THE CONNECTICUT CAMPUS

VARSITY DEBATE WITH SPRINGFIELD APRIL 25

VOL. X

STORRS, CONNECTICUT, TUESDAY, APRIL 15, 1924

NO. 23

FRESHMEN DORMITORY APPROVED BY FACULTY

STORRS HALL FOR NEW MEN

Plan to go into Effect Next Fall.—
Mr. S. L. Daley Named Head Proctor.—Quiet Hours to be Enforced.

The special committee appointed by President C. L. Beach to investigate the question of dormitory conditions for freshmen next year, met on March 31, and approved plans for a freshman dormitory. The committee which was composed of Prof. G. H. Lamson, chairman, Dr. E. W. Sinnott, Prof. W. F. Kirkpatrick, Prof. G. S. Torrey and Prof. J. L. Hughes, presented the following recommendations:

1. That male freshmen who enter college during the next college year be placed in Storrs Hall.
 2. That all occupants of Storrs Hall should be reasonably quiet after 8 p.m. during each evening of the week except Saturday.
 3. That a proctor be placed in each section of Storrs Hall to maintain discipline.
 4. That a head proctor should room in one section and student proctors, preferably upperclassmen, should be placed in each of the three remaining sections.
 5. That the head proctor should be responsible for the maintenance of discipline in the dormitory.
 6. That each proctor should have his semester fees remitted to him for rendering responsible services.
 7. That the head proctor should be given a single room or suite, and have his room rent remitted.
 8. That each student proctor be given a first floor room and have with him one other roommate of his own choice.
 9. That the special committee suggest Mr. Daley as head proctor for Storrs Hall during the coming year.
 10. That the Student Senate nominate upper classmen, after conferring with the head proctor, the names of such students whom they judge would make desirable proctors for Storrs Hall during the college year. The Student Senate to report these names to the Senate Affairs Committee for their election of proctors.
 11. That the head proctor report such cases of insubordination to the Student Senate for discipline to be reported to the chairman of the Committee on Student Affairs.
- These recommendations were approved by the faculty at a meeting held on April 10, and will, in all probability, be effective with the opening of college next fall.

CO-ED WEEK ACTIVITIES TO FOLLOW VACATION

NO CHANGE IN EVENTS

Formal Dance and Play Scheduled for April 25 and 26.—Co-ed Campus the Following Week.

As the result of a health bulletin issued last week by President C. L. Beach, all social activities on the Hill have been cancelled until further notice. Although the scarlet fever epidemic is very mild, all precautions are being taken to prevent any spreading of the disease. It has therefore been necessary to change the dates of the Co-ed Formal and the Glee Club Operetta to the 25th and 26th of April. The Co-ed Campus will be published the following week.

In so far as possible the previously made plans will be followed. Isabella Modell, chairman of the Social Committee, reports no change in the arrangements for the Formal; the Easter decorative scheme will be used, and the Palais Royal Orchestra will furnish the music for the eighteen program dances.

Intensive practice for "Yokohama Maid" is being directed by Mrs. M. J. Farrell and Phyllis D. Smith. Every indication is that the presentation will be successful. Pauline M. Graf, chairman of the staging committee, has been able to obtain several real Japanese backgrounds which will add a great deal to the effect of the production.

Two members of the Co-ed Week Campus staff had some experience

(Cont. on page 8 col. 1)

"YOKOHAMA MAID" TO CONCLUDE CO-ED WEEK

GIRLS' GLEE CLUB CAST

Operetta and Chorus Nearing Perfection Under Coaching of Mrs. M. J. Farrell—Phyllis Smith in Charge of State Direction.—Tickets in the Book Store After Easter.

The Girls' Glee Club will present the two-act Japanese Operetta, "Yokohama Maid," as the concluding number of the annual Co-ed Week, in Hawley Armory, Saturday evening April 26.

The story of the operetta evolves about a young Japanese girl, O Sing-a-Song, and Fateddo, a cunning old mayor of a small province in Japan. At the beginning of the play, the terms of the girl's dead father's will are read, which decree that she be either willing to give herself in marriage to the mayor on her eighteenth birthday or forfeit her fortune. At the time of the reading of the will, O Sing-a-Song is sixteen. In order that the girl will be an accomplished and fitting bride for the sly old mayor, she is sent to America for two years. She returns, married to an American lawyer, who discovers a flaw in the will that she will not be forced to marry as her father has ordained. The part of O Sing-a-Song is successfully done by Margaret O'Brien; and the part of Fateddo, the mayor, by Hazel Pierpont, whose talent as an actress is well known.

