co-ed body is gaining in numbers by leaps and bounds. It is almost certain, too, that the time is not far distant when the matter will be again the subject of debate. It may not hurt to do a little thinking now.

SOME IMPROVEMENT

There is no doubt that the Freshmen held a banquet which was a top-notch success from every standpoint, and a more fortunate get-away could not possibly be imagined. Both the Sophomores and Freshmen showed the proper spirit, too. The former took the defeat smilingly, and as yet none of the latter have been censored for boasting.

The attitude of the two upper classes was also much more sportsmanlike in regard to the banquet than has been the case in the past few years, and shows that the existing customs can be changed quite readily, if there is a real reason for so doing. Of course there were one or two upperclassmen, who apparently did not have enough banquet when they were underclassmen to suffice, and who had to put their fingers in the pie this year so that there would be something about the best Freshman banquet ever held which could be looked back on as objectionable. But light kills bacteria and it doesn't have an enervating influence on upperclassmen of the above type. In another year or two however, if the improvement is as marked as it was this year, Juniors and Seniors will be resigned to allowing the Freshmen to do the best they can toward getting to the banquet, and the Sophomores to do the best they can toward preventing them, without suggestion or aid from upper-class circles.

CLASS SMOKERS

There was a time, just before the war, when the various classes got together and held smokers not once a year but two or three times. The smokers were usually held in one of the fraternity rooms and the program consisted of various speakers, plenty of tobacco and refreshments. The faculty advisor was always present and opportunity was given for everybody to have a good chat. Spirit was always much better after a smoker, and many times real ideas were brought forth in the speeches.

Apparently the custom has been forgotten, for in the past two years the class of 1921 has been the only class to give a smoker. Class spirit is running high at the present time, and it would be a fine idea if the classes would think seriously of giving smokers. Nobody ever regretted going to one yet and the cost is extremely small. Connecticut needs more real class spirit.

SAFETY VALVE

The Campus Board assumes no responsibility for ideas expressed in this column

WHAT'S THE ANSWER

Dear Editor:

Have you ever stopped to consider just how hard it is to get an education, just how many forces there are to work against one?

Personally I have spent fourteen years in broadening my mind through the studying of sciences so that I may be able to solve some of man's most vital subjects—those dealing with life and death; so that I may be able to alleviate the sufferings of mankind; so that I may offer some new discovery to the world that will live to posterity.

This is my ambition and I have eight years more to study making a total of twenty-two years during which time I shall not be a wage earner but an economic parasite. In obtaining the knowledge which I now possess I have confronted many obstacles but through tedious labor they were surmounted each time that they presented themselves. But the law seems to be the higher the education the greater the obstacles.

Now what I want to know is this. Is my ambition economically worth to me the time, labor and money expended?

Will the world appreciate the sacrifices I shall have made for its betterment?

What will the world offer me in return for my labor?

GAMMA CHI EPSILON

At the last president's hour announcement was made of the elections to Gamma Chi Epsilon honorary fraternity, membership in which is the highest honor perhaps that a man can possibly gain while he is here at college. Any man can well be proud to wear the key of the order, for it is a mark of ability and endeavor carried to success through three years of a man's college life.

Many present seniors have said that they were in ignorance of the fraternity when they were freshmen and that in spite of the fact that their marks were very high and their work in college activities commendable in their Sophomore and Junior years, low standing while they were Freshmen eliminated them from eligibility. Members of the class of 1923 who are desirous of really being found allround students should profit by the experience of these Seniors. Freshmen, start now, if you haven't already done so, and use your time to advantage in both studies and activities in order that when the times comes you may be eligible to the fraternity and of such ability to place Gamma Chi Epsilon on an even higher standard than it is today.

If "Curiosity" will watch the columns of this paper, she will in time learn of corrections, within the power of College humans, applied to the above.

—Editor

Is not a person oftentimes better off as a common laborer, a wage earner?

Carlyle in his essay on Burns said "In the modern arrangements of society it is no uncommon thing that a man of genius must, like Butler, ask for bread and received a stone. * * The inventor of a spinning jenny is pretty sure of his reward in his own day but the writer of a true poem, like the apostle of a true religion is nearly as sure of the contrary. We do not know whether it is not an aggravation of the injustice that there is generally a posthumous retribution."

