Title: Research Studies Relevant to the *Musical Aptitude Profile*: A Bibliography

Author(s): Stanley L. Schleuter

Source: Schleuter, S. L. (1991, Spring & Summer). Research studies relevant to the music aptitude profile: A bibliography. *The Quarterly*, 2(1-2), pp. 78-85. (Reprinted with permission in *Visions of Research in Music Education*, 16(2), Autumn, 2010). Retrieved from <http://www-usr.rider.edu/~vrme>

Visions of Research in Music Education is a fully refereed critical journal appearing exclusively on the Internet. Its publication is offered as a public service to the profession by the New Jersey Music Educators Association, the state affiliate of MENC: The National Association for Music Education. The publication of VRME is made possible through the facilities of Westminster Choir College of Rider University Princeton, New Jersey. Frank Abrahams is the senior editor. Jason D. Vodicka is editor of the *Quarterly* historical reprint series. Chad Keilman is the production coordinator. The *Quarterly Journal of Music Teaching and Learning* is reprinted with permission of Richard Colwell, who was senior consulting editor of the original series.

Research Studies Relevant to the *Musical Aptitude Profile*: A Bibliography

By Stanley L. Schleuter

Indiana University

Since Houghton-Mifflin published the *Musical Aptitude Profile* by Edwin Gordon in 1965, no other standardized music test has received as much attention and use by music education researchers. The test itself has been the subject of a number of research studies, and it has served as an independent or control variable in many others. Ninety-nine of the 183 listings below are dissertations or theses representing research efforts by students from most of the major doctoral granting schools in this country.

The bibliographic entries which follow are restricted to research studies conducted between 1965 and 1991 which include a portion of or the entire *Musical Aptitude Profile* in the methodology. Dissertations and their corresponding journal publication are both listed when known. Although efforts were made to be as inclusive as possible, I apologize for the inevitable omissions.

Leonardo Music Journal

The editors of *Leonardo* are pleased to announce the launch of the new *Leonardo Music Journal* and Compact Disc Series. This new journal will address all aspects of the use of contemporary science and technology in music and multimedia art forms which include sound. Each issue will include a compact disc containing contemporary music; the composers themselves will discuss their goals and techniques in the journal. A distinguished international Editorial Board is responsible for editorial direction and quality, and all articles are peer reviewed.

For more information, contact the International Society for the Arts, Sciences and Technology, 1442A Walnut Street, #75, Berkeley, CA 94709; phone (415) 845-6311.