The cast, composed of members of the Girls' Glee Club, is as follows:

(Cont. on page 3 col. 2)

SPEAKERS ANNOUNCED FOR COMING ASSEMBLIES

PROMINENT MEN LISTED

Schedule Includes Specialists in Agriculture, Religious Activities, and Journalism.

The speakers for the remaining assembly periods of the college year 1923-24 have been announced by Dr. H. K. Denlinger, chairman of the assembly committee, as follows.

On April 30, Kenneth McArthur of Cambridge, Mass., will address the student body. Mr. McArthur has recently returned from a six months' visit in Europe, where he has made a very thorough and complete study of agricultural conditions. He has also made in this country a special study of community agriculture, especially as it refers to a pioneer in Ohio.

On May 7, Dr. Davis, pastor of the largest Methodist church in New Britain will speak to the students. The faculty of the college have heard Dr. Davis and it is through their desire that he will be here. Dr. Davis is rated as one of the best pastors in the pulpits of Connecticut.

On May 14, another prominent man Jesse B. Davis, of Hartford, superintendent of all secondary schools throughout the state, will address the student body. Mr. Davis is a man known nationally in all problems pertaining to secondary education. He has much to do in shaping the policy of the school from which Connecticut draws its largest clientals.

May 21 is as yet an uncertain date; either Warren B. Wilson, of New York, or Heywood Broun, also of New York, will speak.

On the last assembly hour of the year Amos P. Wilder, editor of the New Haven Courier will address the students. Mr. Wilder is a prominent figure in journalistic circles in the state.

During this college year, through the efforts of Dr. Denlinger, the students had the privilege of hearing prominent men and noteworthy authors and lecturers speak at President's Hour. This privilege of the students was made possible through the efforts of Dr. Henry K. Denlinger, chairman of the assembly committee. Among the speakers who have already spoken are Thomas D. Curtin, Seyud Hassain, Clement Wood, Frank Tannenbaum, Dr. Rainsford and other prominent men. In order to please everyone, the chairman of the committee has occasionally had the services of the State College Players in presenting one-act plays. These were enjoyed tremendously by the students and

AGGIES DROP FIRST GAME OF SEASON TO HARD-HITTING BROWN UNIV. NINE

BROWN GATHERS 16 HITS

Brundage Fields Brilliantly.—Seymour Connects for Two Hits.—Trumbower of Brown Makes Five Hits in as Many Trips to the Plate—Score 18—2.

The Aggie ball-tossers journeyed to Providence last Saturday and clashed with the Brown University nine in the first game of the season only to meet with an 18—2 defeat at the hands of Brunoians. The Providence team developed unexpected strength with the willow and licked the Connecticut mound artists for sixteen hits. Connecticut was able to connect for six safeties, none of which went for extra bases.

Wells took the mound for Connecticut and lasted four innings, during which time seven Brown runners crossed the rubber. White then took up the burden and fared no better, allowing nine hits for a total of eleven runs. Connecticut was able to register in the eighth and ninth with a single counter in each inning.

Trumbower of Brown was the heavy hitter of the day and collected five blows in as many trips to the plate. Seymour connected for two safeties for the Blue and White with Wardle, Brundage, Emigh and Donahue each gathering one hit. Brundage fielded well and made several difficult catches in left field.

The score:

Connecticut										
	ab	r	h	po	a	e				
O'Brien, ss	3	0	0	2	4	1				
Ahern 3b	2	0	0	3	1	0

Welch, c	2	0	0	3	0	0				
Moriarty c	1	1	0	3	1	0				
Neubauer p	2	1	1	0	4	0				
Marth c	1	1	1	3	0	0				
Cornell, p	2	0	1	0	0	0				
Danzell p	0	1	0	0	0	0				
	43	18	16	27	10	0				

Hits off Newbauer 1 in 3 innings; off Cornell 1 in 3 innings; off Wells 8 in 4 innings; off White, 9 in 4 innings; off Danbell 3 in 3 innings; stolen bases Klump; two base hits, Dixon, Ruckstall, Cornell, Cutler, Trumbower 2.

ST. STEPHENS NEXT ON AGGIE SCHEDULE

Two Game Trip During Easter Recess
West Point Other Opponent

The second game of the season for the Aggies will be with St. Stephens at Aannandale on April 17. St. Stephens has several veterans back from last year's team but according to advances from that college, her pitching is weak. Following the St. Stephen's game, Coach Dole will take his team to West Point to play the Army nine on April 19.

For the Brown game the probable Aggie lineup will be O'Brien, short-stop; Balack, catch; A. Ahern, third base; Brundage, left field; White, right field or pitch; H. Ahern, second base; Nanfeldt, first base; Emigh, center field; Wells, pitch; Dickens, Donahue and Lawson will probably accompany the team. Dickens is a pitcher.