A mechanical invention is protected by a patent. The owner has a monopoly and usually makes great profits. But a scientist, a doctor, a surgeon, a chemist, are their discoveries a source of wealth? Must I too "like Butler, ask for bread and receive a stone?" Burns lived a life of trials and penury and died in the prime of life. Of what use are all these "posthumous retributions"? Wouldn't it have availed more if something had been done to allay his sufferings while alive? What care I for all the monuments in the world after I die? What is of utmost importance to me is—I need shelter, food and clothing. How can I get them? If I spend all my time working for the world will it give me these three necessities in return?

I wish that someone of the faculty would answer my questions through the "Campus Safety Valve" as these are some of the problems that confront and puzzle every college student.
—Questionnaire

WE WONDER. TOO

Dear Editor:

When in the sessions of sweet silent thot,

I summon up desires and wishes vain,
I sigh the lack of many a thing I seek,
And wonder—

How soon the blissful day will dawn when the entrance of the Armory will be free from cigarette stubs.

Whether the post office really is to be moved downstairs next year.

How soon the boys will clean up the unsightly remains of that ancient bonfire between the dorms.

How soon the co-eds will volunteer to do it for them.

Whether Connie is going to run that soda fountain next year. (We hear that he is going to settle down in Storrs.)

When the girls' new dorm will be ready for occupancy.

Why the complainers don't go to some other college since this one does not suit.

Whether we are to have "High School Day" this year.

Why other libraries are not so noisy as ours.

Which roachy will get to the new dining hall first.

Does anyone know?

—"Curiosity."

KAMPUS KLIPS

Unsettled finances of the students have caused Teeter to abandon the detective business.

The Freshman Class is having an argument over how to eat oysters with your eyes open. Who recommends sprinkling salt on their tails?

Prof. Fisher, in D. H. IA.: "Now Cohen proceed."

Cohen: "Well, add up 54 and 41 which will give you 96."

Student in Public Speaking giving a talk on "Haying."

"As I have never had the experience of 'getting in hay' it would be rather absurd to try to explain the sensation of that most common of rural proceedings. I do know, however, how delightful and romantic it is to 'get into the hay,' particularly if it is on a lovely moonlight and you have with you a fair companion. It makes no difference where the hay is; it may be in piles in the field, in the hay loft, or in a large wagon or sleigh. Under the right circumstances the sensations are always the same. But it would not do for me to relate those sensations here in public. You all know them without doubt and that is sufficient."

Boy, you're wasting your time at this "Farm School!"

Moddell has a new girl in the city. Wonder who she is?

Dutch Maier was really "at home" last week end.

Doc Griswold and a few more boys "stepped out among them" last Sunday night.

Freshman: "If Ohio had a flood would Water-bury Connecticut?"

No, but it might cover a Fair-field.

(Cont. from page 1 col. 2)

each high school delegation bring its own chaperone. In other words, the high school is responsible for all students whom they send, thus leaving the college no responsibility for the individual.

The invitation will cover free transportation to and from Willimantic, and one night's lodging. There will be a small charge however, for meals.

Before many more plans are to be made the faculty wish to bring it to a vote among the student body. They desire to know whether or not the students favor such a day to begin with. Are the students willing to give up their dormitories for a night?

To prevent any rough-housing on the part of the high school fellows, as it happened last year, the campus will be under an effective patrol either by the military department of the college or by state police.

EXTERMINATION ON HIGH SCALE TAKES PLACE

No More Complaint Should be Heard in Dining Hall

The roaches have been exterminated from the College Dining Hall by Mr. Martin Maillard of Springfield, Mass. The job was let out on contract by the College.

On Saturday, March 13, four men, armed with powder bellows, proceeded to make the dining hall look as if a blizzard had struck it. Approximately three hundred pounds of powder made by Mr. Maillard himself, were used. This special insect powder retails at one dollar per pound.

At seven o'clock that evening there was very little space either in the basement or dining hall proper which did not show signs of the work. It was interesting to note the powder bellows used. The old fashioned type of automobile horns had a wooden stopper fitted with a short piece of brass tubing about the size of a pencil. The powder was put into the bulb and blown out through the nozzle into every crevice and opening where the roaches might live.