BASKETBALL AWARDS MADE AT ASSEMBLY

Varsity and Co-ed Teams Receive Letters.—Presentation by Dr. Denlinger.

Varsity basketball letters for 1923-24 varsity and co-ed teams were awarded Wednesday in President's Hour. Dr. Denlinger presented six letters to the girls and seven to the men. The following received awards:

Men

Wilbur Lawson, Manager, '24
Maxson Eddy, '25
Marshall Seymour, '26
William O'Brien, '25
Paul Bitgood, '26

DATES SET FOR RHODE ISLAND CO-ED MEET

May 23 and 24 are the dates decided upon for the Rhode Island track meet to be held at Kingston between the Connecticut and "Rhody" co-eds. Practice for track and baseball, under the supervision of Mr. Guyer, has begun in earnest, and as soon as the weather permits, tennis will be started.

The teams are planning to journey to Rhode Island on May 23, when the meet will probably be held, followed by a baseball game and tennis matches on May 24.

SCHEDULE ARRANGED FOR CO-ED SWIMMING

Plans for the interclass co-ed swimming meets were definitely made at a recent meeting of the Athletic Council. They will begin after the Easter recess under the following schedule.

April 29—

Freshmen vs. Sophomores

Juniors vs. Seniors

May 1—

Freshmen vs. Juniors

Sophomores vs. Seniors

May 6—

Freshmen vs. Seniors

Sophomores vs. Seniors

The meet will include the following events:

1 Long distance swimming 200 ft.

2 Short distance swimming 50 ft.

3 Distance under water

4 Back stroke 50 ft.

Diving (1 dive for form and skill)

There will be two places: First place counting 3 points; second place counting 1 point.

"What was all the racket in the barber shop?"

"Casty was trying to shave himself and trying to talk himself into a massage."—Adapted.

Late to bed

And early to rise,

Keeps the dear brothers

From wearing my ties.

—The Technique

KAMPUS KLIPS

Midnight

"Oft in the stilly night"

A boom, a jar,

My dreams go smash;

A distant crash,

A stifled moan;

I lie awake, alone.

A cannonade?

The fire brigade?

An earthquake's roar?

Or just the door?

I ponder 'til

I recollect

Another still.—Tech News.

A Rash Promise

The doctor sighed rather gravely.

"I am sorry to have to tell you,"

he said slowly, looking down at the

sick man in the bed, "that there can

be no doubt that you are suffering

from scarlet fever, and as doubtless

you know it is extremely contagious."

The patient slowly turned his head

upon the pillow and beckoned to his

roommate. Then in a faint voice he

said:

"If any of the fellows to whom I

owe money call, tell them that I at

last am in a position to give them

something."

Dr. Gumbart, in Ec. 3: "Now a

man with a large income going into

a hotel would buy a porterhouse steak

though it cost \$1.50. But now if I

were buying a steak, what would I

order?"

"Red" Thompson: "A hamburg."

Holdridge: "I adore you."

Co-ed: "How nice."

Holdridge: "I'd die for you."

Co-ed: "Will you prove that?"

Mah: "How many subjects are you carrying?"

Jong: "Carrying one and dogging seven."—Ex.

"Why does a fireman wear red suspenders?"

"Probably to keep up appearances."

Diemand: "Fat, why are you mailing all the empty envelopes?"

Edstrom: "I'm cutting classes in a correspondence school."

We wonder if the profs. finds is so hard to knock abstract facts into concrete heads because they use the wrong catayltic agent.

EGGSACTLY

The waitress, very much out of sorts, sailed haughtily up to the table at which sat the grouchy customer. She slammed down the cutlery, snatched a napkin from a pile and tossed it in front of him. Then striking a furious pose, she glared at him.

"Watcha want?" she snapped.

"Couple of eggs," growled the diner.

"How ya want 'em?"

"Just like you are."—Selected.

SENIOR GIRLS ASSIST IN COOKING SCHOOL

Women from the senior class in Home Economics assisted Miss Jeanette Kelly in the "Hartford Courant" Cooking School held last week in Footguard Hall, Hartford. Tuesday, Margaret Hall and Elizabeth Hamilton gave a demonstration of setting a luncheon table to illustrate Miss Kelly's lecture on luncheons. Wednesday Louise Ferriss and Marion Eggleston set a dinner table for a talk on cakes and unusual desserts. Thursday Hazel Palmer and Florence Teeter set a luncheon table for the talk on Sunday night suppers. Friday Isabella Moddell and Margaret Hall assisted in a talk and demonstration on bread.

Miss Kelly is from the Washburn-Crosby Flour Company and will give a demonstration here some time in May.

STORRS REPRESENTED AT MERIDEN CONFERENCE

Several Storrs people attended the annual meeting and conference of the Home Economics Association of Connecticut, held in the High School at Meriden, April 5. As a result of the election of officers for the coming year Mrs. Marion Dakin will take Miss Dorothy Buckley's place as president of the association. The speakers of the day included Miss I. MacDonald, extension nurse, who outlined her work in the state and gave recommendations for more hygiene in the schools and Miss Mildred Annan, who gave a demonstration in renovating old hats. Miss M. Lundberg and Miss E. Edmondson were among the Storrs representatives.

The present Honor Roll of the college bearing the date of April 12 has recently been issued by the Secretary. The list contains forty-two names, seventeen of which are in the first grade and twenty-five in the second grade. Seventeen freshmen appear on the Honor Roll, this being the first time that members of the Class of 1927 have been included.

AT OTHER COLLEGES

Invitations to attend the New England Co-educational Government Conference, have been forwarded by the Rhode Island State organization to every co-educational college in New England. The meeting which is the first of its kind will be held on April 25 and 26.

The Rhode Island Yearling Quintet lost to Brown's Yearlings in their final game of the season, 21-31.

A leap year dance, Rhody's annual Pan-Hellenic dance, was staged by their inter-sorority governing body.

The Swastika, yearbook of the New Mexico College of Agriculture and Mechanic Arts went to the press last week, which is an early date for its completion.

Committees have already been appointed and plans are under way at New Hampshire State for their annual clean-up day.

THE FRESHMAN DORMITORY

The faculty recently approved the recommendation of a special committee that Storrs Hall be used as a freshman dormitory for the coming college year. This recommendation included that student proctors be placed in every section, who together with a head proctor, would enforce quiet hours and perform similar duties.

This ruling, which will probably go into effect next fall, should be a distinct improvement over present conditions in that it will make for improved scholarship by giving the new men a better start on their college career. With a quiet period each evening, with the exception of Saturdays, freshmen will have an opportunity to study every evening and be free from all annoyance. In addition they will not be burdened with the "advice" of upperclass roommates which has been known to start many new men on the wrong path of scholarship.

Again, too, when a new man breaks a freshman rule he can receive the penalty for such infringement without the assumed protectorship of an upperclass roommate. Too often this guardianship has had disastrous results in the enforcement of freshman rules.

Viewed from every angle, the new plan has many advantages and unlimited possibilities which should better existing conditions on the Hill and aid in raising the scholarship of the members of the incoming class.

COLLEGE DAIRY WORK
ANALYZED BY COMMITTEE

PRACTICAL WORK SOUGHT

Need for Close Cooperation Between
Ag. Colleges and Ice Cream Industry Stressed.—Plans for Research Outlined.

Realizing the desirability of the closest cooperation between the Ice Cream Industry and our Agricultural Colleges, a committee was appointed to further such cooperation and to serve with a similar committee representing the Dairy Department and the Eastern Division of the American Dairy Science Association.

The work of the joint committee during the past year has been largely confined to a study and analysis of the work and services now rendered by our Colleges and Experiment Stations so as to be in a position:

1. To make constructive suggestions for improvement. (2) To suggest to the Association how the services now offered by the Colleges may be more fully utilized by our members:

Report of the work of the Committee during the year may be classified as follows:

Research Problems and Methods of Solving Them:

The importance and need of systematic and careful investigation work is recognized by the committee. There are constantly arising problems in the manufacture of our product which can only be solved by careful research and experimental work in the fundamental sciences. Such research work requires men thoroughly trained not only in the fundamental sciences but who have a broad and thorough understanding of the practical ice cream field as well. The committee believes that the Dairy Department of our Colleges, in view of their position, personnel and equipment, are the logical agents to whom the Association should look for this much needed experimental work.

The committee further wishes to emphasize the need of the closest cooperation of the Association in such experimental work by:

1. Bringing to the attention of the Colleges the problems that need investigation.

2. Rendering such support as is possible in working out the problem.

3. Supporting the Dairy Department in securing budgets for such research work.

Training of Students in Regular Four Year Courses to Meet the Needs of the Industry.

Complete outlines and description of ice cream courses were submitted by the Connecticut, Massachusetts, New Hampshire and Vermont Colleges. The committee believes that these courses as given render valuable service by making available to the industry men who have been trained in the fundamental sciences and principles underlying the manufacture of ice cream. It goes without question that the manufacture of ice cream is more and more coming to be based on scientific principles and a man of

the proper attitude and calibre with an understanding of these scientific principles, will certainly be a much better and more valuable man in the industry. However, College men with a four year course, frequently lack practical experience and contact with the commercial factory. The committee therefore believes it very essential that these men be required to work at least one summer between their study courses in a commercial ice cream factory and has so recommended to the College Committee.