The powder must be left on for two weeks. So confident is Mr. Maillard in his method of extermination that he guarantees the absolute extermination of every roach in the place.

QUARTET TO SING AT COLLEGE FUNCTION

Made up of Members of the College Glee Club

New organizations are starting on the hill all the time and this last month brings another into our midst. This new organization is a male quartet.

The members have been rehearsing their parts for the last month and will make an informal appearance soon. The organization was started by E. A. Osborne, '21, for the purpose of filling a definite gap in college activities. Since it was first organized, it has become affiliated with the College Glee Club and will work in connection with it although it has several separate engagements. Manager Osborn stated that the members would be willing to sing for any of the college activities if their services were so desired.

HORT NOTES

William Langdon, '15, was present at the International Flower Show recently held at New York. He is employed by the Louis and Valentine Company of Roseland, L. I., and was at the Flower Show in charge of his employers' display of flowers.

The National Dahlia Society has decided to hold its dahlia trial garden at Storrs again this coming season. Entries from Oklahoma, Pennsylvania and several other places around the country have already been made. It is expected that more land will be required this year than last because of the extreme popularity of the garden. The dahlia gardens are open to visitors at all times. They were the cause of much attraction here at Storrs last summer.

De Laval Users are on Profit Side

No machine used on the farm returns a larger profit on the investment than a De Laval Cream Separator.

It saves from 25 percent to 50 percent of cream twice a day every day in the year over crocks and pans and from 10 percent to 25 percent of cream over an inferior or half-worn-out separator.

With butter-fat at the present high-prices these savings mount rapidly. Many thousands of users have found that their De Laval paid for themselves in a few months. De Laval users are always on the profit side of the ledger at the end of the year.

More De Laval are used than all other makes combined.

If you don't know the local De Laval agent, write the nearest office below

AUTO ACCIDENT SPOILS HOLIDAY

Red Markham Entertains at His Summer Home

Cider in the radiator was said to be the cause of the front wheel coming off a car bringing eight fellows back to Storrs, Sunday evening. The party were returning from a week end vacation, having been the guests of Chauncy Markham at his summer home in Westchester.

The group left the college Saturday and spent the afternoon hunting big game, including rabbits and canaries, every one tramping around in rubber boots and straw hats. They hunted Sunday also, being armed with cameras and biscuits baked by Don MacIntyre.

As a sad ending to a very enjoyable week end, the wheel came off the machine bringing them back from Willimantic and they were forced to walk the rest of the way.

Those who were in the party were C. Markham, J. B. Ricketts, H. Maguire, D. MacIntyre, B. Brow, F. White, R. Sawin and R. Chamberlain. Judge Markham of Hartford, Chauncy Markham's father was also at Westchester.

ETA LAMBDA SIGMA

Andrew Shenker ex-'21 attended the funeral of Alfred Aulick in Stamford.

Webster Chapman was called home last Friday because of the death of his grandfather.

Robert Hughes ex-'22 and Russell Manchester '23 spent the week end in Hartford. "Dick" is planning on entering the University of Pennsylvania next fall where he will take up the study of dentistry.

The Annual Banquet of the Fraternity will be held in Hartford on June 7.

Brothers Sickler, Frostholt and Mettelli represented the Fraternity in the Inter-Fraternity bowling tournament and won by 50 pins.

"Phil" Dean '22 and Evington Osborn '21 attended the Tobacco Growers' Convention in Hartford, March 23.

"Dutch" Maier spent the week end in Boston with his folks. He attended the "Greenwich Follies" with Brothers Alberti, Hood, Howard and Eaton.

SHAKESPEAREAN CLUB

"Chewy" Norton '17 is in Dr. Mason's hospital in Willimantic recuperating from the effects of an operation. He expects to be there a week more.

A. W. Mitchell ex-'22 is home now managing his father's dairy farm at Washington.

Warren Brackett '21 expects to return to college after the Easter vacation. He hopes to go home from the hospital at the end of this week.

Perry Averill is home for a couple of days. He is studying at a vocational school in Detroit.

PHI EPSILON PI TOPS PHI MU DELTA

First Game of Tournament Won By Seven Points

In the first game of the inter-fraternity bowling tournament, played in the Armory on Saturday, March 20, the Phi Epsilon Pi team won from the representatives of the Phi Mu Delta Fraternity. About forty onlookers watched the match.