The committee believes that the college dairy teacher is doing his best to impress upon the student that upon graduation he has simply mastered the fundamentals to help him succeed and that hard work is the practical school of experience and is absolutely necessary. What a man does when he starts to work in the industry depends largely upon certain traits born in the man or so thoroughly cultivated in him that no college on earth could change him.

We believe, therefore, that the industry must not expect all college men to make good and that the failure of certain ones to make good should not result in the condemnation of college men in general.

Short Time Courses for the Men Engaged in the Ice Cream Industry

Connecticut and Massachusetts are now offering two weeks ice cream courses during the winter for practical men. The committee wishes to go on record as highly recommending these courses for practical men who desire a better understanding of the more technical points of ice cream making. It believes that all ice cream companies can well afford to send one or more of its plant men to attend these courses.

There is, however, in the opinion of the committee, need for a longer short course of at least ten weeks in which the work should include thorough training in testing, handling and care of dairy products as well as the fundamentals of ice cream manufacture proper.

Educational Ice Cream Scorings

In the opinion of the committee, the ice cream scorings held by the Connecticut and Massachusetts Colleges during the past year have a distinct educational value. It is the conviction of the committee, however, that these scorings should remain strictly educational and in view of these facts, recommends that the Colleges continue these scorings but send the scores and criticisms of each sample to the firm submitting that particular sample. It is further the opinion of the committee that the educational value of these scorings could be materially increased if the firms sending in the samples would be present in person and score the different samples with the judges. The suggestion is made, therefore, that such educational scorings be held in connection with sectional meetings of the Association, scorings to be in charge of the State College of the State in which the meeting is held.

Future Plan of Work of the Committee

At a recent conference of the joint
(Cont. on page 8 col. 1)

COLLEGE LAND ALLOTTED
FOR DEPARTMENTAL USE

AREAS FOR EXPERIMENT

Farm Now Comprising 1167 Acres—
Serves as Outdoor Laboratory—
Original Farm of 170 Acres Gift
of Charles Storrs.

A recent survey has been made of the farm and the area classified as tilled land, tillable land, non-tillable land, swamp land, and land used for administrative purposes.

The acreage assigned to the several departments is as follows: Farm Department, 512 acres; Forestry, 203; Dairy, 123; Grounds, 123; Pomology, 79; Vegetable Gardening, 38; Poultry, 18; Other Departments, 71; Sheep Farm, 190; Gilbert Farm, 240; Total, 1597 acres.

For convenience and economy in management, the land assigned to each department is, in so far as possible, in a single block or section. In a general way, the land west of the north road to Eagleville and the road to Gurleyville has been assigned to the farm, dairy, and poultry departments; and land lying south of the Willimantic highway and between the north and south roads to Eagleville has been assigned to the horticultural, vegetable gardening, and grounds departments and to the experiment station; the land north of the Willimantic highway and east of the road to Gurleyville has been reserved for future building sites for faculty cottages and fraternity houses. A parcel in this section will, no doubt, be needed as a site for a future Storrs Grammar School and play ground.

The original gift of land to the College by Charles Storrs in 1881 consisted of a farm of about 170 acres. At the present time, the farm consists of a tract of land about two miles long by one mile wide with a total area of 1167 acres not including the sheep farm of 190 acres at Spring Hill and the Gilbert Farm of 240 acres at Georgetown, Conn.

A farm connected with an agricultural college is essentially an out-door laboratory. The orchard, vegetable gardens, and fields are used for illustration, demonstration, and experimental purposes. The campus furnishes facilities for instruction in landscape gardens, floriculture, and road-making, and the woodland for demonstrations in forestry.

"The Magistrate," a three act force by Arthur Pinero, has been chosen by the Junior Week Play Committee as the junior class dramatic production for Junior Week.

The play is an old English story, presenting many clever situations, good dialogue, and good characterization. It is one of Pinero's most successful plays, ranking with "The Amazons," another play produced by the same writer. The first try-outs were held in Holcomb Hall Friday afternoon, at which the girls parts were filled. Try-outs for the men will be held in the very near future.

ADDRESS CLOSES TWO YEAR GRADUATION

Pres. R. D. Hetzel, University of New Hampshire, Speaker for the Occasion.

In his optimistic address to the graduating class of the School of Agriculture on graduation day, April 12, Pres. R. D. Hetzel of the University of New Hampshire voiced a bright and serviceable future to the men who are leaving the college. He stated, in short, that the graduating members should feel fortunate to be trained in this atmosphere of remarkable opportunities, and that he was glad that his college could be associated with this institution in the work which the land-grant colleges were trying to accomplish.