M. Katz, L. Resnick and A. Feldman rolled for the Phi Epsilon Pi while C. Trost, H. French and C. Taylor composed the Phi Mu Delta team. Each team won one string and the outcome of the match depended upon the third which the Phi Epsilon Pi won by seven pins.

The following scores were made.

Phi Epsilon Pi:			
Katz	67	69	73
Resnick	95	78	70
Feldman	99	80	89
	261	227	232
Phi Mu Delta			
Trost	73	81	69
French	77	83	81
Taylor	68	75	75
	218	239	225

High single: Feldman 99

High Total: Feldman 268

PHI MU DELTA HOLDS ANNUAL DANCE

"Sugar-Off" in True Vermont Style Proves Popular

Saint Patrick's Eve the Phi Mu Delta fraternity gave a dance in Hawley Armory. The dance started at eight o'clock with good music furnished by the College Orchestra. The dancing continued until about ten-fifty. The chief features of the dance were two moonlight dances and a good old-fashioned Paul Jones. About 10:30 the first sixteen couples adjourned to the English Room which had been decorated with appropriate fixtures for the evening. Small tables were placed about, which were decorated with orange and green paper. Each table accommodated two couples and as each couple entered they looked about for their place cards. While the second group, including the orchestra, was partaking of refreshments the music was furnished by a four-piece Co-ed orchestra. A moonlight waltz ended the dancing at 11. A "Sugaring-off" party took place and the party broke up soon after eleven.

The chaperons were Miss E. J. Rose and Mr. Skinner.

The Committee in charge was C. H. Ferriss, chairman, E. White, B. Brow and H. Wickham.

PLAY TRYOUT

Junior Play tryouts for "Nothing but the Truth" will be held this afternoon under the supervision of Coach Paul Manwaring at 3:30 o'clock P.M. in the Main Building, Room 7.

HOME EGG-LAYING CONTEST BEGINS

Rev. Marshall Dawson Holds Second Place at Present

The Poultry Extension Service has started an entirely new and original line of work, known as "The Home Egg-laying Contest." This contest is state wide and is designed to create a more decided interest in poultry raising with a particular reference to the bettering of the different strains or breeds. The contest has been in progress for only four months but already a great deal of enthusiasm and interest have been shown.

The principle feature of this contest is the record-calendar, which the service has been supplying upon request. This contains space for a complete record of the flock. A detachable card is attached to each of the twelve monthly sheets and this is filled out by the contestant and returned to the headquarters at Storrs at the end of each month. The standing of each contestant is obtained from these cards. 258 of the cards have been received in one month.

A plan of follow-up work has been outlined by means of which each person competing will be given notice of advice which seems to be of interest.

Field meetings will be held at some of the best farms, and flocks will be culled to cut out slackers and to pick out good breeders. At present, the leading flock is owned by H. J. Cooke of Westbrook, Conn. He has a monthly average of 61.3 eggs per bird, from a flock of 20 White Leghorn pullets.

Rev. Marshall Dawson of Storrs holds second place with an average of 55.9 eggs per bird from a flock of 9 White Wyandottes.

Mr. Roy E. Jones of the Service is in charge of this contest and will be glad to explain it or give advice to anyone who is interested.

ALPHA PHI

Carroll D. Wills, '19, is spending a few weeks at Palm Beach, Fla., with his parents, having made the trip from Detroit, Mich., in his father's private car.

Sandford B. Morse, '18, writes that his mother and sister who have been ill for some time, are now gaining rapidly. "Sammy" is in the employ of the Rosebrugh Chemical Corporation of Syracuse, N. Y.

"Tommy" Elcock, '19S, and Special, writes that he is living for the present at The Woodstock Inn, Woodstock, Vt. His father recently purchased a large farm in Woodstock and the family will take possession within a short time. "Tommy" says that he and his father will probably go into the sheep business, that being one of the main industries in that vicinity.

Robert S. Laubscher, '23, of Rockville and Marshall F. Beebe, '23, 80 West Rock Ave., New Haven, were pledged to the Fraternity on March 23rd.

ALUMNI DAY SHOULD ACCOMPLISH MUCH

Will Revive Interests of Graduates Throughout State

Why do we need an Alumni Day? What good does such a day bring about anyway? There are several reasons why we need an Alumni Day at the College.