Mr. Hetzel in his opening remarks reminded the graduates of the degree of devotion and sacrifice which others have contributed before them, and asked them to try to sense the responsibility which they were now to assume. "If there is salvation it must come through these democratic, scientific institutions of learning," Mr. Hetzel stated. "Youth is cheerful, boyish, and sees not the task it must perform. Authorities seem to be fearful and alarmed, and in a measure this has shaken the confidence of parents and teachers. But youth is unafraid," said Mr. Hetzel, "and is meeting life with an attitude which is to be admired."

"Prophets and people of learning state that the world travels in cycles. At the present time, we are on a decline of civilization," said Mr. Hetzel. "Our civilization is fast becoming complicated and at the same time we are getting enormously wealthy. If we look at our wealth in figures, we are amazed to see our present worth valued at 320 billion dollars, when in 1900 we were worth only 188 billion. At the same time concentration, mostly at the foot of the ladder, so to speak, has increased to such an extent that, when the intelligence tests were taken in the army in the World War 70 percent of the youth showed a mental capacity of a person of 15 years of age." That this condition is most alarming, because it shows that concentration is burning up the verity of the nation, was the opinion expressed by the speaker.

In spite of this condition Mr. Hetzel expressed a real optimism, that the present day college man could and would cope with the situation in the future, for, he said, "These college men," (referring to the graduates) "are scientifically trained. Science," he said, "is a process by which we seek truth. If we can make the youth of today shoulder a scientific attitude, there is no cause to worry."

"These men graduating have acquired this equipment, and also have opportunities that the other youth of the nation cannot obtain. The New England states hold for you today the same romance of which the West used to boast. Your opportunities lie here. Grasp and master them, for the city looks to the country not only for

CAMPUS PHILOSOPHER

The C. P., having exhausted his fertile intellect in studying and washing dishes, decided to ask some of his friends to help out on the column for this week. He asked especially that care be taken not to rap the co-eds.

Historic Spots for Storrs Hikers

A Campus reporter dug up the following material from sundry, bulky and moth-eaten volumes in the college library, under the guidance of the librarian, and lays before the general public a few facts which may be of interest from a historical standpoint, to all those who carry about a thirst for historical associations and traditions on their Sunday afternoon hikes around the vicinity of Storrs.

In "The Storrs Family," a history of this famous family, we gather that "Mansfield was originally a part of the Township of Windham, Conn., a tract of land which was given in 1675 by Joseph, Chief of the Mohicans, to Captain John Mason and others." In the cemetery at Mansfield Center lies buried Samuel Storrs, and his two sons, Samuel and Thomas. Cordial Storrs, the other son, is buried in the little cemetery opposite the Dairy Building. They were some of the earliest settlers in this region, Samuel Storrs, Sr., being the progenitor of the Storrs family in America. He was the fourth son of Thomas and Mary Storrs of Lutton-cum-lound, Nottinghamshire, England, and born about 1640. In 1663 he came to Barnstable, Mass., and from there came to Mansfield.

The first church in Mansfield was organized in 1710. Rev. Eleazer Williams was the first settled pastor. He escaped captivity when his father's house at Deerfield, Mass., was taken by the Indians, by being away from home attending to his studies. Eunice, a child of seven, was carried off and adopted by the savages. She later married an Indian. It is said that she visited her brother at Mansfield Center one Sabbath to hear him preach but her husband, unwilling to enter the church, lay outside on the grass until the service was completed.

Rev. Williams' house, probably the oldest in Mansfield, is still standing. It is 204 years old, having been built in 1720. It is on the main road to Willimantic and will be readily pointed out by any of the inhabitants. He is buried in the old town cemetery.

The old Mansfield Center cemetery is perhaps one of the most interesting in the vicinity, but there are many others within a comparatively short distance that should be visited for the reading of the epitaphs alone. Besides the two here at Storrs, there is one on the road to Gurleyville; another is the so-called Pink Cemetery near the "glen". There is also an Indian cemetery on Bald Hill on the Eagleville road.

The first silk mill on the continent was established about 1760 by Rodney and Horace Hanks at Hanks Hill and the old structure is still there. Evidences of this old industry can still be found in the old mulberry trees scattering the neighborhood.

The first buzz saw was made in Mansfield Center while the first fine tooth comb also claims this town as its birthplace. The inventor of the buzz saw was Daniel Hartshorn, who, with Nathan Palmer, also invented the first screw auger. Horace Hanks invented the double wheelhead for spin-

ning silk. Bells and cannon were cast in the town at an early date and are said to be the first manufactured in the country. Clocks, steelyards and surgical instruments were manufactured at an early date in the history of the town. So we might safely say that Gurleyville is "on the map", at least, historically.