First, it keeps up a closer feeling between the graduates and the college; it keeps them posted as to our conditions and how to better them. Most of the men who have left the college reside in Connecticut. They are consequently voters in this state, and have an influence on the government of this state. If then, we get them back and let them see the lack of dormitory room both for men and women; the poor transportation facilities and our general need of expansion, surely they can bring pressure to bear upon the proper places.

We have not had an Alumni Day since March 15, 1916. Can we therefore wonder at the disinterest of the graduates?

The Alumni days of past years have been occasions which were looked forward to by both students and alumni. Notices are always sent out months ahead of the scheduled day in order that every alumnus may know of it.

The Junior Class has taken it upon themselves to hold the biggest Alumni Day in the history of the College. Plans have been formulated. As it now rests, Alumni Day will come on the last and biggest day of Junior Week.

Reasons for holding Alumni Day during Junior Week are many. The biggest reason is that whenever the Alumni have been on the campus in any number it usually was during Commencement, when students are leaving and the machinery of the college is inactive. The idea of getting them back during Junior Week is that they may see us at work and at play. Likewise, they will see conditions as they really are.

During Commencement Week, many meetings and reunions are held which take up the time of the alumni. This year they are to come as guests of the Junior Class.

In May the weather is cool enough to permit everyone to enjoy themselves. The Campus looks its best in its new spring attire. This alone is enough to bring back any person who has ever lived here during the spring months, for it brings to us all the sweetest memories of our life.

Furthermore we play our old rivals in athletics, Rhode Island State, in baseball here on Alumni Day. What more could be desired to arouse their college spirit than to sit with us in the bleachers and yell their heads off?

Being an agricultural college, most of its graduates are busy in some agricultural enterprises. Therefore it is much easier to get them back in May than in June. Junior Week is the biggest event in a student's career at Connecticut. Getting the old boys back during a Junior Week will be another big drawing card, for they all remember how it used to be and

CHURCH NOTES

Mr. Kilburn of the Interchurch World Movement will occupy the pulpit in the church on the campus on Sunday morning, March 28. The church has not been filled to its capacity yet, let us see what it would look like if it were filled and thereby give Mr. Kilburn a large congregation to address.

VESPERS

Sunday afternoon, March 28, will be the last Vesper Service. Many do not know what these services are like and if they ever expect to know the must attend next Sunday. Turn out and give Miss Buckley, who is the speaker, a well filled church.

C. E. SERVICE

Topic: The Power of an Endless Life.

Reference: Heb. 7:15, 16, 25; I John 3:1-3.

Leader: Mr. Charles Compton.

Time of Meeting: 6:45 in the church on the campus.

To those who attend the Christian Endeavor Service the above announcement is sufficient, but to those who do not attend, or at least not regularly, it does not mean quite so much. As an added attraction the Music Committee has prepared a special musical program. Come over and sample the meeting and the program.

COMMITTEE REPORTS TO THE STUDENT BODY

President Beach Suggested Returning to Old Policy of Flat Rates

A comparison of the quality and cost of board at the Connecticut Agricultural College and four other New England Colleges was given and discussed at great length at a meeting of the Students' Organization held in the Armory on Monday evening. President Beach and Mr. Longley attended the meeting and spoke on this subject.

During the past week Mr. Longley and Frank Wooding visited several college dining halls and obtained information concerning the food served and the costs.

Mr. Wooding, representing the committee appointed some time ago, gave a very complete report on these other colleges. The data was placed on a blackboard in front of the students.

It was shown that with one exception the other college dining halls give equal or better food at smaller cost.

Mr. Longley presented figures relating to the dining hall here and then answered the many questions asked him by various students.

President Beach offered the suggestion of adopting the Flat Board System of \$5.60 per week with tickets for extras which might better satisfy the students.

After an hour and a half of a rehearsal of conditions at the dining hall and discussion which led to nothing definite, it was voted to accept the report of the committee and await further developments in the board situation.

CHARLES LEWIS BEACH, President

DAIRY FOOD COUNCIL IS FORMED IN STATE

Will Instruct People as to Milk Food Value

Due to the efforts of the Extension Department of the College, a new organization, known as the Connecticut Dairy Food Council, has been formed in the state, during the week of March 2, 1920, to further the education of all Connecticut people in regard to the food value of milk and to its necessity and economy in the diet.