In the neighboring town of South Coventry, Nathan Hale was born. The house of his birth is an excellent destination for a hike. It is off the main road and inquiries should be made as to its location.

Austin G. Dunham, who donated the money for our pool, was born in South Coventry. His old residence is on the main road to Hartford. (It is interesting to note that there is a book now available in the library containing his reminiscences.)

Also the gambrel-roofed house of Mr. Dunham's great grandfather, Judge Jesse Root, is still standing in South Coventry. Judge Root's services as lawyer, judge, soldier, and court reporter covered nearly 60 years of the early history of Hartford and Connecticut. When the Revolutionary war broke out he was one of the group of men who made arrangements for the capture of Fort Ticonderoga. In 1777 he joined Washington's army as lieutenant colonel. The next year he went as delegate to Congress where he remained four years.

At Four Corners, Fuller's Tavern, a stage coach stop on the Boston Turnpike, is situated on the northwesterly side of the Corners. The ell of the house opposite is the old toll-house, which originally stood about half-way to the Springfield road on foundation stones which are still to be seen. On the summit of the next hill to the east may be seen one of the old millstones telling off twenty-three miles from Hartford Courthouse. It is said that General Washington on his trips to Boston stopped at the house now owned by Mr. Brown.

Farther east, where the turnpike crosses the Fenton River, is the old Mason Hill where an oldtime cart is yet occasionally turned out. The old up-and-down "saw" is still in use, a relic of the days before circular saws were known.

It is a queer coincidence that this old mill should be using an antiquated saw when only a few miles south the first buzz saw in the country was made.

Thus, there are many little spots of interest, besides the purely scenic ones, that may be visited in and about Storrs.

Four purebred Shorthorn cows have been entered by the College Farm Department to be sold at the sixth annual congress of Shorthorn breeders to be held in connection with the annual congress sale of Shorthorn cattle at Batavia, New York, April 11 and 12.

Professor H. L. Garrigus of the Animal Husbandry Department at C. A. C. is attending the sale and congress.

BEE SPECIALIST AT MEETING OF AG CLUB

TALKS ON HONEY BEE

Interesting Facts in Life of the Honey Insect Told by Experienced Apiarist.—Business Meeting Followed

Allan Latham of Norwichtown, addressed the Ag Club on the subject, "Life Habits of the Honey Bee," Thursday evening in Main 7. The speaker is the president of the Connecticut Bee Association, a man of forty years experience in bee keeping, a Harvard graduate, and a retired teacher of science.

Mr. Latham began his talk by telling of the complex structure of the bee, stating that its structure is much more complex than that of the human body. "Unlike any other living thing the honey bee doesn't have to learn much after it begins life, they come to earth knowing all—like college students," said the speaker. "However, there are things which they must learn. At first they must learn how to get the honey, and also acquaint themselves with their surroundings." Before proceeding further, the speaker described the different kinds of bees. "If you want to have some fun with the bees, and not get stung, you must understand the different structures of the bees," said the speaker. "The worker bee has straight antennae, and is the one which stings, but the drone, which has curved antennae, doesn't sting."

Interesting facts about the honey bee were given by Mr. Latham. "A bee circulates the air thru the beehive by quick motion of its wings. A bee flies at the rate of half a mile a minute, it can reproduce itself 1,500 in five days, hold two-hundred times its weight in air by one leg, and build its own home from the wax which it manufactures."

Mr. Latham used to write articles on the evolution of bees, but because his views didn't coincide with those of the book of Genesis—they were not all published. In conclusion the speaker answered numerous questions about the subject.

A regular business meeting followed the talk, and the High School Judging Contest was discussed. It was decided that the judging will take place on May 24. Sixteen schools are invited to participate, and five men are asked to represent each school. Each of the five men will judge in one of the following: dairy cattle, farm management, poultry, field crops and animal husbandry. The Woodford Cup will be presented to the winning team, and later a banquet will be held to which many outside speakers have been invited.

Soph.: "Are you taking anyone to the Prom?"

Frosh: "Nope, I'd rather go to Europe this summer."

Room: "Who gave you that black eye?"

Mate: "Nobody gives me anything. I fought for it."—Red and Black.

Professor Irving Fisher, of Yale University, gave a talk before the Rutgers College Chapel on the subject: "What is the relation of America to World Peace."

Recently a straw vote was held at Yale University on the Volstead Act. Only 655 from a total of 2,272 were in favor of the law.

Donahue: "What kind of a fellow is Radinsky?"

Balock: "He's the kind of a fellow that when there is a piano to be moved he grabs the stool."

EDMUND HALLEY
1656 1742

Son of a London soap-boiler who became Astronomer-Royal. At the age of 20 headed an expedition to chart the stars of the Southern hemisphere. Financed and handled the printing of Newton's immortal *Principia*.