As stated in the by-laws its purpose is "To educate all Connecticut people both as to the exceptional food value of milk and its products, and as to their necessity and economy in the diet; to save the babies and make healthier men and women; to improve the quality of the milk supply; and to encourage the production in this state of an adequate supply of wholesome milk."

Each organization and institution supporting better health and economic conditions, and a sound agricultural development, especially dairying in the state of Connecticut, may appoint a delegate with voting power, to attend all meetings of the Council.

Organizations and institutions not represented at the organization meeting when approved by the Board of Directors may become members of the Council. It is hoped that every public welfare institution will be represented in this new council for it is only through their closest cooperation that any advancement can be made.

The officers as they now stand are: President, Mr. J. W. Alsop of Avon; Vice-President, Mr. C. J. Morris of New Haven; Secretary and Treasurer, Mr. H. J. Baker of Storrs. The directors are Mr. Thomas Holt of Newington, Mr. Howard Myers of Avon, Mr. W. M. Bryant of Hartford and Mr. Elijah Rogers of Southington.

Mr. Alsop represents the Connecticut Dairymen's Association; Mr. Morris the Milk Dealers; Mr. H. J. Baker, the College; Mr. Thomas Holt, the Dairy Food Commission; Mr. Howard Myers, the State Milk Producers' Association and Mr. Elijah Rogers, the Manufacturers' Association.

(Cont. from page 1 col. 1)

member of the Agricultural Club and has represented the college on various judging teams. He is a member of the Nutmeg Board and holds a commission as Captain in the cadet battalion.

William Maloney is one of the most prominent men of the Junior class. He is manager of the Nutmeg and the Blackguards, Vice-President of his class and a member of the social committee. He has figured in dramatics and belongs to Theta Alpha Phi.

Evington Osborn is President of the College Glee Club and holds a position on the Campus Board.

John C. Taylor, who was president of 1921 in his Sophomore year has figured in class activities and has served on many judging teams.

STRICKLAND GILLILAND NEW MODEL PREACHER

Makes Hearers Think Between the Laughs

While the Freshmen were carousing in Putnam and most of the Sophomores also were off the Hill, the third entertainment of the series was given in Hawley Armory Thursday, March 18. The program consisted of a humorous lecture or talk by Strickland Gilliland. The community had been looking forward to the coming of Mr. Gilliland and this "rambling, homely everyday man" was quite unique in his method of amusing the audience.

He opened his talk by clearing up all misunderstandings—assuring the audience that he was not there to have the people see and hear him but that he was sent us as an experiment on the elevating influence of educational institutions. It is to be regretted that the worthy Classes of '22 and '23 were not on hand to contribute their share of "influence."

Mr. Gilliland's string of amusing anecdotes and incidents kept the audience laughing and he lived up to his vow of "never bringing gloom." His lecture was not entirely of a joking character but he very effectively inserted "sermons between the laughs" where, as he said, they were more easily digested.

FOURTH ENTERTAINMENT PLEASES AUDIENCE

Local Children are Feature of Bill

Under the direction of the Social Committee, the fourth entertainment was presented Wednesday evening, March 24, in Hawley Armory.

Pietro Verdi Mordegla, popular piano-accordion player, opened the entertainment with operatic and popular ragtime selections.

Walter Eccles and Yarrick varied the musical program with impersonations and wand magic. In performing one of the magic feats Dorothy Wheeler and Arnold Lamson acted as impromptu assistants much to the amusement of the audience.

(Cont. from page 7 col. 1)

the Alumni will want to see how we are doing it at present.

The best events of the week have been scheduled for this last grand day. Beginning at ten o'clock in the morning, the College battalion will parade taking up most of the morning. The Junior Tree will be planted at two-thirty. The tablet to Gardner Dow will be dedicated immediately after. At three o'clock the big baseball game will be played. In the evening at eight, the Juniors put on their play. Dancing will follow.

With such a program for the day is there any reason that it should not be one of the most successful ever held? The whole class, every member, is working hard for its success. The cooperation of the entire college and every alumnus is however needed.

Here's to the success of the largest and best Alumni Day ever held at Connecticut!