As spectacular as a comet has been the world's electrical development. By continuous scientific research the General Electric Company has accelerated this development and has become a leader in the industry.

PATRONIZE OUR ADVERTISERS

The comet came back

The great comet that was seen by William of Normandy returned to our skies in 1910 on its eleventh visit since the Conquest. Astronomers knew when it would appear, and the exact spot in the sky where it would first be visible.

Edmund Halley's mathematical calculation of the great orbit of this 76-year visitor—his scientific proof that comets are part of our solar system—was a brilliant application of the then unpublished *Principia* of his friend Sir Isaac Newton.

The laws of motion that Newton and Halley proved to govern the movements of a comet are used by scientists in the Research Laboratories of the General Electric Company to determine the orbit of electrons in vacuum tubes.

GENERAL ELECTRIC

Miss M. E. Sprague, who has been ill at her home in Templeton, Mass., for three weeks, returned to Storrs, Tuesday and has resumed her work.

(Cont. from page 1 col. 2)

will be ready to take over the job for last week in setting up the sheet. They the Co-ed publication. Judging from the spirit shown by those working into the various positions, the girls aim to put out a "live" Campus, despite the shift in plans.

(Cont. from page 4 clo. 3)

committee, plans were laid for constructive and active work along the principles outlined above. These plans call for:

1. A survey by each committee of the research problems in manufacturing which are in need of being worked out.

2. The results of this survey will be turned over to the College Committee, who will study which Institution, because of its personnel and equipment, is best adapted towards doing research work on any one problem suggested.

3. A survey by each committee to find out if the college can render any service to the industry thru its extension forces by making more fully available any facts concerning problems on which they have some knowledge. This work might be done by personal visits, correspondence or thru the distribution of pamphlets.

4. A study and survey by each committee as to ways and means by which the Colleges can improve the training of their students as to duration and time of courses and subject material of courses; and can more fully serve the industry.

5. Working out a cooperative plan of providing employment for dairy students for the purpose of gaining practical experience and contact with the commercial factory. The plan calls for a close follow-up of the students by the Colleges by means of monthly reports on progress of students.

A joint committee representing the American Dairy Science Association and the Ice Cream Manufacturers Association respectively drew up and submitted the above recommendations and conclusions. Professor R. C. Fisher, of the Local Dairy department is chairman of the committee representing the colleges and G. C. Platt, General Manager of the New Haven Dairy Company is chairman of the latter committee. Other members of these committees are Harry Tait, President of Tait Brothers Ice Cream Company and Professor Judkins of the Mass. Aggie Dairy Department.

(Cont. from page 1 col. 4)

aroused more interest among the students in the Little Theatre Movement which Prof. Howard A. Seckerson, head of the English Department, is very successfully planting throughout the state. Among the plays given by the State College players are "He" by Eugene O'Neill, and "Suppressed Desires."

SPRINGFIELD AGGIE DEBATE APRIL 25

Date Conflicts with Co-ed Formal.—
Will Probably be Held in Storrs Church.

The Springfield College-Connecticut debate will take place on Friday evening, April 25, probably in the Storrs Church, according to plans recently made public by Manager Lawrence Loeb.

The date decided upon conflicts with the Co-ed Formal, but the management states that it is the only time available. Connecticut will be represented by John Balock, captain, Malcolm Stevenson, E. R. Mintz, and L. R. Belden, alternate. The subject for discussion is "Resolved, That the United States enter the World Court According to the Hughes Reservation." Connecticut will uphold the negative side. The judges will be Mr. H. A. Noble of Willimantic and one professor from each of the two colleges.

MARKETING CLASS ON SHORT FIELD TRIP

Fourteen members of the marketing class visited warehouses and the Hartford office of the Connecticut Valley Tobacco Association on a field trip to Hartford last Wednesday.

A warehouse in East Hartford and another at Buckland were inspected by the class in the morning under the personal direction of Judge Levi Hickey, field secretary of the Association. During the afternoon the class went through the Hartford office of the Association and were told of the working organization of the Association by its president, J. W. Alsop, who gave considerable of his time to the class in explaining the various details of the organization.

FABRIC DRYING METHODS DEMONSTRATED TO CO-EDS

A very interesting demonstration of the process of drying was given by Miss Otto, a representative of the Putnam Fadeless Dyes, in Holcomb Hall on Wednesday afternoon. Miss Otto first gave a preliminary talk, in which she emphasized the many advantages of a dye which could be used alike for every type of fabric. Her many samples proved very valuable in illustrating the points of her lecture. The actual demonstration consisted of color blending, the popular tie dying, and tinting in feathers as well as in materials. All the work was done in the laboratory where the audience was able to observe and ask questions.
